## Revenue declined by 6% YoY in 3Q25 amid lower selling prices

Apr-25

Saudi Cement reported 3Q25 revenue of SAR 364mn, down 6% YoY as lower average selling prices offset volume growth. Sequentially, revenue fell 16%, driven by a decline in both sales volume and pricing.

### Net profit decreased in 3Q25 on pricing and cost pressures

Net profit fell 47% YoY to SAR 53mn in 3Q25, driven by lower selling prices, higher G&A and zakat expenses, and reduced other income and share of profit from associates, despite lower distribution and finance costs.

#### U Capital view

Saudi Cement reported a sharp decline in net profit for 3Q25, primarily due to persistent pressure on average selling prices. Strong underlying demand supported higher sales volumes compared to 3Q24, however, the pricing weakness more than offset this tailwind, resulting in subdued profitability. Considering these dynamics, we are placing the stock under review and will revisit our investment case once detailed financials are available.
