**INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF
ALLIANZ SAUDI FRANSI COOPERATIVE INSURANCE COMPANY
(A SAUDI JOINT STOCK COMPANY)**

Scope of audit:

We have audited the accompanying statement of financial position of Allianz Saudi Fransi Cooperative Insurance Company (A Saudi Joint Stock Company) (the "Company") as at 31 December 2013 and the related statements of income and comprehensive income of insurance operations and shareholders' operations, statement of changes in shareholders' equity and statements of cash flows of insurance operations and shareholders' operations for the year then ended and the related notes which form an integral part of these financial statements. These financial statements are the responsibility of the Company's management and have been prepared by them in accordance with International Financial Reporting Standards and the provisions of Article 123 of the Regulations for Companies and submitted to us together with all the information and explanations which we required. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the Kingdom of Saudi Arabia. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable degree of assurance to enable us to express an opinion on the financial statements.

Unqualified opinion:

In our opinion, the financial statements taken as a whole:

- i) present fairly, in all material respects, the financial position of the Company as at 31 December 2013 and the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards; and
- ii) comply with the requirements of the Regulations for Companies and the Company's By-laws in so far as they affect the preparation and presentation of the financial statements.

Emphasis of a matter:

We draw attention to the fact that these financial statements are prepared in accordance with International Financial Reporting Standards and not in accordance with accounting standards generally accepted in the Kingdom of Saudi Arabia as issued by the Saudi Organization for Certified Public Accountants.

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2013

1 ORGANIZATION AND PRINCIPAL ACTIVITIES

Allianz Saudi Fransi Cooperative Insurance Company ('the Company') is a Saudi Joint Stock Company registered in the Kingdom of Saudi Arabia under commercial registration number 1010235601 dated 26 Jumada Thani 1428H corresponding to 12 July 2007. The Company has been licensed to conduct cooperative insurance business in the Kingdom of Saudi Arabia under cooperative principles in accordance with Royal Decree number 60/M dated 18 Ramadan 1427H (corresponding to 11 October 2006), pursuant to Council of Ministers resolution number 233 dated 16 Ramadan 1427H (corresponding to 9 October 2006). The Company operates through its 5 branches (2012: 5) in the Kingdom of Saudi Arabia. The registered office of the Company is located at Al Safwa Commercial Building, P O Box 3540, Riyadh 11481, Kingdom of Saudi Arabia.

The objectives of the Company are to transact cooperative insurance operations and related activities in the Kingdom of Saudi Arabia. The Company was listed on the Saudi stock exchange on 9 Rajab 1428H, corresponding to 23 July 2007.

2 BASIS OF PREPARATION

Basis of measurement

The financial statements are prepared under the historical cost convention except for the measurement at fair value of financial assets and liabilities held at Fair Value through Income Statement (FVIS) investments and Available For Sale (AFS) investments.

Statement of compliance

The Company has prepared these financial statements in accordance with International Financial Reporting Standards (IFRS).

Basis of presentation

The Company's Articles of Association require that separate accounts be maintained for Insurance and Shareholders' operations. Income and expenses clearly attributable to either activity are recorded in the respective accounts. The basis of allocation of expenses from joint operations is determined by management and the Board of Directors.

In accordance with the Saudi Arabian Insurance Regulations, the Company is required to distribute 10% of net annual surplus from insurance operations to policy holder operations and remaining 90% of the surplus to be transferred to the shareholders' operation and losses to be borne by shareholders.

Functional and presentational currency

The functional and presentational currency of the Company is Saudi Riyals (SR). The financial statement values are presented in Saudi Riyals, unless otherwise indicated.

NOTES TO THE FINANCIAL STATEMENTS (continued)

At 31 December 2013

3 NEW STANDARDS ISSUED

The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the preparation of the Company's annual financial statements for the year ended 31 December 2012 except for the adoption of following amendments and revisions to existing standards mentioned below which has had no financial impact on the financial statements of the Company.

IFRS 13 Fair Value Measurement

IFRS 13 establishes a single source of guidance under IFRS for all fair value measurements. IFRS 13 does not change when an entity is required to use fair value, but rather provides guidance on how to measure fair value under IFRS. IFRS 13 defines fair value as an exit price. As a result of the guidance in IFRS 13, the Company re-assessed its policies for measuring fair values, in particular, its valuation inputs such as non-performance risk for fair value measurement of liabilities. IFRS 13 also requires additional disclosures.

Application of IFRS 13 has not materially impacted the fair value measurements of the Company. Additional disclosures where required, are provided in the individual notes relating to the assets and liabilities whose fair values were determined. Fair value hierarchy is provided in Note 14.

IAS 1 Presentation of Items of Other Comprehensive Income – Amendments to IAS 1

The amendments to IAS 1 introduce a grouping of items presented in OCI. Items that will be reclassified ('recycled') to profit or loss at a future point in time (e.g., net loss or gain on AFS financial assets) have to be presented separately from items that will not be reclassified (e.g., revaluation of land and buildings). The amendments affect presentation only and have no impact on the Company's financial position or performance.

IAS 1 Clarification of the requirement for comparative information (Amendment)

These amendments clarify the difference between voluntary additional comparative information and the minimum required comparative information. An entity must include comparative information in the related notes to the financial statements when it voluntarily provides comparative information beyond the minimum required comparative period. The amendments clarify that the opening statement of financial position (as at 1 January 2012 in the case of the Company), presented as a result of retrospective restatement or reclassification of items in financial statements does not have to be accompanied by comparative information in the related notes. As a result, the Company has not included comparative information in respect of the opening statement of financial position as at 1 January 2012. The amendments affect presentation only and have no impact on the Company's financial position or performance.

4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies adopted are as follows:

Equipment, furniture and vehicles

Equipment, furniture and vehicles are stated at cost net of accumulated depreciation and any impairment in value. When significant parts of office equipment and furniture are required to be replaced at intervals, the Company recognises such parts as individual assets with specific useful lives and depreciates them accordingly. All other repair and maintenance costs are recognised in statement of income as incurred. The cost of equipment, furniture and vehicles is depreciated and amortised on the straight-line method over the estimated useful lives of the assets as follows:

- Computer and office equipment	4 years
- Motor vehicles	4 years
- Furniture and fittings	7 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each reporting date. The carrying values of these assets are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable. If any such indication exists and where the carrying values exceed the estimated recoverable amount, the assets are written down to their recoverable amount.

4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Insurance contracts

Insurance contracts are those contracts when the Company (the insurer) has accepted significant insurance risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholders. As a general guideline, the Company determines whether it has significant insurance risk, by comparing benefits paid with benefits payable if the insured event did not occur. Insurance contracts can also transfer financial risk.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during this period, unless all rights and obligations are extinguished or expire. Investment contracts can, however, be reclassified as insurance contracts after inception if insurance risk becomes significant.

Insurance contracts with discretionary participation feature (DPF)

Insurance contracts have discretionary participation features (DPF). DPF are contractual rights to receive, as a supplement to guaranteed benefits, additional benefits that are:

- likely to be a significant portion of the total contractual benefits;
- whose amount or timing is contractually at the discretion of the issuer; and
- that are contractually based on the
 - performance of a specified pool of contracts or a specified type of contract
 - the profit or loss of the insurance operation.

The Company classifies the discretionary element of a contract with a DPF as a liability.

Reinsurance

The Company cedes insurance risk in the normal course of business for a portion of its businesses. Reinsurance assets represent balances due from reinsurance companies. Recoverable amounts are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contract.

An impairment review is performed at each reporting date or more frequently when an indication of impairment arises during the reporting period. Impairment occurs when objective evidence exists that the Company may not recover outstanding amounts under the terms of the contract and when the impact on the amounts that the Company will receive from the reinsurer can be measured reliably. The impairment loss is recorded in statement of income of insurance operations. Ceded reinsurance arrangements do not relieve the Company from its obligations to policyholders.

Reinsurance liabilities represent balances due to reinsurance companies. Amounts payable are estimated in a manner consistent with the associated reinsurance contract. Reinsurance assets or liabilities are derecognised when the contractual rights are extinguished or expire or when the contract is transferred to another party.

Gains or losses on buying reinsurance are recognised in the statement of income of insurance operations immediately at the date of purchase and are not amortised.

The Company also assumes reinsurance risk in the normal course of business for insurance contracts where applicable. Premiums and claims on assumed reinsurance are recognised as revenue or expenses in the same manner as they would be if the reinsurance were considered direct business, taking into account the product classification of the reinsured business. Reinsurance liabilities represent balances due to reinsurance companies. Amounts payable are estimated in a manner consistent with the related reinsurance contract.

Premiums and claims are presented on a gross basis for both ceded and assumed reinsurance.

Reinsurance assets or liabilities are derecognised when the contractual rights are extinguished or expire or when the contract is transferred to another party.

4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Investments

All investments, excluding those held at fair value through profit and loss, are initially recognized at fair value including the transaction cost associated with the investment. Investment carried at fair value through profit or loss are initially recognised at fair value and transaction costs are expensed in the statement of income.

Following initial recognition of the various classes of investment securities, the subsequent period end reporting values are determined on the basis as set out in the following paragraphs:

i. Investment at fair value through income statement

Investments held to cover unit-linked liabilities represents investment associated with certain contracts, for which investment risk lies predominantly with the contract holder. These represent investment in units of mutual funds, which are readily marketable. Investment linked insurance contracts appearing in statement of income of insurance operations financial position, are financial assets classified at fair value through income statement (FVIS). After initial recognition, such investment is measured at fair value and change in the fair value is recognized in the Statement of income of insurance operations together with the changes in the mathematical reserve for investment linked insurance contracts.

ii. Held to maturity

Investments which have fixed or determinable payments and fixed maturities that the Company has the positive intention and ability to hold till maturity, are classified as held to maturity. Held to maturity investments are subsequently measured at amortized cost using the effective interest method, less provision for impairment in value. Amortized cost is calculated by taking into account any discount or premium on acquisition. Any gain or loss on such investments is recognized in the statement of shareholders' operations when the investment is derecognized or any loss when the investment is impaired.

iii. Available for sale

Available-for-sale investments are those equity and debt securities which are neither classified as Held For Trading nor designated as FVIS, that are intended to be held for an unspecified period of time, which may be sold in response to changes in market conditions. Unrealised gains or losses arising from changes in fair value of investments are shown either in statement of comprehensive income of shareholder's operations or as a separate component in the insurance operations' surplus. Realized gains or losses on sale of these investments and commission income are reported in the related statements of insurance operations or shareholder's operations. Any permanent decline in value of investments is adjusted for and reported in the related statement of income -insurance operations or shareholders operations, as impairment charges.

Premiums receivable

Premiums receivable are recognized when the policies are issued. The carrying value of premiums receivable is reviewed for impairment whenever events or circumstances indicate that the carrying amount may not be recoverable, with the impairment loss recorded in the statement of income of insurance operations. Premiums receivable are derecognized when the derecognition criteria for financial assets have been met.

Cash and cash equivalents

Cash and cash equivalents comprise cash in hand, bank current accounts and time deposits with an original maturity of three months or less at the date of original acquisition.

Provisions

Provisions are recognized when the Company has an obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Liability adequacy test

At each financial position date, the Company assesses whether its recognised insurance liabilities are adequate using current estimates of future cash flows under its insurance contracts. If that assessment shows that the carrying amount of its insurance liabilities (less related deferred policy acquisition costs) is inadequate in the light of estimated future cash flows, the entire deficiency is immediately recognised in the statement of income of insurance operations and an unexpired risk provision created. The Company does not discount its liability for unpaid claims as substantially all claims are expected to be paid within one year of the statement of financial position date.

4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Employee end of service benefits

Employees' end of service benefits are accrued currently and are payable as a lump sum to all employees under the term and conditions of Saudi labour regulations on termination of their employment contracts. The liability is calculated as the current value of the vested benefits to which the employee is entitled should the employee leave at the statement of financial position date. End-of-service payments are based on employees' final salaries and allowances and their cumulative years of service, as defined by the conditions stated in the laws of Kingdom of Saudi Arabia.

Revenue recognition

Retained premiums and commission income, which relate to unexpired risks beyond the end of the financial period, are reported as unearned and deferred based on the following methods:

- Last three months from the period in respect of marine cargo;
- Actual number of days for other lines of business and
- Pre-defined calculation for Engineering class of business for risks undertaken that extend beyond a single year. In accordance with this calculation, lower premiums are earned in the first year which gradually increase towards the end of the tenure of the policy.

The Company commenced using the pre-defined calculation for Engineering class of business starting 1 January 2013. As only the calculation for deferring the premiums has been amended, this is a change in accounting estimate. This change in calculation is expected to have minimal impact on the net earned premiums of the Company for future years as the net retention of the Company in respect of Engineering business is considered to be minimal by Management.

Unearned premiums represent the portion of premiums written relating to the unexpired period of coverage. The change in the provision for unearned premium is taken to the statement of income of insurance operations in the same order that revenue is recognised over the period of risk.

Fees income on insurance contracts

Insurance policyholders are charged for policy administration services, surrenders and other contract fees. These fees are recognized as revenue over the period in which the related services are performed. If the fees are for services provided in future periods, then they are deferred and recognized over future periods.

Dividend income

Dividend income is recognized when the right to receive payment is established, which is generally when shareholders approve the dividend

Reinsurance premiums

Reinsurance premiums written comprise the total premiums payable for the whole cover provided by contracts entered into the year and are recognized from the date on which the policy incepts. Premiums include any adjustments arising in the accounting period in respect of reinsurance contracts incepting in prior accounting periods.

Claims

Claims, comprising amounts payable to policy holders and third parties and related loss adjustment expenses, net of salvage and other recoveries, are charged to the statement of income of insurance operations as incurred. Total outstanding claims comprise the estimated amounts payable, in respect of claims reported to the Company and those not reported at the statement of financial position date.

The Company estimates its claims provisions based on previous experience. Independent loss adjusters normally estimate property claims. In addition, a provision based on management's judgement and the Company's prior experience, is maintained for Incurred But Not Reported ('IBNR') claims as well as for the cost of settling pending claims at the statement of financial position date. Any difference between the provisions at the statement of financial position date and settlements and provisions for the following period is included in the underwriting account for that period.

Reinsurance claims

Reinsurance claims are recognised when the related gross insurance claim is recognised according to the terms of the relevant contract

4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Deferred policy acquisition costs (DPAC)

Commissions and other costs directly related to the acquisition and renewal of insurance contracts are deferred to the extent that these costs are recoverable out of future premiums. All other acquisition costs are recognized as an expense when incurred. Subsequent to initial recognition, these costs are amortized on a straight-line basis based on the term of expected future premiums. Amortization is recorded in the statement of income of insurance operations. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period and are treated as a change in accounting estimate.

An impairment review is performed at each reporting date or more frequently when an indication of impairment arises. When the recoverable amounts are less than the carrying value, an impairment loss is recognized in the statement of income of insurance operations. DPAC is also considered in the liability adequacy test for each reporting period.

DAC are derecognised when the related contracts are either settled or disposed of.

Mathematical reserve

The mathematical reserve is calculated on the basis of a prudent prospective external actuarial valuation method through the use of current unit fund prices.

Leases

Operating lease payments are recognised as an expense in the statements of income of insurance operations on a straight-line basis over the lease term.

Zakat and income tax

Zakat and income tax are provided for in accordance with Saudi Arabian fiscal regulations. Zakat is computed on the zakatable base of Saudi founding and general public shareholders' share while income tax is computed on the non-Saudi founding shareholders' share of net adjusted income. Zakat and income tax, which are the liabilities of the shareholders, are accrued and charged to the other comprehensive income.

Cash-settled share-based payment

For cash-settled share-based payments, the Company measures the services acquired and the liability incurred at the fair value of the liability. Until the liability is settled, the Company re-measures the fair value of the liability at each reporting date and at the date of settlement, with any changes in fair value recognized in statement of income of insurance operations.

Segmental reporting

An operating segment is a component of the Company that is engaged in business activities from which it may earn revenues and incur expenses and which is subject to risk and rewards that are different from those of other segments. Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the chief executive officer that makes strategic decisions. The Company is organized into business units based on their products and services and has six reportable operating segments as follows:

- Motor insurance provides coverage against loss or damage to the motor vehicles caused by accident, fire or theft along with the coverage of third party liability as well;
- Engineering insurance provides coverage for builder's risks, construction, mechanical, electrical, electronic, and machinery breakdown, and any other insurance included under this class of insurance;
- Health care products provide medical cover to policyholders;
- Property Insurance provides cover against accidental physical loss or damage to the property due to any cause including fire and allied perils and consequential losses associated with the perils insured.
- Other general insurance segment comprises of marine, credit, fidelity guarantee insurance and liability.
- Protection and saving segment includes a variety of savings products designed to meet the needs of individuals as well as corporate institutions.

If any transaction were to occur, transfer prices between business segments are set on an arm's length basis in a manner similar to transactions with third parties. Segment income, expense and results will then include those transfers between business segments which will then be eliminated at the level of financial statements of the Company. As the Company carries out its activities entirely in the Kingdom of Saudi Arabia, reporting is provided by business segment only.

4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Foreign currencies

Transactions in foreign currencies are recorded in Saudi Riyals at the rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the rate of exchange ruling at the financial position date. All differences are taken to the statement of income of shareholders' operations and insurance operations.

Fair values

The fair value of financial assets that are actively traded in organized financial markets is determined by reference to quoted market bid prices for assets and offer prices for liabilities, at the close of business on the reporting date. If quoted market prices are not available, reference can also be made to broker or dealer price quotations.

For financial assets where there is not an active market, the fair value is determined by using valuation techniques. Such techniques include using recent arm's length transactions, reference to the current market value of another instrument which is substantially the same and/or discounted cash flow analysis. For discounted cash flow techniques, estimated future cash flows are based on management's best estimates and the discount rate used is a market related rate for a similar assets.

Impairment and uncollectibility of financial assets

An assessment is made at each financial position date to determine whether there is objective evidence that a financial asset or group of financial assets may be impaired. If such evidence exists, any impairment loss is recognized in the statements of shareholders' operations and insurance operations. Impairment is determined as follows:

- i.* For assets carried at fair value, impairment loss is based on the decline in fair value.
- ii.* For assets carried at cost, impairment is the difference between the cost and the present value of future cash flows discounted at the current market rate of return for a similar financial asset
- iii.* For assets carried at amortized cost, impairment is based on estimated cash flows that are discounted at the original effective interest rate.

Derecognition of financial instruments

The derecognition of a financial instrument takes place when the Company no longer controls the contractual rights that comprise the financial instrument, which is normally the case when the instrument is sold, or all the cash flows attributable to the instrument are passed through to an independent third party.

Offsetting

Financial assets and liabilities are offset and the net amount reported in the statement of financial position only when there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liability simultaneously. Income and expense is not offset in the statement of income of shareholders' operations and insurance operations unless required or permitted by any accounting standard or interpretation

Trade date accounting

All regular way purchases and sales of financial assets are recognized / derecognized on the trade date (i.e. the date that the Company commits to purchase or sell the assets). Regular way purchases or sales are purchases or sales of financial assets that require settlement of assets within the time frame generally established by regulation or convention in the market place.

5 SIGNIFICANT ACCOUNTING ESTIMATES AND ASSUMPTIONS

The preparation of the Company's financial statements requires management to make estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities and the disclosure of contingent liabilities, at the reporting date. However, uncertainty about these estimates and assumptions could result in an outcome that could require a material adjustment to the carrying amount of the asset or liability affected in the future.

The key assumptions concerning the future and other key sources of estimation uncertainty at the statement of financial position date, that have significant risk of causing a material adjustment to the carrying amounts of the assets and liabilities within the next financial year are discussed below.

Impairment of investments

The Company treats available-for-sale equity investments as impaired when there has been a significant or prolonged decline in the fair value below its cost or where other objective evidence of impairment exists. The determination of what is "significant" or "prolonged" requires considerable judgement. In addition, the Company evaluates other factors, including normal volatility in share price for quoted equities and the future cash flows and the discount factors for unquoted equities (if any).

Technical reserve for insurance activities

The estimation of the ultimate liability arising from claims made under general and protection & saving insurance contracts is the Company's most critical accounting estimate. There are several sources of uncertainty that needed to be considered in estimating the liability that the Company will ultimately pay for such claims. The provision for claims incurred but not reported (IBNR) is an estimation of claims net of reinsurance share which are expected to be reported subsequent to the statement of financial position date, for which the insured event has occurred prior to the financial position date. The primary technique adopted by the management in estimating the cost of notified and IBNR claims, is that of using the past claims settlement trends to predict future claims settlement trends. The mathematical reserve for protection & saving insurance contracts is calculated on the basis of management assumptions that include prudent prospective external actuarial valuation method and current unit fund prices.

Claims requiring court or arbitration decisions are estimated individually. Independent loss adjusters normally estimate property, engineering and large claims. Management reviews its provisions for claims incurred, and claims incurred but not reported, on a quarterly basis.

Fair values of financial instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability, or
- in the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

5 SIGNIFICANT ACCOUNTING ESTIMATES AND ASSUMPTIONS(continued)

Fair values of financial instruments(continued)

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

The Company's management determines the policies and procedures for both recurring fair value measurement, such as unquoted AFS financial assets, and for non-recurring measurement, such as assets held for distribution in discontinued operation.

Impairment losses on receivables

The Company assesses receivables that are individually significant and receivables included in a Company of financial assets with similar credit risk characteristics for impairment. Receivables that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment. This assessment of impairment requires judgment. In making this judgment, the Company evaluates credit risk characteristics that consider past-due status being indicative of the ability to pay all amounts due as per contractual terms.

Deferred policy acquisition cost

Certain acquisition cost related to sale of new policies are recorded as deferred acquisition cost and are amortised over the related period of policy coverage. If the assumptions relating to future profitability of these policies are not realised, the amortisation of these costs could be accelerated and this may also require additional impairment.

	Total	Neither past due nor impaired	Up to 90 days	Less than 180 days	More than 180 days
<i>Amount in SR</i>					
Premiums receivable	159,199,776	-	67,712,687	34,574,483	56,912,606
Provision for doubtful debts	(30,482,461)	-	-	(5,186,172)	(25,296,289)
Premiums receivable, net	128,717,315	-	67,712,687	29,388,311	31,616,317

The Company classifies balances as 'past due and impaired' on the basis of the guidelines given by SAMA. Unimpaired premiums receivable are expected, on the basis of past experience, to be fully recoverable. It is not the practice of the Company to obtain collateral over premiums receivable, and vast majority of such balances are therefore unsecured.

Movement of allowance for doubtful debts is as follows:

	2013	2012
	SR	SR
Balance at the beginning of the year	30,482,461	30,112,276
Provided for the year	4,486,314	5,887,607
Premium receivable written off during the year	-	(5,517,422)
Balance at the end of the year	34,968,775	30,482,461

12 CASH AND CASH EQUIVALENTS

	50,206,611	1,815,310	32,987,354	341,510

13 STATUTORY DEPOSIT

As required by Saudi Arabian Insurance Regulations, the Company deposited 10% of its paid up capital, amounting to SR 20,000,000 in a bank designated by SAMA. The accrued interest on deposit is the same as for the previous year; SR 76,025 (2012: SR 76,025). This deposit cannot be withdrawn without SAMA's consent. The statutory deposit is maintained with Banque Saudi Fransi, a shareholder of the Company.

14 AVAILABLE FOR SALE INVESTMENTS

Investments are classified as follows:

a) Insurance operations' available for sale investments:

	2013	2012
	(SR)	(SR)
Bonds-quoted	24,585,094	4,848,750
Funds-quoted	15,119,299	25,032,435
Total	39,704,393	29,881,185

The cumulative unrealised loss in fair value of available for sale investments amounting to SR 2,125,422 (31 December 2012: SR 53,065) is presented within the insurance operation' surplus in the statement of financial position.

Bonds are rated AA by Standard & Poor's however Funds are unrated.

b) Movement in available for sale investments is as follows:

	2013	2012
	SR	SR
Balance at the beginning of the year	29,881,185	-
Acquisition during the year	21,858,000	29,934,250
Disposals during the year	(10,009,635)	-
Unrealized loss on available for sale investments	(2,025,157)	(53,065)
Balance at the end of the year	39,704,393	29,881,185

NOTES TO THE FINANCIAL STATEMENTS (continued)

At 31 December 2013

14 AVAILABLE FOR SALE INVESTMENTS (continued)*c) Shareholders' available for sale investments:*

	<i>As at 31 December 2013 (SR)</i>		
	<i>Quoted</i>	<i>Unquoted</i>	<i>Total</i>
Bonds	95,140,988	-	95,140,988

Funds	8,095,382	-	8,095,382
Equities	-	3,223,078	3,223,078
Total	103,236,370	44,228,078	147,464,448

	<i>As at 31 December 2012 - (SR)</i>		
	<i>Quoted</i>	<i>Unquoted</i>	<i>Total</i>
Bonds	93,084,505	-	93,084,505
Sukuk	-	46,100,500	46,100,500
Funds	3,039,336	-	3,039,336
Equities	-	3,223,078	3,223,078
Total	96,123,841	49,323,578	145,447,419

The cumulative (loss)/gain in fair value of available for sale investments amounting to SR 225,266 (31 December 2012: SR 2,568,517) is presented within the shareholders' equity in the statement of financial position.

As the fair values of the above unquoted sukuk and equities are not readily available, these investments are carried at cost and reviewed by management for impairment.

d) Movement in available for sale investments is as follows:

	2013 SR	2012 SR
Balance at the beginning of the year	145,447,419	130,238,596
Acquisition during the year	14,911,562	83,523,310
Disposals during the year	(10,000,000)	(70,903,813)
Unrealized (loss) gain on available for sale investments	(2,894,533)	2,589,326
Balance at the end of the year	147,464,448	145,447,419

NOTES TO THE FINANCIAL STATEMENTS (continued)

At 31 December 2013

14 AVAILABLE FOR SALE INVESTMENTS (continued)*e) Credit rating*

Following is the credit rating of available for sale investments:

Credit quality	Credit Rating Agency	Financial Instrument	31 December 2013	31 December 2012
Very strong quality AA	S&P/ Moody's	Bonds / Sukuks	29,091,300	30,857,213
Strong quality A+	S&P	Bonds / Sukuks	94,956,000	86,130,505
Satisfactory quality A-	S&P	Sukuk	5,000,000	5,000,000
Unrated	N/A	Equities/Sukuk/Mutual Funds	18,417,148	23,459,701

Very strong quality: Capitalization, earnings, financial strength, liquidity, management, market reputation and repayment ability are excellent.

Strong quality: Capitalization, earnings, financial strength, liquidity, management, market reputation and repayment ability are good.

Satisfactory quality: Require regular monitoring due to financial risk factors. Ability to repay remains at a satisfactory level.

f) Determination of fair value and fair values hierarchy

As at 31 December, the financial instruments under insurance and shareholder operations are measured at fair value using level 1 hierarchy for bonds and funds and level 3 for sukuk and equities.

The following table shows an analysis of financial instruments measured at fair value by level of the fair value hierarchy;

i. Policyholders operations

31 December 2013 (SR)				
	Level 1	Level 2	Level 3	Total
Bonds	24,585,094	-	-	24,585,094

21 CLAIMS DEVELOPMENT TABLE

The following table reflects the net incurred claims including both the net claims notified and net incurred but not reported claims for each accident year (excluding the surrenders for protection and savings insurance products) at each financial position date together with the cumulative payments to date. The development of insurance liabilities provides a measure of the company's ability to estimate the ultimate value of the claims. The company aims to maintain adequate reserves in respect of its insurance business in order to protect against adverse future claims experience and developments. As claims develop and the ultimate cost of claims becomes more certain, adverse claims experiences will be eliminated which results in the release of reserves from earlier accident years. In order to maintain adequate reserves, the company will transfer much of this release to the current accident year reserves when the development of claims is less mature and there is much greater uncertainty attached to the ultimate cost of claims.

Claims triangulation analysis by accident years for the last five years is set out below;

2013

	2009 & Earlier	2010	2011	2012	2013	Total
Accident Year						
Estimate of ultimate claims cost:						
At the end of accident year	59,050,374	98,798,242	102,649,881	104,912,265	128,901,897	-
One year later	70,699,098	121,466,369	119,446,266	113,276,124	-	-
Two years later	71,409,891	118,045,703	117,065,243	-	-	-
Three years later	69,739,655	115,515,172	-	-	-	-
Four years later	69,840,953	-	-	-	-	-
Current estimate of cumulative net claims	69,840,953	115,515,172	117,065,243	113,276,124	128,901,897	544,599,389
Cumulative payments to date	(69,216,214)	(115,145,628)	(113,224,928)	(108,156,653)	(82,839,447)	(488,582,870)
Net liability recognised in statement of financial position	624,739	369,544	3,840,315	5,119,471	46,062,450	56,016,519

The frequency and severity of claims can be affected by several factors like natural disasters, flood, environmental and economical, atmospheric disturbances, concentration of risks, civil riots etc. The Company manages these risk through the measures described above. The Company has limited its exposure to catastrophic and riot events by use of reinsurance arrangements. The Company believes that the claim liabilities under insurance contracts outstanding at the year end are adequate. However, these amounts are not certain and actual payments may differ from the claims liabilities provided in the financial statements. The insurance claim liabilities are sensitive to the various assumptions. It has not been possible to quantify the sensitivity of specific variable such as legislative changes or uncertainty in the estimation process. However, the sensitivity to changes in claim liabilities net of reinsurance by 5 percent is analysed separately for each class of business while keeping all other assumptions constant. A hypothetical 5% change in claims ratio would impact income by approximately SR 17,725,428 (2012: SR: 17,733,538).

NOTES TO THE FINANCIAL STATEMENTS (continued)

At 31 December 2013

22 PROVISION FOR ZAKAT AND INCOME TAX

The provision for zakat and income tax for the year is set out below;

	2013 SR	2012 SR
Provision for zakat	2,213,463	2,022,185
Provision for income tax	1,838,655	998,085
	4,052,118	3,020,270

a) Zakat

The current year's provision is based on the following:

	2013 SR	2012 SR
Opening share capital	200,000,000	200,000,000
Reserves and opening provisions	7,375,529	(5,389,246)
Closing value of long term assets	(26,431,732)	(21,234,518)
	180,943,797	173,376,236
Zakatable income for the year	21,763,605	11,814,037
	202,707,402	185,190,273
Zakat Base	88,538,539	80,887,407
Total Saudi share of zakat base (43.678 %)		
	2,213,463	2,022,185

The differences between the financial and the zakatable results are mainly due to provisions which are not allowed in the calculation of zakatable income.

b) Income tax

The current year's provision is based on the following:

	2013 SR	2012 SR
Net income for the year	12,815,948	10,279,849
Add: Inadmissible expenses	10,734,255	9,157,275
Less : Admissible expenses	(1,786,598)	(7,623,087)
Adjustment of brought forward losses	(5,440,898)	(2,953,508)
Taxable income	16,322,707	8,860,529
Non Saudi base (56.322%)	9,193,275	4,990,427
Provision for income tax (20%)	1,838,655	998,085

NOTES TO THE FINANCIAL STATEMENTS (continued)

At 31 December 2013

22 PROVISION FOR ZAKAT AND INCOME TAX (continued)**c) Movement in zakat and income tax payable is as follows:**

	2013 SR	2012 SR
Opening balance of zakat and tax payable	4,420,173	1,824,453
Provided during the year	4,052,118	3,020,270
Payment made during the year	(984,883)	(424,550)
Closing balance of zakat and tax payable	7,487,408	4,420,173

d) Status of assessments

The Company has filed tax and zakat declaration for the years ended 31 December 2008 to 2012 and the assessments for these years are still outstanding. The Company has filed appeal against Department of Zakat and Income Tax (DZIT) assessment of additional zakat arising from disallowance of long term investments from zakat base for the years 2010, 2011 and 2012 amounting to SR 5.89 million. The Company has booked the additional Zakat provision in the financial statements.

The Company is in the process of filing tax and zakat returns for the year ended 31 December 2013 with the (DZIT).

23 SHARE CAPITAL

The authorized and issued share capital of the Company is SR 200,000,000 as at 31 December 2013 and 2012 consisting of 20,000,000 shares of SR 10 par value.

24 EQUITY INCENTIVE PLAN

The key management personnel of the Company are eligible for a Global Equity Incentive (GEI) plan of Allianz Group, a major shareholder of the Company. The GEI plan consists of Restricted Stock Units (RSU). In accordance with the pre-requisites of these cash-settled equity plans, key management personnel (the eligible personnel) of the Company would be granted, certain number of RSU's at the time of exercise, provided the eligible personnel were still employed within the Allianz Group.

The obligation under the above plans is measured at fair value at the balance sheet date based on pricing information provided by Allianz Group. The fair value of such obligation determined is recognised in the statement of income of insurance operations on a straight line basis over the vesting period. Any future changes from the grant date in the fair value of RSU's have been fully covered for absolute amounts with Allianz Group thus restricting/capping the liability of the Company. During the year ended 31 December 2013, an amount of SR 668,125 was accrued toward the GEI plan (2012: SR 660,000).

25 STATUTORY RESERVE

In accordance with its bylaws, the Company shall allocate 20% of its net income each year to the statutory reserve until it has built up a reserve equal to the capital. The Company has not transferred any amount to statutory reserve due to the fact that the Company has accumulated losses as at 31 December 2013.

NOTES TO THE FINANCIAL STATEMENTS (continued)

28 RISK MANAGEMENT

Risk management strategy

The Company has a comprehensive risk management strategy to understand and manage the types of risk arising from their core business operations.

The strategy considers the impact of market conditions and available expertise on inherent risks to which the company is exposed. Consideration is not limited to the risks associated with one class of business but is extended to risks from all other classes.

The Company's Board of Directors and the senior management periodically reviews and updates the risk management strategy by taking into account developments that are internal and external to the company.

Risk management structure

A cohesive organizational structure is established within the Company in order to identify, assess, monitor and control risks.

The risks faced by the Company and the way these risks are mitigated by management are summarized below:

a) Operational/Process risk

Operational risk is the risk of loss arising from systems and control failures, fraud and human errors, which can result in financial and reputation loss, and legal and regulatory consequences. The Company manages operational risk through appropriate controls, instituting segregation of duties and internal checks and balances, including internal audit and compliance.

b) Insurance risk

Insurance risk is the risk that actual claims payable to contract holders in respect of insured events exceed expectations. This could occur because the frequency or amounts of claims are more than expected. Insurance risk is monitored regularly by the Company to make sure the levels are within the projected frequency bands. The Company underwrites mainly medical, motor, fire and burglary, marine, engineering and public liability risks. The insurance risks arising from the above insurance contracts are mainly concentrated in the Kingdom of Saudi Arabia.

Protection & Saving

For Protection & Saving, the main risk is the mortality and morbidity (permanent or temporary disability) of the insured. This is managed through an effective and clearly defined underwriting strategy. There are various levels of underwriting carried out, including declaration of good health, medical questionnaire, reports from specialists/consultants and comprehensive medical tests. The Company also conducts financial, lifestyle and occupational underwriting to ascertain the degree of risk carried by the insured and to determine whether or not it could be classified as a standard life.

For group Protection & Saving, the main risks are mortality and morbidity (permanent or temporary disability) of the insured. The mortality risk is compounded due to the concentration of lives, for e.g. employees in the same workplace. The Company has a clearly defined underwriting strategy. There are various levels of underwriting carried out, including declaration of good health, medical questionnaire, reports from specialists/consultants and comprehensive medical tests. The Company also looks at the nature of activity carried out by the group, group size, mix of lives by geographical regions, cultural background and manual/non-manual worker split.

The individual family and group Protection & Saving portfolio is protected through an efficient reinsurance arrangement in accordance with Allianz group standards. This protects the Company from adverse mortality/morbidity experience. There is a maximum retention per life under the reinsurance arrangement which protects the Company from single large losses. Multiple claims and concentration of risk is also covered under the arrangement.

28 RISK MANAGEMENT (continued)

b) Insurance risk (continued)

General Insurance

Frequency and amounts of claims

The frequency and amounts of claims can be affected by several factors. The Company underwrites medical, motor, fire and burglary, marine, engineering and public liability risks. These are regarded as short-term insurance contracts as claims are normally advised and settled within one year of the insured event taking place. This helps to mitigate insurance risk.

Medical

The Company's underwriting strategy is designed to ensure that risks are well diversified in terms of type of risks and level of insured benefits. This is largely achieved through diversification across industry sectors and geography, the use of medical screening in order to ensure that pricing takes account of current health conditions and family medical history, regular view of actual claims experience and product pricing, as well as detailed claims handling procedures. The Company further enforces a policy of actively managing and promptly pursuing claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the Company. The Company has reinsurance cover to limit the losses for any individual claim.

Motor

For motor contracts, the main risks are claims for death and bodily injury and the replacement or repair of vehicles. The Company only underwrites comprehensive policies for owner/drivers over 21 years of age.

The level of court awards for deaths and to injured parties and the replacement costs of motor vehicles are the key factors that influence the level of claims. The Company also has risk management procedures to control cost of claims. The Company has reinsurance cover for such damage to limit the losses for any individual claim.

Fire and burglary

For property insurance contracts the main risk is fire. The Company only underwrites policies for properties containing fire detection equipment.

These contracts are underwritten by reference to the replacement value of the properties and contents insured. The cost of rebuilding properties and obtaining replacement contents and the time taken to restart operations which leads to business interruptions are the main factors that influence the level of claims. The Company has reinsurance cover for such damage to limit losses for any individual claim.

Marine

For marine insurance, the main risks are loss or damage to marine craft and accidents resulting in the total or partial loss of cargoes.

The underwriting strategy for the marine class of business is to ensure that policies are well diversified in terms of cargo, vessels and shipping routes covered. The Company has reinsurance cover to limit losses for any individual claim.

Engineering

For engineering insurance, main risks are loss or damage to the construction/erection works caused by fire, explosion, natural perils like flood, earthquake, hailstorm, etc. The Company has reinsurance cover for such risks to limit losses for any individual claim.

Public liability

For public liability insurance, main risks are legal liabilities of the insured towards third party death, bodily injury or property damage arising out of Insured Premises, business operations or projects handled by the insured.

This insurance policy is underwritten based on the turnover of the Company or the value of the contract, nature / occupation of the premises, nature of contracts handled. The Company has reinsurance cover to limit the losses for any individual claim.

NOTES TO THE FINANCIAL STATEMENTS (continued)

At 31 December 2013

28 RISK MANAGEMENT (continued)*c) Liquidity risk*

Liquidity risk is the risk that the Company will encounter difficulty in raising funds to meet commitments associated with financial liabilities. Liquidity requirements are monitored on a timely basis and management ensures that sufficient funds are available to meet any commitments as they arise.

Maturity profile

NOTES TO THE FINANCIAL STATEMENTS (continued)

At 31 December 2013

c) Liquidity risk (continued)

The table below summarizes the maturity profile of the financial assets and financial liabilities of the Company based on remaining expected obligations, including premiums receivable. For insurance contract liabilities and reinsurance assets, maturity profiles are determined based on the estimated timing of net cash outflows from the recognized insurance liabilities. Unearned premiums and the reinsurance share of unearned premiums have been excluded from the analysis as they are not contractual obligations. Repayments that are subject to notice are treated as if notice were to be given immediately.

NOTES TO THE FINANCIAL STATEMENTS (continued)

At 31 December 2013

28 RISK MANAGEMENT (continued)**d) Credit risk**

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. For all classes of financial instruments held by the Company, the maximum credit risk exposure to the Company is the carrying value as disclosed in the statement of financial position.

The following policies and procedures are in place to mitigate the Company's exposure to credit risk:

- To minimize its exposure to significant losses from reinsurance insolvencies, the Company evaluates the financial condition of its reinsurance counterparties. Accordingly, as a pre-requisite, the parties with whom reinsurance is affected are required to have a minimum acceptable security rating level affirming their financial strength.
- The Company only enters into insurance and reinsurance contracts with recognized, creditworthy third parties. It is the Company's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, receivables from insurance and reinsurance contracts are monitored on an ongoing basis in order to reduce the Company's exposure to bad debts.
- The Company seeks to limit the credit risk with respect to agents and brokers by setting credit limits for individual agents and brokers and monitoring outstanding receivables.
- Premiums receivable are mainly receivable from individuals and corporate customers (unrated). The Company seeks to limit the credit risk with respect individuals and corporate customers by setting credit limits and monitoring outstanding receivables.
- Cash and cash equivalents are maintained with local banks approved by management. Accordingly, as a pre-requisite, the banks with whom cash and cash equivalents are maintained are required to have a minimum acceptable security rating level affirming their financial strength.
- The Company's investments mainly comprise of debt securities and mutual funds. The Company does not have an internal grading mechanism for investments. The Company limits its credit risk on investments by setting out a minimum acceptable security rating level affirming their financial strength.

Premiums receivable comprise a large number of receivables from individual and corporate clients. The five largest premium receivable accounts constitute 48% of the same as at 31 December 2013 (2012: 15%).

The table below shows the maximum exposure to credit risk for the components of the statement of financial position:

	<i>31 December 2013</i>		
	<i>SR</i>		
	<i>Insurance Operations</i>	<i>Shareholders' Operations</i>	<i>Total</i>

	<u>287,405,076</u>	<u>159,602,540</u>	<u>447,007,616</u>

e) Special commission rate risk

Special commission rate risk arises from the possibility that changes in interest rates will affect future profitability or the fair values of financial instruments. The Company is exposed to special commission rate risk on its bank balances and available for sale- debt securities.

The sensitivity of the income is the effect of the assumed changes in the interest rates, with all other variable held constant, on the Company's profit for one year, based on the floating rate financial assets held at 31 December 2013. A hypothetical 100 basis points change in the weighted average special commission rate of the floating rate at 31 December 2013 would impact special commission income by approximately SR 160,000 (2012; 160,000) annually in aggregate.

f) Currency exchange risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates.

Management believes that there is minimal risk of significant losses due to exchange rate fluctuation as the majority of monetary assets and liabilities are in currencies linked to the Saudi Riyal. In addition, as the Company's foreign currency transactions are primarily in US dollars which is pegged with Saudi Riyal, foreign exchange gains and losses are not significant and have not been disclosed separately.

g) Fund price risk

Fund price risk is the risk that the fair value of future cash flows of a fund will fluctuate because of changes in the net asset value (NAV) being determined by fund managers.

The Company is not exposed to fund price risk since any change in the NAV of the funds will affect the change in mathematical reserve and the change in the fair value of the funds by the same amount; hence, no impact is on the net performance of the Company.

NOTES TO THE FINANCIAL STATEMENTS (continued)

At 31 December 2013

28 RISK MANAGEMENT (continued)***h) Market risk***

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

The Company's market risk exposure relates to its quoted available for sale investments whose values will fluctuate as a result of changes in market prices. The Company limits market risk by maintaining a diversified portfolio and by monitoring the developments in financial markets.

A 1% change in the market price of the quoted available for sale investments, with all other variables held constant, would impact net equity by increase/ decrease of SR 1,032,364 (2012: SR 1,422,243).

i) Capital management

Objectives are set by the Company to maintain healthy capital ratios in order to support its business objectives and maximize shareholders' value.

The Company manages its capital requirements by assessing shortfalls between reported and required capital levels on a regular basis. Adjustments to current capital levels are made in light of changes in market conditions and risk characteristics of the Company's activities. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders or issue shares.

In the opinion of the Board of Directors, the Company has fully complied with the externally imposed capital requirements during the reported financial year.

j) Fair value of financial instruments

Financial instruments consist of financial assets and financial liabilities. Fair value is the amount for which an asset could be exchanged, or a liability settled between knowledgeable willing parties in an arm's length transaction. Underlying the definition of fair value is a presumption that an enterprise is a going concern without any intention or need to liquidate, curtail materially the scale of its operations or undertake a transaction on adverse terms. The Company's financial assets consist of cash and cash equivalents, receivables, investments and accrued income and its financial liabilities consist of payables, accrued expenses and gross outstanding claims. The fair values of financial assets and liabilities are not materially different from their carrying values at the statement of financial position.

29 BASIC AND DILUTED EARNINGS PER SHARE

	<i>Year ended 31 December 2013</i>	<i>Year ended 31 December 2012</i>
Net income for the year (SR)	12,815,948	10,279,849
Weighted average number of ordinary shares	20,000,000	20,000,000
Basic and diluted earnings per share – (SR)	0.64	0.51

30 CONTINGENCIES

The Company operates in the insurance industry and is subject to legal proceedings in the normal course of business relating to policyholders' insurance claims. While it is not practicable to forecast or determine the final results of all pending or threatened legal proceedings, management does not believe that such proceedings (including litigations) will have a material effect on its performance and financial position.

31 SEGMENT INFORMATION

- (a) Consistent with the Company's internal reporting process, business segments have been approved by Management in respect of the Company's activities, assets and liabilities. Information disclosed in the note is based on current reporting to the chief operating decision maker.

Segment assets do not include insurance operations' cash and cash equivalents, prepaid expenses, due from shareholders' operations and property and equipment. Accordingly they are included in unallocated assets.

Segment liabilities do not include reinsurers' balances payable, employees' end of service benefits, accrued expenses and other liabilities. Accordingly they are included in unallocated liabilities.

The unallocated assets and unallocated liabilities are reported to chief operating decision maker on the cumulative basis and not reported under the related segments.

Operating segments

Following are the operating segments identified for segment reporting purposes;

Motor	:	Motor corporate and motor individual
Engineering	:	Construction
Medical	:	Medical
Property	:	Fire, Burglary and Money
Other general	:	Liability and Marine
Protection & Saving	:	Group Retirement & Individual Protection & Saving

Allianz Saudi Fransi Cooperative Insurance Company (A Saudi Joint Stock Company)

b) Geographical segments

The Company during the year ended 31 December 2013, operated only in the Kingdom of Saudi Arabia.

32 PROSPECTIVE CHANGES IN ACCOUNTING STANDARDS

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Group's financial statements are disclosed below. The Group intends to adopt these standards, if applicable, when they become effective.

IFRS 9 Financial Instruments

On 19 November 2013, the IASB issued a new version of IFRS 9 *Financial Instruments (Hedge Accounting and amendments to IFRS 9, IFRS 7 and IAS 39)*. IFRS 9 (2013) which includes the new hedge accounting requirements and some related amendments to IAS 39 *Financial Instruments: Recognition and Measurement* and IFRS 7 *Financial Instruments: Disclosures*. IFRS 9 (2013) also replicates the amendments in IAS 39 in respect of novations. The standard does not have a mandatory effective date, but it is available for application now. A new mandatory effective date will be set when the IASB completes the impairment phase of its project on the accounting for financial statements. Entities may elect to apply only the accounting for gains and losses from own credit risk without applying the other requirements of IFRS 9 at the same time. An accounting policy choice to continue to apply the hedge accounting requirements of IAS 39 is available for of their hedging relationships. They may later change that policy and apply the hedge accounting requirements in IFRS 9 before they eventually become mandatory. This choice is intended to be removed when the IASB completes its project on accounting for macro hedging.

IAS 32 Offsetting Financial Assets and Financial Liabilities - Amendments to IAS 32

These amendments clarify the meaning of "currently has a legally enforceable right to set-off" and the criteria for non-simultaneous settlement mechanisms of clearing houses to qualify for offsetting. These are effective for annual periods beginning on or after 1 January 2014. These amendments are not expected to be relevant to the Group.

IFRIC Interpretation 21 Levies (IFRIC 21)

IFRIC 21 clarifies that an entity recognises a liability for a levy when the activity that triggers payment, as identified by the relevant legislation, occurs. For a levy that is triggered upon reaching a minimum threshold, the interpretation clarifies that no liability should be anticipated before the specified minimum threshold is reached. IFRIC 21 is effective for annual periods beginning on or after 1 January 2014. The Company does not expect that IFRIC 21 will have material financial impact in future financial statements.

33 COMPARATIVE FIGURES

Certain figures for the year ended 31 December 2012 have been reclassified to conform with the presentation of the current year.

34 APPROVAL OF THE FINANCIAL STATEMENTS

These financial statements have been approved by the Board of Directors on 18 Rabi Thani 1435 H, corresponding to 18 February 2014.
