2 BASIS OF PREPARATION

Statement of compliance

These interim condensed consolidated financial statements (interim condensed consolidated financial information) have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting as endorsed in Saudi Arabia.

IFRS 16 has been applied in preparation of these interim condensed consolidated financial statements. The Main changes to significant accounting policies are described (Note 3).

The Capital Market Authority (CMA) announced the Board of Commissioners resolution dated 16 October 2016 (corresponding to 15 Muharram 1438H), which obligates the listed entities to apply the cost model to measure the property, plant and equipment, investment properties and intangible assets upon adopting the IFRSs for three years period starting from the IFRSs adoption date, while continuing to abide by the IFRSs, that are endorsed in the Kingdom of Saudi Arabia, disclosure requirements, which require or encourage the disclosure of the fair value within the notes to the financial statements. The Company has complied with the requirements in these interim condensed consolidated financial statements.

Basis of measurement

These interim condensed consolidated financial statements have been prepared on the historical cost basis except for the end of service benefits provision, which has been actuarially valued and the measurement of financial assets at fair value through other comprehensive income as explained in the relevant accounting policies.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

The Company has used same accounting policies including risk management policies that were used for the year ended 31 December 2018, unless mentioned otherwise (Note 3).

Basis of consolidation

These interim condensed consolidated financial statements comprising the interim condensed consolidated statement of financial position, interim condensed consolidated statement of profit or loss and other comprehensive income, interim condensed consolidated statement of changes in equity, interim condensed consolidated statement of cash flows and notes to the interim condensed consolidated interim financial statements of the Company, including assets, liabilities and the results of the operations of the Company and its fully owned subsidiaries, as set out in note 1.3. Subsidiaries are consolidated from the date on which ownership commences until the date its ceases. NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued) FOR THE THREE AND NINE MONTH PERIODS ENDED 30 SEPTEMBER 2019

2 BASIS OF PREPARATION (continued)

Critical accounting estimates and judgments

The preparation of interim condensed consolidated financial statements in accordance with IFRSs that are endorsed in the Kingdom of Saudi Arabia requires the use of certain critical estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the reporting date and the reported amounts of revenues and expenses during the reporting period. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results.

The significant judgments made by management in applying the accounting policies and the key sources of estimation uncertainty were the same as those described in the last annual financial statements, except for new significant judgments and key sources of estimation uncertainty related to the application of IFRS 16.

Extension and termination options in lease contracts

Extension and termination options are included in a number of leases across the Company. These terms are used to maximize operational flexibility in terms of managing contracts. The majority of extension and termination options held are exercisable by both the Company and the respective lessor.

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated). The assessment is reviewed if a significant event or a significant change in circumstances occurs which affects this assessment and that is within the control of the lessee.

Discounting of lease payments

The lease payments are discounted using the Group incremental borrowing rate ("IBR"). Management has applied judgments and estimates to determine the IBR at the commencement of lease.

Functional and presentation currency

Saudi Riyal is the functional currency. These interim condensed consolidated financial statements are presented in Saudi Riyals (SR), rounded off to the nearest thousand.

NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued) FOR THE THREE AND NINE MONTH PERIODS ENDED 30 SEPTEMBER 2019

3 CHANGES IN SIGNIFICANT ACCOUNTING POLICIES

Except as described below, the main accounting policies applied in these interim condensed consolidated financial statements are the same as those applied in the annual financial statements as at 31 December 2018. The changes in accounting policies are also expected to be reflected in the financial statements for the year ending 31 December 2019.

The Company has initially adopted IFRS 16 "Leases" from 1 January 2019.

General Impact of application of IFRS 16 Leases

The key changes to the Company's accounting policies resulting from its adoption of IFRS 16 is summarized below:

From 1 January 2019, leases are recognized as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Company. Each lease payment is allocated between liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is amortized over the shorter of the asset's useful life and the lease term on a straight-line basis.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- variable lease payment that are based on an index or a rate;
- amounts expected to be payable by the lessee under residual value guarantees;
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option; and
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability;
- any lease payments made at or before the commencement date less any lease incentives received;
- any initial direct costs; and
- restoration costs.

Payments associated with leases of low-value assets are recognized on a straight-line basis as an expense in profit or loss. Low-value assets comprise IT-equipment and small items of office furniture.

The associated right-of-use assets for property leases were measured on a retrospective basis as if the new rules had always been applied. There were no onerous lease contracts that would have required an adjustment to the right-of-use assets at the date of initial applications.

On adoption of IFRS 16, the Company recognized lease liabilities in relation to leases which had previously been classified as 'operating leases' under the principles of IAS 17 Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of 1 January 2019.

The Company has adopted IFRS 16 modified retrospectively from 1 January 2019, but has not restated comparatives for the 2018 reporting period, as permitted under the specific transitional provisions in the standard. The reclassifications and the adjustments arising from the new leasing rules are therefore recognized in the opening balance sheet on 1 January 2019.

In applying IFRS 16 for the first time, the Company has used the following practical expedients permitted by the standard:

- the use of a single discount rate to a portfolio of leases with reasonably similar characteristics;
- reliance on previous assessments on whether leases are onerous;
- the exclusion of initial direct costs for the measurement of the right-of-use asset at the date of initial application; and
- the use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

The Company has also elected not to reassess whether a contract is, or contains a lease at the date of initial application. Instead, for contracts entered into before the transition date the Company relied on its assessment made applying IAS 17 and IFRIC 4 Determining whether an Arrangement contains a Lease.

The Company's leasing activities and how these are accounted for:

The Company mostly leases indoor and outdoor spaces for installation of its telecommunications sites. Rental contracts are typically made for fixed periods of 1 to 10 years but may have extension options. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants, but leased assets may not be used as security for borrowing purposes.

Until the 2018 financial year, theses leases were classified as operating leases. Payments made under operating leases were charged to profit or loss on a straight-line basis over the period of the lease.
