### SAUDI ARABIAN MINING COMPANY (MA'ADEN) (A Saudi Arabian joint stock company)

Statement of Directors' responsibilities for the preparation and approval of the consolidated interim financial statements for the quarter and six months ended June 30, 2014 (Unaudited)

The following statement, which should be read in conjunction with the independent auditor's responsibilities stated in the independent auditor's review report, set out on page 4, is made with a view to distinguish the responsibilities of management and those of the independent auditors in relation to the consolidated interim financial statements of Saudi Arabian Mining Company (Ma'aden) (the "Company") and its subsidiaries (the "Group")

Management is responsible for the preparation of the consolidated interim financial statements that present fairly the consolidated interim financial position of the Group as at June 30, 2014, the results of its operations, changes in equity and cash flows for the quarter and six months then ended, in accordance with the accounting standards issued by the Saudi Organization for Certified Public Accountants ("SOCPA").

In preparing the consolidated interim financial statements, the management is responsible for:

- selecting suitable accounting policies and applying them consistently;
- making judgments and estimates that are reasonable and prudent;
- stating whether SOCPA standards have been followed, subject to any material departures disclosed and explained in the consolidated interim financial statements and
- preparing and presenting the consolidated interim financial statements on a going concern basis, unless it is inappropriate to presume that the Group will continue its business for the foreseeable future.

The management is also responsible for:

- designing, implementing and maintaining an effective system of internal controls throughout the Group;
- maintaining statutory accounting records in compliance with local legislation and accounting standards in the respective jurisdictions in which the Group operates;
- taking steps to safeguard the assets of the Group and
- · detecting and preventing fraud and other irregularities.

The consolidated interim financial statements for the quarter and six months ended June 30, 2014 set out on pages 5 to 63, were approved and authorized for issue by the Board of Directors on July 15, 2014 and signed on its behalf by:

Engr. Khalid H. Al-Senani Authorized by the Board

Engr. Khalid Al Mudaifer President and Chief Executive Officer Mr. Khalid Al-Rowais Chief Financial Officer

Independent auditor's review report to the shareholders of Saudi Arabian Mining Company (Ma'aden) (A Saudi Arabian Joint Stock Company)

### Scope of review

We have reviewed the accompanying consolidated interim statement of financial position of Saudi Arabian Mining Company "Ma'aden" (the "Company") and its subsidiaries (collectively referred to as the "Group") as at June 30, 2014 and the related consolidated interim statements of income, changes in equity and cash flows for the quarter and the six months then ended and the notes 1 to 48 which form an integral part of the consolidated interim financial statements. These consolidated interim financial statements are the responsibility of the Group's management and have been prepared by them and submitted to us with all the information and explanations which we required.

We conducted our limited review in accordance with the Standard on Review of Interim Financial Reporting issued by the Saudi Organization for Certified Public Accountants. A limited review consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the consolidated interim financial statements taken as a whole. Accordingly, we do not express such an opinion.

### Conclusion

Based on our limited review, we are not aware of any material modifications that should be made to the accompanying consolidated interim financial statements for them to be in conformity with accounting standards generally accepted in the Kingdom of Saudi Arabia.

For Ernst & Young

Rashid S. AlRashoud Certified Public Accountant

SAUDI ARABIAN MINING COMPANY (MA'ADEN)
(A Saudi Arabian joint stock company)
Notes to the consolidated interim financial statements for the quarter and six months ended June 30, 2014 (Unaudited)

MA'ADEN

(All amounts in Saudi Riyals unless otherwise stated)

### 1. General information

Saudi Arabian Mining Company ("Ma'aden") (the "Company") was formed as a Saudi joint stock company pursuant to Royal Decree No. M/17 dated 14 Zul Qaida 1417H (corresponding to March 23, 1997) and the Council of Ministers Resolution No. 179 dated 8 Zul Qaida 1417H (corresponding to March 17, 1997), with Commercial Registration No. 1010164391 dated 10 Zul Qaida 1421H (corresponding to February 4, 2001). The Company has an authorized share capital of SAR 9,250,000,000 (Nine billion and two hundred fifty million Saudi Riyals) divided into 925,000,000 (Nine hundred and twenty five million) ordinary shares with a nominal value of SAR 10 each.

The objectives of the Company and its subsidiaries (the "Group") are to be engaged in various projects related to all stages of the mining industry, including development, advancement and improvement of the mineral industry, mineral products and by-products. These activities exclude:

- petroleum and natural gas and materials derived there from;
- any and all hydrocarbon substances, products, by-products and derivatives; and
- activities related to all stages of the oil industry and the industries associated therewith and supplementary thereto.

The Group's principal mining activities are at the Mahd Ad' Dahab, Al-Hajar, Bulghah, Al-Amar, Sukhaybarat, Al Jalamid, Az Zabirah and Al-Ghazallah mines. Currently the Group mainly mines gold, phosphate rock, low-grade bauxite, kaolin and magnesite.

The Group is involved in the following two major projects, both of which are in their development stages:

### Aluminum project

The Group's objective with the aluminum project is to develop the bauxite mine, the alumina refinery, smelter and rolling mill as well as a power plant for the production of aluminum and related products in the Kingdom of Saudi Arabia. In December 2009, the Company entered into a joint venture agreement with Alcoa Incorporated, ("Alcoa Inc.") for the development of the aluminum project. The Company has a 74.9% interest in the aluminum project and Alcoa Inc. has a 25.1% interest. The estimated capital cost of the project is SAR 40.5 billion. Alcoa Inc. has reimbursed the Company for 25.1% of the aluminum project's costs incurred by the Company before Alcoa Inc.'s participation.

On February 14, 2012 the Board of Directors approved a plan developed by Ma'aden in collaboration with their joint venture partner Alcoa Inc. (Note 27) to extend the product mix of their aluminum complex, currently under construction at Ras Al Khair, to include:

- automotive heat treated and non-heat treated sheet.
- · building and construction sheet, and
- foil stock sheet

### Phosphate production facility

On March 19, 2013, Ma'aden signed Heads of Agreement with The Mosaic Company ("Mosaic") and SABIC to jointly develop a fully integrated phosphate production facility located at the King Abdullah Project for the development of Wa'ad Al Shamal Mineral Industrial City, in the Northern Region, near the city of Turayf in the Kingdom of Saudi Arabia. Ma'aden, Mosaic and SABIC will own 60%, 25% and 15% of the joint venture respectively. On August 5, 2013, the shareholders agreement to jointly develop a fully integrated phosphate production facility was signed by Ma'aden, Mosaic and SABIC (Note 27 and 39).

This project is based on the exploitation of the Al-Khabra phosphate deposit for which Ma'aden owns the mining license and includes the utilization of captive national resources such as groundwater and sulfur, and taking advantage of the existing railway infrastructure, linking the Northern Borders Province to Ras Al Khair in the Eastern Province to have access to the port facilities at the Arabian Gulf. The estimated capital cost of the project is SAR 26 billion.

(All amounts in Saudi Riyals unless otherwise stated)

### 2. Group structure

The Company has the following subsidiaries and jointly controlled entity, all incorporated in the Kingdom of Saudi Arabia:

|   |                           | Effe     | ctive owners | hip        |
|---|---------------------------|----------|--------------|------------|
|   |                           | June 30, | June 30, De  | cember 31, |
| Subsidiaries  | Type of company           | 2014     | 2013         | 2013       |
| Ma'aden Gold and Base Metals Company ("MGBM")           | Limited liability company | 100%     | 100%         | 100%       |
| Ma'aden Infrastructure Company ("MIC")                  | Limited liability company | 100%     | 100%         | 100%       |
| Industrial Minerals Company ("IMC")                     | Limited liability company | 100%     | 100%         | 100%       |
| Ma'aden Aluminum Company ("MAC")                        | Limited liability company | 74.9%    | 74.9%        | 74.9%      |
| Ma'aden Rolling Company ("MRC")                         | Limited liability company | 74.9%    | 74.9%        | 74.9%      |
| Ma'aden Bauxite and Alumina Company ("MBAC")            | Limited liability company | 74.9%    | 74.9%        | 74.9%      |
| Ma'aden Phosphate Company ("MPC")                       | Limited liability company | 70%      | 70%          | 70%        |
| Ma'aden Wa'ad Al Shamal Phosphate<br>Company ("MWASPC") | Limited liability company | 60%      | -8           | -          |
| Jointly controlled entity                               |                           |          |              |            |
| Sahara and Ma'aden Petrochemical Company ("SAMAPCO")    | Limited liability company | 50%      | 50%          | 50%        |

The financial year end of all the subsidiaries and jointly controlled entity coincide with that of the parent company.

### MGBM

The company was incorporated in the Kingdom of Saudi Arabia, on August 9, 1989. The objectives of the company are:

- the exploration and mining of gold and associated minerals within their existing mining lease area by way of drilling, mining, concentrating, smelting and refining;
- extract, refine, export and sell such minerals in their original or refined form; and
- construct, operate and maintain all mines, buildings, highways, pipelines, refineries, treatment plants, communication systems, power plants and other facilities necessary or suitable for the purposes of the lease.

### MIC

The company was incorporated in the Kingdom of Saudi Arabia on August 17, 2008. The objectives of the company are to:

- manage the infrastructure project to develop, construct and operate the infrastructure; and
- provide services to Ras Al-Khair area and other mining and industrial locations in the Kingdom of Saudi Arabia.

### IMC

The company was incorporated in the Kingdom of Saudi Arabia on March 31, 2009. The objectives of the company are:

- the exploitation of industrial minerals within the existing mining lease area by way of drilling, mining, concentrating, smelting and refining; and
- extract, refine, export and sell such minerals in their original or refined form.

The company currently operates a kaolin and low grade bauxite mine in the central zone of Az Zabirah and a high grade magnesite mine and processing plant at Al Madinah Al Munawarah which partially commenced operations during 2011 and the remaining project is still in development stage.

### SAUDI ARABIAN MINING COMPANY (MA'ADEN)

(A Saudi Arabian joint stock company)

(All amounts in Saudi Riyals unless otherwise stated)

### MAC

The company was incorporated in the Kingdom of Saudi Arabia on October 10, 2010 and is owned:

- 74.9% by Saudi Arabian Mining Company ("Ma'aden") and
- 25.1% by Alcoa Saudi Smelting Inversiones S.L. ("ASSI"), a foreign shareholder, a company wholly owned by Alcoa Incorporated ("Alcoa Inc."), which is accounted for as a non-controlling interest in these consolidated interim financial statements.

The objectives of the company are the production of:

- aluminum ingots;
- aluminum T shape ingots;
- aluminum slabs; and
- aluminum billets.

The company is currently in its project development phase.

### MRC

The company was incorporated in the Kingdom of Saudi Arabia on October 10, 2010 and is owned:

- 74.9% by Saudi Arabian Mining Company ("Ma'aden") and
- 25.1% by Alcoa Saudi Rolling Inversiones S.L. ("ASRI"), a foreign shareholder, a company wholly owned by Alcoa Incorporated ("Alcoa Inc."), which is accounted for as a non-controlling interest in these consolidated interim financial statements.

The objectives of the company are the production of:

- can body stock; and
- can ends stock.

The company is currently in its project development phase.

### MBAC

The company was incorporated in the Kingdom of Saudi Arabia on January 22, 2011 and is owned:

- 74.9% by Saudi Arabian Mining Company ("Ma'aden") and
- 25.1% by AWA Saudi Limited ("AWA"), a foreign shareholder, which is owned 60% by Alcoa Inc. and 40% by Alumina Limited, an unrelated third party, which is accounted for as a non-controlling interest in these consolidated interim financial statements.

The objectives of the company are to:

- produce and refine bauxite; and
- produce alumina.

The company is currently in its project development phase.

### MPC

The company was incorporated in the Kingdom of Saudi Arabia on January 1, 2008 and is owned:

- 70% by Saudi Arabian Mining Company ("Ma'aden") and
- 30% by Saudi Basic Industries Corporation ("SABIC") which is accounted for as a non-controlling interest in these consolidated interim financial statements.

The objectives of the company are to:

- exploit the Al Jalamid phosphate deposits;
- utilize local natural gas and sulphur resources to manufacture Diammonium Phosphate ("DAP") fertilizers at the processing facilities at Ras Al-Khair; and
- produce ammonia as a raw material feed stock for the production of fertilizer and the excess ammonia is exported and sold domestically.

### SAUDI ARABIAN MINING COMPANY (MA'ADEN)

(A Saudi Arabian joint stock company)

(All amounts in Saudi Riyals unless otherwise stated)

### **MWASPC**

The company was incorporated in the Kingdom of Saudi Arabia on January 27, 2014 and is owned:

- 60% by Saudi Arabian Mining Company ("Ma'aden");
- 25% by Mosaic Phosphate B.V., a foreign shareholder, a limited liability company registered in Netherlands wholly owned by The Mosaic Company ("Mosaic") which is accounted for as a noncontrolling interest in these consolidated interim financial statements; and
- 15% by Saudi Basic Industries Corporation ("SABIC") which is accounted for as a non-controlling interest in these consolidated interim financial statements.

The objectives of the Company are the production of:

- purified phosphoric acid,
- phosphoric acid.
- sodium tripolyphosphate.
- Di-calcium and Mono-calcium phosphate.
- Di-ammonium and Mono-ammonium phosphate.
- ammonia.
- nitro phosphate and nitro phosphate potash,
- sulphuric acid,
- products used in the manufacturing of lime; and
- purified phosphate rock.

### SAMAPCO

The company was incorporated in the Kingdom of Saudi Arabia on August 14, 2011 and is owned:

- 50% by Saudi Arabian Mining Company ("Ma'aden"); and
- 50% by Sahara Petrochemical Company.

SAMAPCO is a joint venture project and is accounted for as an investment in a jointly controlled entity under the equity method of accounting in these consolidated interim financial statements.

The objectives of the company are the production of:

- concentrated caustic soda:
- chlorine; and
- ethylene dichloride.

The operations of the company includes the production and supply of concentrated caustic soda feed stock to the alumina refinery at MBAC and to sell the excess production in the local wholesale and retail market.

### 3. Basis of preparation

The accompanying consolidated interim financial statements have been prepared under the historic cost convention on the accrual basis of accounting and in compliance with the accounting standards promulgated by the Saudi Organization for Certified Public Accountants ("SOCPA").

The consolidated interim financial statements have been prepared in accordance with SOCPA's standard of interim financial reports, on the basis of integrated periods, which views each interim period as an integral part of the financial year. Accordingly, revenues, gains, expenses, and losses of the period are recognized during the relevant period.

The results of the operations for an interim period may not be indicative of the annual results of the operations.

These consolidated interim financial statements are presented in Saudi Riyals which is both the functional and reporting currency of the Group.

### 4. Summary of significant accounting policies

(All amounts in Saudi Riyals unless otherwise stated)

The significant accounting policies applied in the preparation of these consolidated interim financial statements are set out below. These policies have been consistently applied to all periods / year presented.

### 4.1 Basis of consolidation

### Subsidiaries

Subsidiaries are entities over which the Group has the power to govern the financial and operating policies to obtain economic benefit generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity. Subsidiaries are consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

The purchase method of accounting is used to account for the acquisition of subsidiaries. The cost of an acquisition is measured as the fair value of the assets acquired or liabilities incurred or assumed at the date of acquisition, plus costs directly attributable to the acquisition. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. Goodwill arising from acquisition of subsidiaries is reported under "intangible assets" in the accompanying consolidated interim statement of financial position. Goodwill is tested annually for impairment and carried at cost, net of any accumulated amortization and impairment losses, if any.

Inter-company transactions, balances and unrealized gains or losses on transactions between Group companies are eliminated. The accounting policies of the subsidiaries are in consistency with those adopted by the Group.

### Jointly controlled entity

A joint venture exists where the Group has a contractual arrangement with one or more parties to undertake activities typically, however not necessarily, through entities that are subject to joint control.

The Group recognises its interests in a jointly controlled entity using the equity method of accounting. The Group's share of the results of joint ventures is based on the financial statements prepared up to a date not earlier than three months before the consolidated interim statement of financial position date, adjusted to conform with the accounting polices of the Group, if any. Intragroup gains on transactions are eliminated to the extent of the Group's interest in the investee. Intragroup losses are also eliminated unless the transaction provides evidence of impairment in the asset transferred.

### 4.2 Foreign currency translation

Foreign currency transactions are translated into Saudi Riyals at the rates of exchange prevailing at the time of the transactions. Monetary assets and liabilities denominated in foreign currencies at the consolidated interim statement of financial position date are translated at the exchange rates prevailing at that date. Gains and losses from settlement and translation of foreign currency transactions are included in the consolidated interim statement of income.

### 4.3 Cash and cash equivalents

Cash and cash equivalents balance includes cash on hand, cash in banks and time deposits with an original maturity of three months or less at the date of acquisition.

### 4.4 Short-term investments

Short-term investments include placements with banks and other short-term highly liquid investments with original maturities of more than three months but not more than one year from the date of acquisition.

(A Saudi Arabian joint stock company)

(All amounts in Saudi Riyals unless otherwise stated)

### 4.5 Trade receivables

Trade receivables are carried at the original sales invoice amount less an allowance for doubtful debts (if any). An allowance for doubtful debts is established when there is objective evidence that the Group will not be able to collect all the amounts due according to the original terms of the receivables. Such allowances are charged to the consolidated interim statement of income and reported under "General and administrative expenses". When a trade receivable is uncollectible, it is written-off against the allowance for doubtful debts. Any subsequent recoveries of amounts previously written-off are credited against "General and administrative expenses" in the consolidated interim statement of income.

### 4.6 Inventories

### Finished goods

Finished goods are measured at the lower of net cost of production or net realizable value. The net cost of production is determined as the total cost of production divided by the saleable unit output.

Production costs include:

- labor costs, materials and contractor expenses which are directly attributable to the extraction and processing of ore;
- the depreciation of mining properties and leases of property, plant and equipment used in the extraction and processing of ore;
- production overheads; and
- revenue from sale of by-products is credited against production costs.

By-products are valued at net realizable value, with reference to the spot price of the commodities ruling at the reporting date.

### Work-in-process

The cost of work-in-process is determined using weighted average basis.

### Ore stockpiles

Ore stockpiles represent ore that has been extracted and is available for further processing. If there is significant uncertainty as to when the stockpiled ore will be processed it is expensed as incurred. Where the future processing of this ore can be predicted with confidence because it exceeds the mine's cut-off grade and due to economic viability, it is valued at the lower of net cost of production or net realizable value. Quantities of stockpiles and work-in-process are assessed primarily through surveys and assays.

### Spare parts and consumable materials

Spare parts and consumable materials are valued at the weighted average cost basis less an allowance for obsolete and slow moving items.

Net realizable value is the estimated selling price in the ordinary course of business, less the costs of completion and selling expenses.

### 4.7 Financial assets and liabilities

Financial assets and liabilities carried on the consolidated interim statement of financial position principally include cash and cash equivalents, short-term investments, trade and other receivables, projects and other payables, accrued expenses and borrowings.

A financial asset and liability is offset and net amount reported in the consolidated interim financial statements, when the Group has a legally enforceable right to set-off the recognized amounts and intends either to settle on a net basis, or to realize the asset and liability simultaneously.

(A Saudi Arabian joint stock company)

### 4.8 Property, plant and equipment

Property, plant and equipment are stated at the historical cost less accumulated depreciation. Depreciation is provided over the shorter of estimated economic useful lives of the applicable assets or the estimated life-of-mine using the straight-line method. The estimated useful lives of the principal classes of assets are as follows:

|   |  | Number of years |
|---|--|-----------------|
| • | Buildings                                | 9 – 33          |
| • | Heavy equipment                          | 5 – 20          |
| • | Fixed plant and heap leaching facilities | 4 – 20          |
| • | Other equipment                          | 4 – 20          |
| • | Office equipment                         | 4 – 10          |
| • | Furniture and fittings                   | 4 – 10          |
| • | Mobile and workshop equipment            | 10              |
| • | Computer equipment                       | 4 – 5           |
| • | Mining assets                            | 2-8             |
| • | Laboratory and safety equipment          | 5               |
| • | Motor vehicles                           | 4               |
| • | Civil works                              | 4               |

Maintenance and normal repairs which do not materially extend the estimated economic useful life of an asset are charged to the consolidated interim statement of income as and when incurred. Major renewals and improvements, if any, are capitalized.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount and are included in the consolidated interim statement of income.

Borrowing costs related to qualifying assets are capitalized as part of the cost of the qualified assets.

### 4.9 Capital work-in-progress

Assets in the course of construction are capitalized in the capital work-in-progress account. On completion, the cost of the related asset is transferred to the appropriate category of property, plant and equipment. The cost of property, plant and equipment comprises its purchase price and any costs directly attributable to bringing it into working condition for its intended use. Costs associated with a start-up period are capitalized where the asset is available for use but incapable of operating at normal levels during the commissioning period net of the proceeds from the sale of any production during the development period. Capital work-in-progress is not depreciated.

### 4.10 Exploration and evaluation assets

Exploration expenditures are the costs incurred in the initial search for mineral deposits with economic potential or in the process of obtaining more information about existing mineral deposits. Exploration expenditures typically include costs associated with:

- acquisition of exploration rights to explore a potentially mineralized;
- topographical, geological, geochemical and geophysical studies;
- exploration drilling;
- trenching;
- sampling; and
- other work involved in searching for ore.

Evaluation expenditures are the costs incurred to establish the technical and commercial viability of developing mineral deposits identified through exploration activities or by acquisition. Evaluation expenditures include the cost of:

- establishing the volume and grade of deposits through drilling of core samples, trenching and sampling activities in an ore body that is classified as either a mineral resource or a proven and probable reserve;
- determining the optimal methods of extraction and metallurgical and treatment processes;
- studies related to surveying, transportation and infrastructure requirements;
- · permitting activities; and

### SAUDI ARABIAN MINING COMPANY (MA'ADEN) (A Saudi Arabian joint stock company)

Notes to the consolidated interim financial statements for the quarter and six months ended June 30, 2014 (Unaudited)

(All amounts in Saudi Riyals unless otherwise stated)

 economic evaluations to determine whether development of the mineralized material is commercially justified, including scoping, prefeasibility and final feasibilities studies.

All exploration and evaluation costs are expensed until it is concluded that a future economic benefit is more likely to be realized than not, i.e. 'probable'. The information used to make that determination depends on the level of exploration as well as the degree of confidence in the ore body. Exploration and evaluation expenditures are capitalized if management determines that probable future economic benefits will be generated as a result of the expenditures.

Exploration and evaluation expenditure relating to extensions of mineral deposits which are already being mined or developed, including expenditure on the definition of mineralization of such mineral deposits, is capitalized as mine development cost following the completion of an economic evaluation equivalent to a feasibility study.

All exploration and evaluation costs incurred after it is concluded that economic benefit is more likely to be realized than not, i.e. 'probable' are capitalized as "Exploration and evaluation assets" only until the technical feasibility and commercial viability of extracting of mineral resource are demonstrable. Once the technical and commercial viability is demonstrable i.e. economic benefit will or will not be realized, the asset is tested for impairment and any impairment loss is recognized. Based on the technical and commercial feasibility, if the economic benefit will be realized and management intends to develop the mine, exploration and evaluation asset is reclassified to "Capital work-in progress". Cash flows attributable to capitalized exploration and evaluation expenditures are classified as investing activities in the consolidated interim statement of cash flow. Once the commercial production stage is reached, the capitalized capital work-in-progress is reclassified to "Property, plant and equipment".

Exploration and evaluation assets are assessed for impairment when facts and circumstances suggest that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount. When facts and circumstances suggest that the carrying amount exceeds the recoverable amount, the Company measures, presents and discloses any resulting impairment loss.

For the purposes of exploration and evaluation assets only, one or more of the following facts and circumstances are considered for identifying that exploration and evaluation asset that may be impaired. These include the following:

- the period for which the entity has the right to explore in the specific area has expired during the period or will expire in the near future, and is not expected to be renewed.
- substantive expenditure on further exploration for and evaluation of mineral resources in the specific area is neither budgeted nor planned.
- exploration for and evaluation of mineral resources in the specific area have not led to the discovery of commercially viable quantities of mineral resources and the entity has decided to discontinue such activities in the specific area.
- sufficient data exist to indicate that, although a development in the specific area is likely to proceed, the
  carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from
  successful development or by sale.

Once it has been identified that exploration and evaluation asset may be impaired, asset impairment policy as specified in note 4.13 is followed.

### 4.11 Stripping ratio and deferred stripping costs

The Group also defers waste mining costs and has estimated the average of the waste-to-ore ratio for the quantities contained within the final pit design of the mine. This average is used to calculate the annual waste mining costs to be expensed as follows:

Average ratio of waste to ore mined x Quantity of ore mined x Average unit cost of total tonnes mined

In periods when the actual costs of waste are higher than the costs expensed according to this formula, the difference is deferred to be expensed in a future period when the actual costs are less than the amount to be expensed.

SAUDI ARABIAN MINING COMPANY (MA'ADEN)

(A Saudi Arabian joint stock company)

(All amounts in Saudi Riyals unless otherwise stated)

### 4.12 Intangible assets

Intangible assets comprise of purchased software and systems enhancements and transformation. These assets are carried at cost. Intangible assets are amortized on the straight-line basis over their anticipated useful lives and are reviewed at least at each financial year end. The amortization expense on the intangible assets is recognized in the consolidated interim statement of income consistent with the functions of the intangible assets.

Intangible assets for MIC comprises the infrastructure and support services assets at Ras Al Khair that are transferred to Royal Commission of Jubail and Yanbu ("RCJY") as stated in the Implementation Agreement signed between Ma'aden and RCJY. The cost of the intangible assets comprises its purchase price and any costs directly attributable to bringing such assets to working condition for their intended use. Such intangible assets are carried at historical cost less accumulated amortization. Amortization is provided over the remaining period of LUSA (Land Usage and Service Agreement) term.

### 4.13 Asset impairment

The Group assesses its assets at each reporting date for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value-in-use.

Assets that suffered impairment are reviewed for possible reversal of the impairment at each reporting date. When it becomes evident that the circumstances which resulted in the impairment no longer exist, the impairment amount is reversed (with the exception of goodwill) and recorded as income in the consolidated interim statement of income in the period in which such reversal is determined.

### 4.14 Projects, other payable and accrued expenses

Liabilities are recognized for amounts to be paid for goods and services received, whether or not billed to the Group.

### 4.15 Zakat, income tax and withholding tax

The Company is subject to zakat in accordance with the regulations of the Department of Zakat and Income Tax (the "DZIT"). A provision for zakat for the Company and zakat related to the Company's subsidiaries is charged to the consolidated interim statement of income. Differences, if any, at the finalization of final assessments are accounted for when such amounts are determined. Foreign shareholders in subsidiaries are subject to income tax which is included in non-controlling interest in the consolidated interim statement of income.

The Group withholds taxes on certain transactions with non-resident parties in the Kingdom of Saudi Arabia as required under Saudi Arabian Income Tax Law.

### 4.16 Severance fees

Effective from year 2005 onwards, as per Article No. 71 of the Saudi Mining Investment Code issued based on the Royal Decree No. 47/M dated 20 Sha'aban 1425H (corresponding to October 4, 2004), the Group is required to pay to the Government of Saudi Arabia severance fee representing 25% of the annual net income per mining license or the equivalent of the hypothetical income tax, whichever is the lower.

The Zakat due shall be deducted from gross severance fee and the net severance fee amount is shown as part of cost of sales in the consolidated interim statement of income (Note 33).

### 4.17 Provisions

Provisions are recognized when the Group has:

- a present legal or constructive obligation as a result of a past event;
- it is probable that an outflow of economic resources will be required to settle the obligation in the future;
- the amount can be reliably estimated.

Notes to the consolidated interim financial statements for the quarter and six months ended June 30, 2014 (Unaudited)

(All amounts in Saudi Riyals unless otherwise stated)

### 4.18 Mine closure and reclamation

The mining, extraction and processing activities of the Group normally give rise to obligations for site closure or reclamation. Mine closure and reclamation works can include facility decommissioning and dismantling; removal or treatment of waste materials; site and land rehabilitation. The extent of work required and the associated costs are dependent on the requirements of current laws and regulations.

Provisions for the cost of each closure and reclamation program are recognized at the time the mining activities occur. When the extent of the mining activities increases over the life-of-mine, the provision is increased accordingly.

Costs included in the provision encompass all closure and reclamation activity expected to occur progressively over the life-of-mine and at the time of closure in connection with the mining activities at the reporting date. Costs arising from unforeseen circumstances, such as the contamination caused by unplanned discharges, are recognized as an expense and liability when the event gives rise to an obligation which is probable and capable of reliable estimation. The timing of the actual closure and reclamation expenditure is dependent upon a number of factors such as:

- the life-of-mine;
- · the operating license conditions; and
- the environment in which the mine operates.

The full estimated costs are capitalized as part of mining assets, under property, plant and equipment and then depreciated as an expense over the expected life-of-mine on straight-line basis. Adjustments to the estimated amount and timing of future closure and reclamation cash flows are a normal occurrence in light of the significant judgments and estimates involved. Factors influencing those changes include:

- revisions to estimated ore reserves, mineral resources and lives of mines;
- developments in technology;
- regulatory requirements and environmental management strategies; and
- changes in the estimated extent and costs of anticipated activities, including the effects of inflation.

### 4.19 Employees' termination benefits

Employee termination benefits are payable as a lump sum to all employees employed under the terms and conditions of Saudi Labor and Workman Law on termination of their employment contracts. The liability is calculated as the current value of the vested benefits to which the employee is entitled, should the employee leave at the consolidated interim statement of financial position date. Termination payments are based on employees' final salaries and allowances and their cumulative years of service, as defined by the conditions stated in the laws of the Kingdom of Saudi Arabia.

### 4.20 Employees' savings plan program

In accordance with Article 145 of the Labor Regulations, and in furtherance to Article 76 of the Company's Internal Work Regulation approved by resolution No. 424 dated 6<sup>th</sup> of Rabi II 1420H (corresponding to July 19, 1999) issued by H.H. Minister of Labor and Social Affairs, a Savings Plan Program was introduced to encourage the Saudi employees of the Group to save and invest their savings in areas more beneficial to them, to secure their future and as an incentive for them to continue working with the Group.

Participation in the Savings Plan Program is restricted to Saudi nationals and optional with employees required to contribute a monthly minimum installment of 1% to a maximum of 15% of their basic salary subject to a minimum of SAR 300. The Group will contribute an amount equaling 10% of the monthly savings of each member per annum for the first year and increase it by 10% in the year after it reaches 100% at the 10<sup>th</sup> year, which will in turn be credited to the savings accounts of the member. The Group's portion is charged to the consolidated interim statement of income on a monthly basis. The Group's portion will only be paid upon termination or resignation of the employee.

Notes to the consolidated interim financial statements for the quarter and six months ended June 30, 2014 (Unaudited)

(All amounts in Saudi Riyals unless otherwise stated)

### 4.21 Leasing

Leases are classified as capital leases whenever the terms of the lease transfer substantially all of the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Assets held under capital leases are recognized as assets of the Group at the lower of the present value of the minimum lease payments or the fair market value of the assets at the inception of the lease. Depreciation is provided over the estimated economic useful lives of the assets.

Finance costs, which represent the difference between the total lease commitments and the lower of the present value of the minimum lease payments or the fair market value of the assets at the inception of the lease, are charged to the consolidated statement of income over the term of the relevant lease in order to produce a constant periodic rate of return on the remaining balance of the obligation for each accounting period.

Rentals payable under operating leases are charged to consolidated interim statement of income on a straight-line basis over the term of the operating lease.

### 4.22 Borrowings

Borrowings are recognized at the proceeds received, net of transaction costs incurred, if any. Borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets are capitalized as part of the cost of those assets. Other borrowing costs are charged to consolidated interim statement of income.

### 4.23 Revenue recognition

Revenue is recognized when all the following conditions are met:

- the significant risks and rewards of ownership of the product have been transferred to the buyer;
- neither continuing managerial involvement to the degree usually associated with ownership, nor
  effective control over the goods sold, has been retained;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the sale will flow to the Group; and
- the costs incurred or to be incurred in respect of the sale can be measured reliably.

Revenues are shown net of discounts and after eliminating sales within the Group.

Sales revenue is commonly subject to an adjustment based on an inspection of the product by the customer. In such cases, sales revenue is initially recognized on a provisional basis using the Group's best estimate of contained metal, and adjusted subsequently.

Revenue from the sale of by-products is credited against production costs.

Investment income consists of earnings on bank deposits and is recognized on an accrual basis.

### 4.24 Selling, marketing and logistic expenses

Selling, marketing and logistic expenses include direct and indirect costs not specifically part of cost of sales as required under generally accepted accounting standards. Allocations between selling and marketing expenses and cost of sales, when required, are made on a consistent basis.

### 4.25 General and administrative expenses

General and administrative expenses include direct and indirect costs not specifically part of cost of sales as required under generally accepted accounting standards. Allocations between general and administrative expenses and cost of sales, when required, are made on a consistent basis.

### SAUDI ARABIAN MINING COMPANY (MA'ADEN) (A Saudi Arabian joint stock company)

Notes to the consolidated interim financial statements for the quarter and six months ended June 30, 2014 (Unaudited)

(All amounts in Saudi Riyals unless otherwise stated)

### 5. Critical accounting estimates, assumptions and judgments

The preparation of consolidated interim financial statements in conformity with generally accepted accounting standards requires management to make estimates and assumptions that affect amounts reported in the consolidated interim financial statements and accompanying notes. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Group makes estimates and assumptions concerning the future. The accounting estimates will, by definition, seldom equal the related actual results.

The most significant areas requiring the use of management's assumptions, estimates and judgments relate to:

- ore reserve and mineral resource estimates;
- · economic useful lives of property, plant and equipment;
- impairment and reversal of impairment of assets;
- allowances:
- mine closure and environmental obligation;
- zakat and income taxes; and
- contingencies.

### Ore reserve and mineral resource estimates

There is a degree of uncertainty involved in the estimation and classification of ore reserves and mineral resources and corresponding grades being mined or dedicated to future production. Until ore reserves or mineral resources are actually mined and processed, the quantity of ore reserve and mineral resource grades must be considered as estimates only. What is more, the quantity of ore reserves and mineral resources may vary depending on, amongst other things, metal prices and currency exchange rates.

The ore reserve estimates of the Group have been determined based on management long-term commodity price, forecasts cut-off grades and costs that may prove to be inaccurate. Any material change in the quantity of reserves, grades or stripping ratio may affect the economic viability of the properties. In addition, there can be no assurance that gold recoveries or other metal recoveries in small scale laboratory tests will give the same result in larger scale tests under on-site conditions or during production.

Fluctuation in commodity prices, the results of drilling, metallurgical testing and production and the evaluation of mine plans subsequent to the date of any estimate may require estimates to be revised. The volume and grade of ore reserves mined and processed and recovery rates may not be the same as currently anticipated. Any material reductions in estimates of ore reserves and mineral resources, or of the Group's ability to extract these ore reserves, could have a material adverse effect of the Group's business, prospects, financial condition and operating results.

### Economic useful lives of property, plant and equipment

The Group's mining assets, classified within property, plant and equipment, are amortized on a straight-line basis over the lesser of their economic useful lives or the life-of-mine. When determining the life-of-mine, assumptions that were valid at the time of estimation, may change when new information becomes available.

The factors that could affect estimation of the life-of-mine include the following:

- changes in proven and probable ore reserves;
- the grade of ore reserves varying significantly from time to time;
- differences between actual commodity prices and commodity price assumptions used in the estimation and classification of ore reserves;
- unforeseen operational issues at mine sites; and
- changes in capital, operating, mining, processing and reclamation costs, discount rates could possibly adversely affect the economic viability of ore reserves.

Any of these changes could affect prospective depreciated of mining assets and their carrying value. The economic useful lives of non-mining property, plant and equipment is reviewed by management periodically. The review is based on the current condition of the assets and the estimated period during which they will continue to bring economic benefit to the Group.

### Impairment and reversal of impairment of assets

The Group reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets are impaired or whether there is any indicator that an impairment loss recognized in previous years may no longer exist or may have decreased.

### Allowances

The Group also creates an allowance for obsolete and slow-moving spare parts. At June 30, 2014, the allowance for obsolete slow-moving items amounted to SAR 16 million (June 30, 2013: SAR 19 million and December 31, 2013: SAR 16 million) (Note 10). These estimates take into consideration fluctuations of price or cost directly relating to events occurring subsequent to the consolidated interim statement of financial position date to the extent that such events confirm conditions existing at the end of the period / year.

### Mine closure and environmental obligations

The Group's mining and exploration activities are subject to various environmental laws and regulations. The Group estimates environmental obligations based on management's understanding of the current legal requirements in the various jurisdictions in which it operates, terms of the license agreements and engineering estimates. Provision is made, for decommissioning and land restoration costs as soon as the obligation arises. Actual costs incurred in future years could differ materially from the amounts provided. Additionally, future changes to environmental laws and regulations and life-of-mime estimates could affect the carrying amount of this provision.

### Zakat and income taxes

During the period ended June 30, 2014 an amount of SAR 31.9 million was paid to DZIT pertaining to the year ended December 31, 2013 but no zakat assessments were finalized by the DZIT. Where the final zakat outcome of these matters is different from the amounts that were initially recorded, such differences will impact the zakat provisions in the period / year in which such determinations are made.

### Contingencies

By their nature, contingencies will only be resolved when one or more future events occur or fail to occur. The assessment of such contingencies inherently involves the exercise of significant judgment and estimates of the outcome of future events.

### 6. Segmental information

### Segment reporting

### 6.1 Business segment

A business segment is group of assets, operations or entities:

- engaged in revenue producing activities;
- results of its operations are continuously analyzed by management in order to make decisions related to resource allocation and performance assessment; and
- financial information is separately available.

The Group's operations consist of the following business segments:

• The corporate segment, includes the corporate operations and projects under development.

Automotive sheet project include automotive heat treated and non-heat treated sheet, building and construction sheet and foil stock sheet. The project is in the development stage (Note 1).

- The gold segment, consists of operations related to the mining of gold and is carried out through MGBM. This segment currently operates Mahd Ad Dahab, Al-Hajar, Bulghah, Al Amar, As Suq mines and a processing plant at Sukhaybarat which are located in different geographical areas in the Kingdom of Saudi Arabia. The segment also include Ad Duwayhi mine which is in development stage.
- The phosphate segment, consist of operations related to mining of phosphate, the beneficiation of phosphate concentrate and utilization of national resources of natural gas and sulphur to manufacture DAP, MAP fertilizer and ammonia products and is carried out through MPC. This segment started commercial operation during first quarter of 2012, except for the ammonia plant for which commercial production was declared on October 1, 2011.

Phosphate project at the King Abdullah Project for the development of Wa'ad Al Shamal Mineral Industrial City is based on the exploitation of the Al-Khabra and Umm Wu'al phosphate deposits. The project is in the development stage (Note 1).

- The industrial minerals segment, consist of operations related to the mining of industrial minerals carried out through IMC, which currently operates a kaolin and low grade bauxite mine in the central zone of Az Zabirah and a high grade magnesite mine and processing plant at Al Madinah Al Munawarah which partially commenced operations during 2011.
- The aluminum segment, consists of the operations related to the development of an aluminum mine, refinery, smelter, rolling mill and power plant for the production of aluminum and related products. This segment is currently in the development stage.

Chlor Alkali project consists of the operations related to the development of concentrated caustic soda and ethylene dichloride complex for the production of concentrated caustic soda, chlorine and ethylene dichloride and the supply of all the required feedstock for use in the alumina refinery at Ma'aden Bauxite and Alumina Company, any excess production is sold in the international and domestic market. This segment started commercial operation on July 1, 2014.

• The infrastructure segment, relates to the development, construction and delivery of services in the Ras Al-Khair area, and other mining and industrial locations in the Kingdom of Saudi Arabia.

The corporate segment's net loss amount excludes share in earnings of subsidiary companies. The corporate segment's total assets amount excludes investment balances with respect to subsidiary companies which have been eliminated on consolidation.

## 3.2 Geographical segment

A geographical segment is a group of assets, operations or entities engaged in revenue producing activities within a particular economic environment that are subject to risks and returns different from those operating in other economic environments. The Group's operation is conducted only in the Kingdom of Saudi Arabia.

(A Saudi Arabian joint stock company)

Due from joint venture partners as at December 31, 2013 represents the second installment of the remaining 50% of SAR 1.44 billion due on June 30, 2016 as per the Shareholders Agreement signed on August 5, 2013 (Note 1 and 39).

ended June 30, 2014 (Unaudited)
(All amounts in Saudi Riyals unless otherwise stated)

### 19. Projects and other payables

|                               | June 30,<br>2014 | June 30,<br>2013 | December 31,<br>2013 |
|-------------------------------|------------------|------------------|----------------------|
| Projects                      | 1,638,114,213    | 2,050,594,655    | 1,753,364,144        |
| Trade                         | 372,413,674      | 185,522,763      | 234,551,557          |
| Non-refundable contributions* | 37,000,000       | 38,000,000       | 38,000,000           |
| Other                         | 39,184,819       | 25,373,242       | 25,365,564           |
| Total                         | 2,086,712,706    | 2,299,490,660    | 2,051,281,265        |

Project payables mainly represents the liability in respect of contracts cost arising from MAC, MRC, MBAC and MWASPC.

### 20. Accrued expenses

|   | June 30,<br>2014 | June 30,<br>2013 | December 31,<br>2013 |
|---|------------------|------------------|----------------------|
| Projects                                  | 1,371,590,766    | 2,076,609,089    | 2,543,895,556        |
| Trade                                     | 482,213,810      | 520,896,886      | 447,109,110          |
| Employees                                 | 123,343,300      | 117,974,252      | 185,300,357          |
| Accrued expenses - Alcoa Inc. (Note 41.2) | 79,639,672       | 77,818,437       | 83,763,220           |
| Finance charges                           | 14,081,935       | 1,159,917        | 953,500              |
| Total                                     | 2,070,869,483    | 2,794,458,581    | 3,261,021,743        |

Accrued expenses for projects mainly represents the contracts cost accruals in relation to MAC, MRC, MBAC, MPC and MWASPC.

Accrued expenses for Alcoa Inc. mainly represents the personnel and other cost accruals related to the Alcoa Inc. employees seconded to MAC, MRC and MBAC.

<sup>\*</sup>Contributed by one of the MAC's contractors to support the company's objective to establish a social responsibility fund for the development of a community project.

### 21. Zakat

### 21.1 Components of zakat base

The significant components of the zakat base of each company under the zakat and income tax regulation are as follows:

- shareholders' equity at the beginning of the quarter / period / year;
- provisions at the beginning of the quarter / period / year;
- · long term borrowings;
- adjusted net income;
- spare parts and consumable materials:
- net book value of property, plant and equipment;
- net book value of capital work-in-progress;
- net book value of exploration and evaluation assets;
- net book value of intangible assets;
- · carrying value of investment in a jointly controlled entity; and
- other items.

Zakat is calculated at 2.5% of the higher of the zakat base or adjusted net income.

### 21.2 Zakat payable

In accordance with the Saudi Mining Code based on the Royal Decree No. 47/M dated 20 Sha'aban 1425H (corresponding to October 4, 2004), the Group is required to pay to the Government of Saudi Arabia severance fees, representing 25% of the annual net income per mining license, as defined, or the equivalent of a hypothetical income tax, based on the annual net income, whichever is lower. The zakat due shall be deducted from this amount. As a result of the above:

- the income for each mining license of MGBM is subject to severance fees,
- for low grade bauxite, kaolin and magnesia a fixed tariff per tonne is paid as severance fees,

Severance fee for both are shown as part of cost of sales in the consolidated interim statement of income.

### 22.1 Provision for severance fees consists of:

| Expected closure date in                          | 2026               | 2028                |           |

The provision for mine closure and reclamation represents the full amount of the estimated future closure and reclamation costs for the various operational mining properties, based on information currently available including closure plans and applicable regulations. Future changes, if any, in regulations and cost assumptions may be significant and will be recognized when determined. The provision for mine closure and reclamation relates to the Group's gold, low grade bauxite and kaolin mining activity only, as the aluminum project is currently in the development stage, and, an update estimation of the phosphate mine and plant closure and rehabilitation works including facility decommissioning and dismantling; removal or treatment of waste materials; site and land rehabilitation is in progress.

# 25. Obligation under capital lease

(All amounts in Saudi Riyals unless otherwise stated)

During 2013, MAC on behalf of MBAC entered in a capital lease agreement with a financial institution. The lease payments under such agreements are due in monthly installments. The amounts of future payments under the leases are as follows:

|   | June 30,<br>2014 | June 30,<br>2013 | December 31,<br>2013 |
|---|------------------|------------------|----------------------|
| Future minimum lease payments                               | 68,909,275       | l <del>e</del>   | 76,710,325           |

The financing agreements imposed the following conditions and financial covenants on each of the borrowing legal entities of the Group and if the conditions are met, the financial institutions will provide the long-term borrowing:

- the limitation on creation of additional liens and/or financing obligations by MPC, unless specifically allowed under the CTA;
  - financial ratio maintenance;
- maximum capital expenditures allowed; and
- restriction on dividend distribution to shareholders.
- restriction on the term of the short-term investment with maturities of not more than six (6) months from the date of acquisition, of any Saudi Arabian commercial bank or any other international commercial bank of recognized standing.

Notes to the consolidated interim financial statements for the quarter and six months ended June 30, 2014 (Unaudited)

(All amounts in Saudi Riyals unless otherwise stated)

### MPC facility

\*Banque Saudi Fransi and Mizuho Corporate Bank Limited act as agents for procurement facility and commercial facility, respectively.

### MAC facility

On November 26, 2012, the contracts for US Dollar procurement and Saudi Riyal procurement were revised to increase the respective facility amounts. Accordingly, the CTA was also revised to reflect the new facility arrangement.

\*Standard Chartered Bank acts as inter-creditor agent and as commercial facility agent, Bank Al Jazira acts as US Dollar procurement facility agent, as Saudi Riyal procurement facility agent, as US Dollar Wakala facility agent and as Saudi Riyal Wakala facility agent, SABB Securities Limited acts as onshore security agent and Riyadh Bank, London Branch acts as offshore security trustee and agent.

### MRC facility

Facility Agent, SABB Securities Limited acts as Onshore Security Agent and Riyadh Bank, London Branch acts as Offshore Security Trustee and Agent.

### MBAC facility

HSBC Saudi Arabia limited acts as Inter-creditor Agent and as Commercial Facility Agent, National Commercial bank acts as Dollar Procurement Facility Agent and Riyal Procurement Facility Agent, Bank Al Jazira acts as Wakala Facility Agent, HSBC Saudi Arabia limited acts as Onshore Security Agent and Riyad Bank, London Branch acts as Offshore Security Trustee and Agent.

### MWASPC facility

The company is in process of approval of a loan facility with SIDF.

\*Islamic Development Bank and HSBC Saudi Arabia act as agents for procurement facility and Mizuho Corporate Bank Limited and Sumitomo Mitsui Banking Corporation act as agents for commercial facility.

### Saudi Arabian Mining Company ("Ma'aden")

On December 18, 2012, the Company entered into a Shariah compliant Syndicated Revolving Credit Facility Agreement ("Murabaha Facility Agreement") and other agreements (together referred to as "financing agreements") totaling to SAR 9 billion. The facility is with a syndicate of local and international financial institutions, comprising of the following financial institutions:

Al-Rajhi Bank
Arab National Bank
Bank Al-Bilad
Bank AlJazira
Banque Saudi Fransi
J.P.Morgan Chase Bank, N.A., Riyadh Branch
Riyad Bank
Samba Financial Group
The National Commercial Bank
The Saudi British Bank
The Saudi Investment Bank

The financial covenants and conditions include the following with respect to standalone parent company only:

- EBITDA to Interest ratio shall not be less than three times otherwise dividend block will be triggered; and
- the total net debt to tangible net worth (parent company only) shall be less than or equal to three times
  otherwise an event of default will be triggered which is subject to a cure period of six months, or nine
  months if the Company has acted expeditiously to cure such breach by initiating the process for a rights
  issue.

Total MPC borrowings (Note 26.4)

<sup>\*</sup>Due to Alcoa Inc. represents their share of 25.1% in joint venture project cost to extend the product mix of their aluminum complex, currently under construction at Ras Al Khair, to include automotive heat treated and non-heat treated sheet, building and construction sheet and foil stock sheet (Note 1).

### 28. Share capital

|     |  | June 30,<br>2014 | June 30,<br>2013 | December 31,<br>2013 |
|-----|--|------------------|------------------|----------------------|
|     | Authorized, issued and fully paid  |                  |                  |                      |
|     | 925,000,000 Ordinary shares, with a nominal value of SR 10 per share (Note 40)                     | 9,250,000,000    | 9,250,000,000    | 9,250,000,000        |
| 29. | Share premium  |                  |                  |                      |
|     |  | June 30,<br>2014 | June 30,<br>2013 | December 31,<br>2013 |
|     | 525,000,000 ordinary shares with a nominal value of SAR 10 per share issued at a premium of SAR 10 |                  |                  |                      |
|     | per share  | 5,250,000,000    | 5,250,000,000    | 5,250,000,000        |

<sup>\*\*</sup>At year ended December 31, 2013, due to Mosaic and SABIC represented their capital contribution to develop jointly a fully integrated phosphate production facility known as the Umm Wu'al phosphate project (Note 1). On January 27, 2014, a new company - MWASPC was incorporated in the Kingdom of Saudi Arabia and accordingly the capital contributions are now presented in non-controlling interest as payment to increase share capital (Note 31.5).

Notes to the consolidated interim financial statements for the quarter and six months ended June 30, 2014 (Unaudited)

(All amounts in Saudi Riyals unless otherwise stated)

### 30. Transfer of net income

|  | June 30,<br>2014 | June 30,<br>2013 | December 31,<br>2013 |
|--|------------------|------------------|----------------------|
| January 1                                  | 561,660,119      | 393,422,274      | 393,422,274          |
| Transfer of 10% of net income for the year | <u> </u>         |                  | 168,237,845          |
| June 30 / December 31                      | 561,660,119      | 393,422,274      | 561,660,119          |

In accordance with Regulations for Companies in Saudi Arabia, the Company has established a statutory reserve by the appropriation of 10% of annual net income until such reserve equals 50% of the share capital. Such transfer is made on an annual basis and the reserve is not available for dividend distribution.

### 31. Non-controlling interest

On August 5, 2013, the Company entered into an agreement with Mosaic and SABIC to jointly develop a fully integrated phosphate production facility known as the Umm Wu'al phosphate project (Note 1).

As per the agreement Mosaic and SABIC are liable to pay contractual dues to Ma'aden of SAR 1.44 billion in two installments and thereby recorded as other income. This amount is in addition to the historical cost incurred by Ma'aden on the project. First installment, 50% of SAR 1.44 billion, is received by Ma'aden during the year ended December 31, 2013 while the second installment of remaining 50% of the amount is due on June 30, 2016 (Note 18).

Notes to the consolidated interim financial statements for the quarter and six months ended June 30, 2014 (Unaudited)

(All amounts in Saudi Riyals unless otherwise stated)

| Capital expenditures:   |                  |                  |                      |
| Contracted for  | 17,148,555,189   | 12,062,736,455   | 12,717,132,437       |
| Guarantees:   |                  |                  |                      |
| Guarantees in favor of Saudi Aramco, for future diesel and gas feedstock supplies | 220,962,362      | 220,962,362      | 220,962,362          |
| Guarantees for the development of aluminum project*                               | 225,000,000      | 225,000,000      | 225,000,000          |
| Others  | 157,080          | 157,080          | 321,445              |
| Total   | 446,119,442      | 446,119,442      | 446,283,807          |

<sup>\*</sup>Ma'aden has received a back-to-back letter of credit, for the development of the aluminum project, from Alcoa for their proportionate share of 25.1% in aluminum companies, of the total amount of letter of credits submitted by Ma'aden to the Government.

Ma'aden has also provided guarantees to SIDF for financing facilities available to MAC, MRC and MBAC to the extent of its shareholding of 74.9% and to MPC to the extent of its shareholding of 70% (Note 26.1 and 26.2).

### 44. Financial risk management

The Group's activities expose it to a variety of financial risks: market risk (including currency risk, fair value risk, commission rate risk and commodity price risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Group's financial performance.

### 44.1 Currency risk

Is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Group transactions are principally in Saudi Riyals, Euros and US Dollars. Management monitors the fluctuations in currency exchange rates and believes that the currency risk is not significant.

### 44.2 Fair value

Is the amount for which an asset could be exchanged, or a liability settled between knowledgeable willing parties in an arm's length transaction. As the Group's financial instruments are compiled under the historical cost convention, differences can arise between the book values and fair value estimates. Management believes that the fair values of the Group's financial assets and liabilities are not materially different from their carrying values.

### 44.3 Commission rate risk

Is the exposure to various risks associated with the effect of fluctuations in the prevailing commission rates on the Group's financial position and cash flows. The Group's commission rate risks arise mainly from its short-term investments and long term-borrowings, which are at floating rate of commission and are subject to re-pricing on a regular basis. The Group monitors the fluctuations in commission rate.

Based on the Groups net debt outstanding as at June 30, 2014, the effect on net earnings of a 1% movement in the US Dollar LIBOR commission rate would be SAR 331 million (June 30, 2013: SAR 235 million and December 31, 2013: SAR 284 million). These balances will not remain consistent throughout 2014.

### 44.4 Commodity price risk

Gold is priced in an active market in which prices respond to daily changes in quantities. The Group's normal policy is to sell its products at prevailing market prices. The Group does not generally believe commodity price hedging would provide long-term benefit to the shareholders.

### 44.5 Credit risk

Is the risk that one party will fail to discharge an obligation and cause the other party to incur a financial loss. The Group is exposed to credit risk from its operating activities (pertaining to trade receivables mainly). However, the cash collection is made at time of sales delivery and from its financing activities, including deposits with banks and financial institutions. Credit limits are established for all customers based on internal rating criteria. Outstanding trade receivables are regularly monitored and any credit concerns highlighted to senior management. Cash and short-term investments are substantially placed with commercial banks with sound credit ratings.

The Group currently has two major customers which account for sales of approximately SAR 356 million, representing 9% of the Group's sales for the period ended June 30, 2014 (June 30, 2013: SAR 350 million representing 12% of the Group's sales and December 31, 2013: SAR 709 million representing 12% of Group's sales from two major customers). Trade receivables are carried net of allowance for doubtful debts, if needed.

### 44.6 Liquidity risk

Is the risk that the Group will encounter difficulty in raising funds to meet commitments associated with financial instruments. Liquidity risk may result from an inability to sell a financial asset quickly at an amount close to its fair value. Liquidity risk is managed by monitoring on a regular basis that sufficient funds are available to meet any future commitments.

### 45. Events after the reporting date

On July 13, 2014, Ma'aden announced entering into an agreement to form a joint venture with Barrick Gold Corporation ("Barrick") for the purpose of establishing a limited liability company to jointly develop and operate the Jabel Sayid copper project located in southeast of Al Madinah Al Munawarah. Ma'aden and Barrick will each own 50% of the joint venture. Ma'aden will invest approximately USD 210 million to acquire its 50% share in the project.

Other than the above mentioned, no events have arisen subsequent to June 30, 2014 and before the date of signing the review report, that could have a significant effect on the consolidated interim financial statements as at June 30, 2014.

# 46. Comparative figures

Certain comparative figures of the previous quarter / period / year have been reclassified, wherever necessary, to conform with the current quarter's / period's presentation. Such reclassifications did not affect either the net worth or the net income of the Group for the previous quarter / period / year.

### 47. Contingent assets held and liabilities incurred under fiduciary administration

On January 6, 2013 MIC, a wholly owned subsidiary of Ma'aden, received an amount of USD 140 million (in a fiduciary capacity) from the Ministry of Finance of the Kingdom of Saudi Arabia, in accordance with the Council of Ministers' Resolution No 87, dated 28 Rabi ul Awal 1433H (corresponding to February 20, 2012), for the purpose of establishing an industrial city in the Northern Borders Province, by the name of "Waad Al-Shamal City for Mining Industries". The aggregate amount represents part payment of the following two amounts approved by the Council of Ministers:

- USD 500 million for the design and construction of the basic infrastructure and required utilities of the industrial city, and
- USD 200 million for the design and construction of the housing and required social facilities for the proposed industrial city.

The amounts received have been deposited in a separate bank account and does not form part of MIC's available cash resources and has been accounted for in its own standalone accounting records and has not been integrated with MIC's accounting records. The amounts can only be utilized for the designated purpose in accordance with the Council of Ministers Resolution and replenished based on the presentation of supporting documents for the expenditures incurred, in accordance with the applicable Governments Regulations. Total net assets of the project as of June 30, 2014 amounted to SAR 525 million (June 30, 2013: SAR 525 million and December 31, 2013: SAR 525 million).
