## Standard 102: Compliance with Standards and Research and Inquiry

This valuation work was carried out in accordance with the principle of Standard 102 of compliance with the standards, research and survey work, in the following items:

- The basis of the value (fair value) is commensurate with the purpose of valuation (Periodic valuation of Al Mashaer REIT Fund).
- Gathering evidence through field visits at the time of inspecting the property with the inquiries raised at the time of the evaluation of some accredited offices in the area of the property.
- Evidence from field visits was collected and analysis and computational procedures performed to ensure that evaluation work was adequately supported.
- The data cited was judged to ensure the adequacy of all such information obtained to ensure that it is sufficient for the purpose of the valuation.
- Limitations of the research and survey that were carried out indicate the limitations in the scope of work with the analysis of all valuation inputs mentioned in the report.
- Reliability of the information provided by the real estate offices in the real estate area has been confirmed, and they are accredited and licensed offices in the real estate area.

## Judging the reliability of the information provided and taken into the report

Provider	Data and information	Verdict	Judgment reasons
	Deed	Trusted	The deed sent by the client has been verified
Client	Building permit	Trusted	The building permit has been validated in Baladi platform
Rental data	Trusted	Electronic contracts were received (Ejar platform). The current contracts do not reflect the property's income (market) and were valuated according to market values after review	
	Commercial meter prices	Trusted	Based on the market survey - direct interviews - accredited offices in the real estate area - internal company data
Market	Practical experience of real estate offices	Trusted	Certified by official records in the real estate area
	Source independence	Trusted	A source independent and external to the asset being valued

شركة قيم للتقييم - ترخيص رقم 210000051 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 الانتهاء 1449/03/15 هـ الرقم الموحد 202058819 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 1666

## **Compliance with Standards and Research and Inquiry**

## 03

In the event that there are restrictions on the research and investigation carried out by the evaluator that do not enable him to adequately valuer the inputs and assumptions, which are clarified in the special assumptions 02

Carry out calculations and perform analyzes by gathering sufficient evidence by the following means, such as: field visit, inspection, inquiries and ensuring that evaluation work is appropriately reinforced and professional judgment facility to ensure that the information obtained is sufficient and that it fulfills the purpose of the evaluation

## 01

The research and investigations undertaken in the context of the valuation mission are appropriate to the valuation purpose and value basis

## 06

Record the valuation purpose, basis of value, and scope And the limits of research and survey, and the sources of information that reliable in the scope of work, which must Communicating it to all parties to the valuation task

## 05

Consider the credibility and reliability of the information provided The following matters were taken into consideration:

The purpose of the valuation

The relevance of the information to the outcome of the valuation

The source practical experience in relation to the subject matter of the valuation

Is the source independent of the asset being evaluated or the beneficiary of it?

## 04

Taking into account the reliability of the information so that the evaluation results do not appear, and the inputs provided to the valuer (and) from the client or his representative) were considered.

شركة قيم للتقييم - ترخيص رقم 1210000052 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 تاريخ الانتهاء 1169/03/5 هـ الرقم الموحد 20205839 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 11666

## **Regulatory framework on the International Valuation Standards (IVS 2022)**

General Standards - Criterion 101 Scope of Work Paragraph 20: Emphasizing that the valuation will be prepared in accordance with international valuation standards and that the valuer will assess the appropriateness of all important inputs: Deviations from international evaluation standards and their nature must be mentioned 60.3 Some professional appraisal institutions or regulations allow procedures that deviate from the International Appraisal Standards and in such circumstances, except as described in paragraphs 60.1 and 60.2, the resulting valuation will not be in compliance with the Standards.

General framework: the generally accepted valuation principles and the concepts that should be followed when applying these standards with regard to objectivity, discretionary judgment, efficiency, and the of deviating from the possibility (60.1-60.2). Paragraph standards, requirements mentioned in the reports

#### Note:

Real estate valuations performed in order to prepare financial reports are regarded as situations of systematic deviation from international valuation norms in order to satisfy certain criteria for the purpose of the relevant valuation.

شركة قيم للتقييم - ترخيص رقم 1210000052 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 اتاريخ الانتهاء 1169/03/5 هـ الرقم الموحد 20205839 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 11666

## Real estate and investment properties in the preparation of financial reports

## Clarifying the difference between real estate and investment properties in the financial statements

	IAS 40 defines investment property as any
	property (land or a building - or part of a building -
Investment properties	or both) held (by the owner or by the lessee as a
in the financial	right-of-use asset) to earn rental income or To
in the infancial	grow the capital or for both, and not:
statements	- For use in producing, supplying goods, providing
	services, or for administrative or
	- To sell it in the ordinary course of business

Real estates included in the term of real estate, machinery and equipment in the financial statements The International Accounting Standard No. 16 "property, plant and equipment" IFRS16 defines as the tangible items that: - It is kept for use in the production or supply of goods or services, or it is kept for rent to others (except for investment real estate) or for use in administrative purposes. - It is expected to be used during more than one period

## 2030 Vision

His Royal Highness Prince **Mohammed bin Salman bin Abdulaziz Al Saud**, Crown Prince, Deputy Prime Minister and Chairman of the Council for Economic Affairs and Development.

Our ambition is to build a more prosperous country in which every citizen will find what he desires. For the future of our homeland, which we build together, we will accept nothing but to make it at the forefront of the world, with education and rehabilitation, with opportunities available to all, and advanced services, in employment, health care, housing entertainment and others.

## Economic growth in Saudi Arabia

During its modern era, the Saudi economy has witnessed growth in a large number of sectors, taking advantage of the Kingdom's natural resources, and its geographical and cultural position among the three continents of the world. This growth resulted in building a solid economic base, as it became among the twenty largest global economies and an active member of the Group of Twenty, and one of the main players in the global economy and global oil markets, supported by a strong financial system and an effective banking sector, and giant government companies based on highly qualified Saudi cadres.

In the past years, the Kingdom has also witnessed structural reforms on the economic and financial side, which enhance the increase in economic growth rates while maintaining financial stability and sustainability.

In order to develop and diversify the economy and reduce dependence on oil, the Kingdom of Saudi Arabia launched the Saudi Vision 2030 based on many economic and financial reforms, which aimed at transforming the structure of the Saudi economy into a diversified and sustainable economy based on enhancing productivity, raising the contribution of the private sector, and enabling the third sector.

Since the launch of the vision, the Kingdom has succeeded in implementing many supportive initiatives and structural reforms to enable economic transformation.

This transformation consists of several major efforts centered on a sectoral dimension that includes the promotion of local content, national industry, and the launch of various sectors. Promising economy and its development, enabling dimension that aims to maximize the role of the private sector, small and medium enterprises, and enhance the sustainability of Public Finance. It is expected that the pace of this structural transformation towards sustainable economic growth will continue in the coming years, especially in light of the number of Giant investment initiatives, under the umbrella of the Public Investment Fund, and leading companies. It is also expected that the pace of settlement will accelerate Knowledge and innovative technologies.

## **Business Sectors Overview**

## **Tourism Sector**

Within the framework of the Kingdom's Vision 2030, which aims to lay effective foundations and pillars for the future of the Kingdom of initiatives aimed at reducing the main dependence on oil, through many sectors to support the national economy, including the tourism sector, given what this sector represents from a value, social, civilized and economic dimension. The tourism sector and the hotel sector are closely linked to the Saudi Vision 2030, and it revolves around helping those involved in the hospitality sector, food and entertainment industries to plan for the future.

**Office Sector** 

The offices contribute to achieving the goals of the Saudi national transformation towards prosperity and sustainability by focusing on the goals of Vision 2030, which leads to raising the participation of the private sector in achieving the Kingdom's Vision 2030, working as a representative of the private sector within the national system of vision realization offices in government agencies. Including Riyadh's endeavor to transform into a regional center for international commercial entities, which made it issue a decision to refuse to contract with any company that does not have a regional headquarters in Saudi Arabia by 2024, especially those that have contracts with government agencies, whether they are bodies, institutions, investment funds or devices. Increases the demand for the office sector.

## **Retail Sector**

The vision of the Kingdom's national transformation for the post-oil stage 2030 paid great attention to the development of the commercial and industrial sector in the Kingdom, as the vision is based on focusing on the development and development of the local industry that will achieve great economic returns for the Saudi economy, and among the goals of the vision by 2030 is to raise the percentage of exports The Kingdom's rank in the Logistics Performance Index increased from 16% to 25 globally and first regionally, and the private sector's contribution to the GDP increased from 40% to 65%.

**Housing Sector-**

Vision 2030 has provided sustainable housing solutions that enable Saudi families to own suitable homes according to their needs and financial capabilities. To achieve this, the housing system, in terms of structuring, procedures, and policies for dealing with banks and the private sector, has developed a high percentage of Saudi families' ownership of homes, as the proportion of Saudi families' ownership of homes did not exceed 47% in 2016, and rose to 70% by the end of the first phase of the housing program in 2021.

## Valuation

## Valuation Approaches

The market method provides an indication of value by comparing the asset with identical or comparable (similar) assets for which price information is available.

Income Approach 🔸

The income method provides an indication of value by converting future cash flows into one current value. According to this method, the value of the asset is determined by reference to the value of the revenue and cash flows generated by the asset or the costs it provides.

The cost method provides an indication of value using the economic principle that states that the buyer will not pay an asset more than the cost of obtaining an asset of similar benefit, whether through purchase or construction unless there are time, disturbance, risk, or other related factors. The method provides an indication of value by calculating the current cost of transferring or reproducing the asset, and then discounting the physical wear and tear of all other obsolescence's.

شركة قيم للتقييم - ترخيص رقم 121000052 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 تاريخ الانتهاء 1149/03/15 هـ الرقم الموحد 20205882 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 1666

## Market Approach-Standard No. 105

It is an approach of estimating the value of a real estate or real estate property based on the market comparison between the property being evaluated and similar properties in the same area that were recently sold. The value indicator of the property being valued is derived by applying appropriate comparison units and making adjustments and adjustments to the selling prices of similar properties based on the comparative elements.

## The market approach should be applied and afforded significant weight under the following circumstances:

- The subject asset has recently been sold in a transaction appropriate for consideration under the basis of value
- The subject asset or substantially similar assets are actively publicly traded.
- There are frequent and/or recent observable transactions in substantially similar assets.

## The key steps in the comparable transactions method are:

- Define the units of comparison used by relevant market participants.
- Determine the relevant comparative transactions and calculate the main evaluation criteria for these transactions.
- Conduct consistent comparative analysis of the qualitative and quantitative similarities and differences between the comparable assets and the subject asset.
- Make the necessary adjustments, if any, to the evaluation scales to reflect the differences between the subject of evaluation and the comparative assets.
- Applying the revised valuation criteria to the subject asset.

## Cost Approach - Standard No. 105

It is a valuation method that calculates the capital or market value of a property by adding the value of the real estate's land with the value of the buildings erected on the site.

## Cost Approach should be applied and afforded significant weight under the following circumstances:

- Participants would be able to recreate an asset with substantially the same utility as the subject asset, without regulatory or legal restrictions, and the asset could be recreated quickly enough that a participant would not be willing to pay a significant premium for the ability to use the subject asset immediately,
- The asset is not directly income-generating and the unique nature of the asset makes using an income approach or market approach unfeasible, and/or
- The basis of value being used is fundamentally based on replacement cost, such as replacement value

## Used methods of Cost Approach :

a. Replacement cost method: A method of arriving at value by calculating the cost of a similar asset

## Method of estimating the value of buildings using the straight line method

- The straight-line method: the straight-line method is calculated by the formula (current age of the building / Lifespan) \* 100.

شركة قيم للتقييم - ترخيص رقم 22000012 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 21010927632 تاريخ الانتهاء 1149/03/15 هـ الرقم الموحد 22025839 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 11666

## Income Approach-Standard No. 105

Income Approach provides an indication of value by converting future cash flows into a single present value. Under this approach, the value of an asset is determined by reference to the value of the revenue and cash flows that the asset generates or the costs it provides.

#### Income Approach should be applied and given priority or significant weight in the following cases:

- A. When the ability of the asset to generate income is the primary factor that affects the value from the point of view of market participants.
- B. Reasonable expectations are available for the amount and timing of future revenue for the assessed asset but few, if any, relevant market comparisons.

### Income Approach Methods:

Although there are many ways to apply the income method, the methods used under the income method depend largely on discounting the amounts of future cash flows to a present value, which are various applications in using the discounted cash flow (DCF) method and the concepts below apply in part or all of the methods of the income method.

### **Discounted Cash Flow method (DCF)**

It is a financial method for estimating the value of a financial or real asset. The value index is derived by calculating the present value of future cash flows. The discounted cash flow method is applied to evaluate a property or real estate that generates income based on the expectation of future income for the property under valuation. The value index of the property is derived through Calculating the present value of net operating income or the expected net rental value of the property.

#### **Direct Capitalization Method:**

The direct capitalization method is applied in the event that the net rental value of the property under valuation is fixed and equal in perpetuity.

#### **Residual value method:**

The residual value method is a method of evaluating properties that can be valued by identifying the most appropriate development of the site and property and then predicting the value of such development after it is completed.

شركة قيم للتقييم - ترخيص رقم 22000012 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 21010927632 تاريخ الانتهاء 1149/03/15 هـ الرقم الموحد 22025839 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 11666

## Used valuation approaches and methods - Fair value hierarchy

## Used valuation approaches and methods

Valuation Approaches	tion Approaches Market Approach		Income Approach	
Used approach	Used as an <b>assist approach</b>	Used as an <b>assist approach</b>	Used as a main approach	
Used valuation methods	Field survey (comparisons - offered land prices)	Replacement cost	Discounted Cash Flow method	
Reasons for use/non-use	To know similar properties on the market	Land on which a building is built	The fact that the property is income-generating	

## Hierarchy:

The fair value hierarchy categorizes the inputs to the valuation approaches used to measure fair value at the measurement date into three levels, as follows:

Level	Clarification	Input statement	Classification	Source	Judgment and documentation
First	Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be reached at the measurement date and are given priority.				
Second	They are the inputs other than the published prices within the first level that can be monitored for the asset or liability, either directly or indirectly	Commercial and commercial residential offers in the real estate area	It is classified under the second level	Accredited real estate offices in the real estate area	reliable based on similar market analysis, verification following market research and analysis, in-person interviews, and the company's own database of deals and transactions
Third	They are the inputs that cannot be monitored and are given the lowest priority

## تقدير القيمة

Value Estimation

#### Estimating the value of the land - Market Approach - Comparisons method

Saudi market does not have transparency and it is difficult to collect accurate information. Therefore, we were able to collect data for a selected sample of comparisons that reflect the reality of the market in general, and we will work to present their data and performance indicators as an embodiment of the market.

Selected comparisons are: From the properties offered in Al-Azizia neighborhood, Al-Azizia road.

Comparative Properties - Commercial Residential Lands						
<b>Comparison factors</b>	Comparative 1	Comparative 2				
Area (m2)	1,500	1,200				
Ease of access	High	High				
Property location	High	Average				
Land shape	Regular	Regular				
Land topography	Flat	Flat				
Use	Commercial	Commercial - Residential				
Surrounding streets	2	2				
Price per meter (SR)	40000	30000				
Comparative condition	Available offer	Available offer

#### Similar Comparisons Method assumptions

## Based on the approach used in calculating the market value, which is Market Approach (Method of Similar Comparisons), some steps must be taken to obtain accurate Adjustments, as follows:

- Determine the factors that affect the value of the property under valuation.
- Comparing the features and characteristics of each comparative property with the property being evaluated and determining the difference in each element of the comparison between the comparative property and the property under valuation.
- Make adjustments against each mismatched item.
- Reaching the net adjustment for each comparable property and applying it to the unit price to reach price range of the unit after adjustments for the property under valuation.
- On the basis of the price range, the valuer determines the most reasonable price for the unit in the real estate under valuation, and the unit price is chosen after adjustments from the best comparable real estate usually as it is better.
- Relative control of the area: It is customary to promote a smaller area of the land that achieves a higher value compared to the land that is larger in area, and sometimes vice versa. Here, it was assumed that 5% would be allocated for each multiplier, and the percentage may vary according to the estimate and experience of the real estate valuer, depending on the state of the real estate market and the valuer's experience.
- Market condition: Adjustments against the market condition conditions are often referred to as (time) Adjustment or in the case of negotiation over the offered value. Market conditions may change with the change of time, and the percentage is variable according to the market condition.
- Ease of access: The movement of access to the real estate subject to evaluation is easy, as well as the ease of access to the comparable properties (high, medium, low), Accordingly, a rate of 5% was assumed for each level.
- Location of the property: The location is where the property is located, whether it is on a road front or second row, or has two roads or two entrances, and it has a direct and high impact on the value of the property, and half of it is (high, medium, low), accordingly, a rate of 5% was assumed for each level.
- Land shape: One of the physical characteristics that affect the property is the shape of the land, whether it is regular or irregular, Accordingly, a rate of 5% was assumed.
- Usage: The real estate planning has been taken into consideration as it is (commercial) planning compared to the comparable real estate, as well as all of them are commercial. It is possible for the property to include more than one use, such as (residential, residential, commercial, or residential, commercial, office), and accordingly, a rate of 5% was assumed according to the classification of use.
- Surrounding streets: The location affects the value of real estate directly if it is on one or two streets, as well as the views it provides and the provision of various advantages. Accordingly, a rate of 5% was assumed for each difference for one street.

#### Analysis of valuation assumptions data - Discounted Cash Flow Methods

#### **Rental income:**

The property's income was analyzed by reviewing the contracts for the property and through contracts similar to the property being valued, and this was compared to the market. (Current contract income has been clarified)

The real estate contract in (2024-2025) was not relied upon, which is the contract period in addition to the other property income, according to what was reviewed. Market prices in the valuation years (2024-2033) were relied upon, and this was reflected in the report.

Discounted Cash Flow assumptions				
Net income of the hotel according to the contract	2,645,000	Discount rate	%9.5	
Other income for the property (shops) according to the contract	172,500	Capitalization rate	%7	
Occupancy rate and credit risk	%40	Income years (by market)	2033 - 2024	
Cash flow period (years)	10	Operating and capital expenditure rate	%35	

#### **Discount rate:**

Discount rate extraction (Cu	umulative Model me	thod)
Government bond rate of return	4.6	Saudi Tadawul Fund
Inflation rate (average of the current year)	2.49	Saudi Central Bank
Market risk premium (recession and recovery)	1.25	Depending on the market situation and conditions
Special risk premium (the resulting costs of the property)	1.25	Depending on the property situation and conditions
Discount rate after rounding	9.5	%

	Market Survey - Hotel Income Analysis					
Comparison	Location	Rating	Number of rooms	Annual occupancy	Operational expenses	
1	Aziziyah	3 stars	272	50%	30%	
2	Aziziyah	3 stars	178	45%	35%	
3	Aziziyah	3 stars	188	35%	30%	

#### **Operational rate of return:**

Analysis of the capitalization rate - the method of extracting from the market In view of the market activity and the reports of the Qaim Company for similar investments, as well as in view of the economic reports issued by some study centers and the information center of the Qaim Company for valuation, we found that the return in the region ranges from 7% to 8% and accordingly, the rate of return was assumed at a rate of 7% There are many factors that affect the rate of return, represented in the location of the building, its age and condition, the situation of the tenants, and the degree of risk associated with repayment. The capitalization rate is affected by the demand and supply rates for the same type of real estate.

#### Operating and capital expenditure rate:

Operating expenses are the expenses for renting and maintaining the property, and capital expenses are the expenses borne by the owner in order to maintain it in good condition to achieve the appropriate annual income. The percentage of operating expenses represents 15% - 40% for similar projects in the surrounding area depending on the size and services provided, as most of them are under single contracts in Most likely. (The property is leased under one contract) and the operating and capital expenditure rate was assumed at 35% for the average limit in the market.

#### Final value of the property

Based on the purpose of the valuation, the nature of the property, and its characteristics as a hotel, valuing the property using Income Approach (Discounted Cash Flow Method) is considered the best way to estimate the price on the measurement date of 31/12/2023, which was arrived at with Income Approach as a basis for the fair value of the property being valued (after rounding). As follows:

Price on the date of measurement in numbers (SR)	Price on the measurement date written (SR)
119,793,000	One hundred nineteen million seven hundred ninety-three thousand

#### 2030 Vision

His Royal Highness Prince **Mohammed bin Salman bin Abdulaziz Al Saud**, Crown Prince, Deputy Prime Minister and Chairman of the Council for Economic Affairs and Development.

Our ambition is to build a more prosperous country in which every citizen will find what he desires. For the future of our homeland, which we build together, we will accept nothing but to make it at the forefront of the world, with education and rehabilitation, with opportunities available to all, and advanced services, in employment, health care, housing entertainment and others.

#### Economic growth in Saudi Arabia

During its modern era, the Saudi economy has witnessed growth in a large number of sectors, taking advantage of the Kingdom's natural resources, and its geographical and cultural position among the three continents of the world. This growth resulted in building a solid economic base, as it became among the twenty largest global economies and an active member of the Group of Twenty, and one of the main players in the global economy and global oil markets, supported by a strong financial system and an effective banking sector, and giant government companies based on highly qualified Saudi cadres.

In the past years, the Kingdom has also witnessed structural reforms on the economic and financial side, which enhance the increase in economic growth rates while maintaining financial stability and sustainability.

In order to develop and diversify the economy and reduce dependence on oil, the Kingdom of Saudi Arabia launched the Saudi Vision 2030 based on many economic and financial reforms, which aimed at transforming the structure of the Saudi economy into a diversified and sustainable economy based on enhancing productivity, raising the contribution of the private sector, and enabling the third sector.

Since the launch of the vision, the Kingdom has succeeded in implementing many supportive initiatives and structural reforms to enable economic transformation.

This transformation consists of several major efforts centered on a sectoral dimension that includes the promotion of local content, national industry, and the launch of various sectors. Promising economy and its development, enabling dimension that aims to maximize the role of the private sector, small and medium enterprises, and enhance the sustainability of Public Finance. It is expected that the pace of this structural transformation towards sustainable economic growth will continue in the coming years, especially in light of the number of Giant investment initiatives, under the umbrella of the Public Investment Fund, and leading companies. It is also expected that the pace of settlement will accelerate Knowledge and innovative technologies.

#### **Business Sectors Overview**

#### **Tourism Sector**

Within the framework of the Kingdom's Vision 2030, which aims to lay effective foundations and pillars for the future of the Kingdom of initiatives aimed at reducing the main dependence on oil, through many sectors to support the national economy, including the tourism sector, given what this sector represents from a value, social, civilized and economic dimension. The tourism sector and the hotel sector are closely linked to the Saudi Vision 2030, and it revolves around helping those involved in the hospitality sector, food and entertainment industries to plan for the future.

**Office Sector** 

The offices contribute to achieving the goals of the Saudi national transformation towards prosperity and sustainability by focusing on the goals of Vision 2030, which leads to raising the participation of the private sector in achieving the Kingdom's Vision 2030, working as a representative of the private sector within the national system of vision realization offices in government agencies. Including Riyadh's endeavor to transform into a regional center for international commercial entities, which made it issue a decision to refuse to contract with any company that does not have a regional headquarters in Saudi Arabia by 2024, especially those that have contracts with government agencies, whether they are bodies, institutions, investment funds or devices. Increases the demand for the office sector.

#### **Retail Sector**

The vision of the Kingdom's national transformation for the post-oil stage 2030 paid great attention to the development of the commercial and industrial sector in the Kingdom, as the vision is based on focusing on the development and development of the local industry that will achieve great economic returns for the Saudi economy, and among the goals of the vision by 2030 is to raise the percentage of exports The Kingdom's rank in the Logistics Performance Index increased from 16% to 25 globally and first regionally, and the private sector's contribution to the GDP increased from 40% to 65%.

**Housing Sector-**

Vision 2030 has provided sustainable housing solutions that enable Saudi families to own suitable homes according to their needs and financial capabilities. To achieve this, the housing system, in terms of structuring, procedures, and policies for dealing with banks and the private sector, has developed a high percentage of Saudi families' ownership of homes, as the proportion of Saudi families' ownership of homes did not exceed 47% in 2016, and rose to 70% by the end of the first phase of the housing program in 2021.

# Valuation

# Valuation Approaches

The market method provides an indication of value by comparing the asset with identical or comparable (similar) assets for which price information is available.

Income Approach 🔸

The income method provides an indication of value by converting future cash flows into one current value. According to this method, the value of the asset is determined by reference to the value of the revenue and cash flows generated by the asset or the costs it provides.

The cost method provides an indication of value using the economic principle that states that the buyer will not pay an asset more than the cost of obtaining an asset of similar benefit, whether through purchase or construction unless there are time, disturbance, risk, or other related factors. The method provides an indication of value by calculating the current cost of transferring or reproducing the asset, and then discounting the physical wear and tear of all other obsolescence's.

شركة قيم للتقييم - ترخيص رقم 121000052 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 تاريخ الانتهاء 1149/03/15 هـ الرقم الموحد 20205882 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 1666

# Market Approach-Standard No. 105

It is an approach of estimating the value of a real estate or real estate property based on the market comparison between the property being evaluated and similar properties in the same area that were recently sold. The value indicator of the property being valued is derived by applying appropriate comparison units and making adjustments and adjustments to the selling prices of similar properties based on the comparative elements.

# The market approach should be applied and afforded significant weight under the following circumstances:

- The subject asset has recently been sold in a transaction appropriate for consideration under the basis of value
- The subject asset or substantially similar assets are actively publicly traded.
- There are frequent and/or recent observable transactions in substantially similar assets.

# The key steps in the comparable transactions method are:

- Define the units of comparison used by relevant market participants.
- Determine the relevant comparative transactions and calculate the main evaluation criteria for these transactions.
- Conduct consistent comparative analysis of the qualitative and quantitative similarities and differences between the comparable assets and the subject asset.
- Make the necessary adjustments, if any, to the evaluation scales to reflect the differences between the subject of evaluation and the comparative assets.
- Applying the revised valuation criteria to the subject asset.

# Cost Approach - Standard No. 105

It is a valuation method that calculates the capital or market value of a property by adding the value of the real estate's land with the value of the buildings erected on the site.

## Cost Approach should be applied and afforded significant weight under the following circumstances:

- Participants would be able to recreate an asset with substantially the same utility as the subject asset, without regulatory or legal restrictions, and the asset could be recreated quickly enough that a participant would not be willing to pay a significant premium for the ability to use the subject asset immediately,
- The asset is not directly income-generating and the unique nature of the asset makes using an income approach or market approach unfeasible, and/or
- The basis of value being used is fundamentally based on replacement cost, such as replacement value

# Used methods of Cost Approach :

a. Replacement cost method: A method of arriving at value by calculating the cost of a similar asset

# Method of estimating the value of buildings using the straight line method

- The straight-line method: the straight-line method is calculated by the formula (current age of the building / Lifespan) \* 100.

شركة قيم للتقييم - ترخيص رقم 22000012 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 21010927632 تاريخ الانتهاء 1149/03/15 هـ الرقم الموحد 22025839 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 11666

# Income Approach-Standard No. 105

Income Approach provides an indication of value by converting future cash flows into a single present value. Under this approach, the value of an asset is determined by reference to the value of the revenue and cash flows that the asset generates or the costs it provides.

#### Income Approach should be applied and given priority or significant weight in the following cases:

- A. When the ability of the asset to generate income is the primary factor that affects the value from the point of view of market participants.
- B. Reasonable expectations are available for the amount and timing of future revenue for the assessed asset but few, if any, relevant market comparisons.

#### Income Approach Methods:

Although there are many ways to apply the income method, the methods used under the income method depend largely on discounting the amounts of future cash flows to a present value, which are various applications in using the discounted cash flow (DCF) method and the concepts below apply in part or all of the methods of the income method.

#### **Discounted Cash Flow method (DCF)**

It is a financial method for estimating the value of a financial or real asset. The value index is derived by calculating the present value of future cash flows. The discounted cash flow method is applied to evaluate a property or real estate that generates income based on the expectation of future income for the property under valuation. The value index of the property is derived through Calculating the present value of net operating income or the expected net rental value of the property.

#### **Direct Capitalization Method:**

The direct capitalization method is applied in the event that the net rental value of the property under valuation is fixed and equal in perpetuity.

#### **Residual value method:**

The residual value method is a method of evaluating properties that can be valued by identifying the most appropriate development of the site and property and then predicting the value of such development after it is completed.

# Used valuation approaches and methods - Fair value hierarchy

# Used valuation approaches and methods

Valuation Approaches	Valuation Approaches Market Approach		proaches Market Approach Cost Approach		Income Approach	
Used approach	Used as an <b>assist approach</b>	Used as an <b>assist approach</b>	Used as a main approach			
Used valuation methods	Field survey (comparisons - offered land prices)	Replacement cost	Discounted Cash Flow method			
Reasons for use/non-use	To know similar properties on the market	Land on which a building is built	The fact that the property is income-generating			

# Hierarchy:

The fair value hierarchy categorizes the inputs to the valuation approaches used to measure fair value at the measurement date into three levels, as follows:

Level	Clarification	Input statement	Classification	Source	Judgment and documentation
First	Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be reached at the measurement date and are given priority.				
Second	They are the inputs other than the published prices within the first level that can be monitored for the asset or liability, either directly or indirectly	Commercial and commercial residential offers in the real estate area	It is classified under the second level	Accredited real estate offices in the real estate area	reliable based on similar market analysis, verification following market research and analysis, in-person interviews, and the company's own database of deals and transactions
Third	They are the inputs that cannot be monitored and are given the lowest priority

Value Estimation

#### Estimating the value of the land - Market Approach - Comparisons method

Saudi market does not have transparency and it is difficult to collect accurate information. Therefore, we were able to collect data for a selected sample of comparisons that reflect the reality of the market in general, and we will work to present their data and performance indicators as an embodiment of the market.

Selected comparisons are: From the properties offered in Hajj Road district.

Comparative Properties - Commercial Residential Lands					
<b>Comparison factors</b>	Comparative 1	Comparative 2			
Area (m2)	1,120	561			
Ease of access	High	High			
<b>Property location</b>	High	High			
Land shape	Regular	Regular			
Land topography	Flat	Flat			
Use	Commercial - Residential	Commercial - Residential			
Surrounding streets	• 3	3			
Price per meter (SR)	26785	21000			
<b>Comparative condition</b>	Available offer	Available offer

# Similar Comparisons Method assumptions

# Based on the approach used in calculating the market value, which is Market Approach (Method of Similar Comparisons), some steps must be taken to obtain accurate Adjustments, as follows:

- Determine the factors that affect the value of the property under valuation.
- Comparing the features and characteristics of each comparative property with the property being evaluated and determining the difference in each element of the comparison between the comparative property and the property under valuation.
- Make adjustments against each mismatched item.
- Reaching the net adjustment for each comparable property and applying it to the unit price to reach price range of the unit after adjustments for the property under valuation.
- On the basis of the price range, the valuer determines the most reasonable price for the unit in the real estate under valuation, and the unit price is chosen after adjustments from the best comparable real estate usually as it is better.
- Relative control of the area: It is customary to promote a smaller area of the land that achieves a higher value compared to the land that is larger in area, and sometimes vice versa. Here, it was assumed that 5% would be allocated for each multiplier, and the percentage may vary according to the estimate and experience of the real estate valuer, depending on the state of the real estate market and the valuer's experience.
- Market condition: Adjustments against the market condition conditions are often referred to as (time) Adjustment or in the case of negotiation over the offered value. Market conditions may change with the change of time, and the percentage is variable according to the market condition.
- Ease of access: The movement of access to the real estate subject to evaluation is easy, as well as the ease of access to the comparable properties (high, medium, low), Accordingly, a rate of 5% was assumed for each level.
- Location of the property: The location is where the property is located, whether it is on a road front or second row, or has two roads or two entrances, and it has a direct and high impact on the value of the property, and half of it is (high, medium, low), accordingly, a rate of 5% was assumed for each level.
- Land shape: One of the physical characteristics that affect the property is the shape of the land, whether it is regular or irregular, Accordingly, a rate of 5% was assumed.
- Usage: The real estate planning has been taken into consideration as it is (commercial) planning compared to the comparable real estate, as well as all of them are commercial. It is possible for the property to include more than one use, such as (residential, residential, commercial, or residential, commercial, office), and accordingly, a rate of 5% was assumed according to the classification of use.
- Surrounding streets: The location affects the value of real estate directly if it is on one or two streets, as well as the views it provides and the provision of various advantages. Accordingly, a rate of 5% was assumed for each difference for one street.

#### Analysis of valuation assumptions data - Discounted Cash Flow Methods

#### **Rental income:**

The property's income was analyzed by reviewing the contracts for the property and through contracts similar to the property being valued, and this was compared to the market. (Current contract income has been clarified)

The real estate contract in (2024-2025) was not relied upon, which is the contract period in addition to the other property income, according to what was reviewed. Market prices in the valuation years (2024-2033) were relied upon, and this was reflected in the report.

Discounted Cash Flow assumptions							
Net income of the hotel according to the contract	4,761,000	Discount rate	%9.5				
Occupancy rate and credit risk	%45	Capitalization rate	%7				
Cash flow period (years)	10	Operating and capital expenditure rate	37%				
Income years (by market)	2029 - 2024						

#### **Discount rate:**

Discount rate extraction (Cumulative Model method)					
Government bond rate of return	4.6	Saudi Tadawul Fund			
Inflation rate (average of the current year)	2.49	Saudi Central Bank			
Market risk premium (recession and recovery)	1.25	Depending on the market situation and conditions			
Special risk premium (the resulting costs of the property)	1.25	Depending on the property situation and conditions			
Discount rate after rounding	9.5	%			

Market Survey - Hotel Income Analysis							
Comparison	Location	Rating	Number of rooms	Annual occupancy	Operational expenses		
1	Umm Al-Dana	3 stars	272	45%	30%		
2	Murjan	3 stars	178	35%	35%		
3	Grand Nour	3 stars	188	35%	40%		

#### **Operational rate of return:**

Analysis of the capitalization rate - the method of extracting from the market In view of the market activity and the reports of the Qaim Company for similar investments, as well as in view of the economic reports issued by some study centers and the information center of the Qaim Company for valuation, we found that the return in the region ranges from 7% to 8% and accordingly, the rate of return was assumed at a rate of 7% There are many factors that affect the rate of return, represented in the location of the building, its age and condition, the situation of the tenants, and the degree of risk associated with repayment. The capitalization rate is affected by the demand and supply rates for the same type of real estate.

#### **Operating and capital expenditure rate:**

Operating expenses are the expenses for renting and maintaining the property, and capital expenses are the expenses borne by the owner in order to maintain it in good condition to achieve the appropriate annual income. The percentage of operating expenses represents 15% - 40% for similar projects in the surrounding area depending on the size and services provided, as most of them are under single contracts in Most likely. (The property is leased under one contract) and the operating and capital expenditure rate was assumed at 35% for the average limit in the market.

## Standard 102: Compliance with Standards and Research and Inquiry

This valuation work was carried out in accordance with the principle of Standard 102 of compliance with the standards, research and survey work, in the following items:

- The basis of the value (fair value) is commensurate with the purpose of valuation (Periodic valuation of Al Mashaer REIT Fund).
- Gathering evidence through field visits at the time of inspecting the property with the inquiries raised at the time of the evaluation of some accredited offices in the area of the property.
- Evidence from field visits was collected and analysis and computational procedures performed to ensure that evaluation work was adequately supported.
- The data cited was judged to ensure the adequacy of all such information obtained to ensure that it is sufficient for the purpose of the valuation.
- Limitations of the research and survey that were carried out indicate the limitations in the scope of work with the analysis of all valuation inputs mentioned in the report.
- Reliability of the information provided by the real estate offices in the real estate area has been confirmed, and they are accredited and licensed offices in the real estate area.

# Judging the reliability of the information provided and taken into the report

Provider	Data and information	Verdict	Judgment reasons
	Deed	Trusted	The deed sent by the client has been verified
Client	Building permit	Trusted	The building permit has been validated in Baladi platform
	Rental data	Trusted	Electronic contracts were received (Ejar platform). The current contracts do not reflect the property's income (market) and were valuated according to market values after review
Market	Commercial meter prices	Trusted	Based on the market survey - direct interviews - accredited offices in the real estate area - internal company data
	Practical experience of real estate offices	Trusted	Certified by official records in the real estate area
	Source independence	Trusted	A source independent and external to the asset being valued

شركة قيم للتقييم - ترخيص رقم 210000051 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 الانتهاء 1449/03/15 هـ الرقم الموحد 202058819 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 1666

## **Compliance with Standards and Research and Inquiry**

# 03

In the event that there are restrictions on the research and investigation carried out by the evaluator that do not enable him to adequately valuer the inputs and assumptions, which are clarified in the special assumptions 02

Carry out calculations and perform analyzes by gathering sufficient evidence by the following means, such as: field visit, inspection, inquiries and ensuring that evaluation work is appropriately reinforced and professional judgment facility to ensure that the information obtained is sufficient and that it fulfills the purpose of the evaluation

# 01

The research and investigations undertaken in the context of the valuation mission are appropriate to the valuation purpose and value basis

# 06

Record the valuation purpose, basis of value, and scope And the limits of research and survey, and the sources of information that reliable in the scope of work, which must Communicating it to all parties to the valuation task

# 05

Consider the credibility and reliability of the information provided The following matters were taken into consideration:

The purpose of the valuation

The relevance of the information to the outcome of the valuation

The source practical experience in relation to the subject matter of the valuation

Is the source independent of the asset being evaluated or the beneficiary of it?

# 04

Taking into account the reliability of the information so that the evaluation results do not appear, and the inputs provided to the valuer (and) from the client or his representative) were considered.

شركة قيم للتقييم - ترخيص رقم 1210000052 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 تاريخ الانتهاء 1169/03/5 هـ الرقم الموحد 20205839 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 11666

# **Regulatory framework on the International Valuation Standards (IVS 2022)**

General Standards - Criterion 101 Scope of Work Paragraph 20: Emphasizing that the valuation will be prepared in accordance with international valuation standards and that the valuer will assess the appropriateness of all important inputs: Deviations from international evaluation standards and their nature must be mentioned 60.3 Some professional appraisal institutions or regulations allow procedures that deviate from the International Appraisal Standards and in such circumstances, except as described in paragraphs 60.1 and 60.2, the resulting valuation will not be in compliance with the Standards.

General framework: the generally accepted valuation principles and the concepts that should be followed when applying these standards with regard to objectivity, discretionary judgment, efficiency, and the of deviating from the possibility (60.1-60.2). Paragraph standards, requirements mentioned in the reports

#### Note:

Real estate valuations performed in order to prepare financial reports are regarded as situations of systematic deviation from international valuation norms in order to satisfy certain criteria for the purpose of the relevant valuation.

شركة قيم للتقييم - ترخيص رقم 1210000052 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 اتاريخ الانتهاء 1169/03/5 هـ الرقم الموحد 20205839 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 11666

### Real estate and investment properties in the preparation of financial reports

### Clarifying the difference between real estate and investment properties in the financial statements

	IAS 40 defines investment property as any
	property (land or a building - or part of a building -
Investment properties	or both) held (by the owner or by the lessee as a
in the financial	right-of-use asset) to earn rental income or To
in the infancial	grow the capital or for both, and not:
statements	- For use in producing, supplying goods, providing
	services, or for administrative or
	- To sell it in the ordinary course of business

Real estates included in the term of real estate, machinery and equipment in the financial statements The International Accounting Standard No. 16 "property, plant and equipment" IFRS16 defines as the tangible items that: - It is kept for use in the production or supply of goods or services, or it is kept for rent to others (except for investment real estate) or for use in administrative purposes. - It is expected to be used during more than one period

### 2030 Vision

His Royal Highness Prince **Mohammed bin Salman bin Abdulaziz Al Saud**, Crown Prince, Deputy Prime Minister and Chairman of the Council for Economic Affairs and Development.

Our ambition is to build a more prosperous country in which every citizen will find what he desires. For the future of our homeland, which we build together, we will accept nothing but to make it at the forefront of the world, with education and rehabilitation, with opportunities available to all, and advanced services, in employment, health care, housing entertainment and others.

شركة قيم للتقييم - ترخيص رقم 1210000052 تاريخ الانتهاء 1449/05/03هـ سجل تجاري رقم 1010927632 تاريخ الانتهاء 1449/03/15 هـ الرقم الموحد 22822009 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 1666

### Economic growth in Saudi Arabia

During its modern era, the Saudi economy has witnessed growth in a large number of sectors, taking advantage of the Kingdom's natural resources, and its geographical and cultural position among the three continents of the world. This growth resulted in building a solid economic base, as it became among the twenty largest global economies and an active member of the Group of Twenty, and one of the main players in the global economy and global oil markets, supported by a strong financial system and an effective banking sector, and giant government companies based on highly qualified Saudi cadres.

In the past years, the Kingdom has also witnessed structural reforms on the economic and financial side, which enhance the increase in economic growth rates while maintaining financial stability and sustainability.

In order to develop and diversify the economy and reduce dependence on oil, the Kingdom of Saudi Arabia launched the Saudi Vision 2030 based on many economic and financial reforms, which aimed at transforming the structure of the Saudi economy into a diversified and sustainable economy based on enhancing productivity, raising the contribution of the private sector, and enabling the third sector.

Since the launch of the vision, the Kingdom has succeeded in implementing many supportive initiatives and structural reforms to enable economic transformation.

This transformation consists of several major efforts centered on a sectoral dimension that includes the promotion of local content, national industry, and the launch of various sectors. Promising economy and its development, enabling dimension that aims to maximize the role of the private sector, small and medium enterprises, and enhance the sustainability of Public Finance. It is expected that the pace of this structural transformation towards sustainable economic growth will continue in the coming years, especially in light of the number of Giant investment initiatives, under the umbrella of the Public Investment Fund, and leading companies. It is also expected that the pace of settlement will accelerate Knowledge and innovative technologies.

### **Business Sectors Overview**

### **Tourism Sector**

Within the framework of the Kingdom's Vision 2030, which aims to lay effective foundations and pillars for the future of the Kingdom of initiatives aimed at reducing the main dependence on oil, through many sectors to support the national economy, including the tourism sector, given what this sector represents from a value, social, civilized and economic dimension. The tourism sector and the hotel sector are closely linked to the Saudi Vision 2030, and it revolves around helping those involved in the hospitality sector, food and entertainment industries to plan for the future.

**Office Sector** 

The offices contribute to achieving the goals of the Saudi national transformation towards prosperity and sustainability by focusing on the goals of Vision 2030, which leads to raising the participation of the private sector in achieving the Kingdom's Vision 2030, working as a representative of the private sector within the national system of vision realization offices in government agencies. Including Riyadh's endeavor to transform into a regional center for international commercial entities, which made it issue a decision to refuse to contract with any company that does not have a regional headquarters in Saudi Arabia by 2024, especially those that have contracts with government agencies, whether they are bodies, institutions, investment funds or devices. Increases the demand for the office sector.

### **Retail Sector**

The vision of the Kingdom's national transformation for the post-oil stage 2030 paid great attention to the development of the commercial and industrial sector in the Kingdom, as the vision is based on focusing on the development and development of the local industry that will achieve great economic returns for the Saudi economy, and among the goals of the vision by 2030 is to raise the percentage of exports The Kingdom's rank in the Logistics Performance Index increased from 16% to 25 globally and first regionally, and the private sector's contribution to the GDP increased from 40% to 65%.

**Housing Sector-**

Vision 2030 has provided sustainable housing solutions that enable Saudi families to own suitable homes according to their needs and financial capabilities. To achieve this, the housing system, in terms of structuring, procedures, and policies for dealing with banks and the private sector, has developed a high percentage of Saudi families' ownership of homes, as the proportion of Saudi families' ownership of homes did not exceed 47% in 2016, and rose to 70% by the end of the first phase of the housing program in 2021.

# Valuation

### Valuation Approaches

The market method provides an indication of value by comparing the asset with identical or comparable (similar) assets for which price information is available.

Income Approach 🔸

The income method provides an indication of value by converting future cash flows into one current value. According to this method, the value of the asset is determined by reference to the value of the revenue and cash flows generated by the asset or the costs it provides.

The cost method provides an indication of value using the economic principle that states that the buyer will not pay an asset more than the cost of obtaining an asset of similar benefit, whether through purchase or construction unless there are time, disturbance, risk, or other related factors. The method provides an indication of value by calculating the current cost of transferring or reproducing the asset, and then discounting the physical wear and tear of all other obsolescence's.

شركة قيم للتقييم - ترخيص رقم 121000052 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 تاريخ الانتهاء 1149/03/15 هـ الرقم الموحد 20205882 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 1666

### Market Approach-Standard No. 105

It is an approach of estimating the value of a real estate or real estate property based on the market comparison between the property being evaluated and similar properties in the same area that were recently sold. The value indicator of the property being valued is derived by applying appropriate comparison units and making adjustments and adjustments to the selling prices of similar properties based on the comparative elements.

### The market approach should be applied and afforded significant weight under the following circumstances:

- The subject asset has recently been sold in a transaction appropriate for consideration under the basis of value
- The subject asset or substantially similar assets are actively publicly traded.
- There are frequent and/or recent observable transactions in substantially similar assets.

### The key steps in the comparable transactions method are:

- Define the units of comparison used by relevant market participants.
- Determine the relevant comparative transactions and calculate the main evaluation criteria for these transactions.
- Conduct consistent comparative analysis of the qualitative and quantitative similarities and differences between the comparable assets and the subject asset.
- Make the necessary adjustments, if any, to the evaluation scales to reflect the differences between the subject of evaluation and the comparative assets.
- Applying the revised valuation criteria to the subject asset.

### Cost Approach - Standard No. 105

It is a valuation method that calculates the capital or market value of a property by adding the value of the real estate's land with the value of the buildings erected on the site.

### Cost Approach should be applied and afforded significant weight under the following circumstances:

- Participants would be able to recreate an asset with substantially the same utility as the subject asset, without regulatory or legal restrictions, and the asset could be recreated quickly enough that a participant would not be willing to pay a significant premium for the ability to use the subject asset immediately,
- The asset is not directly income-generating and the unique nature of the asset makes using an income approach or market approach unfeasible, and/or
- The basis of value being used is fundamentally based on replacement cost, such as replacement value

### Used methods of Cost Approach :

a. Replacement cost method: A method of arriving at value by calculating the cost of a similar asset

### Method of estimating the value of buildings using the straight line method

- The straight-line method: the straight-line method is calculated by the formula (current age of the building / Lifespan) \* 100.

شركة قيم للتقييم - ترخيص رقم 22000012 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 21010927632 تاريخ الانتهاء 1149/03/15 هـ الرقم الموحد 22025839 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 11666

### Income Approach-Standard No. 105

Income Approach provides an indication of value by converting future cash flows into a single present value. Under this approach, the value of an asset is determined by reference to the value of the revenue and cash flows that the asset generates or the costs it provides.

### Income Approach should be applied and given priority or significant weight in the following cases:

- A. When the ability of the asset to generate income is the primary factor that affects the value from the point of view of market participants.
- B. Reasonable expectations are available for the amount and timing of future revenue for the assessed asset but few, if any, relevant market comparisons.

### Income Approach Methods:

Although there are many ways to apply the income method, the methods used under the income method depend largely on discounting the amounts of future cash flows to a present value, which are various applications in using the discounted cash flow (DCF) method and the concepts below apply in part or all of the methods of the income method.

### **Discounted Cash Flow method (DCF)**

It is a financial method for estimating the value of a financial or real asset. The value index is derived by calculating the present value of future cash flows. The discounted cash flow method is applied to evaluate a property or real estate that generates income based on the expectation of future income for the property under valuation. The value index of the property is derived through Calculating the present value of net operating income or the expected net rental value of the property.

### **Direct Capitalization Method:**

The direct capitalization method is applied in the event that the net rental value of the property under valuation is fixed and equal in perpetuity.

### **Residual value method:**

The residual value method is a method of evaluating properties that can be valued by identifying the most appropriate development of the site and property and then predicting the value of such development after it is completed.

شركة قيم للتقييم - ترخيص رقم 22000012 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 21010927632 تاريخ الانتهاء 1149/03/15 هـ الرقم الموحد 22025839 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 11666

### Used valuation approaches and methods - Fair value hierarchy

### Used valuation approaches and methods

Valuation Approaches Market Approach		Cost Approach	Income Approach	
Used approach	Used as an <b>assist approach</b>	Used as an <b>assist approach</b>	Used as a main approach	
Used valuation methods	Field survey (comparisons - offered land prices)	Replacement cost	Discounted Cash Flow method	
Reasons for use/non-use	To know similar properties on the market	Land on which a building is built	The fact that the property is income-generating	

### Hierarchy:

The fair value hierarchy categorizes the inputs to the valuation approaches used to measure fair value at the measurement date into three levels, as follows:

Level	Clarification	Input statement	Classification	Source	Judgment and documentation
First	Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be reached at the measurement date and are given priority.				
Second	They are the inputs other than the published prices within the first level that can be monitored for the asset or liability, either directly or indirectly	Commercial and commercial residential offers in the real estate area	It is classified under the second level	Accredited real estate offices in the real estate area	reliable based on similar market analysis, verification following market research and analysis, in-person interviews, and the company's own database of deals and transactions
Third	They are the inputs that cannot be monitored and are given the lowest priority

Value Estimation

### Estimating the value of the land - Market Approach - Comparisons method

Saudi market does not have transparency and it is difficult to collect accurate information. Therefore, we were able to collect data for a selected sample of comparisons that reflect the reality of the market in general, and we will work to present their data and performance indicators as an embodiment of the market.

Selected comparisons are: From the properties offered in Al-Azizia neighborhood, Al-Azizia road.

Comparative Properties - Commercial Residential Lands						
<b>Comparison factors</b>	Comparative 1	Comparative 2				
Area (m2)	1,500	1,200				
Ease of access	High	High				
Property location	High	Average				
Land shape	Regular	Regular				
Land topography	Flat	Flat				
Use	Commercial	Commercial - Residential				
Surrounding streets	2	2				
Price per meter (SR)	40000	30000				
Comparative condition	Available offer	Available offer

### Similar Comparisons Method assumptions

# Based on the approach used in calculating the market value, which is Market Approach (Method of Similar Comparisons), some steps must be taken to obtain accurate Adjustments, as follows:

- Determine the factors that affect the value of the property under valuation.
- Comparing the features and characteristics of each comparative property with the property being evaluated and determining the difference in each element of the comparison between the comparative property and the property under valuation.
- Make adjustments against each mismatched item.
- Reaching the net adjustment for each comparable property and applying it to the unit price to reach price range of the unit after adjustments for the property under valuation.
- On the basis of the price range, the valuer determines the most reasonable price for the unit in the real estate under valuation, and the unit price is chosen after adjustments from the best comparable real estate usually as it is better.
- Relative control of the area: It is customary to promote a smaller area of the land that achieves a higher value compared to the land that is larger in area, and sometimes vice versa. Here, it was assumed that 5% would be allocated for each multiplier, and the percentage may vary according to the estimate and experience of the real estate valuer, depending on the state of the real estate market and the valuer's experience.
- Market condition: Adjustments against the market condition conditions are often referred to as (time) Adjustment or in the case of negotiation over the offered value. Market conditions may change with the change of time, and the percentage is variable according to the market condition.
- Ease of access: The movement of access to the real estate subject to evaluation is easy, as well as the ease of access to the comparable properties (high, medium, low), Accordingly, a rate of 5% was assumed for each level.
- Location of the property: The location is where the property is located, whether it is on a road front or second row, or has two roads or two entrances, and it has a direct and high impact on the value of the property, and half of it is (high, medium, low), accordingly, a rate of 5% was assumed for each level.
- Land shape: One of the physical characteristics that affect the property is the shape of the land, whether it is regular or irregular, Accordingly, a rate of 5% was assumed.
- Usage: The real estate planning has been taken into consideration as it is (commercial) planning compared to the comparable real estate, as well as all of them are commercial. It is possible for the property to include more than one use, such as (residential, residential, commercial, or residential, commercial, office), and accordingly, a rate of 5% was assumed according to the classification of use.
- Surrounding streets: The location affects the value of real estate directly if it is on one or two streets, as well as the views it provides and the provision of various advantages. Accordingly, a rate of 5% was assumed for each difference for one street.

### Analysis of valuation assumptions data - Discounted Cash Flow Methods

#### **Rental income:**

The property's income was analyzed by reviewing the contracts for the property and through contracts similar to the property being valued, and this was compared to the market. (Current contract income has been clarified)

The real estate contract in (2024-2025) was not relied upon, which is the contract period in addition to the other property income, according to what was reviewed. Market prices in the valuation years (2024-2033) were relied upon, and this was reflected in the report.

Discounted Cash Flow assumptions						
Net income of the hotel according to the contract	3,461,000	Other income for the property (shops) according to the contract	287000			
Occupancy rate and credit risk	%40	Capitalization rate	%7			
Cash flow period (years)	10	Operating and capital expenditure rate	%35			
Income years (by market)	2029 - 2026	Discount rate	%9.5			

#### **Discount rate:**

Discount rate extraction (Cumulative Model method)							
Government bond rate of return	4.6	Saudi Tadawul Fund					
Inflation rate (average of the current year)	2.49	Saudi Central Bank					
Market risk premium (recession and recovery)	1.25	Depending on the market situation and conditions					
Special risk premium (the resulting costs of the property)	1.25	Depending on the property situation and conditions					
Discount rate after rounding	9.5	%					

	Market Survey - Hotel Income Analysis							
Comparison	Location	Rating	Number of rooms	Annual occupancy	Operational expenses			
1	Aziziyah	3 stars	250	45%	30%			
2	Aziziyah	3 stars	190	40%	35%			
3	Aziziyah	3 stars	250	40%	40%			

#### **Operational rate of return:**

Analysis of the capitalization rate - the method of extracting from the market In view of the market activity and the reports of the Qaim Company for similar investments, as well as in view of the economic reports issued by some study centers and the information center of the Qaim Company for valuation, we found that the return in the region ranges from 7% to 8% and accordingly, the rate of return was assumed at a rate of 7 % There are many factors that affect the rate of return, represented in the location of the building, its age and condition, the situation of the tenants, and the degree of risk associated with repayment. The capitalization rate is affected by the demand and supply rates for the same type of real estate.

#### Operating and capital expenditure rate:

Operating expenses are the expenses for renting and maintaining the property, and capital expenses are the expenses borne by the owner in order to maintain it in good condition to achieve the appropriate annual income. The percentage of operating expenses represents 15% - 40% for similar projects in the surrounding area depending on the size and services provided, as most of them are under single contracts in Most likely. (The property is leased under one contract) and the operating and capital expenditure rate was assumed at 35% for the average limit in the market.

### Final value of the property

Based on the purpose of the valuation, the nature of the property, and its characteristics as a hotel, valuing the property using Income Approach (Discounted Cash Flow Method) is considered the best way to estimate the price on the measurement date of 31/12/2023, which was arrived at with Income Approach as a basis for the fair value of the property being valued (after rounding). As follows:

Price on the date of measurement in numbers (SR)	Price on the measurement date written (SR)
96,894,000	Ninety-six million eight hundred ninety-four thousand

#### Standard 102: Compliance with Standards and Research and Inquiry

This valuation work was carried out in accordance with the principle of Standard 102 of compliance with the standards, research and survey work, in the following items:

- The basis of the value (fair value) is commensurate with the purpose of valuation (Periodic valuation of Al Mashaer REIT Fund).
- Gathering evidence through field visits at the time of inspecting the property with the inquiries raised at the time of the evaluation of some accredited offices in the area of the property.
- Evidence from field visits was collected and analysis and computational procedures performed to ensure that evaluation work was adequately supported.
- The data cited was judged to ensure the adequacy of all such information obtained to ensure that it is sufficient for the purpose of the valuation.
- Limitations of the research and survey that were carried out indicate the limitations in the scope of work with the analysis of all valuation inputs mentioned in the report.
- Reliability of the information provided by the real estate offices in the real estate area has been confirmed, and they are accredited and licensed offices in the real estate area.

#### Judging the reliability of the information provided and taken into the report

Provider	Data and information	Verdict	Judgment reasons
	Deed	Trusted	The deed sent by the client has been verified
Client	Building permit	Trusted	The building permit has been validated in Baladi platform
	Rental data	Trusted	Paper contracts were reviewed
	Commercial meter prices	Trusted	Based on the market survey - direct interviews - accredited offices in the real estate area - internal company data
Market	Practical experience of real estate offices	Trusted	Certified by official records in the real estate area
	Source independence	Trusted	A source independent and external to the asset being valued

شركة قيم للتقييم - ترخيص رقم 22000012 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 تاريخ الانتهاء 1449/03/15 هـ الرقم الموحد 20205839 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 1666

#### **Compliance with Standards and Research and Inquiry**

#### 03

In the event that there are restrictions on the research and investigation carried out by the evaluator that do not enable him to adequately valuer the inputs and assumptions, which are clarified in the special assumptions 02

Carry out calculations and perform analyzes by gathering sufficient evidence by the following means, such as: field visit, inspection, inquiries and ensuring that evaluation work is appropriately reinforced and professional judgment facility to ensure that the information obtained is sufficient and that it fulfills the purpose of the evaluation

#### 01

The research and investigations undertaken in the context of the valuation mission are appropriate to the valuation purpose and value basis

#### 06

Record the valuation purpose, basis of value, and scope And the limits of research and survey, and the sources of information that reliable in the scope of work, which must Communicating it to all parties to the valuation task

### 05

Consider the credibility and reliability of the information provided The following matters were taken into consideration:

The purpose of the valuation

The relevance of the information to the outcome of the valuation

The source practical experience in relation to the subject matter of the valuation

Is the source independent of the asset being evaluated or the beneficiary of it?

#### 04

Taking into account the reliability of the information so that the evaluation results do not appear, and the inputs provided to the valuer (and) from the client or his representative) were considered.

شركة قيم للتقييم - ترخيص رقم 1210000052 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 تاريخ الانتهاء 1169/03/5 هـ الرقم الموحد 20205839 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 11666

#### **Regulatory framework on the International Valuation Standards (IVS 2022)**

General Standards - Criterion 101 Scope of Work Paragraph 20: Emphasizing that the valuation will be prepared in accordance with international valuation standards and that the valuer will assess the appropriateness of all important inputs: Deviations from international evaluation standards and their nature must be mentioned 60.3 Some professional appraisal institutions or regulations allow procedures that deviate from the International Appraisal Standards and in such circumstances, except as described in paragraphs 60.1 and 60.2, the resulting valuation will not be in compliance with the Standards.

General framework: the generally accepted valuation principles and the concepts that should be followed when applying these standards with regard to objectivity, discretionary judgment, efficiency, and the of deviating from the possibility (60.1-60.2). Paragraph standards, requirements mentioned in the reports

#### Note:

Real estate valuations performed in order to prepare financial reports are regarded as situations of systematic deviation from international valuation norms in order to satisfy certain criteria for the purpose of the relevant valuation.

شركة قيم للتقييم - ترخيص رقم 1210000052 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 اتاريخ الانتهاء 1169/03/5 هـ الرقم الموحد 20205839 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 11666

#### Real estate and investment properties in the preparation of financial reports

#### Clarifying the difference between real estate and investment properties in the financial statements

	IAS 40 defines investment property as any
	property (land or a building - or part of a building -
Investment properties	or both) held (by the owner or by the lessee as a
in the financial	right-of-use asset) to earn rental income or To
in the infancial	grow the capital or for both, and not:
statements	- For use in producing, supplying goods, providing
	services, or for administrative or
	- To sell it in the ordinary course of business

Real estates included in the term of real estate, machinery and equipment in the financial statements The International Accounting Standard No. 16 "property, plant and equipment" IFRS16 defines as the tangible items that: - It is kept for use in the production or supply of goods or services, or it is kept for rent to others (except for investment real estate) or for use in administrative purposes. - It is expected to be used during more than one period

#### 2030 Vision

His Royal Highness Prince **Mohammed bin Salman bin Abdulaziz Al Saud**, Crown Prince, Deputy Prime Minister and Chairman of the Council for Economic Affairs and Development.

Our ambition is to build a more prosperous country in which every citizen will find what he desires. For the future of our homeland, which we build together, we will accept nothing but to make it at the forefront of the world, with education and rehabilitation, with opportunities available to all, and advanced services, in employment, health care, housing entertainment and others.

شركة قيم للتقييم - ترخيص رقم 1210000052 تاريخ الانتهاء 1449/05/03هـ سجل تجاري رقم 1010927632 تاريخ الانتهاء 1449/03/15 هـ الرقم الموحد 22822009 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 1666

#### Economic growth in Saudi Arabia

During its modern era, the Saudi economy has witnessed growth in a large number of sectors, taking advantage of the Kingdom's natural resources, and its geographical and cultural position among the three continents of the world. This growth resulted in building a solid economic base, as it became among the twenty largest global economies and an active member of the Group of Twenty, and one of the main players in the global economy and global oil markets, supported by a strong financial system and an effective banking sector, and giant government companies based on highly qualified Saudi cadres.

In the past years, the Kingdom has also witnessed structural reforms on the economic and financial side, which enhance the increase in economic growth rates while maintaining financial stability and sustainability.

In order to develop and diversify the economy and reduce dependence on oil, the Kingdom of Saudi Arabia launched the Saudi Vision 2030 based on many economic and financial reforms, which aimed at transforming the structure of the Saudi economy into a diversified and sustainable economy based on enhancing productivity, raising the contribution of the private sector, and enabling the third sector.

Since the launch of the vision, the Kingdom has succeeded in implementing many supportive initiatives and structural reforms to enable economic transformation.

This transformation consists of several major efforts centered on a sectoral dimension that includes the promotion of local content, national industry, and the launch of various sectors. Promising economy and its development, enabling dimension that aims to maximize the role of the private sector, small and medium enterprises, and enhance the sustainability of Public Finance. It is expected that the pace of this structural transformation towards sustainable economic growth will continue in the coming years, especially in light of the number of Giant investment initiatives, under the umbrella of the Public Investment Fund, and leading companies. It is also expected that the pace of settlement will accelerate Knowledge and innovative technologies.

#### **Business Sectors Overview**

#### **Tourism Sector**

Within the framework of the Kingdom's Vision 2030, which aims to lay effective foundations and pillars for the future of the Kingdom of initiatives aimed at reducing the main dependence on oil, through many sectors to support the national economy, including the tourism sector, given what this sector represents from a value, social, civilized and economic dimension. The tourism sector and the hotel sector are closely linked to the Saudi Vision 2030, and it revolves around helping those involved in the hospitality sector, food and entertainment industries to plan for the future.

**Office Sector** 

The offices contribute to achieving the goals of the Saudi national transformation towards prosperity and sustainability by focusing on the goals of Vision 2030, which leads to raising the participation of the private sector in achieving the Kingdom's Vision 2030, working as a representative of the private sector within the national system of vision realization offices in government agencies. Including Riyadh's endeavor to transform into a regional center for international commercial entities, which made it issue a decision to refuse to contract with any company that does not have a regional headquarters in Saudi Arabia by 2024, especially those that have contracts with government agencies, whether they are bodies, institutions, investment funds or devices. Increases the demand for the office sector.

#### **Retail Sector**

The vision of the Kingdom's national transformation for the post-oil stage 2030 paid great attention to the development of the commercial and industrial sector in the Kingdom, as the vision is based on focusing on the development and development of the local industry that will achieve great economic returns for the Saudi economy, and among the goals of the vision by 2030 is to raise the percentage of exports The Kingdom's rank in the Logistics Performance Index increased from 16% to 25 globally and first regionally, and the private sector's contribution to the GDP increased from 40% to 65%.

**Housing Sector-**

Vision 2030 has provided sustainable housing solutions that enable Saudi families to own suitable homes according to their needs and financial capabilities. To achieve this, the housing system, in terms of structuring, procedures, and policies for dealing with banks and the private sector, has developed a high percentage of Saudi families' ownership of homes, as the proportion of Saudi families' ownership of homes did not exceed 47% in 2016, and rose to 70% by the end of the first phase of the housing program in 2021.

# Valuation

#### Valuation Approaches

The market method provides an indication of value by comparing the asset with identical or comparable (similar) assets for which price information is available.

Income Approach 🔸

The income method provides an indication of value by converting future cash flows into one current value. According to this method, the value of the asset is determined by reference to the value of the revenue and cash flows generated by the asset or the costs it provides.

The cost method provides an indication of value using the economic principle that states that the buyer will not pay an asset more than the cost of obtaining an asset of similar benefit, whether through purchase or construction unless there are time, disturbance, risk, or other related factors. The method provides an indication of value by calculating the current cost of transferring or reproducing the asset, and then discounting the physical wear and tear of all other obsolescence's.

شركة قيم للتقييم - ترخيص رقم 121000052 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 تاريخ الانتهاء 1149/03/15 هـ الرقم الموحد 20205882 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 1666

#### Market Approach-Standard No. 105

It is an approach of estimating the value of a real estate or real estate property based on the market comparison between the property being evaluated and similar properties in the same area that were recently sold. The value indicator of the property being valued is derived by applying appropriate comparison units and making adjustments and adjustments to the selling prices of similar properties based on the comparative elements.

#### The market approach should be applied and afforded significant weight under the following circumstances:

- The subject asset has recently been sold in a transaction appropriate for consideration under the basis of value
- The subject asset or substantially similar assets are actively publicly traded.
- There are frequent and/or recent observable transactions in substantially similar assets.

#### The key steps in the comparable transactions method are:

- Define the units of comparison used by relevant market participants.
- Determine the relevant comparative transactions and calculate the main evaluation criteria for these transactions.
- Conduct consistent comparative analysis of the qualitative and quantitative similarities and differences between the comparable assets and the subject asset.
- Make the necessary adjustments, if any, to the evaluation scales to reflect the differences between the subject of evaluation and the comparative assets.
- Applying the revised valuation criteria to the subject asset.
- Value indicators are reconciled if more than one evaluation scale is used. 11660 مندن اقف 1169 مندن اقف مه 848 طبق عثمان بن عفان الرياض 1000 مندن المعرب المالية المعرب ال معرب المعرب المع

#### Cost Approach - Standard No. 105

It is a valuation method that calculates the capital or market value of a property by adding the value of the real estate's land with the value of the buildings erected on the site.

#### Cost Approach should be applied and afforded significant weight under the following circumstances:

- Participants would be able to recreate an asset with substantially the same utility as the subject asset, without regulatory or legal restrictions, and the asset could be recreated quickly enough that a participant would not be willing to pay a significant premium for the ability to use the subject asset immediately,
- The asset is not directly income-generating and the unique nature of the asset makes using an income approach or market approach unfeasible, and/or
- The basis of value being used is fundamentally based on replacement cost, such as replacement value

#### Used methods of Cost Approach :

a. Replacement cost method: A method of arriving at value by calculating the cost of a similar asset

#### Method of estimating the value of buildings using the straight line method

- The straight-line method: the straight-line method is calculated by the formula (current age of the building / Lifespan) \* 100.

شركة قيم للتقييم - ترخيص رقم 22000012 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 21010927632 تاريخ الانتهاء 1149/03/15 هـ الرقم الموحد 22025839 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 11666

#### Income Approach-Standard No. 105

Income Approach provides an indication of value by converting future cash flows into a single present value. Under this approach, the value of an asset is determined by reference to the value of the revenue and cash flows that the asset generates or the costs it provides.

#### Income Approach should be applied and given priority or significant weight in the following cases:

- A. When the ability of the asset to generate income is the primary factor that affects the value from the point of view of market participants.
- B. Reasonable expectations are available for the amount and timing of future revenue for the assessed asset but few, if any, relevant market comparisons.

#### Income Approach Methods:

Although there are many ways to apply the income method, the methods used under the income method depend largely on discounting the amounts of future cash flows to a present value, which are various applications in using the discounted cash flow (DCF) method and the concepts below apply in part or all of the methods of the income method.

#### **Discounted Cash Flow method (DCF)**

It is a financial method for estimating the value of a financial or real asset. The value index is derived by calculating the present value of future cash flows. The discounted cash flow method is applied to evaluate a property or real estate that generates income based on the expectation of future income for the property under valuation. The value index of the property is derived through Calculating the present value of net operating income or the expected net rental value of the property.

#### **Direct Capitalization Method:**

The direct capitalization method is applied in the event that the net rental value of the property under valuation is fixed and equal in perpetuity.

#### **Residual value method:**

The residual value method is a method of evaluating properties that can be valued by identifying the most appropriate development of the site and property and then predicting the value of such development after it is completed.

شركة قيم للتقييم - ترخيص رقم 1210000052 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 تاريخ الانتهاء 1169/03/5 هـ الرقم الموحد 20205839 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 11666

## Used valuation approaches and methods - Fair value hierarchy

#### Used valuation approaches and methods

Valuation Approaches Market Approach		Cost Approach	Income Approach
Used approach	Used as an <b>assist approach</b>	Used as an <b>assist approach</b>	Used as a main approach
Used valuation methods	Used valuation methods Field survey (comparisons - offered land prices)		Discounted Cash Flow method
Reasons for use/non-use	To know similar properties on the market	Land on which a building is built	The fact that the property is income-generating

#### **Hierarchy:**

The fair value hierarchy categorizes the inputs to the valuation approaches used to measure fair value at the measurement date into three levels, as follows:

Level	Clarification	Input statement	Classification	Source	Judgment and documentation
First	Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be reached at the measurement date and are given priority.				
Second	They are the inputs other than the published prices within the first level that can be monitored for the asset or liability, either directly or indirectly	Commercial and commercial residential offers in the real estate area	It is classified under the second level	Accredited real estate offices in the real estate area	reliable based on similar market analysis, verification following market research and analysis, in-person interviews, and the company's own database of deals and transactions
Third	They are the inputs that cannot be monitored and are given the lowest priority

Value Estimation

Estimating the value of the land - Market Approach - Comparisons method

Saudi market does not have transparency and it is difficult to collect accurate information. Therefore, we were able to collect data for a selected sample of comparisons that reflect the reality of the market in general, and we will work to present their data and performance indicators as an embodiment of the market.

Selected comparisons are: From the properties offered in Al Thumama Road.

Comparative real estates						
<b>Comparison factors</b>	Comparative 1	Comparative 2

شركة قيم للتقييم - ترخيص رقم 212000012 تاريخ الانتهاء 8484 هـ سجل تجاري رقم 1010927632 تاريخ الانتهاء 1449/03/15 هـ الرقم الموحد 202058819 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 1666

#### Similar Comparisons Method assumptions

Based on the approach used in calculating the market value, which is Market Approach (Method of Similar Comparisons), some steps must be taken to obtain accurate Adjustments, as follows:

- Determine the factors that affect the value of the property under valuation.
- Comparing the features and characteristics of each comparative property with the property being evaluated and determining the difference in each element of the comparison between the comparative property and the property under valuation.
- Make adjustments against each mismatched item.
- Reaching the net adjustment for each comparable property and applying it to the unit price to reach price range of the unit after adjustments for the property under valuation.
- On the basis of the price range, the valuer determines the most reasonable price for the unit in the real estate under valuation, and the unit price is chosen after adjustments from the best comparable real estate usually as it is better.
- A reasonable price for the unit in the property under valuation.

شركة قيم للتقبيم - ترخيص رقم 221000012 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 تاريخ الانتهاء 1169/03/5 هـ الرقم الموحد 20205839 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 1666

#### Similar Comparisons Method Assumptions

#### Based on the approach used in calculating the market value, which is Market Approach (Method of similar comparisons), the following was assumed:

Relative control of the area: It is customary to promote a smaller area of the land that achieves a higher value compared to the land that is larger in area, and sometimes vice versa. Here, it was assumed that 5% would be allocated for each multiplier, and the percentage may vary according to the estimate and experience of the real estate valuer, depending on the state of the real estate market and the valuer's experience.

Market condition: Adjustments against the market conditions are often referred to as (time) Adjustment or in the case of negotiation over the offered value. Market conditions may change with the change of time, and the percentage is variable according to the market condition.

Ease of access: The movement of access to the real estate subject to evaluation is easy, as well as the ease of access to the comparable properties (high, medium, low), Accordingly, a rate of 5% was assumed for each level.

Location of the property: The location is where the property is located, whether it is on a road front or second row, or has two roads or two entrances, and it has a direct and high impact on the value of the property, and half of it is (high, medium, low), accordingly, a rate of 5% was assumed for each level.

Land shape: One of the physical characteristics that affect the property is the shape of the land, whether it is regular or irregular, Accordingly, a rate of 5% was assumed.

Usage: The real estate planning has been taken into consideration as it is (commercial) planning compared to the comparable real estate, as well as all of them are commercial. It is possible for the property to include more than one use, such as (residential, residential, commercial, office), and accordingly, a rate of 5% was assumed according to the classification of use.

Surrounding streets: The location affects the value of real estate directly if it is on one or two streets, as well as the views it provides and the provision of various advantages. Accordingly, a rate of 5% was assumed for each difference for one street.

شركة قيم للتقييم - ترخيص رقم 22000015 تاريخ الانتهاء 1447/05/03 سجل تجاري رقم 1010927632 تاريخ الانتهاء 1166/0418 هـ الرقم الموحد 22582109 - مكتب رقم 7 مبنى رقم 8484 طريق عثمان بن عفان - الرياض 11666

#### Rental income:

The property's income was analyzed by reviewing the contracts for the property and through contracts similar to the property being evaluated, and this was compared to the market.

	Annual income statement for the property (contracts)								
	Rental value per								
Unit No	Unit type	Area (m2)	meter (SR/meter)	Rental value (SR)	Start - end of the contract				
1	Administrative Offices	2910	945	2,750,000	2027-2018				
2	Administrative Offices	2500	1,265	3,162,500	2027-2022				
3	Administrative Offices	5300	943	5,000,000	2027 - 2018				
Т	Total annual income of the property (SR) 10,912,500 -								

#### **Operating and capital expenditure rate:**

Operating expenses are the expenses for renting and maintaining the property, and capital expenses are the expenses incurred by the owner in order to maintain it in good condition to achieve an appropriate annual income. The percentage of operating expenses represents 10% - 5% for similar projects in the surrounding area depending on the size and services provided. The property is leased under contracts that include a clause That (the tenant bears the services of electricity and water), and other contracts that the tenant pays a lump sum in exchange for the operational services provided.

- There is a maintenance contract that has been reviewed, which reflects the calculated percentage.

#### Assumptions:

Discounted Cash Flow assumptions							
Net income of the hotel according to the contract	10,912,500	Discount rate	8%				
Occupancy rate and credit risk	0%	Capitalization rate	7.5%				
Cash flow period (years)	10	Income years (according to contracts)	2027 - 2024				
Growth rate (contracts)	10%	Operating and capital expenditure rate	%10				

#### Analyze the vacancy rate, rate of return, operating and capital expenditures of the market

#	Location	Property type	Vacant %	Return %	Operating and capital expenditures %
1	Olaya	Office building	10%	8%	10%
2	Al Sahafa	Office building	5%	8%	5%

#### **Operational rate of return:**

Analysis of the capitalization rate - the method of extracting from the market In view of the market activity and the reports of the Qaim Company for similar investments, as well as in view of the economic reports issued by some study centers and the information center of the Qaim Company for valuation, we found that the return in the region ranges from 7% to 8% and accordingly, the rate of return was assumed at a rate of 8 % There are many factors that affect the rate of return, represented in the location of the building, its age and condition, the situation of the tenants, and the degree of risk associated with repayment. The capitalization rate is affected by the demand and supply rates for the same type of real estate.

#### **Discount rate:**

Discount rate extraction (Cumulative Model method)								
Government bond rate of return	4.6	Saudi Tadawul Fund						
Inflation rate (average of the current year)	2.49	Saudi Central Bank						
Market risk premium (recession and recovery)	0.5	Depending on the market situation and conditions						
Special risk premium (the resulting costs of the property)	0.5	Depending on the property situation and conditions						
Discount rate after rounding	8%	%

## Final value of the property

Based on the purpose of the valuation, the nature of the property, and its characteristics as a office building, valuing the property using Income Approach (Discounted Cash Flow Method) is considered the best way to estimate the price on the measurement date of 31/12/2023, which was arrived at with Income Approach as a basis for the fair value of the property being valued (after rounding). As follows:

Price on the date of measurement in numbers (SR)	Price on the measurement date written (SR)
143,132,000	One hundred forty-three million one hundred thirty-two thousand
