Our view

SVCP indicated some action in the previous session. It appears to be a double bottom at the lows with good volume support. We expect some bottom fishing on this small cap stock to take place. Risky trade considering this is a fundamentally weak company. However, trades can place bets with appropriate stop loss.

Our view

Etihad is looking to break the 200EMA and move into the next level. Volumes have been supportive and we believe if the broader market holds the stock can move higher. Risk reward is favourable at the current level. Fundamentally good stock and offers high dividend payout.

Our view

ACWA is making its second leg up. It has failed to break the important resistance of 200EMA in the earlier attempts and we believe this time there is more momentum to scale over. We like the pattern formation and it provides comfort on the downside. Buy the stock with appropriate stop loss.

Our view

Bupa has dropped linearly from its peak and is settling at the current level. Recent volumes have been decent and price action positive. We believe this is an early stage of another bullish run. Suggest buying on upsides once the 200EMA breaks. Place appropriate stop loss and build positions gradually as volatility may be high.
