Accounting convention

The interim financial statements are prepared under the historical cost convention.

Use of estimate

The preparation of interim financial statements in conformity with generally accepted accounting principles requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the interim financial statements and the reported amounts of revenue and expenses during the reporting period.

Cash and cash equivalents

Cash and cash equivalents consist of bank balances, cash on hand and Murabaha investment that is readily convertible into known amounts of cash and has original maturities of three months or less, when purchased.

Inventories

Inventories are stated at the lower of cost and market value. Costs are those expenses incurred in bringing each product to its present location and condition and calculated on the following basis:

Spare parts and raw materials	-	purchase cost on a weighted average basis.
Finished goods and work in progress	-	cost of direct materials and labour plus attributable overhead based on normal level of activity.
