We conducted our review in accordance with the Standard on Review of Interim Financial Information issued by the Saudi Organization for Certified Public Accountants (“SOCPA”). A limited review consists principally of applying analytical procedures to financial data and information and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with Generally Accepted Auditing Standards in the Kingdom of Saudi Arabia, the objective of which is the expression of an opinion on the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Conclusion

Based on our limited review, we are not aware of any material modifications that should be made to the accompanying interim condensed financial statements for them to be in conformity with IAS 34.

We draw attention to the following:

1. These interim condensed financial statements are prepared in accordance with International Financial Reporting Standards and not in accordance with the accounting standards generally accepted in the Kingdom of Saudi Arabia; and
2. We draw attention to note 2 to the interim condensed financial statements which sets out the fact that the Board of Directors of the Company has decided to recommend to the shareholders of the Company, not to pursue the transfer of insurance portfolios which were disclosed in the prospectus issued for initial public offering by the Company. (ii) DETERMINATION OF FAIR VALUE AND FAIR VALUE HIERARCHY

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal, or in its absence, the most advantageous market to which the Company has access at that date. Consequently, differences can arise between the carrying values and fair value estimates. The Company's financial assets consist of cash and cash equivalents, receivables, reinsurers' share of unearned premium and outstanding claims, other assets, investments, statutory deposits and accrued income and its financial liabilities consist of outstanding claims, reinsurance balance payable and accrued expenses and other liabilities.

The fair values of financial assets that are traded in active market are based on quoted market prices or dealer price quotations. For all other financial instruments the fair value is based on other valuation techniques. These are not materially different from their carrying values at the financial position date.

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments:

Level 1: quoted prices in active markets for identical assets or liabilities (i.e. without modification or repacking).

Level 2: quoted prices in active markets for similar financial assets and liabilities or other valuation techniques for which all significant inputs are based on observable market data; and

Level 3: prices based on valuation techniques for which significant inputs are not based on observable market data.

The table below presents the financial instruments at their fair values based on their fair value hierarchy.
