A review of interim condensed consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters and applying analytical and other review procedures. QUALIFIED CONCLUSION

Based on our review, and except for the matters described in the basis for qualified conclusion paragraph nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial statements are not prepared, in all material respects, in accordance with IAS (34) that is endorsed in the Kingdom of Saudi Arabia.

2. BASIS OF PREPARATION (CONTINUED)

2.5 Basis of Preparation

A- Subsidiary Companies

The interim condensed consolidated financial statements include the financial statements of the Group and the Companies controlled by the Group and its subsidiaries as at the reporting date. Control is achieved when the Group has:

- Power and control over the investee.
- Exposure, or rights, to variable returns from its transactions with the investee.
- The ability to use its power over the investee to affect its returns.
 - The Group reassesses whether or not it controls the investee if facts and circumstances indicate the existence of changes in one or more of the three elements of control.
 - When the Company has less than a majority of the voting rights of the investee, it has control over the investee company when the voting rights are sufficient to give it the practical ability to unilaterally direct the relevant activities of the investee. The Company considers all relevant facts and circumstances in assessing whether it has control over an investee, including:
- The contractual arrangement(s) with the other vote holders of the investee.
- The Company's potential voting rights. Other voting rights holder and other parties.
- Rights arising from other contractual arrangements.

 The current ability to direct relevant activities at the time of decision-making, including voting patterns in previous shareholder meetings.
 - Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Income and expenses of a subsidiary acquired or disposed of during the period are included in the consolidated statement of profit or loss and other comprehensive income from the date the Company gains control until the date it ceases to control the subsidiary

For the three-months and six-months periods ended 30 June 2022 (All amounts expressed in Saudi Riyals)

2. BASIS OF PREPARATION (CONTINUED)

2.5 Basis of Preparation (continued)

A- Subsidiary Companies (Continued)

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for in the consolidated statement of changes in equity.

Profits or losses and each component of other comprehensive income are attributed to the shareholders of the company and to the non-controlling interest. The total comprehensive income of the subsidiaries is distributed among the shareholders of the company and the non-controlling interest even if this results in the non-controlling interests having a deficit balance.

If the company loses control over a subsidiary, it de-recognizes related assets (including goodwill), liabilities, non-controlling equity and other components of equity, while any resulting gain or loss is recognized in profits or losses. Any investment retained is recorded at fair value. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

All assets, liabilities, equity, revenues, expenses and cash flows related to intercompany operations are completely eliminated on consolidation.

B- Associate companies

Associates are all entities over which the Group has significant influence but no control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method, after initially being recognized at cost.

Equity method

Under the equity method of accounting, the investments are initially recognized at cost and adjusted thereafter to recognize the Group's share of the post-acquisition profits or losses of the investee in profit or loss, and the Group's share of other comprehensive income of the investee in other comprehensive income. If the share in the investee is reduced to zero, a liability is recognised only to the extent that there is an obligation to fund the investee's operations or any payments have been made on behalf of the investee. Dividends received or receivable from associates and joint ventures are recognized as a reduction in the carrying amount of the investment

Goodwill relating to the associate or joint venture is included in the carrying amount of the investment and is not tested for impairment separately.

For the three-months and six-months periods ended 30 June 2022 (All amounts expressed in Saudi Riyals)

2. BASIS OF PREPARATION (CONTINUED)

2.5 Basis of Preparation (continued)

B- Associate companies (continued)

Equity method (continued)

The interim condensed consolidated statement of profit or loss and other comprehensive income reflects the Group's share of the results of operations of the associate or joint venture. Any change in the other comprehensive income ("OCI") of those investees is presented as part of the Group's OCI. In addition, when there has been a change 12ecognizes directly in the equity of the associate or joint venture, the Group 12ecognizes its share of any changes, when applicable, in the interim condensed consolidated statement of changes in shareholders equity. Unrealized gains and losses resulting from transactions between the Group and the associate and joint venture are eliminated to the extent of the interest in the associate or joint venture. The financial statements of the associate or joint venture are prepared for the same reporting period as the Group.

When necessary, adjustments are made to bring the accounting policies of the associate or joint venture in line with those of the Group. After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in associate. The Group determines at each reporting date whether there is any objective evidence that the investment in the associate or joint venture is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value and recognises the loss as 'Share of profit of an associate and a joint venture' in the interim condensed consolidated statement of profit or loss and other comprehensive income.

Upon loss of significant influence over the associate or joint control of the joint venture, the group measures and recognizes any retained investments at fair value. Any difference between the carrying value of the associate or joint venture upon loss of joint influence or control and the fair value of the remaining investments and the proceeds on disposal of these investments is recognized in the interim condensed consolidated statement of profit or loss and other comprehensive income.

15- Financial instrument and risk management

Financial instruments included in the group interim condensed statement of financial position consist mainly of cash and cash equivalents, trade receivables, other current assets, loans, trade payables, accrued expenses, and other current liabilities.

15/1 Currency risk management

Currency risk arises from changes and fluctuations in the value of financial instruments as a result of changes in foreign exchange rates.

The Company did not carry out any operations of relative importance in currencies other than the Saudi riyal and the US dollar. Since the Saudi Riyal exchange rate is fixed against the US dollar, the Company's management believes that it is not fundamentally exposed to currency risk.

15/2 Credit Risk

Credit risk is the risk that one party will not be able to fulfill its obligations and cause the other party to incur a financial loss. The Company's financial instruments that are subject to credit risk include mainly cash and cash equivalents and trade receivables. The Company deposits its funds in banks with high reliability and creditworthiness. The Company has a policy regarding the size of funds deposited in each bank, and the management does not expect the existence of significant credit risks resulting from this. The management also does not expect to be exposed to significant credit risk from clients' accounts, given that it has a broad base of clients operating in different activities and multiple locations. It also monitors the outstanding trade receivables periodically to cover any expected unrecoverable debts.

A major review and restructuring of key interest rate indicators are currently underway at the world level, and in line with the Saudi Central Bank's goal of maintaining monetary and financial stability, the Saudi Central Bank decided in May 2022 to raise the rate of repurchase agreements "RIBOR" by 0.5 percent from 1.25 to 1.75 percent. The Company's management is closely following these changes to determine the possible financial impact on the results of its business during the coming periods.

The following is the maximum exposure to credit risk that can affect the Group at the reporting date:

	30 June 2022 – Unaudited	31 December 2021 – Audited

15/3 liquidity risk management

Liquidity risk is the inability of the Company to meet its liabilities related to financial liabilities as they fall due. Liquidity needs are monitored on a monthly basis and the management works to ensure that sufficient funds are available to meet any commitments when they are due.

The Company's financial liabilities consist of loans, commercial payables, accrued expenses, and other credit balances, and the Company works to reduce liquidity risk by ensuring that the necessary cash is available, in addition to making a harmonization between collection periods of trade receivables, loan repayment periods, trade and other credit balances.

15/4 Commission rate risk

Commission risk arises from possible changes and fluctuations in commission rates that affect future profit or fair values of financial instruments. The Company monitors commission rate fluctuations and believes that the impact of commission rate risk is not material.

15/5 Fair value

The fair value is the price that is received to sell an asset or paid to transfer any of the liabilities in a transaction under regular conditions between market participants at the measurement date. As such, differences can arise between the carrying values and the fair value estimates. The definition of fair value is based on market-based measurement and assumptions used by market participants.

- Level 2 Valuation techniques that depend on inputs that affect the fair value and can be directly or indirectly observable in the market.
- Level 3 Valuation techniques that rely on inputs that affect the fair value and are not directly observable in the market.

All financial assets and liabilities of the Company are stated at amortized cost except biological assets – Noncurrent (Herd of sheep), investment at fair value through OCI, Employee benefit obligation and dismantling provision.
