**Independent auditors' review report**  
**To the shareholders of L'azurde Group for Jewelry and Its Subsidiaries**  
**(A Saudi Joint Stock Group)**  
**Riyadh, Saudi Arabia**

**Introduction**

We have reviewed the accompanying interim condensed consolidated statement of financial position of **L'azurde Company for Jewelry and Its Subsidiaries (a Saudi joint stock Company)** ("the Group") as of 30 June 2017 and the related interim condensed consolidated statements of profit or loss, comprehensive income, changes in equity, and cash flows for the six months period then ended and the related notes (1) to (19) which form an integral part of these interim condensed financial information. Management is responsible for the preparation and presentation of this interim condensed financial information in accordance with International Accounting Standard (IAS) 34 'Interim Financial Reporting', as endorsed in the Kingdom of Saudi Arabia. Our responsibility is to express a conclusion on this interim condensed financial information based on our review.

**Scope of Review**

We conducted our review in accordance with International Standard on Review Engagements 2410, 'Review of Interim Financial Information Performed by the Independent Auditor of the Entity', as endorsed in the Kingdom of Saudi Arabia. A review of interim condensed financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

**Conclusion**

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed financial information is not prepared, in all material respects, in accordance with IAS 34, as endorsed in the Kingdom of Saudi Arabia.

**Other Matters**

The consolidated financial statements of the Group for the year ended 31 December 2016, on which a predecessor auditor has issued an unqualified audit opinion dated 15 Jumad Thani 1438H (corresponding to 14 March 2017G), prepared under Accounting Standards Generally Accepted in the Kingdom of Saudi Arabia. However, as part of our review of the accompanying interim condensed consolidated financial statements, we have performed certain procedures on the adjustments to these comparative figures required for presentation under International Financial Reporting Standards that are endorsed in the Kingdom of Saudi Arabia and other standards and pronouncements that are issued by the Saudi Organization for Certified Public Accountants.

**2. STATEMENT OF COMPLIANCE**

The interim condensed consolidated financial statements include interim condensed consolidated statement of financial position, interim condensed consolidated statement of profit or loss, interim condensed consolidated statement of comprehensive income, interim condensed consolidated statement of changes in equity, interim condensed consolidated statement of cash flows, and notes to the interim condensed consolidated financial statements. These interim condensed consolidated financial statements have been prepared in accordance with International Accounting Standard 34 'Interim Financial Reporting as endorsed in Kingdom of Saudi Arabia. These interim condensed consolidated financial statements are the Group's first interim condensed financial statements prepared in accordance with International Financial Reporting Standards ("IFRS") endorsed by Saudi Organization for Certified Public Accountants ("SOCPA") and other standards and pronouncements issued by SOCPA. The Group's date of transition to IFRS is 1 January 2016. The requirements of IFRS 1 "First-time Adoption of International Financial Reporting Standards" have been applied in preparing these financial statements. Refer to note 19 which discloses the impact of adopting IFRS on these interim condensed consolidated financial statements. These interim condensed consolidated financial statements do not include all of information required for full set of annual financial statements.

The Capital Market Authority (CMA) announced the Board of Commissioners resolution dated 16 October 2016 (corresponding to 15 Muharram 1438H), which obligates the listed entities to apply the cost model to measure the property and equipment, investment properties and intangible assets upon adopting the IFRSs for three years period starting from the IFRSs adoption date, while continuing to abide by the IFRSs, that are endorsed in the Kingdom of Saudi Arabia, disclosure requirements, which encourage the disclosure of the fair value within the notes to the financial statements. The Group has complied with the requirements in these financial statements.

The interim condensed consolidated financial statements for the period ended 30 June 2017 were approved and authorized for issue by the Board of Directors on 16 Dhul-Qa'Dah 1438H (corresponding to 8 August 2017G).

**3. BASIS OF PREPARATION**

**Basis of measurement**

These interim condensed consolidated financial statements have been prepared under historical cost basis as explained in the relevant accounting policies and measurement basis summarized below, except for employees' end of service benefits provision which has been valued by an independent professional actuary.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

**3. BASIS OF PREPARATION (continued)**

**Basis of consolidation (continued)**

**Basis of consolidation**

The Group's financial statements consolidate those of the Parent Company and all its subsidiaries at each reporting date. All subsidiaries have year-end of 31 December.

A subsidiary Company is consolidated from the date on which the Group obtains control until the date that control ceases. The interim condensed consolidated financial statements are prepared on the basis of the individual financial statements of the Group and the financial statements of its subsidiaries.

All transactions and balances between Group companies are eliminated on consolidation, including unrealised gains and losses on transactions between Group companies. Where unrealised losses on intra-Group asset sales are reversed on consolidation, the underlying asset is also tested for impairment from a Group perspective. Amounts reported in the financial statements of subsidiaries have been adjusted where necessary to ensure consistency with the accounting policies adopted by the Group.

Profit or loss and other comprehensive income of subsidiaries acquired or disposed of during the period / year are recognised from the effective date of acquisition, or up to the effective date of disposal, as applicable.

The Group attributes total comprehensive income or loss of subsidiaries between the owners of the parent and the non-controlling interests based on their respective ownership interests, if material.

**Business combinations**

The Group applies the acquisition method in accounting for business combinations. The consideration transferred by the Group to obtain control of a subsidiary is calculated as the sum of the acquisition-date fair values of assets transferred, liabilities incurred and the equity interests issued by the Group, which includes the fair value of any asset or liability arising from a contingent consideration arrangement. Acquisition costs are expensed as incurred.

Assets acquired and liabilities assumed are generally measured at their acquisition-date fair values.

**Functional and presentation currency**

The interim condensed consolidated financial statements are presented in Saudi Riyal (SAR), which is also the functional and presentation currency of the Parent Company.

**Foreign operations**

In the Group's interim condensed consolidated financial statements, all assets, liabilities and transactions of Group entities with a functional currency other than the SAR are translated into SAR upon consolidation. The functional currency of the entities in the Group has remained unchanged during the reporting period.

On consolidation, assets and liabilities of foreign operations have been translated into SAR at the closing rate at the reporting date. Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated into SAR at the closing rate. Income and expenses of foreign operations have been translated into SAR at the average rate over the reporting period. Exchange differences are charged or credited to other comprehensive income and recognized in the currency translation reserve in equity.

On disposal of a foreign operation, the related cumulative translation differences recognized in equity are reclassified to profit or loss and are recognized as part of the gain or loss on disposal.

**4. SIGNIFICANT ACCOUNTING ESTIMATES AND ASSUMPTIONS**

The preparation of interim condensed consolidated financial statements in accordance with IFRSs applicable in the Kingdom of Saudi Arabia requires the use of certain critical estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the reporting date and the reported amounts of revenues and expenses during the reporting period. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results.

**5. SIGNIFICANT ACCOUNTING POLICIES**

**Property and equipment**

Property and equipment is stated at cost less accumulated depreciation and accumulated impairment losses. Cost includes any costs directly attributable to bringing the assets to the location and condition necessary for it to be capable of operating in the manner intended by the Group's management.

Depreciation is recognized so as to write off the cost of assets less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of annual reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Leasehold improvements are depreciated on a straight-line basis over the shorter of the useful life of the improvements, or the term of the lease.

Expenditure for repair and maintenance are charged to the interim condensed consolidated statement of profit or loss as incurred with the exception of costs that extend the useful life of the asset or increase its value, which are then capitalized.

The cost of replacing part of an item of property and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The costs of day-to-day servicing of property and equipment are recognized in the interim condensed consolidated statement of profit or loss.

An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in profit or loss.

Depreciation of property and equipment is calculated on a straight-line basis over the estimated useful lives of assets as follows:

**5. SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Property and equipment (continued)**

<b>Asset Category</b>	<b>Life in years</b>
Buildings	50
Machinery and equipment	10
Furniture and fixtures	6 – 7
Motor vehicles	4
Office equipment	7
Tools, dies and other assets	4 – 7
Leasehold improvements	Shorter of useful life or lease term

**Capital work in progress (CWIP)**

Capital work in progress is stated at cost less any impairment losses. All expenditures incurred during installation and construction period, in connection with specific assets, are carried to CWIP. The cost of CWIP is transferred to the appropriate category of property and equipment when it is ready for use. The cost of CWIP comprises purchase price and costs directly and indirectly attributable to bringing the CWIP for its intended use.

**Intangible assets**

An intangible asset is initially recognized at cost which is equal to the fair value of consideration paid at the time of acquisition of the asset.

The Group applies the following estimated useful lives for amortization of intangible assets:

<b>Asset Category</b>	<b>Life in years</b>
Franchise license fee	5
Computer software	2

An intangible asset is derecognized on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from de-recognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset are recognized in interim condensed consolidated statement of profit or loss when the asset is derecognized.

**Accounts receivable**

Accounts receivable are stated at original invoice amount or gold quantity less a provision for any uncollectible amounts. When collected accounts receivables are settled in cash or gold, an estimate for doubtful debts is made when collection of the remaining amount is no longer probable. Bad debts are written off when the related receivables are considered uncollectible.

Receivables to be settled in gold are re-measured at each reporting period and any difference in the carrying amount is to be recognized in the interim condensed consolidated statement of profit or loss.

**Inventories**

Inventories are stated at the lower of cost and net realizable value. Net realizable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale. Costs of other inventory items are determined as follows:

- Raw material, consumables and other manufacturing material are determined at purchase costs using the First-in-First-Out (FIFO) method.
- Work in progress and finished goods are determined at cost of direct material, labor and overheads based on a normal level of activity.
- Re-sellable goods are determined on specific identification basis.

**5. SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Cash and cash equivalents**

Cash and cash equivalents are items which are readily convertible to known amounts of cash and which are subject to insignificant risk of change in value. Cash and cash equivalents in the interim condensed consolidated statement of financial position comprise cash on hand and bank account balances and are initially and subsequently recorded at fair value.

For the purposes of the statement of cash flows, cash and cash equivalents comprise cash on hand and deposits held with banks, all of which have maturities of 90 days or less and are available for use by the Group unless otherwise stated.

**Financial Instruments**

Financial assets and financial liabilities are recognized when a Group entity becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

Financial assets

Financial assets are classified into the following specified categories: financial assets 'at fair value through profit or loss' (FVTPL), 'held-to-maturity' investments, 'available-for-sale' (AFS) financial assets and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition. All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

For the purpose of subsequent measurement, financial assets are classified into the following categories upon initial recognition:

Effective interest method

The effective interest method is a method of calculating the amortized cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables including trade and other receivables, bank balances and cash are measured at amortized cost using the effective interest method, less any impairment loss which is recognized in profit or loss.

Interest income is recognized by applying the effective interest rate, except for short-term receivables when the effect of discounting is immaterial.

**5. SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Financial Instruments (continued)**

Impairment of financial assets

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

For AFS equity investments, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

For all other financial assets, objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty;
- breach of contract, such as a default or delinquency in interest or principal payments;
- it becomes probable that the borrower will enter bankruptcy or financial re-organization; or
- the disappearance of an active market for that financial asset because of financial difficulties.

For certain categories of financial assets, such as trade receivables, assets are assessed for impairment on a collective basis even if they were assessed not to be impaired individually.

Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period granted, as well as observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortized cost, the amount of the impairment loss recognized is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

For financial assets that are carried at cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss.

For financial assets measured at amortized cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

De-recognition of financial assets

The Group derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

STATEMENTS (UNAUDITED)  
FOR THE THREE AND SIX MONTH PERIODS ENDED 30 JUNE 2017**

**5. SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Financial Instruments (continued)**

De-recognition of financial assets (continued)

If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

On de-recognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income and accumulated in equity is recognized in profit or loss.

On de-recognition of a financial asset other than in its entirety (e.g. when the Group retains an option to repurchase part of a transferred asset), the Group allocates the previous carrying amount of the financial asset between the part it continues to recognize under continuing involvement, and the part it no longer recognizes on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognized and the sum of the consideration received for the part no longer recognized and any cumulative gain or loss allocated to it that had been recognized in other comprehensive income is recognized in profit or loss. A cumulative gain or loss that had been recognized in other comprehensive income is allocated between the part that continues to be recognized and the part that is no longer recognized on the basis of the relative fair values of those parts.

Financial liabilities and equity instruments

Classification as debt or equity

Debt and equity instruments issued by the Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognized at the proceeds received, net of direct issue costs.

Repurchase of the Group's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Group's own equity instruments.

Financial liabilities

Financial liabilities are classified as either financial liabilities 'at FVTPL' or 'other financial liabilities'.

Other financial liabilities

Other financial liabilities (including borrowings and trade and other payables) are initially and subsequently measured at amortized cost using the effective interest method.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

**Financial Instruments (continued)**

Financial liabilities and equity instruments (continued)

De-recognition of financial liabilities

The Group derecognizes financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss.

**Accounts payable and accruals**

Liabilities are recognized for amounts to be paid in the future for goods or services received, whether billed by the supplier or not.

**Provisions**

Provisions are recognized when the Group has an obligation (legal or constructive) arising from a past event, and the costs to settle the obligation are both probable and can be measured reliably. Provisions are reviewed at each reporting date and adjust to reflect current best estimate.

**Contingent liabilities**

A contingent liability is disclosed when the Group has a possible obligation as a result of past event, whose existence will be confirmed only by the occurrence or non-occurrence, of one or more uncertain future events not wholly within the control of the Group; or the Group has a present legal or constructive obligation that arises from past events, but is not probable that an outflow of the resources embodying economic benefits will be required to settle the obligation, or the amount of the obligation cannot be measured with sufficient reliability.

**Employees' end of service benefits**

The Group provides end of service compensation to its employees in accordance with the provisions of the Labor Law applicable in the Kingdom of Saudi Arabia. The entitlement to these benefits is based upon the employees' final salary and length of service, subject to completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Provision is made annually based on valuation done by an independent professional actuary, in accordance with the requirements of IAS 19 "Employee Benefits" using Projected Unit Credit Method. Last valuation was carried out on 30 June 2017.

All past service costs are recognized as an expense immediately. All actuarial gains and losses on defined benefit obligation are recognized in interim condensed consolidated statement of comprehensive income.

**Zakat and taxes**

Zakat is provided for on behalf of the Group and its effectively wholly owned subsidiaries in accordance with the Saudi Arabian fiscal regulations. The foreign subsidiaries provide for income tax liabilities, if any, in accordance with tax regulations of the country in which they operate. Zakat and income tax provisions are charged to the interim condensed consolidated statement of profit or loss and interim condensed consolidated statement of comprehensive income.

Deferred income tax is provided for foreign subsidiaries subject to tax, using the liability method, on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on laws that have been enacted in the respective countries at the reporting date.

**Dividends**

Final dividends are recognized as a liability at the time of their approval by the General Assembly. Interim dividends are recorded when approved by the Board of Directors.

**Revenue**

Revenue from the sale of gold is recognized when the significant risks and rewards of ownership have passed to the buyer; it is probable that economic benefits associated with the transaction will flow to the Group; the sale price can be measured reliably; the Group has no significant continuing involvement; and the costs incurred or to be incurred in respect of the transaction can be measured reliably. Based on the above, sales are recognized when goods are invoiced (at the then gold market prices) and delivered to customers. All the related discounts are deducted from the gross revenue.

Other income is recognized when earned.

**Foreign currency transactions**

Transactions in foreign currencies are translated into Saudi Riyals at the relevant exchange rates prevailing at the time of the respective transactions. Assets and liabilities in foreign currency at the interim condensed consolidated statement of financial position date are translated into Saudi Riyals using the exchange rates prevailing at that date. Realized and unrealized exchange differences on foreign currencies are recognized in the interim condensed consolidated statement of profit or loss.

**Translation of foreign operations**

Financial statements of the foreign subsidiaries are translated into Saudi Riyals using the exchange rates at each interim condensed consolidated statement of financial position date, for assets and liabilities, and the average exchange rates for each period for revenue, expenses, gains and losses. Components of equity, other than retained earnings, are translated at the rates ruling at the date of occurrence of each component. Foreign currency translation adjustments, if material, are recorded in interim condensed consolidated statement of comprehensive income as a separate component of the shareholders' equity.

**Expenses**

Selling and marketing expenses are those which specifically relate to marketing and promotional activities. All other expenses are classified as general and administration expenses and cost of services.

**Operating leases**

Operating leases payments are recognized as expense in the interim condensed consolidated statement of profit or loss on a straight-line basis over the lease term.

**Gold revaluation**

Transactions denominated in gold are recorded in Saudi Riyals at the relevant market rates prevailing at the time of the respective transactions. Asset and liability balances denominated in gold, except for gold inventory, are revalued at the market price ruling at the interim condensed consolidated statement of financial position date. All realized gains and losses and unrealized gains and losses from revaluation of gold related items are recognized in the interim condensed consolidated statement of profit or loss.

**Basic and diluted earnings per share**

The Group presents basic and diluted earnings per share (EPS) for its shareholders. Basic EPS is calculated by dividing the net income or loss attributable to ordinary shareholders of the Parent Company by the weighted average number of ordinary shares outstanding during the year. Diluted EPS is determined by adjusting the net income or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of dilutive potential ordinary shares, if any.

A segment is a distinguishable component of an entity that is engaged either in providing products or services (a business segment) or in providing products or services within a particular economic environment (a geographic segment), which is subject to risks and rewards that are different from those of other segments.

**6. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRSs)**

The Group has not yet applied the following new and revised IFRSs that have been issued and relevant to the Group but are not yet effective:

<u>New and revised IFRSs</u>	<u>Effective for annual periods beginning on or after</u>
IFRS 9 "Financial Instruments" (revised versions in 2009, 2010, 2013 and 2014)	1 January 2018
Amendments to IFRS 7 "Financial Instruments": Disclosures relating to disclosures about the initial application of IFRS 9	When IFRS 9 is first applied
IFRS 7 "Financial Instruments": Disclosures relating to the additional hedge accounting disclosures (and consequential amendments) resulting from the introduction of the hedge accounting chapter in IFRS 9	When IFRS 9 is first applied
IFRS 15 "Revenue from Contracts with Customers"	1 January 2018
IFRS 16 "Leases"	1 January 2019

**Application of new and revised International Financial Reporting Standards (IFRSs)**

Management anticipates that IFRS 15 and IFRS 9 will be adopted in the Group's consolidated financial statements for the annual year beginning 1 January 2018. IFRS 16 will either be adopted for the annual year beginning 1 January 2018 or 1 January 2019. The application of IFRS 9, IFRS 15 and IFRS 16 may have a significant impact on amounts reported and disclosures made in the Group's financial statements in respect of revenue from contracts with customers and the Group's financial assets and financial liabilities. However, it is not practicable to provide a reasonable estimate of effects of the application of these standards until the Group performs a detailed review.

**17. FINANCIAL INSTRUMENTS**

**Fair value measurements of financial instruments**

Assets and liabilities measured at fair value in the interim condensed consolidated statement of financial position are grouped into three levels of fair value hierarchies. This grouping is determined based on the lowest level of significant inputs used in fair value measurement, as follows:

- **Level 1:** quoted prices (unadjusted) in active markets for identical assets or liabilities
- **Level 2:** inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- **Level 3:** inputs for the asset or liability that are not based on observable market data (unobservable inputs).

**19.7 Inventories**

Under SOCPA Standards the Group was carrying its gold inventory at market value. However, as per the IFRS Standards inventories should be carried at lower of cost or net realizable value (NRV). The Group has applied this change in accounting policy retrospectively by adjusting retained earnings and inventories on the date of transition to IFRS.
