

INDEPENDENT AUDITORS' REPORT ON THE FINANCIAL STATEMENTS

**To the Shareholders of
Wafrah Company for Industry and Development
(A Saudi Joint Stock Company)
Riyadh – Kingdom of Saudi Arabia**

Opinion:

We have audited the financial statements of Wafrah for Industry and Development Company A Saudi Joint Stock Company (the "Company"), which comprise the statement of financial position as at December 31, 2021, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2021, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs) endorsed in the Kingdom of Saudi Arabia and other standards and pronouncements issued by Saudi Organization for Certified Public Accountants (SOCPA).

Basis for Opinion:

We conducted our audit in accordance with International Standards on Auditing (ISAs) endorsed in the Kingdom of Saudi Arabia. Our responsibilities under those standards are further described in the "Auditor's Responsibilities for the Audit of the Financial Statements" section of our report. We are independent of the Company in accordance with the Code of Conduct and Ethics adopted in the Kingdom of Saudi Arabia. Also fulfilled the requirements of the conduct of other ethics in accordance with those rules. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern:

We draw attention to note (2-e) to the financial statements, which indicates that the Company incurred a loss of approximately SAR 10,930,587 for the year ended December 31, 2021. Additionally, the Company's current liabilities exceeded its current assets by SAR 20,385,187 as at December 31, 2021. These circumstances indicate the existence of a material uncertainty, that may cast significant doubt on the Company's ability to continue as a going concern and our opinion has not been modified in this respect.

Other Matter:

The Company's financial statements for the year ended December 31, 2020 were audited by another auditor, who expressed a modified opinion on March 29, 2021. The basis of qualified opinion is that the predecessor auditor was not able to reach a sufficient conclusion on the bases and assumptions used in the valuation of property, plant and equipment as on December 31, 2020, whose book value amounted to SAR 95,540,216. As a result, the predecessor auditor was unable to determine whether it was necessary to make any adjustments related to the balance of property, plant and equipment in the statement of financial position and items in the statements of comprehensive income, changes in equity and cash flows.

During the audit process of Company's financial statements for the year ended December 31, 2021, property, plant and equipment were evaluated by an external valuer. Accordingly, there is no modified opinion on the Company's financial statements as on December 31, 2021, in respect of the valuation of property, plant and equipment.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current year. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each key audit matter, a description of how our audit addressed the matter is set out below:

Key audit matters	How the matter was addressed in our audit
<p>Revenue recognition: During the year ended December 31, 2021, Company's revenue amounted to SAR 64.9 million (2020: SAR 83.7 million). The company continues to be under pressure to meet goals and expectations which may lead to misstatements in revenue recognition. Revenue recognition is a key audit matter because there is a risk that management may override controls to misrepresent revenue transactions.</p> <p>Refer to Note 3-14 of the financial statements for the accounting policy related to revenue recognition and Note 23 for the related disclosures.</p>	<p>We have performed the following procedures regarding revenue recognition:</p> <ul style="list-style-type: none"> - Evaluating the appropriateness of the accounting policies related to the revenue recognition of the Company by taking into consideration the requirements of IFRS 15 "Revenue from Contracts with Clients". - Evaluating the design, implementation and testing of the operational effectiveness of the Company's control procedures, including the control procedures to prevent fraud when recognizing revenue in accordance with the Company's policy. - Performance of audit analytical procedures for revenues, by comparing sales for the current year with the previous year, and identifying the causes of fundamental fluctuations, which require additional examination in light of our understanding of the company's operating conditions, considering market conditions as well. - Testing sales transactions, on a sample basis, and perform cut-off tests of revenue to ensure that the revenue has been recognized in the correct period. - Assessing the adequacy of the disclosures that the management has included in the accompanying financial statements.

Report on the Audit of the Financial Statements (continued)

Key Audit Matters (continued)

Key audit matters	How the matter was addressed in our audit
<p>Trade receivables: As on December 31, 2021, the carrying value of trade receivables amounted to SAR 28.3 million (2020: SAR 30 million), and the provision for expected credit losses of trade receivables amounted to SAR 9.5 million (2020: SAR 9.4 million).</p> <p>At each reporting date, the Company's management applies a simplified expected credit loss ("ECL") model to determine the allowance for impairment of trade receivables. The ECL model involves the use of various assumptions, macro-economics factors and study of historical trends relating to the Company's experience of trade receivables' collection.</p> <p>We considered this a key audit matter due to the judgements and estimates involved in the application of the expected credit loss model.</p> <p>Refer to Note 3-6 of the financial statements for the accounting policy relating to trade receivables and Note 11 for the related disclosures.</p>	<p>We have performed the following procedures regarding expected credit losses valuation of trade receivables:</p> <ul style="list-style-type: none"> - Compared the ECL model developed by management to that required by IFRS 9 and reviewed the reasonableness of the methodology in comparison to accepted best practice. We also account the arithmetical accuracy of the model. - Tested key assumptions such as those used to calculate the likelihood of default and the subsequent loss on default, by comparing to historical data. We also considered the incorporation of forward-looking factors to reflect the impact of future events on expected credit losses. - Selected a sample of trade receivables and sent confirmation requests to ensure the accuracy of balances at year-end. And related to customers from whom no confirmations were received, we conducted an alternative audit procedures that included verifying the supporting documents and subsequent collections occurred after year-end for the selected sample. - We compared the Company's ECL provision policy and the ECL practice in accordance with the requirements set out in IFRS 9. - Understand and evaluate the design and effectiveness of the internal controls that the Company applies to the trade receivables cycle. - Assessing the adequacy of the Company's disclosures included in the accompanying financial statements.
<p>Inventory: As on December 31, 2021, the carrying value of inventory amounted to SAR 15.2 million (2020: SAR 21.2 million). Inventory is important because of the nature of the Company's activity, which depends on the stock mainly in generating revenue and due to the nature of the stock of perishable food items or the expiry of its validity. Accordingly, the inventory is one of the key audit matters because of its impact on the results of the business. Refer to Note 3-7 of the financial statements for the accounting policy related to inventory and Note 12 for related disclosures.</p>	<p>We have performed the following procedures regarding valuation and accuracy of inventory:</p> <ul style="list-style-type: none"> - Test the design of the control procedures and their operating effectiveness in respect of the recognition of inventory. - Detailed analytical procedures for inventory. - Test the correctness of inventory measurement at the lower of cost or net realizable value as well as reviewing the Company's policy to determine the cost using weighted average method. - Test the movement of inventory in the subsequent period after year-end to ensure that it is not required to recognize more provision for slow moving or damaged inventory. - We have attended the Company's annual stock count as at December 31, 2021 to verify the actual existence and good status of a sample of items that are selected randomly. - Assessing the adequacy of the Company's disclosures included in the accompanying financial statements.

Other information included in the Company's annual report for the year ended 31 December 2021

Management is responsible for the other information. The other information consists of the information included in the annual report of the board of directors, but does not include the financial statements and our report thereon, which are expected to be made available to us after the date of our report.

Our opinion on the financial statements does not cover the other information and we will not express any kind of assurance thereon.

Other information included in the Company's annual report for the year ended 31 December 2021 (continued)

With regard to our review of the financial statements, our responsibility is limited to reading the other information described above, and when reading it, we take into account whether the other information does not materially correspond to the financial statements or information obtained during the audit process or otherwise appears to contain significant misstatements.

If, upon reading the board's report, we conclude that it contains material misstatements, we must inform those charged with governance of this matter.

Responsibilities of Management and those charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation for the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Auditor's Responsibilities for the Audit of the Financial Statements (continued)

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

During our audit of the financial statements, we did not find the Company's violation of the provisions of the Companies Law or the provisions of the Company's Articles of Association.

2. BASIS OF PREPARATION

(a) Applicable accounting standards :

These Financial Statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as endorsed in the Kingdom of Saudi Arabia and other standards and pronouncements that are issued by Saudi Organization for Certified Public Accountants ("SOCPA")

(b) basis of prepare financial statements:

The financial statements have been prepared on the historical cost basis except for certain financial assets that are measured at fair value through OCI and certain financial assets at fair value measured through OCI at fair value and financial assets and liabilities accounted at amortized cost.

(c) Functional and presentation currency:

The financial statements are presented in Saudi Riyal, which is the Company's functional currency.

(d) Use of Accounting judgments and estimates:

The preparation of these financial statements requires management to use judgments and estimates that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

WAFRAH FOR INDUSTRY AND DEVELOPMENT COMPANY
(A Saudi Joint Stock Company)
NOTES TO THE FINANCIAL STATEMENTS (continued)
FOR THE YEAR ENDED DECEMBER 31, 2021
(Saudi Riyals)

(e) Going concern:

The company incurred a loss of approximately SAR 10.9 million and approximately SAR 12.4 million for the two years ended December 31, 2021 and 2020 respectively, in addition to the company's current liabilities as on December 31, 2021 exceeding its current assets by SAR 20,385,187 which indicates Due to the existence of fundamental uncertainty, it may cast great doubt about the company's ability to survive as a going concern and the company may not be able to realize its assets and fulfil its obligations in the normal course of activity. The management conducted an assessment of the company's ability to continue as an existing entity, and concluded that the company has the necessary resources to continue operating in the foreseeable future for a period of not less than 12 months from the date of approval of these financial statements. The company's management seeks to improve the financial conditions by increasing sales and reducing expenses in order to reduce the cost of production to enhance the competitiveness of the company's products and the management intends to benefit from the initiatives launched by the Saudi Industrial Development Fund through a request to reschedule the balance of the existing loan, which will affect the balance of current liabilities. In addition, the company was able to reduce the net losses for years 2020 and 2021 by 51,20 % and 11,70 % respectively which indicates the improvement in company performance, and accordingly, these financial statements were prepared on the basis of going concern.

3. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of the most important accounting policies followed by the company:

3-1 New standards, amendments to standards and interpretations

The Company has applied the following standards and amendments for the first time for their annual reporting period commencing 1 January 2021.

Amendments to IFRS 7 and IFRS 16 interest rate benchmark reform – Phase 2

The Phase 2 amendments address issues that arise from the implementation of the reforms, including the replacement of one benchmark with an alternative one. The Phase 2 amendments provide additional temporary reliefs from applying specific IAS 39 and IFRS 9 hedge accounting requirements to hedging relationships directly affected by IBOR reform.

Amendment to IFRS 16, 'Leases' – COVID-19 related rent concessions

As a result of the coronavirus (COVID-19) pandemic, rent concessions have been granted to lessees. In May 2020, the International Accounting Standards Board ("IASB") published an amendment to IFRS 16 that provided an optional practical expedient for lessees from assessing whether a rent concession related to COVID-19 is a lease modification. On 31 March 2021, the IASB published an additional amendment to extend the date of the practical expedient from 30 June 2021 to 30 June 2022. Lessees can select to account for such rent concessions in the same way as they would if they were not lease modifications. In many cases, this will result in accounting for the concession as variable lease payments in the period(s) in which the event or condition that triggers the reduced payment occurs.

The adoption of above amendments does not have any material impact on the Financial Statements during the year.

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

3-2 Standards issued but not yet effective

Following are the new standards and amendments to standards which are effective for annual periods beginning on or after 1 January 2022 and earlier application is permitted; however, the Company has not early adopted them in preparing these Financial Statements.

Amendments to IAS 1, 'Presentation of financial statements' on classification of liabilities

These narrow-scope amendments to IAS 1, 'Presentation of financial statements', clarify that liabilities are classified as either current or non-current, depending on the rights that exist at the end of the reporting period. Classification is unaffected by the expectations of the entity or events after the reporting date (for example, the receipt of a waiver or a breach of covenant). The amendment also clarifies what IAS 1 means when it refers to the 'settlement' of a liability.

Amendments to IFRS 3, IAS 16, IAS 37

- IFRS 3, 'Business combinations' update a reference in IFRS 3 to the Conceptual Framework for Financial Reporting without changing the accounting requirements for business combinations.
- IAS 16, 'Property, plant and equipment' prohibit a company from deducting from the cost of property, plant and equipment amounts received from selling items produced while the company is preparing the asset for its intended use. Instead, a company will recognise such sales proceeds and related cost in profit or loss.
- IAS 37, 'Provisions, contingent liabilities and contingent assets' specify which costs a company includes when assessing whether a contract will be loss-making.

Amendments to IAS 1, Practice statement 2 and IAS 8

The amendments aim to improve accounting policy disclosures and to help users of the financial statements to distinguish between changes in accounting estimates and changes in accounting policies.

Amendment to IAS 12 – deferred tax related to assets and liabilities arising from a single transaction

These amendments require companies to recognise deferred tax on transactions that, on initial recognition give rise to equal amounts of taxable and deductible temporary differences.

(A Saudi Joint Stock Company)
NOTES TO THE FINANCIAL STATEMENTS (continued)
FOR THE YEAR ENDED DECEMBER 31, 2021
(Saudi Riyals)

3-3 Property, plant and equipment's

- Recognition and measurement

Items of property and equipment are measured at cost less accumulated depreciation and impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset.

When parts of an item of property and equipment have different useful lives, they are accounted for as items (major components) of property and equipment.

Gains and losses on disposal of an item of property and equipment are determined by comparing the proceeds from disposal with the carrying amount of property and equipment and are recognized net within in the statement of profit or loss.

- Subsequent costs

The cost of replacing part of an item of property and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the company and its cost can be measured reliably. The carrying amount of the replaced part is derecognized. The costs of the day-to-day servicing of property and equipment are recognized in statement of profit or loss as incurred.

- Depreciation

Items of property and equipment are depreciated on a straight-line basis in statement of income over the estimated useful lives of each component. Leased assets are depreciated over the lease term or on the shorter useful lives of the assets

The estimated annual depreciation rates for property, plant and equipment during the current year are the same as for the previous year and details as follows:

Machinery and equipment's	2.5 -5 %
Buildings	3 - 15 %
Tools	5 - 15 %
Artesian wells	5 %
Furniture and fixture	2.5 - 15 %
Air conditions	15 %
Motor vehicles	25 %
Fitting and equipment's	10 %

3-4 Real estate investments

Real estate investment is a property acquired either to earn rental income or to increase in value or both, but not for the purpose of selling it through the normal activities of the Company. It is not used for production or supply of goods or services or for administrative purposes. Investment properties are stated at cost and their fair values are disclosed in the notes to the financial statements, which are estimated annually by an independent real estate expert based on the market prices of those properties within an active real estate market.

WAFRAH FOR INDUSTRY AND DEVELOPMENT COMPANY
(A Saudi Joint Stock Company)
NOTES TO THE FINANCIAL STATEMENTS (continued)
FOR THE YEAR ENDED DECEMBER 31, 2021
(Saudi Riyals)

3- SIGNIFICANT ACCOUNTING POLICIES (Continued)

3-5 Intangible assets

Intangible assets other than goodwill are measured at cost less accumulated amortization and accumulated losses of impairment, if any.

The intangible assets are amortized on a straight-line basis over the economic life of 7 years.

Subsequent expenditure is capitalized only when it is probable that the future economic benefits associated with the expenditure will flow to the company, and the costs can be measured reliably.

The residual values of the intangible assets, their useful lives and indicators of impairment are reviewed at the end of each financial year and adjusted for a future effect, if necessary.

3-6 Accounts receivable

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. For impairment of financial assets refer to Note 3-18

3-7 Inventory

Inventories are measured at the lower of cost and net realisable value. Cost is determined using the weighted average method. Cost includes all direct manufacturing expenditure based on the normal level of activity and transportation and handling costs. Net realisable value comprises estimated selling price less further production costs to completion and appropriate selling and distribution costs. Allowance is made, where necessary for slow moving inventories. Cost of inventories is recognised as an expense.

3-8 Cash and cash equivalents

Cash and cash equivalents consists of cash and banks balances amounts and demand deposits, which can be converted into cash within a period of three months or less (If any).

3-9 Employees Benefits

Short Term Obligations

Liabilities for wages and salaries and any other short term benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the statement of financial position.

Post-Employment Obligations

Defined Contribution Plans

Contributions to defined contribution superannuation plans are expensed when the employees have rendered service entitling them to the contributions.

Retirement benefit in the form of General Organization of Social Insurance (GOSI) is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the GOSI. The Company recognizes contribution payable to the GOSI as an expense, when an employee renders the related service.

Defined Benefits Plans

The cost of providing benefits under the defined benefit plans is determined using the projected unit credit method. Re-measurements, comprising of actuarial gains and losses, are recognized immediately in the statement of financial position with a corresponding debit or credit to retained earnings through other comprehensive income in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods.

The discount rate for discounting the estimated future cash outflows is required to be based on the yield on corporate bonds of duration and currency consistent with the liabilities. Where there is no deep market in corporate bonds in the currency under consideration, the yields on government bonds are used.

WAFRAH FOR INDUSTRY AND DEVELOPMENT COMPANY
(A Saudi Joint Stock Company)
NOTES TO THE FINANCIAL STATEMENTS (continued)
FOR THE YEAR ENDED DECEMBER 31, 2021
(Saudi Riyals)

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

3- 9 Employees Benefits (Continued)

Past service costs are recognized in the statement of profit or loss on the earlier of the date of the plan amendment or curtailment and the date on which the Company recognizes related restructuring costs. Net interest is calculated by applying the discount rate to the net defined benefit liability. The Company recognizes the changes in the net defined benefit obligation under 'cost of revenue, 'general and administrative expenses' and 'selling and distribution expenses' in the statement of profit or loss.

3-10 Accounts payable

Liabilities are recognized for amounts to be paid in the future for goods or services received, whether billed by the suppliers or not.

3-11 Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

3-12 Estimated Zakat

Zakat is provided on accrual basis in accordance with the Regulations of the General Authority for Zakat and Income ("DZIT") in the Kingdom of Saudi Arabia. The zakat provision is charged to the statement of profit or losses, any differences resulting from the final assessments are recorded in the year of their finalization.

Zakat is calculated on an accrual basis and is calculated on the basis of net income adjusted for zakat during the year or on the basis of zakat calculated according to the laws. Any differences in the provision previously recognized are settled when the final approval is received by the General Authority for Zakat and Income.

3-13 Related parties transactions

Related party

A related party is a person or entity that is related to the entity that is preparing its financial statements.

(a) A person or a close member of that person's family is related to a reporting entity if that person:

- (i) Has control or joint control of the reporting entity;
- (ii) Has significant influence over the reporting entity; or
- (iii) Is a member of the key management personnel of the reporting entity or of a parent of the reporting entity?

(b) An entity is related to a reporting entity if any of the following conditions applies:

- (i) The entity and the reporting entity are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).
- (ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).
- (iii) Both entities are joint ventures of the same third party.
- (iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.
- (v) The entity is a post-employment benefit plan for the benefit of employees of either the reporting entity or an entity related to the reporting entity. If the reporting entity is itself such a plan, the sponsoring employers are also related to the reporting entity.
- (vi) The entity is controlled or jointly controlled by a person identified in (a).
- (vii) A person identified in (a) (i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).
- (viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the reporting entity or to the parent of the reporting entity.

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

3-14 Revenue recognition

Revenue is measured based on the consideration specified in a contract with customer and excludes amount collected on behalf of third parties.

The Company recognizes revenue when it transfers control over a product or service to a customer. The principles in IFRS 15 are applied using the following five steps:

Step 1: The Company accounts for a contract with a customer when:

- The contract has been approved and the parties are committed;
- Each party's rights are identified;
- Payment terms are defined;
- The contract has commercial substance; and
- Collection is probable.

Step 2: The Company identifies all promised goods or services in a contract and determines whether to account for each promised good or service as a separate performance obligation. A good or service is distinct and is separated from other obligations in the contract if both:

- The customer can benefit from the good or service separately or together with other resources that are readily available to the customer; and
- The good or service is separately identifiable from the other goods or services in the contract.

Step 3: The Company determines the transaction price, which is the amount of consideration it expects to be entitled to in exchange for transferring promised goods or services to a customer.

Step 4: The transaction price in an arrangement is allocated to each separate performance obligation based on the relative standalone selling price of the good or service being provided to the customer.

Step 5: Revenue is recognized when control of the goods or services is transferred to the customer. The Company transfers a good or service when the customer obtains control of that good or service. A customer obtains control of a good or service if it has the ability to direct the use of and receive the benefit from the good or service.

In comparative period, revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is received.

Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duty. The Company has concluded that it is the principal in all of its revenue arrangements, has pricing latitude, and is also exposed to inventory and credit risks.

Significant accounting judgments and estimates for revenue

The following is a description of the accounting policies and important provisions of the main activities that the company generates its revenues:

(A) Selling products

Revenue is recognized when control over those products or services is transferred, and it is when the products or services are delivered to the customer. Delivery occurs when products are shipped to the specified location, and the risk of depreciation and loss has been transferred to the customer.

In these contracts, the company is primarily responsible for fulfilling the obligation to provide food and other specific products. The company assumes inventory risk before the food products are transported to customers. In addition, the company has discretion in setting prices for specific food products. The company also bears credit risk on these transactions as it is obligated to pay the supplier even if the customer fails to pay.

NOTES TO THE FINANCIAL STATEMENTS (continued)
FOR THE YEAR ENDED DECEMBER 31, 2021
(Saudi Riyals)

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

3-14 Revenue recognition (continued)

Significant accounting judgments and estimates for revenue (continued)

(B) Discounts on sales volume

Revenue is often recognized with sales volume discounts over 12 months. Revenue from these sales is recognized based on the price specified in the contract, after deduction of the estimated discounts.

The contracted discount rate and accumulated experience are used to determine the size of those discounts, and revenue is recognized only to the extent that it is highly probable that the opposite will not occur. The contractual obligation of expected discounts is recognized in the amount of amounts payable to customers in respect of sales made until the end of the reporting period.

(C) Sales returns

Revenue is recognized minus sales returns.

The accumulated experience is used to estimate the amount of sales returns using the projected value method, and revenue is recognized only to the extent that it is highly probable that the opposite will not occur. Expected sales returns are recognized in the amount of amounts payable to customers in respect of sales made up to the end of the reporting period.

Revenue is the fair value of the consideration received or receivable against the goods sold, net of returns, trade discount and rebates. The company recognizes revenue when the customer obtains the goods or acknowledges their acceptance.

Products are mainly sold on a sales or return basis, and a return sales allowance is calculated on the basis of the expected return from expired or damaged products. The expected sales returns are offset against revenue with the associated effect of the sales allowance.

Goods are sold at significant discounts retroactively on the basis of total sales over a 12-month period. Revenue from these sales is recognized based on the price specified in the contract minus the estimated discounts. Accumulated experience is used to estimate and provide discounts and revenue is recognized to the most likely extent that there will be no material reversal.

There is no component of an existing financing component as sales are made in either cash or term debt in line with market practice.

3-15 Expenses

Expenses incurred by the Company consist of selling and marketing expenses, general and administrative expenses and operating expenses. Production costs are charged at full cost of materials, direct labor and indirect industrial costs. The expenses resulting from the Company's efforts related to the marketing, sale and distribution of finished products are classified as a separate item under the heading of selling and marketing expenses. Other direct and indirect expenses relating to management that are not related to the production function or the sales and marketing function are classified as general and administrative expenses. The joint expenses are distributed, if necessary, between administrative and general expenses, selling and marketing expenses and operating expenses on a consistent basis. The accrual principle is applied in charging the financial period with administrative and general expenses and selling and marketing expenses.

NOTES TO THE FINANCIAL STATEMENTS (continued)
FOR THE YEAR ENDED DECEMBER 31, 2021
(Saudi Riyals)

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

3-16 Financial Instruments

IFRS 9 introduces new classification and measurement requirements for financial assets. IFRS 9 requires all financial assets to be classified and subsequently measured at either amortized cost or fair value. The classification depends on the business model for managing the financial asset and the contractual cash flow characteristics of financial asset, determined at the time of initial recognition.

Financial assets are classified into the following specified categories under IFRS 9:

- Debt instruments at amortized cost;
- Debt instruments at fair value through other comprehensive income (FVOCI), with gains or losses recycled to profit or loss on de-recognition;
- Equity instruments at FVOCI, with no recycling of gains or losses to profit or loss on de-recognition; and
- Financial assets at fair value through profit and loss (FVPL).

(a) Financial assets classified as amortized cost

Debt instruments that meet the following conditions are subsequently measured at amortized cost less impairment loss (except for debt investments that are designated as at fair value through profit or loss on initial recognition):

- 1- The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- 2- The contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

If a financial asset does not meet both of these conditions, it is measured at fair value.

The Company makes an assessment of a business model at portfolio level as this best reflects the way the business is managed and information is provided to management. In making an assessment of whether an asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows, the Company considers:

- Management's stated policies and objectives for the portfolio and the operation of those policies in practice;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed;
- How management evaluates the performance of the portfolio;
- Whether the management's strategy focus on earning contractual commission income;
- The degree of frequency of any expected asset sales;
- The reason for any asset sales; and
- Whether assets that are sold are held for an extended period of time relative to their contractual maturity or are sold shortly after acquisition or an extended time before maturity.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company will consider the contractual terms of the instrument. This will include assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

Income is recognized on an effective interest basis for debt instruments measured subsequently at amortized cost. Interest is recognized in the statement of profit or loss.

Debt instruments that are subsequently measured at amortized cost are subject to impairment.

WAFRAH FOR INDUSTRY AND DEVELOPMENT COMPANY
(A Saudi Joint Stock Company)
NOTES TO THE FINANCIAL STATEMENTS (continued)
FOR THE YEAR ENDED DECEMBER 31, 2021
(Saudi Riyals)

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

3-16 financial instruments (continued)

(b) Financial assets designated as FVOCI with recycling

Debt instruments that meet the following conditions are subsequently measured at FVOCI:

- The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For debt financial instruments measured at FVOCI, commission income and impairment losses or reversals are recognized in the statement of income and computed in the same manner as for financial assets measured at amortized cost.

All other changes in the carrying amount of these instruments are recognized in other comprehensive income and accumulated under the investment revaluation reserve. When these instruments are derecognized, the cumulative gains or losses previously recognized in other comprehensive income are reclassified to the statement of profit or loss.

(c) Financial assets classified as FVPL

Investments in equity instruments are classified as at FVPL, unless the Company designates an investment that is not held for trading as at FVOCI on initial recognition.

Debt instruments that do not meet the amortized cost of FVOCI criteria are measured at FVPL. In addition, debt instruments that meet the amortized cost criteria but are designated as at FVPL to avoid accounting mismatch are measured at fair value through income statement. A debt instrument may be designated as at FVPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognizing the gains and losses on them on different bases. The Company has not designated any debt instrument as FVPL since the date of initial application of IFRS 9 (i.e. 1 January 2018).

Debt instruments are reclassified from amortized cost to FVPL when the business model is changed such that the amortized cost criteria are no longer met. Reclassification of debt instruments that are designated as at FVPL on initial recognition is not allowed.

Financial assets at FVPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in statement of profit or loss.

Commission income on debt instruments as at FVPL is included in the statement of profit or loss.

Dividend income on investments in equity instruments at FVPL is recognized in the statement of profit or loss when the Company's right to receive the dividends is established in accordance with IFRS 15 Revenue from contracts with customers.

(d) Investment in equity instruments designated as FVOCI

On initial recognition, the Company can make an irrevocable election (on an instrument-by-instrument basis) to designate investments in equity instruments as at FVOCI. Designation as at FVOCI is not permitted if the equity investment is held for trading.

A financial asset or financial liability is held for trading if:

- It is acquired or incurred principally for the purpose of selling or repurchasing it in the near term;
- On initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking; or
- It is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

WAFRAH FOR INDUSTRY AND DEVELOPMENT COMPANY
(A Saudi Joint Stock Company)
NOTES TO THE FINANCIAL STATEMENTS (continued)
FOR THE YEAR ENDED DECEMBER 31, 2021
(Saudi Riyals)

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

3-16 financial instruments (continued)

(d) Investment in equity instruments designated as FVOCI (continued)

Investments in equity instruments at FVOCI are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated in other reserves. Gain and losses on such equity instruments are never reclassified to the statement of profit or loss and no impairment is recognized in the statement of profit or loss. Investment in unquoted equity instruments which were previously accounted for at cost in accordance with IAS 39, are now measured at fair value. The cumulative gain or loss will not be reclassified to the statement of profit or loss on disposal of the investments.

Dividends on these investments are recognized in the statement of profit or loss when the Company's right to receive the dividends is established in accordance with IAS 18 Revenue, unless the dividends clearly represent a recovery of part of the cost of the investment.

Fair value reserve includes the cumulative net change in fair value of equity investment measured at FVOCI. When such equity instruments are derecognized, the related cumulative amount in the fair value reserve is transferred to accumulated losses.

Impairment of financial assets

The Company recognizes a loss allowance for expected credit losses (ECL) on debt instruments that are measured at amortized cost or at FVOCI, lease receivables, trade receivables, as well as on loan commitments and financial guarantee contracts. No impairment loss is recognized for investments in equity instruments. The amount of expected credit losses reflects changes in credit risk since initial recognition of the respective financial instrument.

The Company applies the simplified approach to calculate impairment on trade receivables and this always recognizes lifetime ECL on such exposures. ECL on these financial assets are estimated using a flow rate based on the Company's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

For all other financial instruments, the Company applies the general approach to calculate impairment. Lifetime ECL is recognized when there has been a significant increase in credit risk since initial recognition and 12 months ECL is recognized the credit risk on the financial instrument has not increased significantly since initial recognition. The assessment of whether credit risk of the financial instrument has increased significantly since initial recognition is made through considering the change in risk of default occurring over the remaining life of the financial instrument.

Measurement and recognition of expected credit losses

The measurement of expected credit losses is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default is based on historical data adjusted by forward-looking information as described above.

As for the exposure at default for financial assets, this is represented by the assets' gross carrying amount at the reporting date. Exposure at default for off balance sheet items is arrived at by applying a credit conversion factor to the undrawn portion of the exposure.

WAFRAH FOR INDUSTRY AND DEVELOPMENT COMPANY
(A Saudi Joint Stock Company)
NOTES TO THE FINANCIAL STATEMENTS (continued)
FOR THE YEAR ENDED DECEMBER 31, 2021
(Saudi Riyals)

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

3-16 Financial instruments (continued)

Where lifetime ECL is measured on a collective basis to cater for cases where evidence of significant increases in credit risk at the individual instrument level may not yet be available, the financial instruments are grouped on the following basis:

- Nature of financial instruments (i.e. the Company's trade and other receivables), are assessed for expected credit losses on an individual basis);
- Past-due status;
- Nature, and size industry of debtors; and
- External credit ratings where available.

The Company recognizes an impairment gain or loss in the statement of profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account, except for investments in debt instruments that are measured at FVOCI, for which the loss allowance is recognized in profit or losses statement and accumulated in the fair value reserve, and does not reduce the carrying amount of the financial asset in the interim condensed statement of financial position.

Derecognize of financial assets

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the assets expires; or it transfers the financial asset or substantially all the risk and rewards of ownership to another entity. If the Company neither transfer nor retains substantially all the risks and reward of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

Financial liabilities

Financial liabilities carried at amortized cost have been classified and measured at amortized cost using the effective yield method.

For financial liabilities that are designated as at FVPL, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is recognized interim condensed other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in interim condensed other comprehensive income would create or enlarge an accounting mismatch in interim condensed comprehensive income. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to interim condensed comprehensive income.

The liability credit reserve includes the cumulative changes in the fair value of the financial liabilities designated as at fair value through profit or loss that are attributable to changes in the credit risk of these liabilities and which would not create or enlarge accounting mismatch in interim condensed comprehensive income. Amount presented in liability credit reserve are not subsequently transferred to interim condensed comprehensive income. When such investments are derecognized, the related cumulative amount in the liability credit reserve is transferred to retained earnings. Since the date of initial application of IFRS 9 (i.e. 1 January 2018), the Company has also not designated any financial liability as at FVPL.

Derecognize of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or expired.

3-17 Foreign currency transactions

Transactions in foreign currencies are translated into Saudi Riyals during the period at the exchange rates prevailing at the date of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated into Saudi Riyals at the date of the financial statements at the exchange rates prevailing on that date. Differences arising from the translation of foreign currencies into Saudi Riyals are recognized in the income statement, profits or losses.

(A Saudi Joint Stock Company)
NOTES TO THE FINANCIAL STATEMENTS (continued)
FOR THE YEAR ENDED DECEMBER 31, 2021
(Saudi Riyals)

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

3-18 Offsetting

A offsetting is made between financial assets and financial liabilities and the net amount is reported in the statement of financial position only when binding legal rights are available and also when they are settled on a clearing basis or the verification of the assets and the settlement of liabilities at the same time.

4. SIGNIFICANT JUDGEMENTS, ASSUMPTIONS AND ESTIMATES

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectation of future events that are believed to be reasonable under the circumstances. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities within the next financial year are addressed below;

4.1 Judgements

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements:

Operating leases

Management established on the basis of an evaluation of the terms and conditions for the operating lease arrangements that not all the significant risks and rewards of ownership of land and buildings leased for warehousing and distribution will be transferred to the Company. Consequently, the land and warehouse buildings are recognized as operating leases.

4.2 Assumptions and estimates

(1) Impairment reviews

IFRS requires management to undertake an annual test for impairment of indefinite lived assets and, for finite lived assets, to test for impairment if events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

Impairment testing is an area involving management judgement, requiring inter alia an assessment as to whether the carrying value of assets can be supported by the net present value of future cash flows derived from such assets using cash flow projections which have been discounted at an appropriate rate. In calculating the net present value of the future cash flows, certain assumptions are required to be made in respect of highly uncertain matters including management's expectations of:

- a) Growth in earnings before interest, tax, depreciation and amortization (EBITDA), calculated as adjusted operating profit before depreciation and amortization.
- b) Timing and quantum of future capital expenditure.
- c) long-term growth rates; and
- d) Selection of discount rates to reflect the risks involved.
- e) The amount of mining reserves expected to be extracted during the relevant year.

Changing the assumptions selected by management, in particular the discount rate and growth rate assumptions used in the cash flow projections, could significantly affect the Company's impairment evaluation and hence results.

(Saudi Riyals)

4. SIGNIFICANT JUDGEMENTS, ASSUMPTIONS AND ESTIMATES (continued)

4-2 Assumptions and estimates (continued)

(2) Impairment losses on trade and other receivables

Trade and other receivables are stated at their amortised cost as reduced by appropriate allowances for estimated irrecoverable amounts. Estimated irrecoverable amounts are based on the ageing of the receivable balances and historical experience adjusted appropriately for the future expectations. Individual trade receivables are written off when management deems them not to be collectible.

(3) Measurement of defined benefit obligations

The Company's net obligation in respect of defined benefit schemes is calculated by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value, and the fair value of any plan assets is deducted. The present value of the obligation is determined based on actuarial valuation at the statement of financial position date by an independent actuary using the Projected Unit Credit Method, which recognises each period of service as giving rise to an additional unit of employee benefit entitlement and measures. The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plan, are determined by reference to US bond yields, (as the Saudi Riyal is pegged to the US dollar), adjusted for an additional risk premium reflecting the possibility of the linkage being broken.

(4) Estimate of zakat

Management estimates the zakat expenses according to instructions and active law.

(5) Determining whether the Company or a company part of it is acting as an agent or principal

Principles of IFRS 15 are applied by identifying each specified (i.e. distinct) good or service promised to the customer in the contract and evaluating whether the entity under consideration obtains control of the specified good or service before it is transferred to the customer. This assessment requires significant judgement based on specific facts and circumstances.

26. OTHER REVENUE

	2021	2020
Rental income	1,201,750	994,000
Gain on sales of property, plant and equipment	847,655	192,145
Gain on sales of scrap	894,832	107,291
Other revenue	584,564	189,099
	3,528,801	1,482,535

27. LOSS PER SHARE

Loss per share is calculated from the net loss of major operations by dividing the net loss of major operations for the year by the weighted average number of shares during the year. Loss per share is calculated from the net loss for the year by dividing the net loss for the year by the weighted average number of shares during the year.

Diluted loss per share for the year ended 31 December 2021 and ending 31 December 2020 was calculated by dividing the net loss from main operations and net loss for the year by the weighted average number of shares outstanding during the year adjusted for the potential reduction in ordinary shares. As there is no contingent liability for equity instruments, the diluted loss per share are not different from basic loss per share.

The weighted average number of shares for the two years ended December 31, 2021 and December 31, 2020 was reached by taking the effect of the capital decrease from the beginning of the nearest offered period (January 1, 2019) to comply with the requirements of IAS 33.

The following table reflects the loss and share data used in the basic and diluted loss per share computations:

	2021	2020
Net loss for the year	(10,930,587)	(12,379,088)
Loss per share - basic and diluted	(1.42)	(1.60)
Net loss from the main operation	(11,908,032)	(6,494,577)
Loss per share - basic and diluted	(1.54)	(0.84)
Weighted average number of shares outstanding for basic & diluted EPS	7,717,035	7,717,035

28. FINANCIAL INSTRUMENTS

Fair value measurement

Fair value represents the amount may be collected from the asset sale or a boost to convert commitment between knowledgeable parties on the same terms and dealing with others and depends on the fair value measurement of the following conditions:

1. In the principal market for the asset or liability, or
2. The most advantageous market for the asset or liability in the absence of a principal market the company should be able to handle through the most advantageous market.

WAFRAH FOR INDUSTRY AND DEVELOPMENT COMPANY
(A Saudi Joint Stock Company)
NOTES TO THE FINANCIAL STATEMENTS (continued)
FOR THE YEAR ENDED DECEMBER 31, 2021
(Saudi Riyals)

28. FINANCIAL INSTRUMENTS (continued)

When measuring the fair value of an asset or a liability, the Company uses market observable data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- **Level 1:** quoted prices (unadjusted) in active markets for identical assets or liabilities.
- **Level 2:** inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.
- **Level 3:** inputs for the asset or liability that are not based on observable market data (unobservable inputs). If the inputs used to measure the fair value of a financial asset at fair value measures.

The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Management believes that its estimates and judgments are reasonable and adequate.

The fair values of financial assets and liabilities are not significantly different from their carrying values in the financial statements as of December 31, 2021.

Fair value levels

Details of financial instruments carried at fair value are as below:

	Amount	Level 1	Level 2	Level 3
31 December 2021				
Investments determined by fair value through other comprehensive income	724,441	724,441	-	-
31 December 2020				
Investments determined by fair value through other comprehensive income	673,826	673,826	-	-

Transfers between Levels 1 & 2

There have been no transfers between Level 1 and Level 2 during the reporting periods

29. FINANCIAL RISK MANAGEMENT

The company has exposure to the following risks from its use of financial instruments.

- Credit risk.
- Liquidity risk.
- Market risk.
- Capital management.

This note presents information about the company's exposure to each of the above risks, the company's objectives, policies and processes for measuring and managing risk, and the company's management of capital.

Risk management framework

The management has overall responsibility for the establishment and oversight of company's risk management framework.

The company's risk management policies are established to identify and analyses the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits.

Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the company's activities. The company, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company's Audit Committee monitors the management's performance in monitoring compliance with the Company's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks facing the Company.

Financial instruments included in the statement of financial position include mainly cash and cash equivalents, receivables, other assets, investments, creditors, accrued liabilities, loans and other non-current liabilities.

29. FINANCIAL RISK MANAGEMENT (continued)

Credit risk

Credit risk represents the risk that the Company will incur a financial loss as a result of a failure of the customer or counterparty to meet a financial instrument with its contractual obligations. These risks arise mainly from its bank balances, trade and other receivables.

The Company's exposure to credit risk is mainly affected by the specificity of each customer. The demographic nature of the Company's customers, including the default risk of the activity and the country in which the customer operates, has a lower impact on credit risk.

Liquidity risk

Liquidity risk is the risk that the Company will be unable to meet its financial liabilities as they fall due to its financial liabilities that are settled through the provision of cash or other financial assets. The Company's liquidity management is to ensure, to the extent possible, that the Company always maintains sufficient liquidity to meet its obligations when it becomes payable under normal and stressful circumstances without incurring unacceptable losses or risks that may affect the Company's reputation.

The Company ensures that it has sufficient cash to cover expected operating expenses including coverage of financial liabilities but without any potential impact on difficult and unpredictable conditions such as natural disasters. In addition, the Company maintains a credit source from its banks to meet any sudden cash needs.

The contractual maturities of non-derivative financial liabilities are as follows:

Non-derivative financial liabilities	Less than a year	More than a year	No fixed maturity	Total
31 December 2021				
Government loan	19,500,000	6,000,000	-	25,500,000

Market risk

Market risk is the risk arising from changes in market prices such as foreign exchange rates, murabaha rates and equity prices that affect the Company's profits or the value of the Company's financial instruments.

The objective of market risk management is to control the extent to which the Company is exposed to market risk within acceptable limits in addition to maximizing returns.

Currency risk

It is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. Management monitors fluctuations in foreign currency exchange rates, and believes that the Company is not exposed to significant currency risk since the Company did not undertake significant transactions in currencies other than Saudi Riyal and US Dollars. The Saudi Riyal is pegged to the US Dollar, accordingly, balances and transactions in US Dollars are not considered to represent significant currency risk.

Capital Management

The Company's capital management policy is to maintain a strong capital base to maintain shareholders, creditors and market confidence as well as the continued development of the company's future activities.

The capital consists of ordinary shares, outstanding shares outstanding, retained earnings and non-controlling interests.

The management monitors the return on equity, which is determined by dividing net operating profit on shareholders' equity.

The Company aim to maintain the balance between the highest return possible in case of borrowing as high as possible and the preference and safety of a strong capital centre.

The Company did not have any change in capital management during the year and the Company is not subject to any external capital requirements.

30. ADJUSTED CAPITAL RATIO

32. SUBSEQUENT EVENTS

The management believes that there are no significant subsequent events since the end of the year that may affect the financial position of the company.

WAFRAH FOR INDUSTRY AND DEVELOPMENT COMPANY
(A Saudi Joint Stock Company)
NOTES TO THE FINANCIAL STATEMENTS (continued)
FOR THE YEAR ENDED DECEMBER 31, 2020
(Saudi Riyals)

33. SIGNIFICANT EVENTS

- A. In response to the spread of the Covid-19 virus around the world and the resulting disruption of social and economic activities in those markets, the company's management has proactively assessed its impact on its operations and has taken a series of preventive measures, including forming teams and ongoing crisis management processes, to ensure the health and safety of its employees. And its customers, consumers and society as a wider range as well as ensuring the continuity of supplying its products in all its markets. Whereas, the food industry in general has been exempt from the various bans and restrictions imposed by the various regulatory authorities including the exemption from curfew hours.
- B. Based on these factors, the company's management believes that the Covid-19 epidemic did not have a significant impact on the company's financial statement results that were reported for the year ended December 31, 2021.
- C. Due to persistence of the Covid - 19 disease, the company is monitoring the situation closely, especially in the next few months and the company expects the situation to be gradually improved and hopes the outbreak of Covid-19 will end this year.
- D. On May 22, 2021 the company's board of directors issued a recommendation to increase the company's capital through a issuing an ordinary shares of 154,340,700 Saudi Riyals. The company's management appointed an issuer, a legal advisor and financial advisor to manage the increase process. A request to increase the capital has been submitted to the Capital Market Authority and the company is still awaiting the approval of the Capital Market Authority.

34. Comparative numbers

The comparative figures for the previous period have been modified to correspond with the figures of the current period.

35. APPROVAL OF FINANCIAL STATEMENTS

The financial statements were approved by the Board of Directors on 14 Shaban 1443H (17 March 2022).
