### Independent auditor's report

To the shareholders of SADR Logistics Services Company (a Saudi Joint Stock Company) Kingdom of Saudi Arabia

#### **Opinion**

We have audited the financial statements of **SADR Logistics Services Company** (the "Company"), which comprise of the statement of financial position as at 31 December 2022, and the statement of profit or loss and other comprehensive income, statement of changes in shareholders' equity, and statement of cash flows for the year then ended, and notes to the financial statements including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at 31 December 2022, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards that are endorsed in the Kingdom of Saudi Arabia and other standards and pronouncements that are endorsed by the Saudi Organization for Chartered and Professional Accountants ("SOCPA").

### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia. Our responsibilities under those standards are further described in the (Auditor's Responsibilities for the Audit of the Financial Statements) section of our report. We are independent of the Company in accordance with the professional code of conduct and ethics that are endorsed in the Kingdom of Saudi Arabia that are relevant to our audit of the financial statements and we have fulfilled our ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Head office: Moon Tower - 8 Floor P.O. Box 8736, Riyadh 11492 Unified Number: 92 002 4254

Fax: +966 11 278 2883

### **Key audit matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements for the current year ended. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Revenue recognition	
Key audit matter	How the key audit matter was addressed in our audit
The Company recognized revenue of SR 111 million during the year ended 31 December 2022 (31 December 2021: SAR 73 million).	Our procedures for auditing revenue recognition included the following:
The Company recognizes revenue either at a point in time when the customers obtain control over the goods and this is done upon acceptance and delivery of the goods to the customer or over time when the performance obligations are satisfied over time.  Revenue recognition is considered as a key audit matter due to the fact that revenue is one of the Company's performance indicators giving rise to an inherent risk that revenue could be subject to overstatement to meet targets or expectations.	<ul> <li>Assessed the appropriateness of the Company's accounting policy for revenue recognition in accordance with the requirements of International Financial Reporting Standard No. (15) "Revenue from Contracts with Customers".</li> <li>Assessed the design and implementation of relevant controls in relation to revenue recognition.</li> <li>Evaluate the key contractual arrangement with customers.</li> </ul>
	<ul> <li>Performed tests (on a sample basis) of revenue transactions and traced these to the supporting documentation, to verify that these transactions are appropriately recognized and recorded in the correct accounting period.</li> <li>Assessed the adequacy of relevant disclosures in the financial statements.</li> </ul>
Refer to note 3 for the accounting policies and no	te 22 for the related disclosures

#### Other matter

The financial statements of the Company for the year ended 31 December 2021, were audited by another auditor who expressed an unmodified opinion on those statements on 21 March 2022.

### Other information

Management is responsible for the other information. The other information comprises the information included in the Annual Report of the Company (but does not include the financial statements and our auditor's report thereon), which is expected to be made available to us after the date of this auditor's report.

Head office: Moon Tower - 8 Floor P.O. Box 8736, Riyadh 11492 Unified Number : 92 002 4254

Fax: +966 11 278 2883

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Annual Report of the Company, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

#### Responsibilities of management and Those Charged with Governance for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards that are endorsed in the Kingdom of Saudi Arabia and other standards and pronouncements endorsed by Saudi Organization for Chartered and Professional Accountants ("SOCPA") and Regulations for Companies and the Company's Bylaws and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Those Charged with Governance, in particular the Audit Committee for the Company is responsible for overseeing the Company's financial reporting process.

### Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs endorsed in the Kingdom of Saudi Arabia, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

Identify and assess the risks of material misstatement of the financial statements, whether due to fraud
or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that
is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Head office: Moon Tower - 8 Floor P.O. Box 8736, Riyadh 11492 Unified Number: 92 002 4254

Fax: +966 11 278 2883

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
  are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
  effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves a fair presentation.

We communicate with the management and with charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

For Dr. Mohamed Al-Amri & Co.

Gihad Al-Amri Certified Public Accountant Registration No. 362

Riyadh, on: 12 Ramadan 1444H Corresponding to: 3 April 2023 G

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

#### 1. ORGANIZATION AND PRINCIPAL ACTIVITIES

Sadr Logistics Services Company (formerly Al-Samaani for Metal Industries Company) (the "Company") was incorporated as a Saudi joint stock company under the Companies Law in the Kingdom of Saudi Arabia under the main commercial registration No. 1131012302 on 20 Shaaban 1414H corresponding to 2 February 1994.

The company carries out its industrial activities under Industrial Registration No. 415 issued on 18 Rajab 1412H, corresponding to 25 November 1995, and amended by Industrial License No. 112845 issued on 3 Ramadan 1443H, corresponding to 05 April 2022.

In accordance with the decision of the Capital Market Authority dated 13 Jumada Al-akhirah 1438H, corresponding to 11 January 2017, which included the approval of placement of the company's shares in the parallel market (NOMU) and with the approval of the Company's extraordinary general assembly, the Company's capital was increased from 9,000,000 Saudi riyals (divided into 900,000 shares) to 11,250,000 Saudi riyals (divided into 1,125,000 shares) by offering 225,000 shares for subscription, and on 29 Jumada al-Awwal 1438H, corresponding to 26 February 2017, the Company's shares were listed and started trading in the parallel market "NOMU".

On 25 Rajab 1439H, corresponding to 11 April 2018, the Company's capital was increased by granting bonus shares to shareholders, one bonus share for every three shares owned. The Company's capital, after the increase, became 15 million Saudi riyals, divided into 1,500,000 shares, through a capitalization of 3,750,000 Saudi Riyals from the retained earnings.

On 4 Dhu al-Qi`dah 1441H, corresponding to 25 June 2020, the Extraordinary General Assembly approved the recommendation of the Board of Directors to increase the Company's capital by granting bonus shares to shareholders from 15 million Saudi Riyals to 25 million Saudi Riyals, by capitalizing 10 million Saudi Riyals from the issue premium. The remaining amount in the issue premium account amounting to 4,478,469 Saudi Riyals was capitalized to the retained earnings.

On 12 Rabi` al-Awwal 1442H, corresponding to 29 October 2020, the Extraordinary General Assembly agreed to amend Article Two of the Articles of Association related to the Company's name to become the name of Sadr Logistics Company instead of Al-Samaani for Metal Industries Company, in addition to amending and adding some articles in the Company's Articles of Association.

On 25 Rabi` al-Thani 1442H, corresponding to 10 December 2020, the Company's shares were listed and started trading in the main market "Tadawul" under the symbol (1832).

On Jumada Al-Awwal 20 1442H, corresponding to 3 January 2021, the Company announced the recommendation of the Board of Directors to increase the capital by offering rights issues in order to enable the Company to implement its strategic and operational plans and support the expansion of logistical services. The Capital Market Authority ("CMA") issued its approval of the Company's request to increase the capital On 02 November 2021, and the Extraordinary General Assembly approved the capital increase on Rabi' al-Thani 26 1443H corresponding to 1 December 2021, by offering right shares to shareholders with an increase of 6 shares for each share. The number of shares increased by 15 million shares with a value of 150 million Saudi Riyals. After the increase, the capital became 175 million Saudi Riyal, divided into 17.5 million ordinary shares.

The principal activity of the Company is the manufacture of wooden pallets, the manufacture of prefabricated steel structure units, the manufacture of finished and semi-finished industrial products by forging, pressing, casting and rolling, the manufacture of furniture for all purposes from plastic.

The financial statements presented include the accounts of the Company and its branches, as follows:

Branch Name	CR No.	City
Branch Sadr Logistics Company	1010947309	Riyadh (I)
Branch Sadr Logistics Company	1010742525	Riyadh (II)
Branch Sadr Logistics Company	2050115434	Dammam

The purpose of Riyadh Branch I is the manufacture of wooden containers, including (packing boxes, crates, and shipping containers made of wood), and the manufacture of wooden pallets.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

### 1. ORGANIZATION AND PRINCIPAL ACTIVITIES (continued)

The purpose of Riyadh Branch II is to operate storage facilities for all types of goods (except foodstuffs), land transportation of goods, light transport, cargo and unloading services in general, refrigerated food stores, frozen food stores, general stores that include a variety of goods, material stores, dry food, logistics services, management and rental of self-storage warehouses.

The purpose of the Dammam branch is the wholesale of wooden, cork and plastic products, the wholesale of office furniture, the retail sale of metal scrap and carpentry and blacksmithing tools and tools, the sale of metal, stel and wooden boxes and caravans.

The commercial registration No. 1131023051, of Buraidah Branch, was cancelled on 19 Safar 1444H, corresponding to 16 September 2022, due to the lack of economic feasibility to carry out the business activity.

### 2. BASIS OF PREPARATION

### 2.1 Statement of compliance

The financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") that are endorsed in the Kingdom of Saudi Arabia and other standards and pronouncements that are endorsed by the Saudi Organization for Chartered and professional Accountants ("SOCPA").

#### 2.2 Measurement basis

The financial statements have been prepared in accordance with the historical cost basis, except for recognizing employees end-of-service benefits at the present value of future obligations using the projected unit credit method and certain financial instruments that are measured at fair value as explained in the significant accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for the goods and services.

### 2.3 Functional and presentation currency

The financial statements are presented in Saudi Riyals (SR), which is the Company's functional currency. All amounts are rounded to the nearest Saudi Riyal unless otherwise indicated.

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### 3.1 Current versus non-current classification

The Company presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in the normal operating cycle;
- It is held primarily for the purpose of trading;
- Expected to be realized within twelve months after the reporting period; or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

The Company classifies all other assets as non-current assets.

A liability is current when:

- It is expected to be settled in the normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current liabilities.

(A Saudi Joint Stock Company)

#### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.2 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to settle a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. Fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability; or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interests.

Fair value measurement of a non-financial assets takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for leasing transactions that are within the scope of IFRS 16 Leases, and measurements that have some similarities to fair value but are not fair value, such as net realizable value in IAS 2 'Inventories' or value in use in IAS 36 'Impairment of Assets'.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: Quoted (unadjusted) market prices in active markets for identical assets and liabilities can be obtained at the measurement date.
- Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly observable (such as prices) or indirectly (derived from prices).
- Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable (unobservable inputs).

For assets and liabilities that are recognized in the financial statements at fair value on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Company has determined the policies and procedures for both recurring fair value measurement, and for non-recurring measurement.

At each reporting date, the Company analyzes the changes in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Company's accounting policies. For this analysis, the Company verifies the major inputs applied in the latest valuation by considering the information in the valuation computation to contracts and other relevant documents. The Company also compares the change in the fair value for each asset and liability with relevant external sources to determine whether the change is reasonable.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

#### 3.3 Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment in value (if any), except for land and capital work in progress which are stated at cost less accumulated impairment in value and are not depreciated. Capital work in progress represent costs relating directly to the new projects in progress and are capitalized as property, plant and equipment when the project is completed. However, depreciation on such assets under construction commences when the asset becomes available for use.

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Company and the amount can be measured reliably.

(A Saudi Joint Stock Company)

#### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.3 Property, plant and equipment (continued)

Borrowing costs directly attributable to construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use are added to the cost of these assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

When parts of property, plant and equipment are significant in cost in comparison to the total cost of the item, and where such parts/components have a useful life different than other parts and are required to be replaced at different intervals, the Company recognizes such parts as individual assets with specific useful lives and depreciates them accordingly. All other repair and maintenance costs are recognized in the profit or loss as incurred.

Depreciation is calculated from the date the item of property, plant and equipment are available for its intended use or in respect of self-constructed assets, from the date such assets are ready for the intended use

Depreciation is calculated on a straight-line basis over the useful life of the asset as follows:

<u>Statement</u>	<u>Percentage</u>
Buildings and fixtures	5% - 15% per annum
Leasehold improvements	5% per annum or over the lease period, whichever is less
Machines and equipment	12% per annum
Vehicles	25% per annum
Tools	20% per annum
Furniture	15-25% per annum

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognised in the profit or loss.

Items such as spare parts, stand-by equipment and servicing equipment, if any, are recognized in accordance with IAS 16, when they meet the definition of property, plant and equipment. Otherwise, such items are classified as inventory as per IAS 2.

### 3.4 Capital project in progress

Assets under construction are capitalized under capital projects in progress. Assets under construction or development are transferred to the appropriate category of property, equipment or intangible assets (depending on the nature of the project), when the asset reaches the location and/or condition necessary for it to operate in the manner deemed by management. The cost of the capital project in progress item includes the purchase price, construction/development cost, professional fees, borrowing costs for qualifying assets, capitalized in accordance with the Company's accounting policy and any other costs directly associated with creating or acquiring the capital work-in-progress item that management considers. Costs associated with testing items of capital work-in-progress (before they are available for use) are capitalized net of proceeds from selling any production during the testing period. Capital projects in progress are not depreciated or amortized.

### 3.5 Intangible assets

### Intangible assets acquired separately

The intangible asset is initially recognized at cost equal to the fair value of the consideration paid at the time the asset was acquired. Such assets are carried at cost less accumulated amortization and accumulated impairment losses. Amortization is recognized on a straight-line basis over their estimated useful lives. The estimated useful life and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

### 3. <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES</u> (continued)

### 3.5 Intangible assets (continued)

### **Intangible assets acquired separately (continued)**

The Company applies the following annual rates of amortization to its intangible assets.

Computer software

16%-18% per annum

Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses. An intangible asset with an indefinite useful life is not amortized, rather, such an asset is tested for impairment annually, and whenever there is an indication that asset may be impaired.

### Internally-generated intangible assets – research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following conditions have been demonstrated:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale
- The intention to complete the intangible asset and use or sell it
- The ability to use or sell the intangible asset
- How the intangible asset will generate probable future economic benefits
- The availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset
- The ability to measure reliably the expenditure attributable to the intangible asset during its development

The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

An intangible asset is derecognized on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognized in profit or loss when the asset is derecognized.

### 3.6 Inventory

The inventory includes finished goods, work in progress, raw material, stores supplies, spare parts and goods in transit. Please include goods-in-transit as well. Company measures inventory at lower of cost and net realizable value. Cost includes cost of material and all expenses directly related to manufacturing and the appropriate amount of other costs, based on the normal operating capacity. Finished goods cost includes raw material cost, labour and appropriate general production expenses. The cost of Finished goods and work-in-progress is determined on weighted average basis which includes, inter alia, an allocation of labor and production overheads. The cost of goods in transit is determined based on the invoice value plus other charges incurred in getting this inventory to its location at the reporting date. The value of the raw materials, stores supplies and spare parts are measured using weighted average method. The net realizable value forms the estimated selling price during the ordinary business of the Company after deducting the additional production cost to complete and the selling and distribution expenses.

The Company reviews the carrying value of inventory regularly, and when needed, inventory is reduced to net realizable value or a provision is made for obsolescence if there is any change in the usage pattern and / or physical appearance of the related stock.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

### 3. <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES</u> (continued)

### 3.7 Impairment of non – financial assets

At the end of each reporting period, the Company reviews the carrying amounts of its non-financial assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of:

- (i) fair value less costs of disposal; and
- (ii) value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been deter-mined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

### 3.8 Cash and cash equivalents

Cash and cash equivalents consist of cash in hand, current accounts, deposits with banks and other short-term highly liquid investments with original maturities of three months or less, which can be readily converted into a specified amount of cash and are subject to an insignificant risk of change in value and are available for the Company's use.

### 3.9 Equity reserves

The share capital represents the nominal value of the shares that have been issued. Retained earnings include all current and prior period retained earnings. All transactions with the owners of the company in their capacity as owners are presented separately within equity. Owners of the Company are holders of instruments classified as equity.

### 3.10 Employees benefit

### **Short-term obligations**

Liabilities for wages and salaries, including non-monetary benefits and accumulated leaves, air fare, child education allowance, furniture allowance that are expected to be settled wholly within twelve months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the undiscounted amount of the benefits expected to be paid in exchange for that service.

### **Retirement benefits**

Retirement benefits made to funded defined contribution plans in respect of Saudi employees are expensed when incurred.

### **Employees' post-employment benefits**

The liability or asset is recognized in the statement of financial position with respect to defined benefit. The liability recognised is the present value of the defined benefit obligation at the end of the reporting period. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

### 3. <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES</u> (continued)

### 3.10 Employees benefit (continued)

### **Employees' post-employment benefits (continued)**

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms approximating to the terms of the related obligation.

Defined benefit costs are categorized as follows:

#### Service cost

Service costs include current service cost and past service cost that are recognized immediately in the profit or loss. Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in the profit or loss as past service costs.

#### Interest cost

The interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation. This cost is included in salaries, wages and other benefits expense in the profit or loss.

### Re-measurement gains or losses

Re-measurement gains or losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income.

#### 3.11 Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the reporting date, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material). When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received, and the amount of the receivable can be measured reliably.

### Warranties

Provisions for the expected cost of warranty obligations under local sale of goods legislation are recognised at the date of sale of the relevant products, at the directors' best estimate of the expenditure required to settle the Company's obligation.

### Onerous contracts

Present obligations arising under onerous contracts are recognised and measured as provisions. An onerous contract is considered to exist where the Company has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it.

### 3.12 Contingent liabilities

All contingent liabilities arising from past events that will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events that are not fully controlled by the Company or all current liabilities arising from past events but are not recognised for the following reasons:

- 1) It is not probable that the flow of external resources inherent in economic benefits will be required to settle the obligation or
- 2) The amount of the obligation cannot be measured reliably,

Contingent liabilities are assessed at the date of each financial position and disclosed in the Company's financial statements unless the probability of an outflow of resources embodying economic benefits is remote.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

### 3. <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES</u> (continued)

#### 3.13 Zakat and taxation

#### Zakat

The Company is subject to zakat in accordance with the Zakat, Tax and Customs Authority (ZATCA) laws in the Kingdom of Saudi Arabia. Zakat charge is provided on the accrual basis and presented in Statement of profit or loss and other comprehensive income. Any difference in the estimate is recorded when the final assessment is approved, at which time the provision is adjusted.

### Withholding tax

The Company withhold taxes on certain transactions with non-resident parties in the KSA, as required under Saudi Arabian Income Tax Law.

#### Value added tax

Expenses and assets are recognized net of the amount of value added tax, except:

- 1) when the value added tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the value added tax is recognized as part of the cost of acquisition of the asset or as part of the expense item, as applicable.
- 2) when receivables and payables are stated with the amount of value added tax included. The net amount of value added tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

### 3.14 Foreign Currencies

Transactions in foreign currencies are initially recorded by the Company at their respective functional currency spot rates at the date the transaction first qualifies for recognition. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Differences arising on settlement or translation of monetary items are recognized in the profit or loss.

### 3.15 Finance costs

Finance costs directly attributable to the acquisition, construction or production of a qualifying asset are capitalized during the period of time that is necessary to complete and prepare the asset for its intended use or sale. Other finance costs are expensed in the period in which they are incurred. Finance costs consist of interest and other costs incurred by the Company in connection with the borrowing of funds.

### 3.16 Revenue

Revenue is recognised by reference to each distinct performance obligation in the contract with customer and is measured at consideration specified in the contract of which the Company expects to be entitled in exchange for transferring promised goods or services to a customer, net of sales and service tax (Value added tax), returns, rebates and discounts if any.

The Company recognises revenue using the five steps model as per IFRS 15 Revenue from Contracts with customers when (or as) it transfers control over a product or service to customer. An asset is transferred when (or as) the customer obtains control of that asset. Depending on the substance of the contract, revenue is recognised when the performance obligation is satisfied, which may be at a point in time or over time

The Company transfers control of a good or service at a point in time unless one of the following, over time criteria is met:

- The customer simultaneously receives and consumes the benefits provided as the Company performs.
- The Company's performance creates or enhances an asset that the customer controls as the asset is created or enhanced.
- The Company's performance does not create an asset with an alternative use and the Company has an enforceable right to payment for performance completed to date.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

### 3. <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES</u> (continued)

### 3.16 Revenue (continued)

#### 3.16.1 Product sale

The Company is engaged in selling different warehouse solution products, including wooden and plastic pallets, steel racks, forklifts, refrigeration systems and other equipment.

Revenue from the sale of these products is recognized at the point in time when control of the asset is transferred to the customer, generally on delivery of the products. The company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of products, the company considers the effects of variable consideration, the existence of significant financing components, non-cash consideration, and consideration payable to the customer (if any).

### 3.16.2 Rendering of installation services

The Company provides installation and maintenance for the above-mentioned products. These services can be obtained from other providers and do not significantly customize or modify the product.

Contracts for bundled sales of products and related installation services are comprised of two performance obligations because the promise to transfer products and provide installation services are capable of being distinct and separately identifiable. The company allocates the transaction price based on the stand-alone selling prices of the equipment and installation services. If the stand-alone prices are not observable, the transaction price is allocated based on the best estimate of similar services.

The Company recognizes revenue form the above services at the point in time, generally upon completion of services or delivery of the equipment.

### 3.16.3 Projects revenue

### 3.16.3.1 Building racking systems

The Company provides services of setting up racking systems at warehouses of the customers. Upon approval of design and signing of an agreement, the Company starts production of the required parts/equipment. These parts and equipment are then transported and installed at customer's warehouse to complete the racking system.

In such contracts, the customer controls all the work in progress as the work progresses and parts are manufactured. This is because work is performed and parts are made to a customer's specification and if a contract is terminated by the customer, the Company is entitled to reimbursement of the costs incurred to date, including the reasonable profit margin.

At the time of entering into a contract, the Company identifies the performance obligations attached to each contract. For this purpose, the Company evaluates the contractual terms and its customary business practices to identify whether there are distinct performance obligations within each contract. The Company determines the transaction price of each contract in order to identify the transaction price of each aforementioned performance obligation as the amount of consideration to which the Company expects to be entitled in exchange for transferring promised goods and services to a customer. Having determined the transaction price of the contract, the Company allocates the transaction price to each performance obligation.

The Company recognizes revenue from such contracts over time, using an input method on a cost-to-cost method, i.e., based on the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs. The directors consider that this input method is an appropriate measure of the progress towards complete satisfaction of these performance obligations under IFRS 15.

The Company receives advances from customers for such projects. Generally, such advances are not significant to the contract consideration and received in the normal course of business at the start of the project. The Company does not adjust the promised amount of consideration for the effects of a significant financing component as the Company has determined that such advances are received for reasons other than financing the projects. These advances are adjusted against progress billings raised to the customer in accordance with the terms of the contract.

The value of work completed but not billed at the date of statement of financial position is classified as "contract assets" under current assets in the statement of financial position. Amounts billed in excess of work completed and advances received at the statement of financial position date are classified as "contract liabilities" under current liabilities in the statement of financial position. Invoices are issued according to contractual terms and are usually payable within 30 to 90 days.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

### 3.16.3 Projects revenue (continued)

### 3.16.3.2 Removal and re-installation services

The Company provides the services of removing warehouse installations from one warehouse and reinstalling at another warehouse. As the customer receives and consumes the benefits of such service simultaneously, the Company recognizes the revenue from these contracts overtime. The Company recognizes the revenue using output method by assessment of result achieved or milestones reached relative to the services promised under the contract.

### 3.16.4 Logistics services

### 2PL Contracts

The Company subleases the leasehold warehouses to the customers. These warehouses are then used and managed by the customer. The company usually provides general maintenance of the warehouse only. The company arranges the insurance of the warehouse which is charged back to the customer on actual basis. The Company recognizes the revenue from such contracts in accordance with IFRS 16 Leases.

#### 3PL Contracts

The Company also provides storage space, inbound and outbound logistics, and other warehouse management services to the customers at its leasehold warehouses. These warehouses are managed and controlled by the Company and not by the customer and hence no sublease exists. Such contracts are accounted for as per IFRS 15 Revenue from Contracts with customers. As series of distinct services provided under such contracts are substantially the same and have same pattern of transfer to the customer, the Company recognizes revenue over time based on the period of service.

### 3.17 Contract balances

### **Contract assets**

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

#### **Accounts receivables**

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets.

#### **Contract liabilities**

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

### 3.18 Selling, marketing and general and administrative expenses

Selling, marketing and general and administrative expenses include direct and indirect costs that are not specifically part of cost of sales. Allocation between cost of sales and selling, marketing and general and administrative expenses, when required, is made on a consistent basis. The company recognizes marketing support from sellers in selling and marketing expenses on an accrual basis.

### 3.19 Earning per share

The Company presents basic and diluted earnings per common share. Basic earnings per share from net profit (loss) is calculated by dividing the net profit (loss) for the year attributable to the ordinary shareholders of the Company to the weighted average number of ordinary shares outstanding during the year. Diluted earnings per share is determined by adjusting the net profit (loss) for the year attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding during the year for the effects of all potential diluted ordinary shares.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

### 3. **SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES** (continued)

#### 3.20 Leases

### The Company as lessee

The Company assesses whether a contract is or contains a lease, at inception of the contract. The Company recognizes a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets (such as tablets and personal computers, small items of office furniture and telephones). For these leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Company uses its incremental borrowing rate.

The incremental borrowing rate depends on the term, currency and start date of the lease and is determined based on a series of inputs including: the risk-free rate based on government bond rates; a country-specific risk adjustment; a credit risk adjustment based on bond yields; and an entity-specific adjustment when the risk profile of the entity that enters into the lease is different to that of the Company and the lease does not benefit from a guarantee from the Company.

Lease payments included in the measurement of the lease liability comprise:

- Fixed lease payments (including in-substance fixed payments), less any lease incentives receivable;
- Variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- The amount expected to be payable by the lessee under residual value guarantees;
- The exercise price of purchase options, if the lessee is reasonably certain to exercise the options; and
- Payments of penalties for terminating the lease if the lease term reflects the exercise of an option to terminate the lease.

The lease liability is presented as a separate line in the statement of financial position. The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

The Company remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:

- The lease term has changed or there is a significant event or change in circumstances resulting in a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.
- The lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using an unchanged discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).
- A lease contract is modified and the lease modification is not accounted for as a separate lease, in
  which case the lease liability is remeasured based on the lease term of the modified lease by
  discounting the revised lease payments using a revised discount rate at the effective date of the
  modification.

The Company did not make any such adjustments during the periods presented.

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement day, less any lease incentives received and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses. Whenever the Company incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease, a provision is recognized and measured under IAS 37. To the extent that the costs relate to a right-of-use asset, the costs are included in the related right-of-use asset, unless those costs are incurred to produce inventories.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the right-of-use asset.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.20 Leases (continued)

### The Company as lessee (continued)

If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the Company expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

The right-of-use assets are presented as a separate line in the statement of financial position.

The Company applies IAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the 'Property, plant and equipment' policy. Variable rents that do not depend on an index or rate are not included in the measurement the lease liability and the right-of-use asset. The related payments are recognized as an expense in the period in which the event or condition that triggers those payments occurs and are included in the line "Other expenses" in statement of profit or loss and other comprehensive income.

As a practical expedient, IFRS 16 permits a lessee not to separate non-lease components, and instead account for any lease and associated non-lease components as a single arrangement. The Company has not used this practical expedient. For a contract that contains a lease component and one or more additional lease or non-lease components, the Company allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

#### The Company as lessor

The Company enters into lease agreements as a lessor in respect of certain right-of-use assets that it leases from third parties.

Leases for which the Company is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

When the Company is an intermediate lessor, it accounts for the head lease and the sub-lease as two separate contracts. The sub-lease is classified as a finance or operating lease by reference to the right-of-use asset arising from the head lease.

Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized on a straight-line basis over the lease term.

Amounts due from lessees under finance leases are recognized as receivables at the amount of the Company's net investment in finance lease. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Company's net investment outstanding in respect of the leases.

Subsequent to initial recognition, the Company regularly reviews the estimated unguaranteed residual value and applies the impairment requirements of IFRS 9, recognizing an allowance for expected credit losses on the lease receivables.

Finance lease income is calculated with reference to the gross carrying amount of the lease receivables, except for credit-impaired financial assets for which interest income is calculated with reference to their amortized cost (i.e. after a deduction of the loss allowance).

When a contract includes both lease and non-lease components, the Company applies IFRS 15 to allocate the consideration under the contract to each component.

#### 3.21 Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value, except for trade receivables that do not have a significant financing component which are measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

### 3.21 Financial instruments (continued)

#### **Financial assets**

All recognised financial assets are measured subsequently in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

#### 3.21.2 Classification of financial assets

Debt instruments that meet the following conditions are measured subsequently at amortised cost:

- The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

Debt instruments that meet the following conditions are measured subsequently at fair value through other comprehensive income (FVTOCI):

- The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

By default, all other financial assets are measured subsequently at fair value through profit or loss (FVTPL).

Despite the above, the Company may make the following irrevocable election / designation at initial recognition of a financial asset:

- The Company may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if certain criteria are met (see below)
- The Company may irrevocably designate a debt investment that meets the amortised cost or FVTOCI criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

### 3.21.3 Amortised cost and effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period.

For financial assets other than purchased or originated credit-impaired financial assets (i.e. assets that are credit-impaired on initial recognition), the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses, through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition. For purchased or originated credit-impaired financial assets, a credit-adjusted effective interest rate is calculated by discounting the estimated future cash flows, including expected credit losses, to the amortised cost of the debt instrument on initial recognition.

The amortised cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance. The gross carrying amount of a financial asset is the amortised cost of a financial asset before adjusting for any loss allowance.

Interest income is recognised using the effective interest method for debt instruments measured subsequently at amortised cost and at FVTOCI. For financial assets other than purchased or originated credit-impaired financial assets, interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset. If, in subsequent reporting periods, the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

### 3. **SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES** (continued)

### 3.21 Financial instruments (continued)

### 3.21.3 Amortised cost and effective interest method (continued)

For purchased or originated credit-impaired financial assets, the Company recognises interest income by applying the credit-adjusted effective interest rate to the amortised cost of the financial asset from initial recognition. The calculation does not revert to the gross basis even if the credit risk of the financial asset subsequently improves so that the financial asset is no longer credit-impaired.

Interest income is recognised in profit or loss.

### 3.21.4 Equity instruments designated as at FVTOCI

On initial recognition, the Company may make an irrevocable election (on an instrument-by-instrument basis) to designate investments in equity instruments as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognised by an acquirer in a business combination to which IFRS 3 applies.

Investments in equity instruments at FVTOCI are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the investments revaluation reserve. The cumulative gain or loss is not reclassified to profit or loss on disposal of the equity investments, instead, it is transferred to retained earnings.

Equity instruments designated as at FVTOCI (continued)

Dividends on these investments in equity instruments are recognised in profit or loss in accordance with IFRS 9, unless the dividends clearly represent a recovery of part of the cost of the investment.

A financial asset is held for trading if either:

- It has been acquired principally for the purpose of selling it in the near term
- On initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has evidence of a recent actual pattern of short-term profit-taking
- It is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument)

#### 3.21.5 Financial assets at FVTPL

Financial assets that do not meet the criteria for being measured at amortised cost or FVTOCI are measured at FVTPL. Specifically:

- Investments in equity instruments are classified as at FVTPL, unless the Company designates an equity investment that is neither held for trading nor a contingent consideration arising from a business combination as at FVTOCI on initial recognition.
- Debt instruments that do not meet the amortised cost criteria or the FVTOCI criteria are classified as at FVTPL. In addition, debt instruments that meet either the amortised cost criteria or the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. The Company has not designated any debt instruments as at FVTPL

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss to the extent they are not part of a designated hedging relationship (if any). The net gain or loss recognised in profit or loss includes any dividend or interest earned on the financial asset and is included in the 'Other income' line item (note 10).

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

### 3.21 Financial instruments (continued)

### 3.21.6 Impairment of financial assets

The Company recognises a allowance for expected credit losses on lease receivables, trade receivables and contract assets. No impairment loss is recognized for investments in equity instruments. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

The Company always recognises lifetime expected credit losses (ECL) for trade receivables, contract assets and lease receivables. The expected credit losses on these financial assets are estimated using a provision matrix based on the Company's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

For all other financial instruments, the Company recognises lifetime ECL when there has been a significant increase in credit risk since initial recognition. However, if the credit risk on the financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month ECL.

Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

### 3.21.7 Significant increase in credit risk

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Company compares the risk of a default occurring on the financial instrument at the reporting date with the risk of a default occurring on the financial instrument at the date of initial recognition. In making this assessment, the Company considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. Forward-looking information considered includes the future prospects of the industries in which the Company's debtors operate, obtained from economic expert reports, financial analyse governmental bodies, relevant think-tanks and other similar organisations, as well as consideration of various external sources of actual and forecast economic information that relate to the Company's core operations.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly since initial recognition

- An actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating
- Significant deterioration in external market indicators of credit risk for a particular financial instrument, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor, or the length of time or the extent to which the fair value of a financial asset has been less than its amortised cost.
- Existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations.
- An actual or expected significant deterioration in the operating results of the debtor.
- Significant increases in credit risk on other financial instruments of the same debtor.
- An actual or expected significant adverse change in the regulatory, economic, or technological
  environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt
  obligations.

Irrespective of the outcome of the above assessment, the Company presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Company has reasonable and supportable information that demonstrates otherwise. Despite the foregoing, the Company assumes that the credit risk on a financial instrument has not increased

significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.21 Financial instruments (continued)

### 3.21.7 Significant increase in credit risk (continued)

A financial instrument is determined to have low credit risk if:

- The financial instrument has a low risk of default
- The debtor has a strong capacity to meet its contractual cash flow obligations in the near term
- Adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations

The Company considers a financial asset to have low credit risk when the asset has external credit rating of 'investment grade' in accordance with the globally understood definition or if an external rating is not available, the asset has an internal rating of 'performing'. Performing means that the counterparty has a strong financial position and there are no past due amounts.

For financial guarantee contracts, the date that the Company becomes a party to the irrevocable commitment is considered to be the date of initial recognition for the purposes of assessing the financial instrument for impairment. In assessing whether there has been a significant increase in the credit risk since initial recognition of a financial guarantee contract, the Company considers the changes in the risk that the specified debtor will default on the contract.

The Company regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

### 3.21.8 Definition of default

The Company considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that financial assets that meet either of the following criteria are generally not recoverable:

- When there is a breach of financial covenants by the debtor
- Information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Company, in full (without taking into account any collateral held by the Company)

Irrespective of the above analysis, the Company considers that default has occurred when a financial asset is more than 180 days past due for financial assets due from private sector customers and more than two years past due from government customers unless the Company has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

### 3.21.9 Credit-impaired financial assets

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- Significant financial difficulty of the issuer or the borrower
- A breach of contract, such as a default or past due event
- The lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider
- It is becoming probable that the borrower will enter bankruptcy or other financial reorganisation;
- The disappearance of an active market for that financial asset because of financial difficulties

### 3.21.10 Write-off policy

The Company writes off a financial asset when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered into bankruptcy proceedings, or in the case of trade receivables, when the amounts are over two year past due for private sector customers and five years past due for government sector customers, whichever occurs sooner. Financial assets written off may still be subject to enforcement activities under the Company's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.21 Financial instruments (continued)

### 3.21.11 Measurement and recognition of expected credit losses

The measurement of expected credit losses is a function of the probability of default (PD), loss given default (LGD) (i.e. the magnitude of the loss if there is a default) and the exposure at default (ED). The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above.

As for the exposure at default, for financial assets, this is represented by the assets' gross carrying amount at the reporting date; for financial guarantee contracts, the exposure includes the amount of guaranteed debt that has been drawn down as at the reporting date, together with any additional guaranteed amounts expected to be drawn down by the borrower in the future by default date determined based on historical trend, the Company's understanding of the specific future financing needs of the debtors, and other relevant forward-looking information.

For financial assets, the expected credit loss is estimated as the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive, discounted at the original effective interest rate.

For a lease receivable, the cash flows used for determining the expected credit losses is consistent with the cash flows used in measuring the lease receivable in accordance with IFRS 16.

If the Company has measured the loss allowance for a financial instrument at an amount equal to lifetime ECL in the previous reporting period but determines at the current reporting date that the conditions for lifetime ECL are no longer met, the Company measures the loss allowance at an amount equal to 12-month ECL at the current reporting date, except for assets for which the simplified approach was used.

The Company recognises an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

### 3.21.12 Derecognition of financial assets

The Company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received. On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss. In addition, on derecognition of an investment in a debt instrument classified as at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss. In contrast, on derecognition of an investment in an equity instrument which the Company has elected on initial recognition to measure at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is not reclassified to profit or loss, but is transferred to retained earnings.

### 3.21.13 Financial liabilities and equity

#### 3.21.13.1 Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

#### 3.21.13.2 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

### 3. <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES</u> (continued)

### 3.21 Financial instruments (continued)

#### 3.21.13.3 Financial liabilities

All financial liabilities are measured subsequently at amortised cost using the effective interest method or at FVTPL. However, financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies, and financial guarantee contracts issued by the Company, are measured in accordance with the specific accounting policies set out below.

### Financial liabilities at FVTPL

Financial liabilities are classified as at FVTPL when the financial liability is (i) contingent consideration of an acquirer in a business combination, (ii) held for trading or (iii) it is designated as at FVTPL.

A financial liability is classified as held for trading if either:

- It has been acquired principally for the purpose of repurchasing it in the near term
- On initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking or
- It is a derivative, except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument.

A financial liability other than a financial liability held for trading or contingent consideration of an acquirer in a business combination may be designated as at FVTPL upon initial recognition if either:

- Such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise
- The financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Company's documented risk management or investment strategy, and information about the grouping is provided internally on that basis
- It forms part of a contract containing one or more embedded derivatives, and IFRS 9 permits the entire combined contract to be designated as at FVTPL.

Financial liabilities at FVTPL are measured at fair value, with any gains or losses arising on changes in fair value recognised in profit or loss to the extent that they are not part of a designated hedging relationship (if any). The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability. However, for financial liabilities that are designated as at FVTPL, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is recognised in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. The remaining amount of change in the fair value of liability is recognised in profit or loss. Changes in fair value attributable to a financial liability's credit risk that are recognised in other comprehensive income are not subsequently reclassified to profit or loss; instead, they are transferred to retained earnings upon derecognition of the financial liability.

Financial liabilities measured subsequently at amortised cost

Financial liabilities that are not (i) contingent consideration of an acquirer in a business combination, (ii) held-for-trading, or (iii) designated as at FVTPL, are measured subsequently at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.21 Financial instruments (continued)

### Financial liabilities and equity (continued)

### Financial liabilities (continued)

Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

#### Offsetting financial assets and liabilities

Financial assets and liabilities are offset and net amounts reported in the financial statements, when the Company has a legally enforceable right, which is not contingent on anything, to set off the rec-ognised amounts and intends either to settle on a net basis, or to realise the assets and liabilities simultaneously.

#### 3. 22 Segmental reporting

### 3.22.1 Operating segment

A business segment is group of assets, operations or entities:

- i) engaged in business activities from which it may earn revenue and incur expenses including revenues and expenses that relate to transactions with any of the group's other components;
- ii) the results of its operations are continuously analyzed by chief operating decision maker in order to make decisions related to resource allocation and performance assessment; and
- iii) for which financial information is discretely available.

The Company's Board of Directors is considered as Chief operating decision-maker. Segment results that are reported to the Board of Directors, include items directly attributable to a segment in addition to those that can be allocated on appropriate basis i.e., Head office expenses, research and development costs, related assets and liabilities, zakat assets and liabilities. The Company has its operations in the Kingdom of Saudi Arabia and have four operating segments, (steel – wood – logistics services – all other segments). Each segment has reached the quantitative threshold referred to in the Segment Reporting Standard in the IFRS 8.

#### 3.22.2 Geographical segment

A geographical segment is a group of assets, operations, or establishments that engage in profitable activities in a particular economic environment that are subject to risks and returns that are different from those operating in other economic environments.

### 3.23 Monetary dividend and non-monetary dividend to shareholders

Monetary and non-monetary dividends to shareholders are recognized as liabilities upon declaration of the dividend, and according to the companies' law in the Kingdom of Saudi Arabia, dividends are declared upon approval by the shareholders. The amount of dividend is deducted directly from equity and recognized as a liability.

### 4. <u>NEW STANDARDS AND INTERPRETATIONS</u>

### 4.1 Amendments

A number of new amendments to standards, listed below, are effective this year but they do not have a material effect on the Company's Financial Statements, except for where referenced below: New amendments to standards issued and applied as of 2022 are as follows;

Amendments to standard	Description	Effective for annual years beginning on or after	Summary of the amendment
IAS 37	Onerous Contracts – Cost of Fulfilling a Contract	January 1, 2022	fulfilled all its obligations at the beginning of the annual reporting period in which the entity first applies the amendments.
IFRS 16, IFRS 9 and IFRS 1	Annual Improvements to IFRS Standards 2018–2020	January 1, 2022	IFRS 16: The amendment removes the illustration of the reimbursement of leasehold improvements IFRS 9: The amendment clarifies that in applying the '10 percent' test to assess whether to derecognize a financial liability, an entity includes only fees paid or received between the entity (the borrower) and the lender.  The amendment is to be applied prospectively to modifications and exchanges that occur on or after the date the entity first applies the amendment.  IFRS 1: The amendment provides additional relief to a subsidiary which becomes a first-time adopter later than its parent in respect of accounting for cumulative translation difference.
IAS 16	Property, Plant and Equipment: Proceeds before Intended Use	January 1, 2022	The amendments prohibit deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced before that asset is available for use.  Additionally, the amendments also clarify the meaning of 'testing whether an asset is functioning properly'.
IFRS 3	Reference to the Conceptual Framework	January 1, 2022	The amendment as a whole updated IFRS 3 so that it refers to the 2018 Conceptual Framework instead of the 1989 Framework.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

### 4. NEW STANDARDS AND INTERPRETATIONS (continued)

### 4.2 New standards, amendments, and revised IFRS issued but not yet effective

The Company has not applied the following new and revised IFRSs and amendments to IFRS that have been issued but are not yet effective.

Amendments to standard	Description	Effective for annual years beginning on or after	Summary of the amendment
IFRS 17	Insurance Contracts	January 1, 2023	This is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation, and disclosure. Once effective, IFRS 17 (along with its subsequent amendments) will replace IFRS 4 Insurance Contracts (IFRS 4) that was issued in 2005.
IAS 1	Classification of Liabilities as Current or Non-current	January 1, 2023	The amendment has clarified what is meant by a right to defer settlement, that a right to defer must exist at the end of the reporting period, that classification is unaffected by the likelihood that an entity will exercise its deferral right and that only if an embedded derivative in a convertible liability is itself an equity instrument the terms of a liability would not impact its classification.
IAS 1 and IFRS Practice Statement 2	Disclosure of accounting policies	January 1, 2023	This amendment deals with assisting entities to decide which accounting policies to disclose in their financial statements
IAS 8	Amendment to definition of accounting estimate	January 1, 2023	This amendment relates to the definition of accounting estimates to help entities to distinguish between accounting policies and accounting estimates.
IAS 12	Income taxes	January 1, 2023	This amendment deals with clarification regarding accounting of deferred tax on transactions such as leases and decommissioning obligations
Amendment to IFRS 10 and IAS 28	Sale or Contribution of Assets between an Investor and its Associate or Joint Venture	N/A	The amendments to IFRS 10 and IAS 28 deal with situations where there is a sale or contribution of assets between an investor and its associate or joint venture. Specifically, the amendments relate to gains or losses resulting from the loss of control of a subsidiary.

Management anticipates that these new standards interpretations and amendments will be adopted in the Company's financial statements as and when they are applicable and adoption of these interpretations and amendments may have no material impact on the financial statements of the Company in the period of initial application.

(A Saudi Joint Stock Company)

### 5. CRITICAL JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

#### Critical judgments and estimates

The preparation of these financial statements in compliance with IFRS requires the management to make estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses and disclosure of contingent assets and contingent liabilities. Future events may occur which will cause the assumptions used in arriving at the estimates to change. The effects of any change in estimates are reflected in the financial statements as they become reasonably determinable.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

#### 5.1 Critical judgements

In the process of applying the Company's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the financial statements:

### 5.1.1 Revenue recognition

Management considers recognizing revenue over time, if one of the following criteria is met, otherwise revenue will be recognized at a point in time:

- a) the customer simultaneously receives and consumes the benefits provided by the Company's performance as the Company performs;
- b) the Company's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- c) the Company's performance does not create an asset with an alternative use to the entity and the entity has an enforceable right to payment for performance completed to date.

Management makes judgements in assessing amount and timing of revenue from contracts with customers. In making its judgement on satisfaction of performance obligation, the management considers the detailed criteria for the recognition of revenue set out in IFRS 15 and, in particular, whether the Company has transferred control of the goods or rendered services to the customer. Following the detailed quantification of the Company, the management recognises the revenue when it is satisfied that control has been transferred or performance obligation is satisfied that recognition of the revenue in the current year is appropriate.

### 5.1.2 Going concern

The Company's management has made an assessment of the Company's ability to continue as a going concern and is satisfied that the Company has the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue a going concern. Therefore, the financial statements are prepared on a going concern basis.

### 5.2 Key sources of estimation uncertainty

The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that, period, or in the period of the revision and future periods if the revision affects both current and future periods.

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material difference in the carrying amounts of assets and liabilities within the next financial period, are presented below. The Company used these assumptions and estimates on the basis available when the financial statements were prepared.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

# 5. <u>CRITICAL JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY</u> (continued)

### 5.2 Key sources of estimation uncertainty (continued)

However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

### 5.2.1 Impairment of tangible and intangible assets

The Company's management tests annually whether there is an indication that tangible and intangible assets have suffered impairment in accordance with accounting policies stated in note 3. The recoverable amount of an asset is determined based on value-in-use method. This method uses estimated cash flow projections over the estimated useful life of the asset discounted using market rates.

### 5.2.2Impairment of trade and other receivables

An estimate of the allowance for expected credit loss is calculated in accordance with the accounting policy detailed in note 3.

### 5.2.3 Allowance for slow moving and obsolete inventories

Allowances for inventory are recorded where events or changes in circumstances indicate that the carrying cost of inventories will not be fully realized. The quantification of allowances for inventories requires the use of estimates and judgements. Where the outcomes are different from the original estimates, such differences will impact the carrying value of inventories and allowance for inventory in the years in which such estimates have been changed.

#### 5.2.4 Defined benefits obligation

Post-employment defined benefits, end-of-service benefits and indemnity payments represent obligations that will be settled in the future and require assumptions to project obligations and fair values of plan assets, if any. Management is required to make further assumptions regarding variables such as discount rates, rate of salary increase and return on assets, mortality rates, employment turnover and future healthcare costs. Periodically, management of the Company consults with external actuaries regarding these assumptions. Changes in key assumptions can have a significant impact on the projected benefit obligations and/or periodic employee defined benefit costs incurred.

The discount rate is set by reference to market yields at the end of the reporting period on high quality corporate bonds. Significant assumptions are required to be made when setting the criteria for bonds to be included in the population from which the yield curve is derived. The most significant criteria considered for the selection of bonds include the issue size of the corporate bonds, quality of the bonds and the identification of outliers which are excluded.

### 5.2.5Useful lives of property, plant and equipment and intangible assets

The Company estimates the useful lives of its property, plant and equipment at the end of each annual reporting period. These estimates are determined after considering the expected usage of the assets or depreciation arising from physical use. Management reviews the residual value and useful lives annually and future depreciation charges will be adjusted if management believes that the useful lives differ from previous estimates.

### 5.2.6 Determine the discount rate to calculate the present value

Discount rates represent the current market assessment of the risks involved in scheduling cash flows, taking into account the time value of money and the individual risks of the underlying assets that have not been included in the cash flow estimates. The discount rate calculation is based on the specific circumstances of the Company.

(A Saudi Joint Stock Company)

#### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

### 5. <u>CRITICAL JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY</u> (continued)

### 5.2.7Revenue recognition

The Company uses the input method to recognise revenue on the basis of entity's efforts or inputs to the satisfaction of a performance obligation in accounting for its racking system installation contracts. This is done by measuring the costs incurred to date relative to the total expected costs to be incurred (forecast final costs). At each reporting date, the Company is required to estimate stage of completion and costs to complete on its racking system installation contracts. These estimates require the Company to make estimates of future costs to be incurred, based on work to be performed beyond the reporting date.

Effects of any revision to these estimates are reflected in the year in which the estimates are revised. When it is probable that total contract costs will exceed total contract revenue, the total expected loss is recognised immediately, as soon as foreseen, whether or not work has commenced on these contracts. The Company uses its commercial teams together with project managers to estimate the costs to complete the contracts. Factors such as delays in expected completion date, changes in the scope of work, changes in material prices, increase in labour and other costs are included in the cost estimates based on best estimates updated on a regular basis.

### 5.2.8 Zakat provision

Management has evaluated the zakat position taking into consideration the local zakat legislations, the resolutions issued periodically and the agreements. The interpretation of legislative decrees and agreements is not always clear and requires completion of the assessment by the Zakat, Tax and Customs Authority (ZATCA).

### 5.2.9Leases - estimating the incremental borrowing rate

The Company cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Company 'would have to pay', which requires estimation when no observable rates are available. The weighted average rate used is 5%.

# 6. PROPERTY, PLANT AND EQUIPMENT (continued)

\*\* The Company has purchased through a public auction on 3 August 2021, a factory in the second industrial area in Riyadh affiliated to the Saudi Authority for Industrial Cities and Technology Zones with a value of 4.82 million Saudi Riyals to operate the factory in the company's productive sectors. The deal was financed through the Company's financing facility with the Arab National Bank and was recorded in the "Projects in progress" account under property, plant and equipment. A report was also obtained from an independent consultant that the factory is not ready for it intended use as it needs many essential repairs in order to be usable. The Company incurred 2.9 million Saudi Riyals (including finance cost on financing facility for qualifying asset) in 2022, for making the factory in the condition to be ready for intended use. Management expects to start the production from the factory in year 2023. The Company's contractual commitments related to acquisition of plant and equipment are disclosed in note 32.

The company leased buildings (warehouses), machines and vehicles on lease and the average lease term is 3 years (2021: 3 years) for all types of leases.

# 8.3 Recognized amounts in the statements of profit or loss and other comprehensive income

Statement of profit or loss and other comprehensive income shows the following amounts related to leases;

	31 December 2022	31 December 2021
Finance cost of lease liabilities (note 29)	963,093	1,029,826
Depreciation expense (note 8.1.1)	9,589,071	8,169,093
Short term and low value operating leases expense	387,697	513,496
Finance income from investment in finance lease	197,617	28,087
Finance lease income	<u> </u>	5,533,725

The Company has short term and low value operating leases commitments amounting to 692,669 Saudi Riyals (2021: 878,415 Saudi Riyals)

## 8.4 Extension and termination options

Extension and termination options are included in a number of properties, plant and equipment leases. These terms are used to increase the operational flexibility of contract management. The majority of extension and termination options can be used only by the Company and not the lessor.

The Company does not face a significant liquidity risk with regard to its lease liabilities, which are monitored to determine that these are settled in accordance with the relevant lease agreements.

(A Saudi Joint Stock Company)

	12,009,482	818,621	11,190,861

#### 9.3 Main contract:

The Company (the lessee) leased a warehouse from the Arab Investment Stores Company (the lessor) at a value of 8.5 million Saudi riyals for a period of three years, starting from 20 July 2021 to 19 July 2024, provided that the store is returned at the end of the lease period. The lessee has the right to rent the rental unit to others.

### 9.4 Sub-lease contract:

On 20 July 2021, the Company (as a lessor) leased the warehouse of the Arab Investments warehouses to the Supreme Food Company. Ltd. (the lessee) for a value of 14 million Saudi riyals for a period of three years period ended on 19 July 2024, provided that the warehouse is returned at the end of the period to the lessor. The lessee has the right to lease the rental unit to others, provided that it is one of the companies owned by the lessee.

The Company's finance lease arrangements do not include variable payments.

The directors of the Company estimate the loss allowance on finance lease receivables at the end of the reporting period at an amount equal to lifetime ECL. None of the finance lease receivables at the end of the reporting period is past due. Taking into account the historical default experience and the future prospects of the industries in which the lessees operate, the directors of the Company consider that finance lease receivable is not impaired (2021: Nil). There has been no change in the estimation techniques or significant assumptions made during the current reporting period in assessing the loss allowance for finance lease receivables.

## 10. OTHER FINANCIAL ASSETS - INVESTMENTS

	December 31, 2022	December 31, 2021
Financial assets designated as FVTPL (note 10.1)

Ividiabana	25,000,000	50,000,000
Analyzed between:		
Current assets	25,000,000	50,000,000
Non-current assets	25,000,000	50,000,000

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

## 10. OTHER FINANCIAL ASSETS – INVESTMENTS (continued)

**10.1** These assets comprise investments in commodity funds. These investments were held for short term purposes. Accordingly, the management elected to designate these investments as at FVTPL as they believed that recognizing short-term fluctuations in fair value in profit or loss would be consistent with the Company's strategy of holding these investments for short term purposes. The gain recognised (including fair value gain) on this investment during the year amounted to 1,428,986 Saudi Riyals (2021: 43,077 Saudi Riyals)

The fair value of these investments is in the level 1 hierarchy as defined in IFRS 13 and are based on quoted prices in an active market. Consequently, the Company has been exposed to equity price risks arising from these investments.

**10.2** Company invested the amount in Murabaha in 2022. The investments in Murabaha bears profit at a rate of 4.5 to 5.5 % per annum and has maturity dates ranging between 91 to 180 days.

The investment in Murabaha is held by the Company within a business model whose objective is to collect their contractual cash flows, which are solely payments of principal and interest on the principal amount outstanding. Hence, these financial assets are classified as at amortized cost. The gain recognised during the year is amounted to 319,652 Saudi Riyals (2021: Nil).

## 11. INVENTORY, NET

	31 December 2022	31 December 2021
Raw material	19,202,017	7,169,311
Finished goods	7,875,193	6,660,098
Spare parts and supplies	1,304,767	966,105
Work in progress	744,743	1,063,402
Goods in transit	12,459,467	-
	41,586,187	15,858,916
Less: provision for obsolescence of inventory	(1,162,831)	(674,845)
	40,423,356	15,184,071

## **11.1** Movement in provision is as follows:

	31 December 2022	31 December 2021
Balance at the beginning of the year	674,845	498,052
Charge during the year	487,986	176,793
Balance at the end of the year	1,162,831	674,845

The cost of inventories recognized as an expense during the year in respect of continuing operations was 79,192,621 Saudi Riyals (2021: 39,002,736 Saudi Riyals).

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

### 12. CONTRACT ASSETS

	31 December 2022	31 December 2021
Project revenue (steel racking systems)	5,065,265	2,693,744

Amounts relating to contract assets are balances due from customers under projects for installation of racking systems that arise when the Company receives payments from customers in line with a series of performance related milestones. The Company initially recognises a contract asset for any work performed. Any amount initially recognised as a contract asset is settled against contract liability for the same project at the completion of the project.

The directors of the Company always measure the loss allowance on amounts due from customers at an amount equal to lifetime expected credit loss (ECL), taking into account the historical default experience, the nature of the customer and where relevant, the sector in which they operate.

There has been no change in the estimation techniques or significant assumptions made during the current reporting period in assessing the loss allowance for the contract assets.

The following table details the risk profile of contract assets based on the Company's provision matrix. As the Company's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished between the Company's different customer base

	31 December 2022	31 December 2021
Expected credit loss rate	2.26%	0%
Estimated total gross carrying amount	5,065,265	2,693,744
Lifetime ECL	(114,224)	-
Net carrying amount	4,951,041	2,693,744

The following table shows the movement in lifetime ECL that has been recognised for contract assets in accordance with the simplified approach set out in IFRS 9.

	31 December 2022	31 December 2021
Opening balance Net increase in loss allowance arising from new amounts recognised in current year, net of those derecognised upon	114,224	-
billing Closing balance	114,224	

There has not been any significant change in the gross amounts of contract assets that has affected the estimation of the loss allowance.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

(All amounts in Saudi Rivals unless otherwise stated)

### 13. TRADE, OTHER RECEIVABLES AND PREPAYMENTS

	31 December	31 December
	2022	2021
Trade receivables – customers	55,261,236	21,945,834
Trade receivables – government	308,358	196,503
Allowance for expected credit losses	(3,574,620)	(2,092,907)
Net trade receivables	51,994,974	20,049,430
Advanced to suppliers	5,262,577	2,847,443
Employee's loan	656,278	370,019
VAT receivables	-	359,077
Accrued profit on Murabaha	300,694	-
Prepayments	194,276	182,492
Insurance	401,500	1,500
Prepaid subscription	239,127	174,182
Prepaid rent	98,058	120,897
Deposits for insurance letters of guarantee (note 32)	2,428,565	24,205
	61,576,049	24,129,245

The average credit period on sales of goods is 90 days. No interest is charged on outstanding trade receivables.

The Company always measures the loss allowance for trade receivables at an amount equal to lifetime ECL.

The expected credit losses on trade receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date. The Company has engaged a third-party supplier to provide relevant economic data for determining the factors that are specific to the debtors, the general economic conditions of the industry in which the debtors operate and the forecast direction of conditions at the reporting date. The Company has significantly increased the expected loss rates for trade receivables from the prior year based on its judgement of the impact of current economic conditions and the forecast direction of travel at the reporting date. There has been no change in the estimation techniques during the current reporting period.

The Company writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered into bankruptcy proceedings, or when the trade receivables are over two years past due, whichever occurs earlier.

The Government balances have not historically defaulted on any outstanding balances and any delays in payments are of an operational nature rather than associated to credit risk. However, no entity can have a credit risk of zero theoretically. Hence, an expected credit loss provision has been calculated. Management has used the 1 year Credit Default Swap (CDS) spread on a Saudi Arabia bond to approximate the associated credit risk.

A trade receivable account with a balance of 34.7million Saudi Riyals is secured by a Promissory note of 40 million Saudi Riyals from the customer. Furthermore, the outstanding balance due from the customer is is secured against the inventory stored in the Company's warehouse. The value of inventory is estimated to be 60 million Saudi Riyals (as per latest management stock count). Agreement signed with the customer enforces management's right in the event of default by the customer over the inventory purchased by the customer and right to conduct inventory count and valuation. There have not been any significant changes in the quality of the collateral held for these trade receivables. Consequently, management has decided to exclude the trade receivable from aforesaid customer in calculation of expected credit loss.

(A Saudi Joint Stock Company)

	31 December 2022	31 December 2021
Banks – current accounts Short term deposits Petty cash Cash on hand	3,641,209 30,000,000 191,195 71,989	118,936,391 - 297,777 32,949
	33,904,393	119,267,117

Short term deposits are murabaha instruments with original maturity less than 90 days and bear profit at a rate of 4.5 to 5.5 % per annum.

## 15. SHARE CAPITAL

The company's capital on 31 December 2022 amounted to 175,000,000 Saudi Riyals (2021: 175,000,000 SAR) consisting of 17,500,000 (2021: 17,500,000) fully paid shares with a nominal value of 10 Saudi riyals per share.

	31 December	31 December 2021
Share capital	175,000,000	25,000,000
Right shares issued	-	150,000,000
Share capital at the end of the year	175,000,000	175,000,000

On 20 Jumada Al-Awwal 1442H, corresponding to 3 January 2021, the Company announced the Board of Directors' recommendation to increase the share capital by offering priority rights shares. The Capital Market Authority "CMA" issued its approval of the Company's request to increase the capital on 2 November 2021, and the Extraordinary General Assembly approved the capital increase on 26 Rabi' al-Thani 1443H corresponding to 1 December 2021, by offering rights-based shares to shareholders at an increase of 6 shares for each share, and the number of increase shares is 15 million shares, with a value of 150 million Saudi Riyal. After the increase, the capital became 175 million Saudi Riyals, divided into 17.5 million ordinary shares.

# 16. STATUTORY RESERVE

In accordance with Company's By-laws and the regulations of companies in the Kingdom of Saudi Arabia, the Company is required to transfer 10% of its net profit to statutory reserve until it reaches 30% of share capital. This reserve is not available for dividend distribution to the shareholders. No transfer to statutory was made in 2022 consequent to net loss incurred for the year.

(A Saudi Joint Stock Company)

## 31. **BORROWINGS**

	31 December 2022	31 December 2021
Working capital Loans  Analyzed between:	1,323,622	14,205,068
-non-current portion	257,806	591,955
-current portion	1,065,816	13,613,113
	1,323,622	14,205,068

The Company has financing facility agreement with:

**18.1-** Al-Inma Bank which is compliant with Islamic Sharia for a Small & Medium Enterprises (SME) loan guarantee program, consisting of loans, Murabaha, credit facilities, documentary credits and Murabaha and forward selling for fixed-term period with maximum of 10 million Saudi Riyals. The facility is for the purpose of financing the Company's working capital requirements as well as financing raw materials and equipment related to the Company's activities and its projects. These facilities are charged with financing expenses in accordance with the relevant agreement at an interest rate of 4% fixed annually. The balance due on 31 December 2022 amounted to (618,505) Saudi riyals (2021: 9,413,256 Saudi riyals). The amount is repayable on quarterly basis and final repayment is due in 1 August 2024.

Under this agreement, the Company provided guarantees to cover the entire value of the financing, represented in promissory notes amounting to 10 million Saudi riyals, in addition to the another guarantee with a value of 9.5 million Saudi riyals.

**18.2-** Arab Bank, which is compliant with Islamic Sharia for a fixed term with a maximum of 5 million Saudi riyals for the purpose of financing the Company's working capital requirements as well as financing raw materials and equipment related to the Company's activities and its projects. These facilities are charged with financing costs in accordance with the relevant agreement at an interest rate of 4% fixed annually. The facility agreement was renewed in 2022. The balance due on 31 December 2022 amounted to (705,072) Saudi riyals (2021: 4,791,812 Saudi riyals). The amount is due for repayment in full on 16 June 2023.

The movement of borrowings during the year has been as follows:

	31 December 2022	31 December 2021
Balance at the beginning of the year	14,205,068	_
Additions during the year	718,136	14,641,069
Finance cost	279,334	223,999
Paid during the year	(13,878,916)	(660,000)
Balance at the end of the year	1,323,622	14,205,068

During 2022 finance cost amounting to 129,303 Saudi Riyals related to financing facility used for purchase of wooden factory (qualifying asset) is capitalized into the cost of capital work in progress.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

# 19. CONTRACT LIABILITIES

	31 December 2022	31 December 2021
Deferred revenue related to projects Advances from customers	3,481,973 3,735,280 7,217,253	2,216,762 147,279 2,364,041

Contract liabilities include advances against contracts with customers, advances received to provide services and transaction price allocated to unsatisfied performance obligations.

Contract liabilities relating to contracts with customers are balances due to customers in accordance with terms of contracts. These arise if a particular milestone payment exceeds the revenue recognised to date under the cost-to-cost method.

Revenue relating to services is recognised over time although the customer makes advance payments for these services. A contract liability is recognised for revenue relating to the services at the time of the initial sales transaction and is released over the service period.

There were no significant changes in the contract liability balances during the reporting period.

The following table shows how much of the revenue recognised in the current reporting period relates to brought-forward contract liabilities. There was no revenue recognised in the current reporting period that related to performance obligations that were satisfied in a prior year.

	31 December 2022	31 December 2021
Deferred revenue related to projects	2,216,762	<u>-</u>
Advances from customers	147,279	498,609
	2,364,041	498,609

## 20. TRADE AND OTHER PAYABLES

Trade payables	16,216,504	4,301,431
Notes payable	1,108,140	-
Employee's dues	1,471,654	722,588
Accrued expenses	1,218,835	664,845
Accrued commissions	928,258	443,617
Bank amounts under settlements	25,818	748
Accrued VAT	1,725,131	-
Provision for project losses	166,438	-
Others	· -	208,106
	22,860,778	6,341,335

No interest is charged on trade payables. The Company has financial risk management policies in place to ensure that all payables are paid within the credit timeframe. The fair value of trade and other payables approximates their carrying amount.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

## 21. CREDITORS' COMPENSATION AND SUBSCRIPTION TO PRIORITY RIGHTS SHARES

The results of issue and subscription of priority rights were the subscription of (14,827,529) shares out of a total number of (15,000,000) shares, with a value of 148,275,290 Saudi Riyals and the coverage ratio of the total new shares offered was 98.85%. The remaining shares that were not subscribed amounted to (172,471) shares were offered in the auction. The average selling price of the sold shares was 106.44 Saudi Riyals per share, and the total amount of the proceeds from the sale of unsubscribed shares was 18,357,455 Saudi Riyals. This resulted the net compensation amount belonging to the owners of priority rights to 16,632,745 Saudi Riyals. Shares were distributed on 6 January 2022. The costs of offering and subscribing to the rights issue amounted to 3,667,194 Saudi Riyals, which were charged to the retained earnings.

### 22. RELATED PARTY INFORMATION

Transaction with related parties is in salaries, remuneration, allowances of members of the board of directors (BOD) and senior management that took place during the year between the Company and members of the board of directors, members of committees and senior management.

The most significant transactions with related parties are as follows:

	<b>31 December 2022</b>		31 December 2021	
	BOD members and committees	Executive management	BOD members and committees	Executive management
BOD members and committees' remuneration	805,000	-	579,288	-
BOD and committee's attendance allowance	162,000	-	187,500	-
Salaries and wages	-	1,342,590	-	1,651,223
Bonus	-	50,000	-	70,000
End of service		214,500	<u> </u>	187,716
	967,000	1,607,090	766,788	1,908,939

The amount due to above related parties with respect to remuneration for BOD members and Committees amounted to 805,000 Saudi riyals (2021: 499,288 Saudi riyals).

### 23. ZAKAT PROVISION

## 23.1 Zakat status:

The Company submitted its returns to the Zakat, Tax and Customs Authority (the authority) until the year ended on 31 December 2021, and the Company obtained a certificate from the General Authority of Zakat and Tax, valid until 10 Shawwal 1444 AH corresponding to 30 April 2023.

The company received final zakat assessments for the years (2019, 2020) on 8 February 2022 corresponding to 7 Rajab 1443 AH. The assessment amounted to 37,114 Saudi riyals, and the amount was settled with the Authority during the year 2022.

Zakat adjustment Zakat assessments (note 23) Payment during the year	- (860,165)	37,114 (1,077,573)
Balance at the end of the year	3,691,348	861,212

# 24. REVENUE

The Company derives its revenue from contracts with customers for the transfer of goods and services over time and at a point in time in the following major product lines. The disclosure of revenue by product line is consistent with the revenue information that is disclosed for each reportable segment under IFRS 8 Operating Segments in note 33.

# **Desegregation of revenue**

	2022	2021
Sales of products		
- Steel products	1,143,599	1,302,519
- Wooden products	52,165,925	15,034,693
- Other products	2,476,887	3,335,487
Projects revenue		
- Steel (racking systems)	39,245,928	32,243,913
- Logistics services	15,274,900	14,357,868
- Other services	515,049	1,420,606
	110,822,288	67,695,086

(A Saudi Joint Stock Company)

## NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Riyals unless otherwise stated)

# 24. REVENUE (continued)

## Timing of revenue recognition

	2022	2021
At a point in time - Steel products	1,143,599	1,302,519
- Wooden products	52,165,925	15,034,693
- Other products	2,476,887	3,335,487
- Other services	515,049	1,420,606
	56,301,460	21,093,305
	2022	2021
Over time - Steel (racking systems)	39,245,928	32,243,913
- Logistics services – 3PL contracts	15,274,900	14,357,868
Total	54,520,828	46,601,781
Total revenue	110,822,288	67,695,086

Other products comprise forklifts, refrigeration systems and other equipment related to warehouse solutions. Other services comprise installation of above equipment (if required), removal and installation of warehouse equipment at customers warehouses and epoxy coating of warehouse floors.

The following table shows the aggregate amount of the transaction price allocated to performance obligations that are unsatisfied (or partially unsatisfied) as at the end of the reporting period.

	2022	2021
<ul><li>Steel (racking systems)</li><li>Logistics services – 3PL contracts</li></ul>	14,143,079 7,161,700	2,772,336 19,095,700
	21,304,779	21,868,036

Management expects that 100% of the entire transaction price allocated to the unsatisfied contracts as at 31 December 2022 will be recognized as revenue during the next reporting period.

## 25. COST OF REVENUE

		2021

### 29. FINANCE COST'NET

	2022	2021
Finance cost - lease liabilities (note 8)	963,093	1,029,826
Finance cost of borrowings	150,032	223,999
Finance income on net investment in finance lease (note 9)	(197,617)	(28,087)
	915,508	1,225,738

## 30. EARNINGS PER SHARE (EPS)

The basic and diluted earning per share is calculated from profit / loss for the year attributed to Company's shareholders divided by weighted average on outstanding ordinary shares at the end of the year. The ordinary shares outstanding as at the end of the year were amounting to 17,500,000 shares (2021: 17,500,000 shares).

	For the year ended 31 December	
	2022	2021
(Loss) / Profit for the year	(7,215,933)	3,599,087
Weighted average number of shares outstanding	17,500,000	3,750,000
	(0.41)	0,96

### 31. DIVIDENDS

In view to strengthening the Company's financial position and supporting the Company's upcoming expansions and projects, Board of Directors recommended not to distribute cash dividend to shareholders for the fiscal year ended 31 December 2022. In 2021, the Company distributed dividends amounting to 1,250,000 Saudi riyals at the rate of 0.50 Saudi riyals per share, which is equivalent to 5% of the nominal value of the share. The General Assembly approved the proposed dividends in its session held on 15 Ramadan 1442 AH corresponding to 4 April 2021.

### 32. CAPITAL COMMITMENTS AND CONTIGENT LIABILITIES

The Company has capital commitments with foreign companies to purchase machinery and equipment, amounting to 1,876,100 Euros and 83,500 United States Dollars (USD), equivalent to 7,755,531 Saudi riyals as at 31 December 2022. The Company has paid an amount of 326,857 Euros and 15,800 USD, being equivalent to 1,355,252 Saudi Riyals, and the remaining amount is 1,549,242 Euros and 67,700 USD being equivalent to 6,396,626 Saudi Riyals. Management expects that an amount of 4,962,983 (77% of outstanding amount) Saudi riyals will be paid during the year 2023.

The Company also has a capital commitment to purchase machinery and equipment from local companies, amounting to 131,078 Saudi Riyals, out of which 39,646 Saudi Riyals have been paid, and the remaining amount is expected to be paid during the year 2023.

The Company has a capital commitment for development of intangible assets (ERP & HR system) from local companies amounting to 2,672,251 Saudi Riyals. An amount of 842,231 Saudi Riyals has been paid, and the remaining amount is expected to be paid during the year 2023 (capital commitments as at 31 December 2021 was1,824,444 Saudi Riyals out of which 1,093,986 Saudi Riyals was paid, and the remaining amount was paid during 2022).

Company has issued letters of guarantee as on 31 December 2022 which are 100% covered in cash of 2,428,565 Saudi Riyals (2021: issued against a 100% cash cover of 24,205 Saudi Riyals), as stated in Trade, other receivables and prepayments (note 13).

The Company has no contingent liabilities as on 31 December 2022 and 2021.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

## 33. SEGMENT INFORMATION

Information reported to the Company's Chief operating decision-maker for the purposes of resource allocation and assessment of segment performance is focused on the Company's categories of activities (products, or services offered to customers). The Company's activity is represented into the main segments as follows:

**Steel:** Company is engaged in sale of steel products (i.e., pallets) and delivery and installation steel racking systems at customers warehouses. For financial statements presentation purposes, these individual operating segments have been aggregated into a single operating segment because the nature of the products and production processes are similar.

**Wood:** Wood segment represents sale of wooden pallets, boxes and raw material.

**Logistics services:** Logistics services represent providing storage services, transportation for others, as the company engaged in long -term contract with customers.

**All others:** The "all other activities" segment represents sale of plastics products, forklifts and refrigerating systems and rendering of other services i.e., removal and re-installation, epoxy flooring etc.

Items of revenue, cost of revenue and long-term assets have been distributed among these segments and the rest of items are difficult to distribute among segments.

Selected financial information as at December 31, 2022 and December 31, 2021, and for the years then ended, categorised by these business segments, is as follows:

<b>31 December 2022</b>	Steel	Wood	Logistic services	All others	Total
Total assets	54,983,930	26,905,039	149,193,762	1,237,161	232,319,892
Total liabilities	17,430,234	12,481,815	24,931,268	1,244,945	56,088,262
Revenue (note 24)	40,389,527	52,165,925	15,274,900	2,991,936	110,822,288
Cost of revenue	(31,177,449)	(46,506,072)	(15,150,254)	(2,477,421)	(95,311,196)
Gross profit	9,212,078	5,659,853	124,646	514,515	15,511,092
Net profit / (Loss)	(5,541,465)	784,888	(2,707,085)	247,729	(7,215,933)

31 December 2021	Steel	Wood	Logistics services	All others	Total
Total assets	120,418,164	47,741,375	69,251,983	9,750,196	247,161,718
Total liabilities	25,575,563	11,062,077	24,638,944	3,015,438	64,292,022
Revenue (note 24)	33,546,432	15,034,693	14,357,868	4,756,093	67,695,086
Revenue from finance lease (note 9)	-	-	5,533,725	-	5,533,725
Cost of revenue	23,762,215-	12,533,526-	11,953,327-	3,637,982-	51,887,050-
Gross profit	9,784,217	2,501,167	7,938,266	1,118,111	21,341,761
Net profit	2,101,032	417,404	781,522	299,129	3,599,087

The accounting policies of the reportable segments are the same as the Company's accounting policies described in note 3. Segment profit represents the profit earned by each segment with allocation of central administration costs including directors' salaries, finance income, non-operating gains and losses in respect of financial instruments and finance costs, and Zakat. This is the measure reported to the Company's Chief operating decision-maker for the purpose of resource allocation and assessment of segment performance.

For the purposes of monitoring segment performance and allocating resources between segments the Company's Chief operating decision-maker monitors the tangible, intangible and financial assets attributable to each segment. All assets are allocated to reportable segments without any exception. Assets used jointly by reportable segments are allocated on the basis of the revenues earned by individual reportable segments.

Included in revenues arising from wood segment are revenues of approximately 34.9 million Saudi Riyals (2021: Nil) which arose from sales to the Company's largest customer. No other single customers contributed 10 per cent or more to the Company's revenue in either 2022 or 2021.

The Company's assets and the principal markets of its operations are located in the Kingdom of Saudi Arabia, therefore the geographical information has not been presented in these financial statements.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

(All amounts in Saudi Rivals unless otherwise stated)

## 34. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

# 34.1 Capital management

The Company manages its capital to ensure it will be able to continue as a going concern while maximizing the return to stakeholders through the optimization of the equity balance. The Company's overall strategy remains unchanged from the previous year.

The capital structure of the Company consists of debt and equity comprising share capital, actuary reserve, retained earnings and long-term loans.

# **Categories of financial instruments**

	31 December 2022	31 December 2021
Financial assets	' <u> </u>	
Amortized cost		
Cash and cash equivalents	33,904,393	119,267,117

Contract liabilities	7,217,253	2,364,041
Borrowings	1,323,622	14,205,068

The Company's policy is to maintain a strong capital base to maintain investor, creditor and market confidence and to sustain future development of the business. The Company monitors its capital base using the debt-to-equity ratio.

The following is the net debt to equity ratio of the Company at the end of the year:

	31 December	31 December
	2022	2021
Borrowings	1,323,622	14,205,068
Total equity attributed to company shareholders	176,231,630	182,869,696
Net debt rate to equity	0.75%	7.76%

The main financial risks arising from the Company's financial instruments are market risk, credit risk, liquidity risk, currency risk and concentration risk. Management reviews and conforms to policies to manage these risks.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

## 34. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

### 34.2 Market risk

It is the risk of fluctuation in a financial instrument due to changes in prices prevailing in the market, such as foreign exchange rates and interest rates, which affects the Company's income or the value of its financial instruments. Market risk management aims to manage and control exposure to market risk within acceptable limits while maximizing returns. There has been no change in the Company's exposure to market risks or the way in which these risks are managed and how they are measured.

#### 34.3 Interest rate risk

Interest rate risk is the exposure to various risks associated with the effect of fluctuations in the prevailing interest rates on the Company's financial position and cash flows. The Company is exposed to interest rate risk on its interest-bearing assets and liabilities, which mainly consist of bank facilities and borrowings. Management limits interest rate risk by monitoring changes in interest rates.

Management monitors changes in interest rates and believes that the cash flow and interest rate risks to the Company are not significant.

Company receivables and payables carried at amortized cost are not subject to interest rate risk as defined in IFRS 7 as the carrying amount or future cash flows do not change due to changes in market interest rates. Accordingly, the Company is not exposed to fair value interest rate risk.

The Company is not exposed to interest rate risk because the Company borrow funds at fixed interest rates.

	31 December 2022	31 December 2021
Fixed interest rate borrowings	1,323,62	14,205,068

All existing credit facility agreements are concluded with local banks and are compatible with the provisions of Islamic Sharia.

The Company is not exposed to interest rate risk due to fixed rate nature of debt instruments and hence the sensitivity analysis of interest rate risk has not been presented in the financial statements.

### 34.4 Foreign currency risk

Foreign currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates, foreign currency risk arises when future commercial transactions, assets and liabilities are denominated in a currency other than in the Saudi Riyals (SR). Management monitors the risks of fluctuations in exchange rates closely and on an ongoing basis, and based on its experience and market reactions, management does not believe that it is necessary to hedge against foreign exchange risks as most of the foreign exchange risks are relatively limited in the medium term.

The Company's transactions are mainly conducted in Saudi riyals, US dollars and Euros.

The carrying amounts of the Company's foreign currency denominated monetary liabilities at the reporting date are as follows:

	31 December 2022	31 December 2021
Euros	2,818,700	

## 34.5 Foreign currency sensitivity analysis

The Company is mainly exposed to the currency of Euros and the currency of USD.

The following table details the Company's sensitivity to a five per cent increase and decrease in currency units against the relevant foreign currencies. Five per cent is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates.

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

# 34. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

## 34.5 Foreign currency sensitivity analysis (continued)

The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the year-end for a five per cent change in foreign currency rates.

	31 December	31 December 2021
Profit or loss	551,146	

### 34.6 Credit risk

It is the risk that one party will not be able to fulfill its obligations, causing financial losses to the other party. The Company does not have a significant concentration of credit risk. Cash and cash equivalents are deposited with local banks with high credit ratings. Accounts receivable and other receivables are mainly due from customers in the local market and are stated at their estimated collectible value. The Company has policies in place to reduce its exposure to credit risk. The carrying amounts of the financial assets represent the maximum credit risk. The following is the credit rating of the banks that the company deals with and their balances as on 31 December 2022:

Credit rating	31 December 2022	31 December 2021
A1	2,236,179	115,000,561
A2	1,405,030	3,935,830
	3,641,209	118,936,391

As at 31 December 2022, the Company's maximum exposure to credit risk without taking into account any collateral held or other credit enhancements, which will cause a financial loss to the Company due to failure to discharge an obligation by the counterparties arises from the carrying amount of the respective recognised financial assets as stated in the statement of financial position.

The Company's current credit risk grading framework comprises the following categories

Category	Description	Basis for recognising expected credit losses
Performing	The counterparty has a low risk of default and does not have any past-due amounts	12-month ECL
Doubtful	Amount is >30 days past due or there has been a significant increase in credit risk since initial recognition	Lifetime ECL – not credit-impaired
In default	Amount is >180 days past due or there is evidence indicating the asset is credit-impaired	Lifetime ECL – credit- impaired
Write-of	There is evidence indicating that the debtor is in severe financial difficulty and the Company has no realistic prospect of recovery	Amount is written of

The tables below detail the credit quality of the Company's financial assets and contract assets as well as the Company's maximum exposure to credit risk by credit risk rating grades:

31 December 2022	External credit rating	Internal credit rating	Gross carrying amount	Loss allowance	Net carrying amount
Trade receivables	N/A	(34.6.1)	55,569,594	(3,574,620)	51,994,974
Finance lease receivables	N/A	(34.6.1)	6,530,710	(266,171)	6,264,539
Contract assets	N/A	(34.6.1)	5,065,265	(114,224)	4,951,041
			67,165,569	(3,955,015)	63,210,554

(A Saudi Joint Stock Company)

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

# 34. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

## 34.6 Credit risk (continued)

31 December 2021	External credit rating	Internal credit rating	Gross carrying amount	Loss allowance	Net carrying amount
Trade receivables Finance lease receivables Contract assets	N/A N/A N/A	(34.6.1) (34.6.1) (34.6.1)	22,142,337 11,190,861 2,693,744	(2,092,907) (1,209,587)	20,049,430 9,981,274 2,693,744
			36,026,942	(3,302,494)	32,724,448

**34.6.1** For trade receivables, finance lease receivables and contract assets, the Company has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. The Company determines the expected credit losses on these items by using a provision matrix, estimated based on historical credit loss experience based on the past due status of the debtors, adjusted as appropriate to reflect current conditions and estimates of future economic conditions. Accordingly, the credit risk profile of these assets is presented based on their past due status in terms of the provision matrix. Notes 13, 12 and 9 include further details on the loss allowance for these assets respectively.

The Company does not hold any collateral to cover the credit risk associated with its financial assets other than those disclosed in note 13 of the financial statements.

## 34.5 Liquidity risk

It is the risk that the Company will encounter difficulties in obtaining the necessary financing to meet obligations associated with financial instruments. Liquidity risk may arise when the inability to sell a financial asset quickly at a value close to its fair value. Liquidity risk is managed through regular monitoring of the adequacy of liquidity available to meet the Company's financial obligations. The Company's approach to managing liquidity is to ensure that it has sufficient liquidity to meet its liabilities when due, under normal and established conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The following table summarizes the Company's financial liabilities in the related maturity Company's based on the remaining period at the balance sheet date and up to the contractual maturity date. The amounts shown in the table are the contractual undiscounted cash flows.

31 December 2022	Carrying amount	Less than a year	1-5 years	More than 5 years
Lease liabilities	16,480,347	11,341,150	5,478,486	655,702
Borrowings	1,323,622	1,084,669	261,419	
Trade and other payables	36,375,983	36,375,983		
Due to related parties	805,000	805,000	-	-

## 34.8 Fair value

The table below analyses financial instruments measured at fair value at the end of the reporting period by the level in the fair value hierarchy into which the fair value measurement is categorized. It does not include fair value information for financial assets and financial liabilities not measured at fair value.

Fair value	Level 1	Level 2	Level 3	Total
31 December 2022				
Financial assets				
Investments at FVTPL	-	-	-	-
31 December 2021				
Financial assets				
Investments at FVTPL	50,000,000	<u> </u>		

There were no transfers between the levels of fair value hierarchies during the year.

The directors consider that the carrying values of all other financial instruments reported in the statement of financial position approximate their fair values.

### NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

(All amounts in Saudi Rivals unless otherwise stated)

## 35. <u>RESTATEMENTS</u> (continued)

- **35.1** The Company invested 50,000,000 Saudi Riyals into commodity funds as at December 2021. However, amount was presented as a part of cash and cash equivalents. Consequently, management has restated the comparative numbers to rectify error in classification. The restatement has negative impact on prior year cash and cash equivalents balance and a positive impact on statement of cash flows from investing activities.
- **35.2** The Company previously off-set the contract assets with contract liabilities (on lump sum basis) and the net amount was disclosed as a part of trade and other payables or receivables. However, in 2022, Company has off-set contract assets with contract liabilities on individual customer level only. Consequently, comparative numbers are restated to ensure the consistency in presentation.

Theses restatements have no impact on prior year profit or loss for the year, earning per share, other comprehensive income for the year and retained earnings.

- **35.3** The Company previously presented revenues in the statement of profit or loss in one line and then reclassified revenues in the statement of profit or loss for 2022 for the comparative year to 2 items, revenues in accordance with IFRS 15 revenue from contracts with customers and finance lease income in accordance with IFRS 16 leases.
- **35.4** In 2022, the Company separated proceeds of investments from Proceeds from investments returns. Consequently, comparative numbers are restated to ensure the consistency in presentation.
- **35.5** In 2022, the Company separated Proceeds from lease from Transferred to trade receivables. Consequently, comparative numbers are restated to ensure the consistency in presentation.
- **36.6** Creditors' compensation and subscription to priority rights shares was reclassified in 2022 from operating cash flows to financing cash flows. Consequently, comparative numbers are restated to ensure the consistency in presentation.

### **36. SUBSEQUENT EVENTS**

On 1 March 2023, The Company announced a renewal of lease contract for refrigerators warehouse for a term of three years till August 2026. The total value of the contract is 31,093,987 Saudi Riyals. The warehouses are located in the city of Jeddah in the third industrial zone. The transaction will have a positive impact on continued growth in the logistical sector and the preservation of existing projects of the Company.

## 37. APPROVAL OF THE FINANCIAL STATEMENTS

The financial statements for the year ending on 31 December 2022 were approved by the company's board of directors on 4 Ramadan 1444 H corresponding to 26 March 2023.
