Independent auditors' report on review of condensed interim financial statements

To the Shareholders of Saudi Ground Services Company

Introduction

We have reviewed the accompanying 30 June 2019 condensed interim financial statements of Saudi Ground Services Company ("the Company"), which comprises:

- the condensed statement of financial position as at 30 June 2019;
- the condensed statement of profit or loss and other comprehensive income for the three-months and six-months period ended 30 June 2019;
- the condensed statement of changes in shareholders' equity for the six-months period ended 30 June 2019;
- the condensed statement of cash flows for the six-months period ended 30 June 2019; and
- the notes to the condensed interim financial statements.

Management is responsible for the preparation and presentation of these condensed interim financial statements in accordance with IAS 34, 'Interim Financial Reporting' that is endorsed in the Kingdom of Saudi Arabia. Our responsibility is to express a conclusion on these condensed interim financial statements based on our review.

Scope of review

We conducted our review in accordance with the International Standard on Review Engagements 2410, 'Review of Interim Financial Information Performed by the Independent Auditor of the Entity' that is endorsed in the Kingdom of Saudi Arabia. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia, and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying 30 June 2019 condensed interim financial statements of Saudi Ground Services Company is not prepared, in all material respects, in accordance with IAS 34, 'Interim Financial Reporting' that is endorsed in the Kingdom of Saudi Arabia.

SAUDI GROUND SERVICES COMPANY
(A Saudi Joint Stock Company)

NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS

For the period ended 30 June 2019

(Expressed in thousands of Saudi Arabian Riyals, unless otherwise stated)

1. REPORTING ENTITY

- 1.1 Saudi Ground Services Company ("the Company") was registered as a limited liability company in the Kingdom of Saudi Arabia under Commercial Registration number 4030181005 dated 11 Rajab 1429H, (corresponding to 14 July 2008). The Company was formed by Saudi Arabian Airlines Corporation ("Saudia"), a 100% Government owned entity, in 2008 to consolidate the ground support services business (GSS) in the Kingdom of Saudi Arabia.
- 1.2 The legal name "Saudi Airlines Ground Services Company" was changed to "Saudi Ground Services Company" under the same commercial registration number 4030181005 on 20 Safar 1432H, (corresponding to 24 January 2011).
- 1.3 On 17 Jamadul Thani 1435H, corresponding to 17 April 2014, the Company converted from a limited liability company to a closed joint stock company, pursuant to the Ministerial resolution number -171/R.
- 1.4 As decided by the shareholders of the Company, the Company offered 56.4 million shares, with a nominal value of SR 10 each, representing 30% share capital of the Company, to public during subscription period from 3 June 2015 (corresponding to 15 Shabaan 1436H) to 9 June 2015 (corresponding to 21 Shabaan 1436H) after obtaining required approval from the Capital Market Authority. The Company's shares started trading on the Saudi Stock Exchange (Tadawul) on 25 June 2015, corresponding to 8 Ramadan 1436H. Accordingly, after successful completion of Initial Public offering (IPO), the Company was declared as a Saudi Joint Stock Company. During the six months period ended 30 June 2019, the founding shareholders (Attar Ground Handling and Attar Travel (collectively referred as "Attar") and National Aviation Ground Support Company ("NAGS")) disposed off additional 24.9 million shares to general public and accordingly the shares subscribed by general public increased to 43.25% (see note 10).
- 1.5 The Company is engaged in providing aircraft cleaning, passenger handling, fuel, baggage and ground handling services to Saudi Arabian Airlines, other local and foreign airlines at all airports in the Kingdom of Saudi Arabia.
- 1.6 The Company's registered office is located at the following address:
- Saudi Ground Services Company
Nahda District, Henaki Business Centre
Prince Sultan Street
P. O. Box 48154
Jeddah 21572
Kingdom of Saudi Arabia.
- 1.7 As at the reporting date, the Company holds 50% ownership interest in Saudi Amad for Airport Services and Transport Support Company ("SAAS"). SAAS is a joint venture in which the Company has joint control and 50% ownership interest. Accordingly, the Company has classified its interest in SAAS as a joint venture. SAAS is one of the Company's strategic supplier and is principally engaged in providing transportation services for passengers and crew in the Kingdom of Saudi Arabia.

NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS

For the period ended 30 June 2019

(Expressed in thousands of Saudi Arabian Riyals, unless otherwise stated)

2. BASIS OF PREPARATION

2.1 Statement of compliance

These condensed interim financial statements have been prepared in accordance with International Accounting Standards (IAS) 34 “Interim Financial Reporting” that is endorsed in Kingdom of Saudi Arabia and other standards and pronouncements that are issued by Saudi Organization for Certified Public Accountants (“SOCPA”) and should be read in conjunction with the Company’s last annual Financial Statements as at and for the year ended 31 December 2018 (“last annual Financial Statements”).

These condensed interim financial statements do not include all of the information required for a complete set of IFRS financial statements, however, accounting policies and selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Company’s financial position and performance since last annual financial statements.

This is the first set of the Company’s condensed interim financial statements in which IFRS 16 has been applied. Changes to significant accounting policies are described in note 3.

2.2 Basis of measurement

The condensed interim financial statements have been prepared under the historical cost basis, except for investments at fair value through profit or loss (FVTPL) that are measured at fair value and employee benefits which are recognized at the present value of future obligations using Projected Unit Credit Method. Further, the financial statements are prepared using the accrual basis of accounting and the going concern assumption.

Certain comparative amounts have been reclassified to conform to the current period’s presentation.

2.3 Functional and presentation currency

These interim financial statements are presented in Saudi Arabian Riyals (“SR”) which is the functional currency of the Company. All numbers are rounded off to the nearest thousands unless otherwise stated.

2.4 Use of estimates and judgments

The preparation of these condensed interim financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses and the accompanying disclosures, and the disclosure of contingent liabilities. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future periods. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS

For the period ended 30 June 2019

(Expressed in thousands of Saudi Arabian Riyals, unless otherwise stated)

2. BASIS OF PREPARATION (continued)

2.4 Use of estimates and judgments (continued)

The significant judgements made by management in applying the Company's accounting policies and the key sources of estimation of uncertainty were the same as those described in the last annual financial statements, except for the new significant judgements and key sources of estimation uncertainty related to the application of IFRS 16, which are described in note 20.

3. SIGNIFICANT ACCOUNTING POLICIES

Except as described below, the accounting policies applied in these condensed interim financial statement are the same as those applied in the Company's annual financial statements as at and for the year ended 31 December 2018. The changes in accounting policies are also expected to be reflected in the Company's financial statements as at and for the year ended 31 December 2019.

The Company has initially adopted IFRS 16 Leases from January 1, 2019, the impact of which is explained in note 20. A number of other amendments are effective from January 1, 2019 but they do not have a material effect on the Company's condensed interim financial statements.

IFRS 16 introduced a single on-balance sheet accounting model for lessees. As a result, the Company, as a lessee, has recognised right-of-use assets representing its rights to use the underlying assets and lease liabilities representing its obligation to make lease payments.

The Company has applied IFRS 16 using the modified retrospective approach under which the cumulative effect of initial application is recognised in retained earnings at 1 January 2019. Accordingly, the comparative information presented for 2018 has not been restated - i.e. it is presented, as previously reported, under IAS 17 and related interpretations. The details of the changes in accounting policies are disclosed below.

Significant accounting policies under IFRS 16:

The Company recognises a right-of-use asset and a lease liability at the lease commencement date.

Right-of-use asset

The right-of-use asset is initially measured at cost, and subsequently at cost less any accumulated depreciation and impairment losses, and adjusted for certain remeasurements of the lease liability.

Lease liability

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the Company's incremental borrowing rate.

Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e. those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption. Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS

For the period ended 30 June 2019

(Expressed in thousands of Saudi Arabian Riyals, unless otherwise stated)

3. SIGNIFICANT ACCOUNTING POLICIES

Significant accounting policies under IFRS 16 (continued):

Significant judgement in determining the lease term of contracts with renewal options

The Company determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

Transition:

Previously, the Company classified its leases as operating leases under IAS 17.

At transition, for leases classified as operating leases under IAS 17, lease liabilities were measured at the present value of the remaining lease payments, discounted at the incremental borrowing rates at 1 January 2019. Right-of-use assets are measured at either:

- their carrying amount as if IFRS 16 had been applied since the commencement date, discounted using Company's incremental borrowing rate at the date of initial application; or
- an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments - the Company applied this approach to all other leases.

The Company used the following practical expedients when applying IFRS 16 to leases previously classified as operating leases under IAS 17.

- Applied the exemption not to recognise right-of-use assets and liabilities for leases with less than 12 months of the lease term.
- Excluded initial direct costs from measuring the right-of-use asset at the date of initial application.
- Used hindsight when determining the lease term if the contract contains options to extend or terminate the lease.

4. PROPERTY AND EQUIPMENT

During the secondment period, based on the thresholds set out in the secondment agreement, the Company will be responsible for its share of liabilities and obligations of seconded employees, in accordance with their terms of employment with Saudia.

16. OPERATING SEGMENTS

The Company's primary format for segmental reporting is based on business segments. The business segments are determined based on the Company's management and internal reporting structure. The Company is principally involved in providing ground handling services to airlines within the Kingdom of Saudi Arabia. Accordingly, the management believes that the Company's business falls within a single business segment and is subject to similar risks and returns.

17. ZAKAT

a) Charge for the period

Payments during the period / year	(10,249)	(5,536)
Balance at the end of the period / year	91,253	86,252

c) Status of Zakat

The Company has filed a declaration up to financial year ended 31 December 2018 with the General Authority of Zakat and Income Tax (GAZT). The Company also obtained Zakat certificate valid until 30 April 2020. The GAZT has issued the final Zakat assessment order for 2008 to 2011 subject to an additional Zakat liability of SR 0.9 million. However, the Company has filed an objection against this assessment.

18. CONTINGENT LIABILITIES AND COMMITMENTS

In addition to contingencies disclosed in note 17, the Company has provided, in the normal course of business, bank guarantees amounting to SR 17.77 million (31 December 2018: SR 14.83 million) to the Ministry of Finance, Saudi Airlines, International Air Transport Association (IATA) and General Authority of Civil Aviation ("GACA"), in respect of Haj visa, tickets, airline ticket sales and rentals as at 30 June 2019. The Company's bank has earmarked bank balances of SR 0.27 million (31 December 2018: SR 0.01 million) as a lien against these guarantees.

During the year ended 31 December 2016, the Company had received claims amounting to SR 36 million from the General Authority for Civil Aviation ("GACA") regarding fees on each domestic and international trip in King Khaled International Airport and King Abdul Aziz International Airport. Currently management is negotiating and discussing the matter with GACA and has not reached a final conclusion yet. Consequently, it is difficult to estimate the related liability.

Commitments amounting to SR 18.27 million (31 December 2018: SR 27.07 million) are in respect of capital expenditure committed but not paid.

19. FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date. The fair value of a liability reflects its non-performance risk.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Fair value hierarchy

The Company's management regularly reviews significant unobservable inputs and valuation adjustments. If third-party information, such as broker quotes or pricing services is used to measure fair values, then the evidence obtained from the third parties is assessed to support the conclusion that these valuations meet the requirements of IFRS, including the level in the fair value hierarchy in which the valuations should be classified.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

When quoted prices are available, the Company measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

When measuring the fair value, the Company uses market observable data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows;

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be accessed at the measurement date.

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or liability falls into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest input level that is significant to the entire measurement.

The fair values of financial instruments are not materially different from their carrying values. At 30 June 2019, there were no financial instruments held by the Company that were measured at fair value, apart from investments at FVTPL.

20. NEW STANDARDS AND AMENDMENTS TO STANDARDS

The Company has adopted, as appropriate, the following new and amended IASB Standards, effective 1 January 2019.

IFRS 16 Leases

IFRS 16 supersedes IAS 17 *Leases*, IFRIC 4 *Determining whether an agreement contains a lease*, SIC 15 *Operating Leases-Incentives* and SIC-27 *Evaluating the Substance of Transactions Involving the Legal Form of a lease*. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for most leases under a single on-balance sheet model. Lessor accounting under IFRS 16 is substantially unchanged from IAS 17. Lessors will continue to classify leases as either operating or finance leases using similar principles as in IAS 17. Therefore, IFRS 16 did not have an impact on leases where the Company is the lessor.

IFRS 16 introduced a single on-balance sheet accounting model for lessees. As a result, the Company, as a lessee, has recognised right-of-use assets representing its rights to use the underlying assets and lease liabilities representing its obligation to make lease payments.

The Company has applied IFRS 16 using the modified retrospective approach under which the cumulative effect of initial application is recognised in retained earnings at 1 January 2019. Accordingly, the comparative information presented for 2018 has not been restated - i.e. it is presented, as previously reported, under IAS 17 and related interpretations. The details of the changes in accounting policies are disclosed below.

Definition of a lease

Previously, the Company determined at contract inception whether an arrangement was or contained a lease under IAS 17 and IFRIC 4. The Company now assesses whether a contract is or contains a lease based on the new definition of a lease. Under IFRS 16, a contract is, or contains, a lease if the contract conveys a right to control the use of an identified asset for a period of time in exchange for consideration.

On transition to IFRS 16, the Company elected to use the transition practical expedient allowing the standard to be applied only to contracts that were previously identified as leases applying IAS 17 and IFRIC 4 at the date of initial application. Contracts that were not identified as leases under IAS 17 and IFRIC 4 were not reassessed. Therefore, the definition of a lease under IFRS 16 has been applied only to contracts entered into or changed on or after 1 January 2019.

As a lessee, the Company has lease contracts for airport facilities, office premises and motor vehicles.

The Company previously classified leases as operating or finance leases based on its assessment of whether the lease transferred substantially all of the risks and rewards of ownership. Under IFRS 16, the Company recognises right-of-use assets and lease liabilities for leases on-balance sheet.

The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

22. FINANCIAL RISK MANAGEMENT

Financial risk management

The Company has exposure to the following risks arising from financial instruments:

- Credit risk
- Market risk
- Liquidity risk

The Company's overall risk management program focuses on robust liquidity management as well as monitoring of various relevant market variables, thereby continually seeking to minimize potential adverse effects on the Company's financial performance.

Risk management is carried out by senior management under policies approved by the Board of Directors. Senior management identifies, evaluates and hedges financial risks in close co-operation with the Company's operating units. The most important types of risk are a market risk, credit risk and liquidity risk.

The Board of Directors has overall responsibility for establishment and oversight of the Company's risk management framework. The executive management team is responsible for developing and monitoring the Company's risk management policies. The team regularly meets, and any changes and compliance issues are reported to the Board of Directors through the audit committee.

Risk management systems are regularly reviewed by the executive management team to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The audit committee oversees compliance by management with the Company's risk management policies and procedures and reviews the adequacy of the risk management framework about the risks faced by the Company.

Financial instruments carried on the condensed interim financial statements include cash and cash equivalents, trade and other receivables, investments at FVTPL, trade and other payables and accrued zakat. The particular recognition methods adopted are disclosed in the individual policy statements associated with each item.

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company is exposed to risk on its trade and other receivables, investments at FVTPL and cash at banks.

22. FINANCIAL RISK MANAGEMENT (continued)

Credit risk (continued)

The Company's gross maximum exposure to credit risk at the reporting date is as follows:

	30 June <u>2019</u> (Unaudited)	31 December <u>2018</u> (Audited)
Financial assets		
Trade receivables	1,307,681	1,487,031
Other receivables	273,306	205,486
Investment at FVTPL	378,405	305,038
Cash at banks	554,027	308,935
	<u>2,513,419</u>	<u>2,306,490</u>

Impairment losses

The Company manages credit risk with respect to receivables from customers by monitoring in accordance with defined policies and procedures. To reduce exposure to credit risk, the Company has developed a formal approval process whereby credit limits are applied to its customers. The management also continuously monitors the credit exposure towards the customers and makes provision against those balances considered doubtful of recovery. To mitigate the risk, the Company has a system of assigning credit limits to its customers based on an extensive evaluation based on customer profile and payment history.

The receivables are shown a net of allowance for impairment of trade receivables. The Company applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables. To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions.

The Company's exposure to credit risk for gross trade receivables by type of counterparty mainly includes local and foreign airlines and other related parties (note 15(a)).

At 30 June 2019, trade receivables are mainly due from related parties (note 15(a)) and other trade receivables and are stated at their estimated realisable values. The ten largest customers account for 82% (31 December 2018: 80%) of outstanding gross other trade receivables. The financial position of the related parties is stable.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk.

22. FINANCIAL RISK MANAGEMENT (continued)

Interest rate risk

Interest rate risks are the exposures to various risks associated with the effect of fluctuations in the prevailing interest rates on the Company's financial position and cash flows.

The interest rate profile of the Company's interest-bearing financial instruments as reported to the management of the Company is as follows:

	30 June 2019 (Unaudited)	31 December 2018 (Audited)
Fixed rate instruments		
Financial assets		
- Short term deposits	<u>400,000</u>	<u>300,000</u>
Variable rate instruments		
Financial assets		
- Investments at FVTPL	<u>378,405</u>	<u>305,038</u>

Fair value sensitivity analysis for fixed interest rate instruments

The Company does not account for any fixed rate financial assets and liabilities at fair value through profit or loss. Therefore, a change in interest rates at the reporting date would not affect the statement of profit or loss and other comprehensive income.

Cash flow sensitivity analysis for variable rate instruments

A change of 100 basis points in interest rates at the reporting date would have increased / (decreased) profit or loss by SR 3.78 million (31 December 2018: SR 3.05 million). This analysis assumes that all other variables, in particular, foreign currency rates, remain constant.

Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates for its transactions principally in Saudi Riyals, United States Dollars and Euro. The Company operates internationally and is exposed to foreign exchange risk. Currently, such exposures are mainly related to exchange rate movements between foreign currencies against Euros and United Kingdom Pounds. The Company's management monitors such fluctuations and manages its effect on the financial statements accordingly.

The cash and cash equivalents, trade receivables and trade payables of the Company are denominated in Saudi Arabian Riyals.

22. FINANCIAL RISK MANAGEMENT (continued)

Price risk

The risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all instruments traded in the market. The Company is exposed to price risk which arises from investment in mutual funds measured at FVTPL. The management of the Company monitors the portfolio on a regular basis, and all the significant decisions are approved by the Risk Management Committee.

Sensitivity analysis

Every 5% increase or decrease in the net asset value with all other variables held constant will decrease or increase profit before zakat for the period by SR 18.92 million (31 December 2018: SR 15.25 million).

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Capital risk management

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders, and to maintain a strong capital base to support the sustained development of its businesses. The Company manages its capital structure by monitoring return on net assets and makes adjustments to it in the light of changes in economic conditions.

23. SUBSEQUENT EVENTS

There have been no significant subsequent events since the period-end, except for the matters disclosed in note 10, that would require any disclosure or adjustment in these condensed interim financial statements.

24. BOARD OF DIRECTORS' APPROVAL

The condensed interim financial statements were approved and authorized for issue by the Board of Directors on 29 July 2019, corresponding to: 26 Dhul Qadah 1440H.
