INDEPENDENT AUDITOR'S REVIEW REPORT ON INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

To the shareholders
Savola Group Company
(A Saudi Joint Stock Company)
Jeddah, Kingdom of Saudi Arabia

Introduction

We have reviewed the accompanying interim condensed consolidated statement of financial position of Savola Group Company ("the Company") and its subsidiaries (together "the Group") as of June 30, 2026, and the related interim condensed consolidated statements of profit or loss and other comprehensive income for the three and six months periods then ended, and the related interim condensed consolidated statements of changes in equity and cash flows for the six months period then ended, and the explanatory notes ("the interim condensed consolidated financial statements"). Management is responsible for the preparation and presentation of this interim condensed consolidated financial statements in accordance with International Accounting Standard 34 - Interim Financial Reporting (IAS 34), that is endorsed in the Kingdom of Saudi Arabia. Our responsibility is to express a conclusion on these interim condensed consolidated financial statements based on our review.

Scope of review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" that is endorsed in the Kingdom of Saudi Arabia. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing endorsed in the Kingdom of Saudi Arabia and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial statements is not prepared, in all material respects, in accordance with IAS 34 as endorsed in the Kingdom of Saudi Arabia.

2. BASIS OF PREPARATION

2.1 Statement of compliance

The interim condensed consolidated financial statements of the Group for the six months period ended June 30, 2026 have been prepared in accordance with International Accounting Standard 34 - “*Interim Financial Reporting*” (“IAS 34”), as endorsed in the Kingdom of Saudi Arabia and other standards and pronouncements endorsed by Saudi Organization for Chartered and Professional Accountants (“SOCPA”).

Therefore, these interim condensed consolidated financial statements should be read in conjunction with the Group’s annual consolidated financial statements for the year ended December 31,2025.

The results for the interim period of six months ended June 30, 2026 are not necessarily indicative of the results that may be expected for the financial year ending December 31, 2026.

These interim condensed consolidated financial statements have been prepared under the going concern basis.

Certain comparative amounts have been reclassified to conform to the current period's presentation and do not have a material effect on these interim condensed consolidated financial statements. The significant reclassifications pertain to impact of discontinued operations.

2.3 Functional and presentation currency

The interim condensed consolidated financial statements are presented in Saudi Riyals ﷲ, which is the functional and presentation currency of the Group. All amounts have been rounded to the nearest thousand, unless otherwise indicated.

3. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The accounting policies applied in these interim condensed consolidated financial statements are the same as those applied in the Group's last annual consolidated financial statement as at and for the year ended December 31, 2025.

Accounting policies adopted in preparation of these interim condensed consolidated financial statements are described in note 4 of the Group's consolidated financial statements for the year ended December 31, 2025.

3.1 New Standards, Amendment to Standards and Interpretations

The new standards and amendments to standards disclosed in the Group's annual consolidated financial statements remain unchanged. As of the date of authorisation of these interim condensed consolidated financial statements, the preliminary assessment of the impact of IFRS 18, Presentation and Disclosure in Financial Statements, is presented below:

3.1 New Standards, Amendment to Standards and Interpretations (continued)

Preliminary impact assessment of IFRS 18 Presentation and Disclosure in Financial Statements

Effective 1 January 2027, IFRS 18 Presentation and Disclosure in Financial Statements will replace IAS 1 Presentation of Financial Statements and will be applicable to annual reporting periods beginning on or after that date. The Group has not early adopted IFRS 18 in preparing these condensed consolidated interim financial statements.

The Group has initiated an IFRS 18 implementation project to assess the standard's impact on the classification, presentation and disclosure of information in the consolidated financial statements, as well as the related data requirements. Based on the assessment performed to date, the Group expects the principal impacts of IFRS 18 to relate to the classification, presentation, aggregation, disaggregation and disclosure of information in the consolidated financial statements. The adoption of IFRS 18 is not expected to have an impact on the Group's net profit or equity.

Consolidated statement of profit or loss - structure and classification

IFRS 18 requires entities to classify all income and expenses into categories in the statement of profit or loss – namely operating, investing, financing, zakat income tax and discontinued operations. Classification of income and expenses depends on the main business activities of an entity.

The Group will be required to present two newly defined subtotals, which are 'operating profit' and 'profit or loss before financing and income taxes'. However, operating profit subtotal differs from the current operating profit subtotal presented by the Group. Based on the information currently available, the Group expects changes to the current structure of the statement of profit or loss to result from the following:

- Interest income and expenses are generally included in finance income and finance costs under the Group's current accounting policy and are presented in the 'net finance costs' subtotal. IFRS 18 provides specific guidance on the income and expenses classified in the investing and financing categories.
- Share of results in equity-accounted investees is currently presented under results from operating activities. IFRS 18 provides specific guidance on the share of results in equity-accounted investees to be classified in the investing category.
- Bank charges and other charges not related to raising finance or changes in interest rates will be reclassified and presented under operating category.
- Certain unwinding cost on long-term provisions, currently presented other than in finance costs, will be reclassified and presented within finance costs.
- Net foreign exchange losses are currently included in finance costs. Under IFRS 18, foreign exchange differences are required to be presented in the same category as the income and expenses from the items that gave rise to the differences.
- Under IFRS 18, gains and losses on designated hedging instruments are required to be classified in the same category as the income and expenses affected by the hedged risks.

3. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

3.1 New Standards, Amendment to Standards and Interpretations (continued)

Management-defined Performance Measures

IFRS 18 introduces new disclosure requirements for management-defined performance measures ("MPMs"). An MPM is a subtotal of income and expenses that is used in public communications outside the financial statements to communicate management's view of an aspect of the Group's financial performance as a whole and that is not specified by IFRS 18 or otherwise required to be presented or disclosed by IFRS Accounting Standards.

Where identified, MPMs will be required to be disclosed in a single note to the financial statements. The Group is in process to determine which public communications should be considered when identifying MPMs. MPMs relate to the same reporting period as the financial statements.

Aggregation and Disaggregation

IFRS 18 introduces enhanced requirements relating to the aggregation and disaggregation of information throughout the financial statements and accompanying notes. These requirements are intended to improve transparency by ensuring that material information is presented separately and dissimilar items are not obscured through aggregation. The Group is currently assessing whether additional disaggregation may be required for other assets, other liabilities, other operating income, other general and administrative expenses, other operating expenses. The Group also expects certain line-item descriptions currently used within the financial statements to be refined to enhance clarity and consistency with the objectives of IFRS 18.

Consequential Amendments

IFRS 18 introduces consequential amendments to IAS 7, which require entities to use the newly defined operating profit subtotal as the starting point for the statement of cash flows when presenting operating cash flows under the indirect method. The Group currently uses profit for the year/period as the starting point of the reconciliation to cash flows from operating activities. Certain adjusting items included in the reconciliation are expected to change as a result of the new starting point.

The consequential amendments also provide specific guidance on the classification of interest and dividend cash flows. The Group will classify cash flows from interest paid as financing activities rather than operating activities under this guidance.

3.2 Critical accounting estimates and judgments

The preparation of these interim condensed consolidated financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

The significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty are consistent with those used in the preparation of the annual financial statements as at and for the year ended December 31, 2025.

8. SHARE BASED PAYMENT PLAN

On April 29, 2020, the shareholders of the Company approved the Employees Long Term Incentive Program ("Plan") for the benefit of certain eligible senior executives of the Group (the "Participants"). The Plan entitles the Participants a conditional right to receive a number of restricted share units (each unit equal to the value of one share of the Company at the Grant date), following the satisfaction of service condition.

Significant features of the Plans are as follows:

Grant date / employees entitled	Total number of shares granted	Service / vesting period	Fair value per share on grant date
August 20, 2025	888,008	3 years	24.0
August 20, 2024	468,637	3 years	43.0
September 10, 2023	700,176	3 years	34.8

Fair value per share on grant date is the closing price per share on Tadawul as at the grant date.

During 2024, the Group carried out capital restructuring, which included a rights issue and a capital reduction through the distribution of Almarai shares. Under the granted plans, employees are entitled to all corporate actions affecting the Company's share capital. As a result of the rights issue, the allocated shares increased by 1,613,727 with the Company to claim an exercise price of ﷲ 10 per share from employees. Meanwhile, the capital reduction led to a decrease of 2,337,416 allocated shares, resulting in the grant of 967,551 Almarai shares. The liability for settling Almarai shares is recorded under "Accrued and Other Liabilities."

The number of shares under share base payment plans after rights issue, capital reduction and distribution are as follows:

Grant date / employees entitled	Total number of shares allocated	Rights issue shares	Shares cancelled due to Capital reduction	Remaining Savola shares to be vested	Almarai Shares to be vested
August 20, 2024	468,637	470,982	(682,067)	257,552	282,335

14. OPERATING SEGMENTS

The Group has four reportable segments, as described below, which are the Group's strategic business units. The strategic business units offer different products and services, and are managed separately because they require different technology and marketing strategies. For each of the strategic business units, the Group's Chief Executive Officer (Chief Operating Decision Maker) reviews internal management reports on at least quarterly basis. The following summary describes the operations in each of the Group's reportable segments:

Food processing - includes manufacturing, sale and distribution of Edible oils, Sugar, Pasta, Spices, Nuts, Pulses and other food products.

Retail - includes hyper markets, supermarkets and convenience stores operations.

Food services - includes food products and fast food restaurants' chain operated by Herfy.

Frozen Food - includes manufacturing, wholesale and retail distribution of frozen food products operated by Good Food Company.

The segments which do not meet any of the quantitative thresholds for determining reportable segments, are classified as "Others / Eliminations", which mainly include investments in equity-accounted investees, other investments and the eliminations.

Performance is measured based on segment profit net of income tax and zakat, as included in the internal management reports. Management believes that such information is the most relevant in evaluating the results of certain segments relative to other entities that operate within these industries. Inter-segment pricing is determined on an arm's length basis. Information regarding the results of each reportable segment is included below:

15. FINANCIAL RISK MANAGEMENT

a) Accounting classification and fair values

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Group has access at that date. The fair value of a liability reflects its non-performance risk.

A number of the Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

When one is available, the Group measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Group uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

When measuring the fair value of an asset or liability, the Group uses observable market data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: The fair value of financial instruments traded in active markets (such as publicly traded derivatives, and equity securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the group is the current bid price. The quoted market price incorporates the market's assumptions with respect to changes in economic climate such as rising interest rates and inflation, as well as changes due to ESG risk. These instruments are included in level.
- Level 2: The fair value of financial instruments that are not traded in an active market (e.g. over-the counter derivatives) is determined using valuation techniques that maximize the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.
- Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities and for instruments where ESG risk gives rise to a significant unobservable adjustment.

If the inputs used to measure the fair value of an asset or liability falls into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest input level that is significant to the entire measurement.

The Group recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

As the Group's financial instruments are compiled under the historical cost convention, except for FVOCI investments, FVTPL investments, inventory and firm commitments under fair value relationships and derivative financial instruments which are carried at fair values, differences can arise between the book values and fair value estimates. Management believes that the fair values of the Group's financial assets and liabilities are not materially different from their carrying values.

16. CAPITAL MANAGEMENT

The Group's objective when managing capital is to safeguard the Group's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and to maintain a strong capital base to support the sustained development of its businesses.

The Group manages its capital structure by monitoring return on net assets and makes adjustments to it in the light of changes in economic conditions. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders or issue new shares. The Group also monitors capital using a leverage ratio, which is calculated as total liabilities (as shown in the condensed consolidated statement of financial position) less Cash and cash equivalents.

Adjusted equity comprises all components of equity other than amounts accumulated in the hedging reserves. The leverage ratio is as follows:

	June 30, 2026 (Unaudited)	December 31, 2025 (Audited)
Total liabilities	14,071,166	14,013,987
