CHAIRMAN'S STATEMENT

In the Name of Allah, the Most Gracious, the Most Merciful

Dear Shareholders,

On behalf of the Board of Directors, it gives me great pleasure to present Kingdom Holding Company's annual report and audited financial statements for the year ended December 31, 2013.

The financial results presented today reflect the Company's continued success in implementing its investment strategy and demonstrate the constant dedication and effort of the management team in developing the business. The report also outlines the Company's intention to continue driving investment towards key sectors where our expertise can realize promising growth.

Through our commitment towards excellence, we seek new investment strategies and opportunities to further generate gains within various fields. Our accomplishments were achieved through a comprehensive investment strategy based on in-depth analysis of local, regional and global market data. Kingdom Holding has maintained a methodological approach to investment with diversification at its core. The Company's investment portfolio includes assets from the following sectors: real estate; investments; financial services; hospitality services; hotel management; social networking; health; education; aviation; telecommunications; media; publishing; entertainment; retail; agriculture; and petrochemicals. Moreover, the Company has maintained its influential position in the Saudi market, giving it exceptional stature and presence worldwide.

Kingdom Holding undertakes thorough research and intensive study of promising investment opportunities before making any financial commitments, an approach that has helped the Company achieve optimum results for our business, partnerships and vision. We followed the same method when we purchased a strategic stake in Twitter, the micro-blogging service that today has more than 230 million active users around the world. This investment which has already proven itself to be rewarding has contributed to strengthening the Company's competitive advantage in local and international markets.

Kingdom Holding Company's strategic focus on local investments has achieved remarkable success and enabled the initiation of leading national projects in several sectors of the Saudi economy. The Company has established itself as a role model and demonstrated the importance and the benefits of its investment strategy.

The company has expanded its domestic investments through major real estate projects including the Kingdom Land Project in Riyadh, and through a major real estate project in Jeddah, incorporating the world's tallest tower. Those investments are aligned with the Company's board of directors' vision to invest in the homeland.

This annual report is a transparent presentation of the Company's activities, operations and businesses. It details the success and prosperity we have achieved over the year and which we are confident we will continue to achieve in the future. The report also demonstrates that the past, current and future achievements of Kingdom Holding remain consistent with our long-term investment objectives (God willing). With our proven capabilities and the dedication of the Company's board and executives, we are devoting our efforts, resources and expertise toward greater success and achievement. Kingdom Holding Company is proud to be one of the most successful and diversified investment firms in the world and an elite leading company in Saudi Arabia, the Arab Gulf Region and across the globe.

On a final note, I would like to express my thanks and appreciation to you, our valued shareholders, for your continued confidence and support. Thanks are also due to the Company's Board of Directors and executives for their ongoing efforts. I look forward to another year of further growth and sustained profitability - God willing.

- The investment value of KHC in Twitter company rose by 200% at the closing of the first dealing day in the US stock Market whereby the investment value reached more than half a billion Saudi Riyals.

Dividends Policy

Dividends Distribution to Shareholders is governed by certain rules and regulations stated upon by the Company's bylaws whereby the Company is required to transfer 10% of its net profits after the deduction of Zakat to the statutory reserve. The Assembly General Meeting (AGM) may stop this transfer when it reaches 50% of the Company's paid up capital.

The dividends distribution policy is decided based on the Company's financial performance, market and economic conditions in general in addition to other factors including the needs of prospective investment opportunities, reinvestment, cash flow and capital requirements and business expectations and the effect of those dividends to be distributed on the Company amongst other factors including regulatory considerations.

Moreover, the Board of Directors ratified in its meeting held on Wednesday 20 February 2013 the distribution of quarterly cash dividends from the profits by 1.25% (5% for all the year) from the shares nominal value namely 12.5 Halalas/quarter for each share totaling SR 0.50 for the whole year for a total of SR 137.6 million for each quarter with the total private distribution for the whole year amounting to SR 550.3 million. The Chairman of the Board, HRH Prince Alwaleed Bin Talal Bin Abdulaziz Alsaud has relinquished his 37 Halalas for each share he owns amounting to SR 1302.6 million from his part of the cash distributions proposed for the whole year amounting to 9.25 Halalas per share or the equivalent of SR 325.7 million from his part of the quarterly profits.

Jeddah Tower - the Highest Tower in the World

Dividends Entitlements for the payments were as follows:

- First payment: Dividends entitlement for shareholders registered in the Company records at the end of the Assembly General Meeting (AGM) on 26 March 2013. It was disbursed 2 weeks later.
- Second payment: Dividends entitlement for shareholders registered in the Company records at the end of 30 June 2013. It was disbursed 2 weeks later.
- Third payment: Dividends entitlement for shareholders registered in the Company records at the end of 30 September 2013. It was disbursed 2 weeks later.
- Fourth payment: Dividends entitlement for shareholders registered in the Company records at the end of 31 December 2013. It was disbursed 2 weeks later.

It is to be noted that the shareholders approved the above decision during the fifth Assembly General Meeting (AGM) dated 26 March 2013.

Social Responsibility

The Company, through its local subsidiaries (Trade Centre Company, Kingdom Hospital and Kingdom Schools), has effectively supported human and philanthropic initiatives in the Saudi society, through organization of exhibitions, implementation of awareness programs, support of charity societies and grant of scholarships.

CONSOLIDATED FINANCIAL
STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2013
AND INDEPENDENT AUDITORS' REPORT

DEPENDENT AUDITORS' REPORT

February 23, 2014

To the Shareholders of Kingdom Holding Company:
(A Saudi Joint Stock Company)

Scope of audit

We have audited the accompanying consolidated balance sheet of Kingdom Holding Company (the "Company") and its subsidiaries (collectively referred to as the "Group") as of December 31, 2013 and the consolidated statements of income, cash flows and changes in equity for the year then ended, and the notes from (1) to (33) which form an integral part of the consolidated financial statements. These consolidated financial statements, which were prepared by the Company in accordance with Article 123 of the Regulations for Companies and presented to us with all information and explanations which we required, are the responsibility of the Group's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in Saudi Arabia. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting policies used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

Unqualified opinion

In our opinion, such consolidated financial statements taken as a whole:

- Present fairly, in all material respects, the financial position of the Group as of December 31, 2013 and the results of its operations and its cash flows for the year then ended in conformity with accounting standards generally accepted in Saudi Arabia appropriate to the circumstances of the Group; and
- Comply, in all material respects, with the requirements of the Regulations for Companies and the Company's By-Laws with respect to the preparation and presentation of consolidated financial statements.

The principal activities and the various segments of the Group are described in Note 30.

These financial statements were authorized for issue by the Company's Board of Directors on February 20, 2014.

2 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

2.1 Basis of preparation

The accompanying consolidated financial statements have been prepared under the historical cost convention on the accrual basis of accounting, as modified by revaluation of held for trading and available for sale investments to fair value, and in compliance with accounting standards promulgated by Saudi Organization for Certified Public Accountants.

The accompanying consolidated financial statements include the assets, liabilities and the results of operations of the Company and its subsidiaries. A subsidiary is a company in which the Group has, directly or indirectly, long term investment comprising an interest of more than 50% in the voting capital or over which it exerts a practical control. A subsidiary company is consolidated from the date on which the Group obtains a practical control until the date such control ceases. Significant balances and transactions, including unrealized gains or losses on transactions, between the Group companies have been eliminated in the consolidated financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 2013

(All amounts in Saudi Riyals thousands unless otherwise stated)

Minority interests represent the portion of profit or loss and net assets not held by the Group and are presented separately in the consolidated income statement, consolidated balance sheet and within consolidated statement of changes in equity separately from shareholders' equity.

2.2 Critical accounting estimates and judgments

The preparation of consolidated financial statements in conformity with generally accepted accounting principles requires the use of estimates and assumptions that affect the reported balances of assets and liabilities and disclosure of contingent assets and liabilities at the reporting date and the reported amounts of revenue and expenses during the reporting period. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under circumstances. Although these estimates and judgments are based on management's best knowledge of current events and actions, actual results ultimately may differ from those estimates. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(a) Impairment of trade receivables

An estimate of the collectible amount of trade accounts receivable is made when collection of the full amount is no longer probable. For individually significant amounts, this estimation is performed on an individual basis. Amounts which are not individually significant, but which are past due, are assessed collectively and a provision applied according to the length of time past due and historical recovery rates.

(b) Estimated impairment of goodwill

The Group tests annually whether goodwill has suffered any impairment, in accordance with the accounting policy stated in Note 2.11 (a). The recoverable amounts of cash-generating units have been determined based on appropriate valuation techniques. These calculations require the use of estimates.

(c) Estimated impairment of available for sale investments

The Group determines that available for sale equity financial assets are impaired when there has been a significant and prolonged decline in the fair value below its cost. This determination of what is significant and prolonged requires significant judgment. In making this judgment, the Group evaluates among other factors, the normal volatility in share price, the financial health of the investee, industry sector performance, changes in technology, and operational and financing cash flows. Impairment may be appropriate when there is evidence of deterioration in the financial health of the investee, industry and sector performance, changes in technology, and financing and operational cash flows.

(d) Estimated useful life of property and equipment

Management assesses useful lives and residual value of property and equipment on intended use of assets and the economic lives of the assets. Subsequent changes in circumstances such as technological advances could result in the actual useful lives or residual values differing from the initial estimates. Management has reviewed the residual value and useful lives of major property and equipment and determined that no adjustment is necessary.

2.3 Cash and cash equivalents

For the purposes of the consolidated statement of cash flows, cash and cash equivalents consist of bank balances, cash on hand, and short-term deposits with an original maturity of three months or less.

2.4 Accounts receivable

Accounts receivable are stated at original invoice amount less provision for any uncollectible amounts. A provision for doubtful debts is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. Such provisions are charged to the consolidated income statement and reported under "General and administrative expenses". When account receivable is uncollectible, it is written-off against the provision for doubtful debts. Any subsequent recoveries of amounts previously written-off are credited against "General and administrative expenses" in the consolidated income statement.

2.5 Inventories

Inventories are carried at the lower of cost and market value. Cost is determined using weighted average method. The cost of finished products include the cost of raw materials, labor and production overheads. Net realizable value is the estimated selling price in the ordinary course of business, less the costs of completion and selling expenses. Appropriate provision is made for obsolete and redundant inventory.

2.6 Assets held for sale

The Group considers properties to be assets held for sale when management approves and commits to a formal plan to actively market a property or group of properties for sale and it is probable that the sale will occur within twelve months of the balance sheet date. Upon designation of an asset held for sale, the Group records the carrying value of each property or group of properties at the lower of its carrying value or its estimated fair value, less estimated cost to sell. Assets once classified as held for sale are not depreciated or amortized.

2.7 Investments

(a) Held for trading investments

Held for trading investments in readily marketable securities, which are purchased for trading purposes, are stated at market value and included under current assets. Changes in market value are credited or charged to the consolidated income statement.

(b) Investment in available for sale investments

Investments intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity are classified as available for sale. After initial recognition, investments purchased neither with the intention of being held to maturity nor for trading purposes are re-measured at fair value as follows:

- (i) Fair values of quoted securities are based on available market prices at the reporting date adjusted for any restriction on the transfer or sale of such investments; and
- (ii) Fair values of unquoted securities are based on a reasonable estimate determined by reference to the current market value of other similar quoted investment securities or is based on the expected discounted cash flows. Where fair values cannot be reliably estimated, the Group records such investments at cost.

Unrealized gains and losses are reported as a separate component of shareholders' equity until the investment is derecognized or the investment is determined to be impaired. When designation of investments is changed to be held for trading, the related unrealized gain/losses on these investments are recycled from equity and recognized in the consolidated income statement.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 2013

(All amounts in Saudi Riyals thousands unless otherwise stated)

(c) Associates and joint ventures

Associates and joint ventures are entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates and joint ventures are accounted for using the equity method of accounting and are initially recognized at cost. The Group's investment in associates and joint ventures includes goodwill identified on acquisition, net of any accumulated amortization and impairment losses, if any. Under the equity method, investments in associates and joint ventures are carried in the consolidated balance sheet at cost plus post-acquisition changes in the Group's share of net assets of the associates and joint ventures. The consolidated income statement reflects the Group's share in the results of associates and joint ventures and the Group's share of post-acquisition movements in reserves, if any, is recognized in equity. When the Group's share of losses in an associate and joint venture equals or exceeds its interest in the associate and joint venture, including any other unsecured receivables, the Group does not recognize further losses, unless it has incurred obligations or made payments on behalf of the associate or joint venture.

Unrealized gains on transactions between the Group and its associates and joint ventures are eliminated to the extent of the Group's interest in the associates and joint ventures. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

Dilution gains and losses arising in investments in associates and joint ventures are recognized in the consolidated income statement.

(d) Investments in real estate

Real estate investments that are being developed are recorded at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business less cost to complete, re-development and selling expenses. Investments in real estate are derecognized when either they have been disposed off or when the investment in real estate is permanently withdrawn from use and no future economic benefits are expected from its disposal. Any gains or losses on the retirement or disposal of investments in real estate are recognized in the consolidated income statement in the period of the retirement or disposal.

2.8 Business combination and goodwill

Business combinations are accounted for using the purchase method of accounting. This involves recognizing identifiable assets (including previously unrecognized intangible assets) and liabilities (including contingent liabilities and excluding future restructuring) of the acquired business at fair value.

Goodwill acquired in a business combination is initially measured at cost, being the excess of the cost of the business combination over the Group's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities. Following initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units, or group of cash-generating units, that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or groups of units.

Each unit or group of units to which the goodwill is allocated represents the lowest level within the Group at which the goodwill is monitored for internal management purposes.

Where goodwill forms part of a cash-generating unit (or group of cash-generating units) and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill

disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

When subsidiaries are sold, the difference between the selling price and the net assets plus cumulative transaction difference and goodwill is recognized in the consolidated income statement.

2.9 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is considered the fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at each financial year end. Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cash-generating unit level. Such intangibles are not amortized. The useful life of an intangible asset with an indefinite life is reviewed annually to determine whether indefinite life assessment continues to be supportable. Amortization expense is reported in the consolidated income statement.

2.10 Property and equipment

Property and equipment are carried at cost less accumulated depreciation and any impairment in value. Depreciation is charged to the consolidated income statement. Land and construction work in progress are not depreciated. The cost less estimated residual value of other property and equipment is depreciated on a straight line basis over the following estimated useful lives of the assets:

	Number of years
Buildings	20 to 50 years
Equipment	2 to 20 years
Furniture and fixtures	2 to 20 years
Others	4 to 10 years

Leasehold improvements are amortized on a straight-line basis over the shorter of the useful life of the improvement or the term of the lease.

Gains and losses on disposals are determined by comparing proceeds with carrying amount and are included in the consolidated income statement.

Maintenance and normal repairs which do not materially extend the estimated useful life of an asset are charged to the consolidated income statement as and when incurred. Major renewals and improvements, if any, are capitalized and the assets so replaced are retired.

2.11 Impairment

(a) Tangibles and Intangible assets

At each fiscal year end, the Group reviews the carrying amounts of its long term tangible and intangible assets to determine whether there is any indication that those assets are impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment

(All amounts in Saudi Riyals thousands unless otherwise stated)

loss. Recoverable amounts are determined on the basis of value-in-use calculations. Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount. Impairment losses are recognized in the consolidated income statement.

(b) Financial assets

An assessment is made at each balance sheet date to determine whether there is objective evidence that a specific financial asset may be impaired. If such evidence exists, any impairment loss is recognized in the consolidated income statement. Impairment is determined as follows:

- (i) For assets carried at fair value, impairment is the difference between the carrying amount and fair value, less any impairment loss previously recognized in the consolidated income statement; and
- (ii) For assets carried at cost, impairment is the difference between carrying value and the present value of future cash flows discounted at the current market rate of return for a similar financial asset.

For impairment of available for sale investments, the unrealized gain or loss previously reported in shareholders' equity is included in the consolidated income statement.

Where an impairment loss subsequently reverses, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but the increased carrying amount should not exceed the carrying amount that would have been determined, had no impairment loss been recognized for the assets or cash-generating unit in prior years. A reversal of an impairment loss is recognized as income immediately in the consolidated income statement. Impairment losses recognized on equity investments classified as available for sale and goodwill are not reversible.

2.12 Loans and bank borrowings

Bank borrowings and term loans are recognized initially at fair value and any differences between the proceeds and the redemption value are recognized in the consolidated income statement over the period of the loan using the effective interest method. Loans are classified as current liabilities unless the Group has an unconditional right and intention to defer settlement of the liability for at least twelve months after the balance sheet date.

Borrowing costs directly attributable to the construction of qualifying assets, which are assets that necessarily take a substantial period of time to prepare for their intended use, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use. All other borrowing costs are recognized as an expense in the consolidated income statement when incurred.

2.13 Accounts payable and accruals

Liabilities are recognized for amounts to be paid in the future for goods or services received, irrespective of date of billing.

2.14 Provisions

Provisions are recognized when; the Group has a present legal or constructive obligation as a result of a past event; it is probable that an outflow of resources will be required to settle the obligation; and the amount can be reliably estimated.

2.15 Pension and other post employment benefits

Certain companies within the Group operate defined benefit pension plans and other post retirement plans, primarily life insurance and health care coverage, for certain grades of employees. Pension benefits are based principally on years of service and compensation rates near retirement. The cost of these benefit plans is determined by an actuary using the projected benefit method pro-rated based on the employees' terms of service and management's best estimate of expected plan investment performance, salary escalation, retirement ages of employees and expected health care costs.

In certain jurisdictions, the Group participates in various defined contribution pension schemes in accordance with the local conditions and practices in the countries in which the subsidiaries operate. The amount charged to the consolidated income statement in respect of pension costs is the contributions payable in the year. Differences between contributions payable during the year and contributions actually paid are shown as either accrued liabilities or prepaid assets in the consolidated balance sheet.

2.16 Employees' termination benefits

Employee termination benefits required by Saudi Labor and Workman Law are accrued by the Company and its Saudi Arabian subsidiaries and charged to the consolidated income statement. The liability is calculated; at the current value of the vested benefits to which the employee is entitled, should the employee leave at the balance sheet date. Termination payments are based on employees' final salaries and allowances and their cumulative years of service, as stated in the laws of Saudi Arabia.

The foreign subsidiaries provide currently for employee termination and other benefits as required under the laws of their respective countries of domicile.

2.17 Statutory reserve

In accordance with the Saudi Arabian Regulations for Companies, the Company sets aside 10% of its net income (after absorbing accumulated deficit) in each year to a statutory reserve until such reserve equals to one half of the share capital. This reserve is not available for distribution to the shareholders of the Company.

2.18 Revenue

Hotel revenues are recognized when services are performed or when food and beverages are sold. Other revenues are recognized when services are provided and ultimate collection is reasonably assured. Management fees and other revenues from managed properties are recognized when performance conditions have been met, in accordance with the terms specified in the related management contracts.

Revenue from real estate leasing operations is recognized on accrual basis, effectively over the term of the lease.

Revenue from sale of real estate is recognized when the risks and rewards of ownership are transferred to the buyer, which is deemed to take place when legal title transfers to the buyer. However, in certain circumstances equitable interest in the land may vest with the buyer before legal title passes and therefore risks and rewards of ownership are transferred at that stage. In such cases, provided that the Group has no further substantive act to complete in connection with the sale of land, revenue is recognized when equitable interest in the land passes to the buyer.

Dividend income is recognized when the right to receive the dividends is established. Commission income is recognized as the commission accrues.

(All amounts in Saudi Riyals thousands unless otherwise stated)

2.19 Expenses

Operating costs of the Group are reported as hotels and other operating costs. Other expenses, including selling and marketing expenses which are not material, are classified as general and administration expenses. Development costs are capitalized only when economic feasibility of the project has been demonstrated. In the absence of economic feasibility, such cost is expensed when incurred.

2.20 Zakat and taxes

(a) Zakat and income taxes

The Company is subject to Zakat in accordance with the regulations of the Department of Zakat and Income Tax (the "DZIT"). Foreign shareholders in the consolidated Saudi Arabian subsidiaries are subject to income taxes. Income tax provisions related to the foreign shareholders in such subsidiaries are charged to the minority interest. Provision for Zakat for the Company and Zakat related to the Company's ownership in the Saudi Arabian subsidiaries is charged to the consolidated income statement. Additional amounts payable, if any, at the finalization of final assessments are accounted for when such amounts are determined.

Foreign subsidiaries are subject to income taxes in their respective countries of domicile. Such income taxes are charged to the consolidated income statement.

(b) Deferred tax assets and liabilities

Deferred tax assets and liabilities are recognized for all temporary differences at the current rates of taxation applicable in the relevant jurisdiction. The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available in the near future to allow all or part of the deferred tax asset to be utilized.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

(c) Other

The Company and its Saudi Arabian subsidiaries withhold taxes on certain transactions with non-resident parties in the Kingdom of Saudi Arabia as required under Saudi Arabian Income Tax Law.

2.21 Leases

Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease payments are recognized as an expense in the consolidated income statement on a straight-line basis over the lease term.

2.22 Segmental reporting

(a) Business segment

A business segment is a group of assets, operations or entities:

- (i) engaged in revenue producing activities;

- (ii) results of its operations are continuously analyzed by management in order to make decisions related to resource allocation and performance assessment; and
- (iii) financial information is separately available.

(b) Geographical segment

A geographical segment is a group of assets, operations or entities engaged in revenue producing activities within a particular economic environment that are subject to risks and returns different from those operating in other economic environments.

2.23 Foreign currency translations

The consolidated financial statements are presented in Saudi Riyals, which is the Company's functional and Group's presentation currency. Each subsidiary in the Group determines its own functional currency, and as a result, items included in the financial statements of each subsidiary are measured using that functional currency.

At the subsidiary level, transactions in foreign currencies are initially recorded in the functional currency rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the balance sheet date. All differences are taken to the consolidated income statement.

At the consolidation level, financial statements of foreign subsidiaries are translated into the Group's presentation currency using the exchange rate at each balance sheet date for assets and liabilities, and the average exchange rate for each period for revenues and expenses. Components of equity, other than retained earnings, are translated at the rate ruling at the date of occurrence of each component. Translation adjustments are recorded as a separate component of equity.

2.24 Dividends

Dividends are recorded in the consolidated financial statements in the period in which they are approved by shareholders of the Company.

Trade receivables include Saudi Riyals 270 million (2012: Saudi Riyals 300 million) resulting from the sale of a parcel of land during the last quarter of 2012 by one of the Group's subsidiary, KRED. This receivable has been pledged as collateral against a loan obtained during the year ended December 31, 2013 by KRED.

Trade receivables are expected, on the basis of past experience, to be fully recoverable. Generally, it is not a practice of the Group to obtain collateral over trade receivables and the vast majority is, therefore, unsecured.

The shareholders in the annual General Assembly meeting held on March 27, 2012 approved the purchase of land from the Principal Shareholder amounting to Saudi Riyals 431 million as recommended by the Company's Board of Directors.

- (i) During the year ended December 31, 2012, the Company sold a portion of land to Trade Centre Company Limited (TCCL), an associate. This land was acquired from the Principal Shareholder during the year at a cost of Saudi Riyals 319.3 million. The Company recognized a gain of Saudi Riyals 83.6 million on this transaction, which represents portion of the gain attributable to the equity of the other shareholders in TCCL.

Amounts due from / to affiliates are shown in Notes 6 and 17, respectively.

Net carrying amount	14,246,498	10,712,875

Certain available for sale investments are used as collateral against bank borrowings and term loans of the Company and its subsidiaries (Note 15).

As of December 31, 2013, the Company has performed an assessment to determine whether the decline in value of its available for sale investments is temporary or non-temporary. Based on this assessment, management has concluded that such a decline is considered to be temporary. In reaching to this conclusion, management has considered several factors, including: the financial performance of the investee, the fair value of the investment and information from financial analysts about the forecasted market price.

Management will continue to monitor and review its available for sale investments and assess the impact of changes in the factors referred to above to determine the need for any further impairment.

10 Investments in associates and joint venture

13 Intangible assets

Intangible assets comprise the following:

	2013	2012
Goodwill	<u>1,802,252</u>	1,798,637
Other intangible assets	<u>58,413</u>	59,483
	<u>1,860,665</u>	<u>1,858,120</u>

Goodwill represents the excess of consideration paid by the Group over its interest in the net fair value of the subsidiary's identifiable assets, liabilities and contingent liabilities. Most of the goodwill balance shown above resulted from the Group's acquisition of major subsidiaries in the hotel business.

Movement in goodwill during the year is set out below:

	2013	2012
January 1	<u>1,798,637</u>	1,790,594
Effect of foreign exchange, disposals and others	<u>3,615</u>	8,043
December 31	<u>1,802,252</u>	<u>1,798,637</u>

Other intangible assets principally include brand names and management contracts that relate to subsidiaries that operate hotel properties. Such contracts have definite lives and are amortized over their useful economic lives.

Impairment:

i. Impairment test

Goodwill is allocated to the Group's cash-generating units identified which is based on the business segments. The Group has tested separately recognised goodwill for impairment.

ii. Basis of determining recoverable amounts

Hotels

The recoverable amount has been determined based on value-in-use, using either discounted cash flow analysis, or based on expert valuation reports. The cash flow projections are based on financial budgets that are approved by management. The discount rates and terminal capitalization rate ranged between 7.75% to 15% and 4.25% to 10%, respectively, depending on the geographical territories in which the hotels are located.

Management has adopted a 5 year period to assess its value-in-use except for three hotels in the Middle East where 10 year cash flow projections have been used. Management considers that a five year period would be too short of a period for impairment testing purposes due the current political situation in such countries in the Middle East.

Retail

The recoverable value has been determined based on value-in-use using discounted cash flow analysis. The key assumptions used include a risk adjusted discount rate, growth rates based on management's expectation for market development and historical earnings. During the year ended December 31, 2013, management

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

determined that the carrying value of the retail cash-generating unit exceeded the recoverable value by Saudi Riyals 20 million. This decline, considered permanent in nature, was recognised as an impairment loss in the consolidated income statement (Note 25).

Others

Goodwill allocated to the School cash-generating unit amounts to Saudi Riyals 8.9 million (2012: Saudi Riyals 8.9 million) and management is of the opinion that this goodwill is not impaired.

Zakat for the year represents the amount due on the Company and its local subsidiaries. The significant components of Zakat base under Zakat and income tax regulations are principally comprised of equity, provisions at the beginning of year, long-term borrowings and adjusted net income, less deductions for the net book value of long-term assets and certain other items. The differences between the financial and adjusted net income are mainly due to provisions and other items which are not allowed in the calculation of adjusted net income subject to Zakat. The Company's subsidiaries that are incorporated outside the Kingdom of Saudi Arabia are subject to related tax laws of the country of operations. Foreign dividends are subject to withholding taxes.

Status of final assessments

The Company has received final assessments from the Department of Zakat and Income Tax ("DZIT") up to year 2002. During 2012, the Company received assessment from the DZIT for the years 2003 to 2010 resulting in additional Zakat assessment. Management has seriously contested the matters included in the assessment and has filed an appeal providing its detailed arguments against the assessment.

b) Income tax

The Group's subsidiaries which are incorporated outside the Kingdom of Saudi Arabia are subject to tax laws of the country of incorporation. The income tax payable was approximately Saudi Riyals 60 million and Saudi Riyals 44 million as at December 31, 2013 and 2012, respectively (Note 17).

25 Reversal of impairment losses

During the year ended December 31, 2013, the Company reviewed the carrying value of certain investments based on an updated valuation. This resulted in a net increase in the carrying value of Saudi Riyals 151.3 million (2012: Saudi Riyals 186 million). Accordingly such increase, net of impairment charge of Saudi Riyals 20 million (see Note 13), was recorded as a reversal of impairment loss, which was initially recorded in prior years against these investments.

26 Commitments

(a) Capital commitments

The Group has on-going activities to construct and renovate hotels, and these developments are at various stages of completion. The total outstanding capital commitments relating to such developments as of December 31, 2013 amounted to Saudi Riyals 4 million (2012: Saudi Riyals 3.4 million).

(b) Operating lease commitments

The Group has various commitments under operating leases. Future minimum annual payments under these leases are as follows:

	<u>47,234</u>	<u>59,064</u>

27 Contingencies

The Company and its subsidiaries are defendant in various legal claims arising in the normal course of business. Provision has been established for certain claims, based on the information presently available. Management believes that the existing liabilities provided for such claims are adequate. Any additional liabilities including any potential Zakat and tax assessments that may result in connection with other claims are not expected to have a material effect on the Group's financial position or results of operation.

At December 31, 2013, the Group has outstanding letters of guarantee amounting to Saudi Riyals 11.6 million (2012: Saudi Riyals 11 million) issued in the normal course of business.

28 Financial instruments and risk management

The Group's activities expose it to a variety of financial risks: market risk (including currency risk, fair value and cash flow interest rate risks and price risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Group's financial performance.

Risk management is carried out by senior management under policies approved by the board of directors. The most important types of risk are credit risk, currency risk, price risk and fair value and cash flow interest rate risks.

Financial instruments carried on the balance sheet principally include cash and cash equivalents, investments, receivables and certain other assets, bank borrowings, term loans, payables and certain other liabilities. The particular recognition methods adopted are disclosed in the individual policy statements associated with each item.

Financial asset and liability is offset and net amounts reported in the financial statements, when the Group has a legally enforceable right to set off the recognized amounts and intends either to settle on a net basis, or to realize the asset and liability simultaneously.

Fair value and cash flow interest rate risk

Fair value and cash flow interest rate risks are the exposures to various risks associated with the effect of fluctuations in the prevailing interest rates on the Group's financial positions and cash flows. The Group is subject to interest rate risk on its interest bearing assets and liabilities, including loans and bank borrowings and time deposits which are at floating rates of interest.

The sensitivity of the income/expense is the effect of the assumed changes in interest rates on the Group's net results for one year, based on the floating rate financial assets and financial liabilities held at December 31, 2013 and 2012.

Equity price risk

Equity price risk is the risk that the fair value of equity securities may decrease as the result of changes in the levels of equity indices and the value of individual equities. The Group's available for sale investments and held for trading are subject to price risk as its underlying investments are equity instruments. To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio to the extent possible.

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and will cause the other party to incur a financial loss. The Group seeks to manage its credit risk with respect to customers by setting credit limits for individual customers and by monitoring outstanding receivables.

The table below shows the maximum exposure to credit risk for the significant components of the balance sheet:

	Note	2013	2012
Bank balances and short term deposits	3	1,006,823	805,052
Accounts receivable	5	520,885	538,775
Other current assets (Due from affiliates and others)	6	268,634	261,804
Other long term assets (Refundable deposits and others)	14	64,411	60,935
		<u>1,860,753</u>	<u>1,666,566</u>

Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in raising funds to meet commitments associated with financial instruments. Liquidity risk may result from an inability to sell a financial asset quickly at an amount close to its fair value. Liquidity risk is managed by monitoring on a regular basis that sufficient funds are available through committed banking facilities to meet any future commitments. The Group's terms of sales require amounts to be paid around 30 days of the date of sale. Trade payables are normally settled within 60 days of the date of purchase.

Currency risk

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. The Group monitors the fluctuation in currency exchange rates and manages its effect on the consolidated financial statements accordingly.

29 Fair values

Fair value is the amount for which an asset could be exchanged, or a liability settled between knowledgeable willing parties in an arm's length transaction. As the Group's financial instruments are compiled under the historical cost convention, except for available for sale and held for trading investments which are carried at fair values, differences can arise between the book values and fair value estimates.

The Group estimates the fair values of its financial instruments based on appropriate valuation methodologies. However, considerable judgment is necessary to develop these estimates. Accordingly, estimates of fair values are not necessarily an indicative of what the Group could realize in a current market exchange. The use of different assumptions or methodologies may have a material effect on the estimated fair value amounts.

The Group has determined that the fair values of their financial instruments at year end approximate their carrying amounts.
