The significant accounting policies summarized below that were adopted in the preparation of the interim financial statements, are in conformity with those described in the annual audited financial statements for the year ended 31 December 2013. The interim financial statements and the accompanying notes should be read in conjunction with the annual audited financial statements and the related notes for the year ended 31 December 2013.

*Accounting convention*

These interim financial statements have been prepared on a historical cost basis using the accrual basis of accounting.

*Use of estimates*

The preparation of interim financial statements in conformity with generally accepted accounting standards in the Kingdom of Saudi Arabia, requires the use of estimates and assumptions that affect the reported amounts of assets, and liabilities and disclosure of contingent assets and liabilities at the date of the interim financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of current events and actions, actual results ultimately may differ from those estimates.

*Revenue recognition*

Revenue from sales is recognized when goods are delivered and services are rendered to customers. Rental income is recognized on a straight line basis over the term of the lease.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

*Investment*

*Investment in jointly controlled entity*

A joint venture is contractual arrangements whereby the Company and other parties undertake an economic activity that is subject to joint control, i.e the strategic financial and operating policy decisions relating to the activities require the unanimous consent of the parties sharing control. Joint venture arrangements that involve the establishment of a separate entity in which each party has an interest are referred to as "jointly controlled entities". The Company applies the equity method of accounting for its interests in jointly controlled entities.

Under the equity method, the interest in the jointly controlled entity is carried in the interim balance sheet at cost as adjusted by post-incorporation changes in the Company's share of the net assets of the jointly controlled entity, less any impairment in the value of individual investment.

*Deferred costs*

Deferred costs represent key money paid for renting new petrol stations in the Kingdom of Saudi Arabia. Deferred costs are amortized, using the straight line method, over the period of the contracts.

*Property and equipment*

Property and equipment are stated at cost less accumulated depreciation and any impairment in value. Depreciation is provided over the estimated useful lives of the applicable assets using the straight line method. Lease hold improvements are amortized over the shorter of the estimated useful life or term of the lease. The rates of depreciation of the principal classes of assets are as follows:

	<u>Percentage</u>
Buildings	3
Leasehold improvements	shorter of lease period/useful life
Machinery and equipment	10
Furniture and fixtures	10
Trucks	7.14 with 20% salvage value
Vehicles	15 - 25
Computers	12.5 - 25
Tools	12-20

Expenditure for repair and maintenance are charged to interim statement of income. Betterments that increase the value or materially extend the life of the related assets are capitalized.

*Impairment*

The Company periodically reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. Where it is not possible to estimate the recoverable amount of an individual asset the Company estimates the recoverable amount of the cash generating unit which the asset belongs.

If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount. Impairment losses are recognized as expenses immediately in the interim statement of income.

Where an impairment loss subsequently reverses, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset or cash-generating unit in prior year. A reversal of an impairment loss is recognized as income immediately in the interim statement of income.
