## Target price and rating

We maintain our ACCUMULATE rating on ADCB with a target price of AED 11.60. The bank's net interest margin is expected to benefit in a rising interest rate environment due to the positive interest rate sensitivity gap. In a rising interest rate scenario, the positive gap will push the NIM upwards and vice versa. A positive gap happens when rate-sensitive assets are greater than rate-sensitive liabilities. ADCB also maintains a stable funding profile largely funded by customer deposits reflecting a strong franchise. Low-cost CASA deposits make up 58% of total deposits in 1Q22. Non-funded income is also projected to maintain a healthy growth rate with improving economic outlook. The bank operational efficiency is projected to improve further as merger-related synergies are fully realized and continued investment in digital initiatives. Additionally, asset quality is also anticipated to remain stable in 2022 given improving macroeconomic outlook. Notwithstanding all these positives, ADCB is projected to generate ROA of 1.30% in 2022 compared to industry of 1.49% in 2022 leading us to assign ACCUMULATE rating on the stock.
