INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF ANB CAPITAL (A Saudi Closed Joint Stock Company)

Opinion

We have audited the financial statements of ANB Capital (the "Company"), which comprise the statement of financial position as at 31 December 2022, the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statement present fairly, in all material respects, the financial position of the Company as at 31 December 2022 and its financial performance and its cash flows for the year then ended in accordance with the International Financial Reporting Standards that are endorsed in the Kingdom of Saudi Arabia and other standards and pronouncements that are endorsed by the Saudi Organization for Chartered and Professional Accountants.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statement section of our report. We are independent of the Company in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) that is endorsed in the Kingdom of Saudi Arabia that is relevant to our audit of the financial statements, and we have fulfilled our other ethical responsibilities in accordance with this Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statement in accordance with International Financial Reporting Standards that are endorsed in the Kingdom of Saudi Arabia and other standards and pronouncements that are endorsed by the Saudi Organization for Chartered and Professional Accountants and the provisions of Company's law and the Company's By-laws, and for such internal control as management determines is necessary to enable the preparation of financial statement that are free from material misstatement, whether due to fraud or error.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF ANB CAPITAL (A Saudi Closed Joint Stock Company)

Responsibilities of Management and Those Charged with Governance for the Financial Statements (continued)

In preparing the financial statement, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statement as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial statement.

As part of an audit in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF ANB CAPITAL (A Saudi Closed Joint Stock Company) (continued)

Auditor's Responsibilities for the Audit of the Financial Statements (continued)

- Conclude on the appropriateness of management's use of the going concern basis of
 accounting and, based on the audit evidence obtained, whether a material uncertainty
 exists related to events or conditions that may cast significant doubt on the Company's
 ability to continue as a going concern. If we conclude that a material uncertainty exists,
 we are required to draw attention in our auditor's report to the related disclosures in the
 financial statements or, if such disclosures are inadequate, to modify our opinion. Our
 conclusions are based on the audit evidence obtained up to the date of our auditor's
 report. However, future events or conditions may cause the Company to cease to
 continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

1 ACTIVITIES

ANB Capital Company (the "Company") is registered in Riyadh, Kingdom of Saudi Arabia under commercial registration No. 1010239908 and unified ID No. 7001548267 on Shawwal 26, 1428 H (corresponding to November 7, 2007). The Company has taken over the management of the Arab National Bank ("ANB" or the "Bank") investment services and asset management activities related to dealing, managing, arranging, advising and custody of securities, as from the date of commencement of its commercial operations on January 12, 2008. The company has changed its name from Arab National Investment Company to ANB Capital Company on 29 June 2022 and maintained the same commercial registration number.

The Company is a 100% subsidiary of ANB and closed joint stock company, which was converted from limited liability company on the directions from Capital Market Authority (CMA) dated Sha'ban 3, 1433 (corresponding to 23 June 2013). Such change was approved according to the Ministerial Resolution No. 317/G dated Muharram 19, 1436 H (corresponding to 12 November 2014), and a revised commercial registration was issued on 17 Rabi Al Awal 1436 H (corresponding to 8 January 2015).

The objective of the Company as approved by CMA Board of Commissioners on 28 Muharram 1437 H (corresponding to 10 November 2015) through a resolution number S/1/6/14832/15 is to conduct dealing in securities, arranging in securities, providing advice in securities, keeping custody in securities, managing investments, operating funds and managing investments in the Kingdom of Saudi Arabia. This includes various investment activities in Islamic and other related investments such as establishment and management of public equity portfolios, direct investments and real estate funds. Based on the directive of CMA through the letter dated 10 Rabi Al Awal 1437 H (corresponding to 21 December 2015), the Company has obtained the margin lending facility from Arab National Bank with effective from 1 April 2017. Therefore, the Company has amended its objectives to include margin lending financing.

The Company's registered office is located at the following address:

King Faisal Road, Arab National Investment Company Building, Murabbaa District P.O. Box 220009, Riyadh 11311 Kingdom of Saudi Arabia

The Company commenced its operations on 7 November 2007.

2 BASIS OF PREPARATION

2.1 Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by International Accounting Standards Board ("IASB"), as endorsed in the Kingdom of Saudi Arabia and other standards and pronouncements that are endorsed by the Saudi Organization for Chartered and Professional Accountants ("SOCPA").(collectively referred to as "IFRS as endorsed in KSA").

The financial statements have been prepared on going concern basis under the historical cost convention, except for the following items in the statement of financial position:

- Investments at fair value through profit or loss ("FVTPL") is measured at fair value.
- Employees defined benefit obligations are measured at present value of future obligations using the Projected Unit Credit Method.

The financial statements are presented in Saudi Riyals ("SR") and all values are rounded to the nearest one Saudi Riyal, except when otherwise indicated.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

3 SIGNIFICANT ACCOUNTING POLICIES

The following are the significant accounting policies applied by the Company in preparing its financial statements:

3.1 Property and equipment

Property and equipment are stated at cost less accumulated depreciation and accumulated impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the asset. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost can be measured reliably. Repairs and maintenance costs are charged to the statement of comprehensive income during the period in which they are incurred.

The major categories of property and equipment are depreciated on a straight line basis as follows:

Asset categories Useful lives

Leasehold improvements Period of lease or 10 years; whichever is shorter

Furniture and fixtures 4 years
Office equipment 4 years

The Company allocates the amount initially recognized in respect of an item of property and equipment to its significant parts and depreciates separately each such part. The carrying amount of a replaced part is derecognized when replaced. Residual values, method of amortization and useful lives of the assets are reviewed annually and adjusted if appropriate. Impairment losses and gains or losses on disposals of property and equipment are included in statement of comprehensive income.

3.2 Intangible assets

Intangible assets comprise of computer software.

Expenditures on internally developed software is recognized as an asset when the Company is able to demonstrate its intention and ability to complete the development and use the software in a manner that will generate future economic benefits and can reliably measure the costs to complete the development. The capitalized costs of internally developed software include all costs directly attributable to developing the software and are amortized over its useful life. Internally developed software is stated at capitalized cost less accumulated amortization and impairment, if any.

Amortization is recognized in the statement of comprehensive income on a straight-line basis over the estimated useful life of the software from the date that it is available for use since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful life of software is 4 to 10 years.

Amortization method, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

Subsequent expenditures on software assets are capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditures are expensed in the statement of comprehensive income as incurred.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

3.3 Financial instruments

Classification of financial assets depends on the Company's business model for managing its financial assets and the contractual terms of the cash flows. The Company classifies its financial assets as:

- financial assets measured at amortised cost, or
- financial assets measured at fair value

Gains or losses of assets measured at fair value will be recognised either through the profit or loss or through other comprehensive income ("OCI").

Time deposits, due from related parties and other receivables are held to collect contractual cash flows and are expected to give rise to cash flows representing solely payments of principal and interest and are measured at amortised cost.

All financial instruments for which fair value is recognised or disclosed are categorised within the fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole, as follows:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Initial measurement

Financial assets are initially measured at their fair value, plus transaction costs in the case of a financial asset at fair value through statement of comprehensive income. Transaction costs of financial assets carried at fair value through profit or loss are recognised in the statement of comprehensive income.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows meet the requirements as solely payment of principal and interest.

Subsequent measurement

Debt instruments

The Company recognises three classifications to subsequently measure its debt instruments:

Amortised cost

Financial assets held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest (SPPI) are measured at amortised cost. A gain or loss on a debt investment subsequently measured at amortised cost and not part of a hedging relationship is recognised in the statement of comprehensive income when the asset is derecognised or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.

• Fair Value through Other Comprehensive Income ("FVOCI")

Financial assets held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses, which are recognised in the statement of comprehensive income. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI, is reclassified from equity to the statement of comprehensive income and recognised in other gains/(losses). Interest income from these financial assets is included in finance income using the effective interest rate method. Foreign exchange gains and losses are presented in other income/expense.

• Fair Value through profit or loss ("FVTPL")

Financial assets that do not meet the criteria for subsequent recognition at amortised cost or FVOCI, are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through the profit and loss and which is not part of a hedging relationship is recognised and presented net in the statement of comprehensive income in the period in which it arises.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

3.3 Financial instruments (continued)

Business model assessment

The Company assesses the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated- e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Company's stated objective for managing the financial assets is achieved and how cash flows are realised.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Company's original expectations, the Company does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

Financial assets that are held for trading and whose performance is evaluated on a fair value basis are classified as FVPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

Equity instruments

The Company subsequently measures all equity investments at fair value. Where the Company's management has elected to present fair value gains and losses on equity investments in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other operating income when the Company's right to receive payments is established.

Changes in the fair value of financial assets at fair value through profit or loss are recognised in profit or loss as applicable. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

De-recognition

A financial asset or a part of a financial asset is de-recognised when:

- a) The rights to receive cash flows from the asset have expired, or
- b) The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either:
 - The Company has transferred substantially all the risks and rewards of the asset, or
 - The Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

3.3 Financial instruments (continued)

Impairment of financial assets

The Company assesses all information available, including a forward looking basis the expected credit losses associated with its assets carried at amortised cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk. To assess whether there is a significant increase in credit risk, the Company compares the risk of a default occurring at the asset as at the reporting date with the risk of default at the date of initial recognition based on all information available, and reasonable and supportive forward looking information.

The expected loss approach breaks the total loss amount modeling into following parts: probability of default (PD), loss given default (LGD), exposure at default (EAD). These are briefly described below:

Loss given default (LGD)

This is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from any collateral. It is usually expressed as a percentage of the EAD.

Probability of default (PD)

The likelihood of a default over a particular time horizon.

Exposure at default (EAD)

This is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest.

Expected Credit Loss (ECL) Model

The Company uses a point in time (PIT) probability of default model to measure its impairment on financial assets. Point-in-time PD models incorporate information from a current credit cycle and assess risk at a point-in-time. The point-in-time PD term structure can be used to measure credit deterioration and starting PD when performing the allowance calculations. Also, when calculating lifetime expected credit losses, after the inputs are correctly converted, the cash flows are projected and the gross carrying amount, loss allowance, and amortised cost are calculated for the financial instrument.

Definition of default

In the above context, the Company considers default when:

the customer is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realizing security.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

3.3 Financial instruments (continued)

Impairment of financial assets (continued)

Expected credit loss assessment for receivable against margin lending

The Company uses three categories for receivable against margin lending which reflect their credit risk and how the expected credit loss is determined for each of these categories. These internal credit risk ratings are aligned to external credit rating companies, such as Moody's.

A summary of the assumptions underpinning the Company's expected credit loss model is as follows:

Category	Company's definition of category	Basis of recognition of expected credit loss
Performing	Borrowers having a low risk of default and a strong capacity to meet contractual cash flows	12 months expected losses. Where the expected lifetime of an asset is less than 12 months, expected losses are measured at its expected lifetime.
Underperforming	Receivables for which there is significant increase in credit risk; as significant increase in credit risk is presumed if profit and / or principal repayments are 30 days past due.	Lifetime expected losses
Non-performing	Profit and / or principal repayments are 60 days past due	Lifetime expected losses

Over the term of the receivable against margin lending, the Company accounts for its credit risk by appropriately providing for expected credit losses on a timely basis. In calculating the expected credit loss rates, the Company considers historical loss rates for each borrower and adjusts for forward looking macroeconomic data.

Write-off

The Company writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery, for example when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings. Financial assets written off may still be subject to enforcement activities under the Company's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognized in profit or loss.

Governance and controls

The Company has adopted an effective governance and control framework. Following aspects depict governance approach of management:

Data quality and availability: Management will maintain a detailed credit risk information that was not previously maintained, or is available but was not previously used for financial reporting purposes. Systems, processes and internal controls: On an ongoing basis, Company will produce IFRS 9 measurements and related disclosures within a short timeframe. Associated controls will be sufficiently automated and streamlined to deliver reliable results that are subject to appropriate review and challenge in the required timeframe. Further, as portfolio composition and market conditions change, processes, methodologies and assumptions will be adapted, in order to remain compliant with the requirements of IFRS 9.

Timely monitoring, review and challenge of IFRS 9 implementation plans, key decisions and output: Internal reporting mechanisms will be enhanced to support IFRS 9 implementation efforts and ensure timely decision making and reporting. Frequent review of whether assumptions and methodologies are consistent with business and risk management practices and strategies, including assessing whether they are consistent with those used in other areas of reporting and planning.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

3.3 Financial instruments (continued)

Governance and controls (continued)

A strong governance and controls framework over ECL estimation and reporting will be developed, focusing on data integrity and model validation given the large population of data, models and systems that either did not previously exist or were not used in financial reporting. Additionally, those charged with governance would have oversight over why different models are used for different portfolios across varying jurisdictions.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the assets and settle the liability simultaneously.

3.4 Current versus non-current classification

The Company presents assets and liabilities in the statement of financial position based on a current/non-current classification. An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in the normal operating cycle.
- Held primarily for the purpose of trading.
- Expected to be realized within twelve months after the reporting period; or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in the normal operating cycle.
- It is held primarily for the purpose of trading.
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

3.5 Cash and cash equivalents

Cash and cash equivalents include cash on hand, deposits held with banks, and other short-term highly liquid investments with original maturities of three months or less. These deposits are made with reputable banks and financial institutions within the Kingdom of Saudi Arabia.

The Company also holds cash in clients' cash accounts with a local Saudi bank to be used for investments on their behalf. Such balances are not included in the financial statements.

3.6 Margin lending receivables

Margin lending receivables are recognized when the cash is advanced to the customers who trade in the capital markets. The cash advance is collateralized against equity securities purchased by the borrowers using these funds as well as any cash accounts that may be held by the customers. The outstanding receivable will decrease when either the borrowers liquidate their holdings or remit cash to reduce the utilization. Margin lending receivables are financed with initial coverage of at least 200%. This coverage is actively monitored and margin calls and liquidation calls are performed at specific predefined thresholds to ensure that the margin lending is sufficiently collateralised at all times. Customer portfolios can be liquidated to cover the loan amounts if the collateral coverage ratio drops below the liquidation level.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

3.7 Investment in associates

The Company's interests in equity-accounted investee comprise interests in an associates. Associates are those entities in which the Company has significant influence, but no control or joint control, over the financial and operating policies.

Interests in an associates are accounted for using the equity method. Under the equity method of accounting, the investments are initially recognized at cost and adjusted thereafter to recognise the Company's share of the post-acquisition profits or losses of the investee in profit or loss, and the Company's share of movements in other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates are recognized as a reduction in the carrying amount of the investments.

When the Company's share of losses exceeds its interest in an equity-accounted investee, the carrying amount of that interest, including any long-term investments, is reduced to nil, and the recognition of further losses is discontinued except to the extent that the Company has a corresponding obligation.

Unrealized gains on transactions between the Company and its associates are eliminated to the extent of the Company's interest in these entities. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity-accounted investees is changed where necessary to ensure consistency with the policies adopted by the Company.

The carrying amount of equity-accounted investments is tested for impairment. The net investment in an associate is impaired and impairment losses are incurred if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the net investment (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows from the net investment that can be reliably estimated. Objective evidence that the net investment is impaired includes observable data that comes to the attention of the entity about the following loss events:

- significant financial difficulty of the equity-accounted investee;
- a breach of contract, such as a default or delinquency in payments by the equity-accounted investee;
- the entity, for economic or legal reasons relating to its equity-accounted investee's financial difficulty, granting to the associate or joint venture a concession that the entity would not otherwise consider;
- it becoming probable that the equity-accounted investee will enter bankruptcy or other financial reorganization; or
- the disappearance of an active market for the net investment because of financial difficulties of the equityaccounted investee.

The entire carrying amount is tested for impairment in accordance with IAS 36 Impairment of Assets as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs to sell) with its carrying amount.

3.8 Employee defined benefit obligation

The Company operates a defined benefit scheme for its employees in accordance with labour regulations applicable in the Kingdom of Saudi Arabia. The cost of providing the benefits under the defined benefits plan is determined using the projected unit credit method. Actuarial gains and losses are recognized in full in the period in which they occur in other comprehensive income. Such actuarial gains and losses are also immediately recognized in the retained earnings and are not reclassified to profit or loss in subsequent periods. Re-measurements are not reclassified to profit or loss in subsequent periods.

Interest expense is calculated by applying the discount rate to the net defined benefit liability. The Company recognises the following changes in the net defined benefit obligation under 'general and administration expenses' in the statement of comprehensive income.

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

3.9 Employee defined benefit liability

The defined benefit asset or liability comprises the present value of the defined benefit obligation, less past service costs and less the fair value of plan assets out of which the obligations are to be settled. However, currently the plan is unfunded and has no assets.

3.10 Accrued expenses and other payables

Accrued expenses are recognised initially at fair value and subsequently stated at amortised cost using the effective interest method. Provisions for restructuring costs, warranties and legal claims are recognized in other liabilities when the Company has a present legal or constructive obligation as a result of past events; it is more likely than not that an outflow of resources will be required to settle the obligation; and the amount can be reliably estimated. Provisions are measured at management's best estimate of the expenditure required to settle the obligation at the end of the reporting period, and are discounted where the effect is material.

3.11 Zakat and income tax payables and value added tax

Zakat

Zakat is provided for in accordance with the Saudi Arabian regulations. The liability is charged to the statement of comprehensive income. This is adjusted, if applicable, upon receiving the final zakat assessment.

Income tax

Income tax assets and liabilities for the year are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted, or substantively enacted at the reporting date in the Kingdom of Saudi Arabia where the Company operates and generates taxable income.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation, and it establishes provisions where appropriate.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised

Value Added Tax (VAT)

Expenses, and assets are recognized net of the amount of VAT, except:

- When the VAT incurred on a purchase of assets or services is not recoverable from the taxation authority, in which
 case, the VAT is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable;
 and/or
- When receivables and payables are stated with the amount of VAT included.

The net amount of VAT recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

3.12 Contingent liabilities

A contingent liability is disclosed where the existence of the obligation will only be confirmed by future events or where the amount of obligations cannot be measured with reasonable reliability. Contingent assets are not recognised, but are disclosed where an inflow of economic benefits is probable.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

31 DECEMBER 2022

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

3.13 Revenue from contracts with customers

IFRS 15 Revenue from contracts with customers has established a five-step model to account for revenue arising from contracts with customers. The five step model is as follows:

- a) Identify the contract
- b) Identify performance obligation
- c) Determine the transaction price
- d) Allocation of the transaction price
- e) Recognize revenue

The Company generates the following revenue streams that are covered:

- a) Brokerage fees
- b) Special commission income on margin lending
- c) Asset management fees
- d) Corporate finance and Advisory fees

3.13.1 Brokerage fees

Brokerage income is recognized when the related transactions are executed on behalf of the customers at the price agreed in the contract with the customers, and is recorded net of The Saudi Stock Exchange Company (Tadawul) fees, Capital Market Authority (CMA) fees and discounts. The performance obligation of the Company is satisfied when the Company carries out the transaction, which triggers immediate recognition of the revenue, as the Company will have no further commitments.

3.13.1.1 Special commission income on margin lending

Margin lending is an overdraft facility provided to customers to trade in the capital market. Interest income from margin lending is accrued daily on the outstanding balance on an effective yield basis. Margin lending fees are recognised based on customer utilisation of the margin lending facility at the applicable rates agreed in the contract with the customer.

3.13.1.2 Management and administration fees from investment funds

Management and administration fee income is recognized on a periodic basis (annual % pro-rated for daily accruals) with reference to the Net Asset Value ('NAV') computation. The Company's practice for recognition of management fees is aligned with IFRS since the Management fee is recognized on an accruals basis against the rendering of the Asset Management services that the Company is providing on an on-going basis.

3.13.1.3 Advisory and corporate finance

Advisory and corporate finance fee is recognized based on services rendered under the applicable service contracts using the five-step approach to revenue recognition above.

3.13.2 Other operating income

3.13.2.1 Net gain or loss on financial assets at fair value through profit or loss

Net gains or losses on financial assets at fair value through profit or loss are changes in the fair value of financial assets held for trading or designated upon initial recognition as at fair value through profit or loss and exclude interest and dividend income and expenses.

Unrealised gains and losses comprise changes in the fair value of financial instruments for the period and from reversal of the prior period's unrealised gains and losses on the disposal of financial instruments which were realised in the reporting period. Realised gains and losses on the disposal of financial instruments classified as at fair value through profit or loss are calculated using the weighted average method. They represent the difference between an instrument's initial carrying amount and disposal amount, or cash payments or receipts made on financial instruments classified as at fair value through profit or loss (excluding payments or receipts on collateral margin accounts for such instruments).

3.13.2.2 Dividend income

Dividend income is recognised on the date when the Company's right to receive the payment is established. For quoted equity securities, this is usually the ex-dividend date. For unquoted equity securities, this is usually the date on which the shareholders approve the payment of a dividend. Dividend income from equity securities designated as at FVOCI is recognised in the statement of comprehensive income in a separate line item.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

3.13 Revenue from contracts with customers (continued)

3.13.2 Other operating income (continued)

3.13.2.3 Special commission income and expense

Special commission income and expense for all commission-bearing financial instruments is recognised in the statement of comprehensive income on an effective yield basis. The effective commission rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter period) to the carrying amount of the financial asset or liability. When calculating the effective commission rate, the Company estimates future cash flows considering all contractual terms of the financial instrument but not future credit losses.

3.14 General and administrative expenses

General and administrative expenses are mainly staff costs and professional fees. All other expenses are classified based on their nature in the statement of comprehensive income.

3.15 Earnings per share

Basic and diluted earnings per share are calculated by dividing the income for the year attributable to the shareholders of the Company by the weighted average number of outstanding ordinary shares.

3.16 Dividends

Dividend distribution to the Company's shareholders is recognised as a liability in the Company's financial statements in the period in which the dividends are approved by the Company's shareholders.

3.17 Assets held in trust or in a fiduciary capacity

Assets held in trust or in a fiduciary capacity by the Company are not treated as assets of the Company and accordingly are treated as off-balance sheet items in these financial statements.

3.18 Foreign currencies

In preparing the financial statements of the Company, transactions in currencies other than the Company's functionally currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Differences arising on settlement or translation of monetary items are recognized in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognized in profit or loss or other comprehensive income, respectively).

3.19 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

3 SIGNIFICANT ACCOUNTING POLICIES (continued)

3.20 Segment reporting

An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Company's other components. All operating segments' operating results are reviewed by the Company's Chief Operating Decision maker to make decision about resources to be allocated to the segment and to assess its performance, and for which discrete financial information is available.

Segment results that are reported to the Company's Chief Operating Decision maker include items directly attributable to a segment as well as those that can be allocated on a reasonable basis.

3.21 Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not recognizes for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognizes even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to liability. The increase in the provision due to the passage of time is recognizes as interest expense.

3.22 Leases

The Company assess whether a contract contains a lease, at inception of the contract. For all such lease arrangements the Company recognize right of use assets and lease liabilities except for the short term leases and leases of low value assets as follows:

Right-of-use assets

The Company recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Unless the Company is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognised right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term. Right-of-use assets are subject to impairment. Right-of-use assets are depreciated over the useful life or lease period whichever is lower.

Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating a lease, if the lease term reflects the Group exercising the option to terminate. The variable lease payments that do not depend on an index or a rate are recognised as expense in the period on which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is re-measured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

The preparation of the Company's financial statements requires management to make estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

4 SIGNIFICANT ACCOUNTING ESTIMATES AND ASSUMPTIONS

The key assumptions concerning the future and other key estimates made regarding uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

4.1 Measurement of the expected credit loss allowance

The measurement of the expected credit loss allowance for debt instrument measured at amortised cost and FVOCI is an area that requires the use of complex models and significant assumptions about future economic conditions and credit behaviour (e.g. the likelihood of customers defaulting and the resulting losses). Explanation of the input, assumptions and estimation techniques used in measuring ECL is further detailed in note 3.3 Impairment – Financial assets, which also sets out key sensitivities of the ECL to changes in these elements.

4.2 Measurement of the net employment defined benefit liabilities

The cost of the defined benefit plan and the present value of the obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions which may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, and mortality rates.

4.3 Impairment of non-financial assets

Intangible assets and investment properties are tested for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. For the purpose of measuring recoverable amounts, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units or 'CGUs'). Recoverable amount is the higher of an asset's fair value less costs to sell and value in use (being the present value of the expected future cash flows of the relevant asset or CGU, as determined by management).

The Company evaluates impairment losses, for potential reversals when events or circumstances warrant such consideration.

4.4 Fair value measurement of financial instruments

When the fair value of financial assets and financial liabilities recorded in the statement of financial position cannot be measured based on quoted prices in active markets, their fair value is determined using valuation techniques including the discounted cash flow model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. The judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions relating to these factors could affect the reported fair value of financial instruments.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Company invests in redeemable units of unlisted mutual funds, which are also managed by the Company. The funds are open for subscriptions/redemptions on a periodic basis as mentioned in the terms and conditions. The value of the net assets of the funds for the purpose of the subscription/redemption of units is determined by dividing the net assets attributable to unitholders of the funds (fair value of the funds' assets minus the liabilities) by the total number of the funds' units outstanding on the relevant valuation day.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

4 SIGNIFICANT ACCOUNTING ESTIMATES AND ASSUMPTIONS (continued)

4.5 Useful lives of property and equipment

The Company's management determines the estimated useful lives of its property and equipment for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. Management reviews the useful lives and residual value of the assets at least once per year and always at the end of each financial year and the future depreciation charge would be adjusted where the management believes the useful lives differ from previous estimates.

4.6 Useful lives of intangible assets

The useful life starts at the date that it is available for use since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful life of software is four years.

Useful lives are reviewed at each financial year-end and adjusted if appropriate.

4.7 Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the reporting date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows

4.8 Going concern

The Company's management has made an assessment of its ability to continue as a going concern and is satisfied that it has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, these financial statements continue to be prepared on the going concern basis.

4.9 Determining the lease term of contracts with renewal and termination options – Company as lessee

The Company determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Company has several lease contracts that include extension and termination options. The Company applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., construction of significant leasehold improvements or significant customization to the leased asset).

The Company included the renewal period as part of the lease term for leases of right of use asset with shorter non-cancellable period (i.e., three to five years). The Company typically exercises its option to renew for these leases because there will be a significant negative effect on operations if a replacement asset is not readily available. The renewal periods for leases of right of use assets with longer non-cancellable periods (i.e., 10 to 15 years) are not included as part of the lease term as these are not reasonably certain to be exercised. Furthermore, the periods covered by termination options are included as part of the lease term only when they are reasonably certain not to be exercised.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

5 NEW IFRS, AMENDMENTS AND INTERPRETATIONS ADOPTED BY THE COMPANY

The Company applied for the first-time certain standards and amendments, which are effective for annual periods beginning on or after 1 January 2022. The Company has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

Property, Plant and Equipment: Proceeds before Intended Use – Amendments to IAS 16

In May 2020, the IASB issued Property, Plant and Equipment — Proceeds before Intended Use, which prohibits entities deducting from the cost of an item of property, plant and equipment, any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognises the proceeds from selling such items, and the costs of producing those items, in profit or loss.

The amendment is effective for annual reporting periods beginning on or after 1 January 2022 and must be applied retrospectively to items of property, plant and equipment made available for use on or after the beginning of the earliest period presented when the entity first applies the amendment. The amendments are not expected to have a material impact on the Company.

Onerous Contracts - Costs of Fulfilling a Contract - Amendments to IAS 37

In May 2020, the IASB issued amendments to IAS 37 to specify which costs an entity needs to include when assessing whether a contract is onerous or loss-making. The amendments apply a "directly related cost approach". The costs that relate directly to a contract to provide goods or services include both incremental costs and an allocation of costs directly related to contract activities. General and administrative costs do not relate directly to a contract and are excluded unless they are explicitly chargeable to the counterparty under the contract.

The amendments are effective for annual reporting periods beginning on or after 1 January 2022. The Company will apply these amendments to contracts for which it has not yet fulfilled all its obligations at the beginning of the annual reporting period in which it first applies the amendment.

IFRS 9 Financial Instruments - Fees in the '10 per cent' test for derecognition of financial liabilities

As part of its 2018-2020 annual improvements to IFRS standards process the IASB issued amendment to IFRS 9. The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf. An entity applies the amendment to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment.

The amendment is effective for annual reporting periods beginning on or after 1 January 2022 with earlier adoption permitted. The Company will apply the amendments to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment.

The amendments are not expected to have a material impact on the Company.

Standards issued but not yet effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Company's financial statements are disclosed below. The Company intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

Amendments to IAS 1: Classification of Liabilities as Current or Non-current

In January 2020, the IASB issued amendments to paragraphs 69 to 76 of IAS 1 to specify the requirements for classifying liabilities as current or non-current. The amendments clarify:

- What is meant by a right to defer settlement
- That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

5 NEW IFRS, AMENDMENTS AND INTERPRETATIONS ADOPTED BY THE COMPANY (continued)

Standards issued but not yet effective (continued)

Amendments to IAS 1: Classification of Liabilities as Current or Non-current (continued)

• That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification

The amendments are effective for annual reporting periods beginning on or after 1 January 2023 and must be applied retrospectively. The Company is currently assessing the impact the amendments will have on current practice and whether existing loan agreements may require renegotiation.

Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2

In February 2021, the IASB issued amendments to IAS 1 and IFRS Practice Statement 2 Making Materiality Judgements, in which it provides guidance and examples to help entities apply materiality judgements to accounting policy disclosures. The amendments aim to help entities provide accounting policy disclosures that are more useful by replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies and adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures.

The amendments to IAS 1 are applicable for annual periods beginning on or after 1 January 2023 with earlier application permitted. Since the amendments to the Practice Statement 2 provide non-mandatory guidance on the application of the definition of material to accounting policy information, an effective date for these amendments is not necessary.

The Company is currently revisiting its accounting policy information disclosures to ensure consistency with the amended requirements going forward.

Definition of Accounting Estimates - Amendments to IAS 8

In February 2021, the IASB issued amendments to IAS 8, in which it introduces a definition of 'accounting estimates'. The amendments clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. Also, they clarify how entities use measurement techniques and inputs to develop accounting estimates.

The amendments are effective for annual reporting periods beginning on or after 1 January 2023 and apply to changes in accounting policies and changes in accounting estimates that occur on or after the start of that period. Earlier application is permitted as long as this fact is disclosed. The amendments are not expected to have a material impact on the entity.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

10 INVESTMENTS IN ASSOCIATES

Investments in associates consist of investments in private real estate funds. The details of the Company's associate at the end of the reporting period is as follows::

Name of Associates	31 December 2022	31 December 2021	31 December 2022 SR	31 December 2021 SR
	% of ow	nership		
ANBC Business Gate Fund (10.1)	12.74%	12.74%	40,652,984	, ,
Sara Second Real Estate Fund (10.2)	23.76%	23.76%	304,499,032	308,402,442
			345,152,016	359,162,245

10.1 In 2015, the Company has subscribed in 25.47% of the units of the ANBC Business Gate Fund (the Fund) (formerly known as ANBI Business Gate Fund) amounting to SR 242 million. It is a closed-ended private placement real estate investment fund launched on 26 August 2014 for a period of 5 years starting from date of closure of first offering on 11 January 2015. CMA was informed of the offering of the Fund through letter number 8/14/411 dated 9 Shawwal 1435H (corresponding to 5 August 2014).

The Fund's term is for 5 years effective from date of closure of first offering (i.e. 11 January 2015). However, on 10 December 2019, the Fund's board of directors resolved to extend the Fund's duration by additional six months ending on 13 July 2020. The said resolution was approved by the Unitholders. On 21 June 2020, an extension by additional 6 months ended 31 December 2020 was approved by the fund's board of directors. On 15 December 2020, the Fund Manager sent a notification to Capital Market Authority (CMA), to further extended the life of the fund to 31 March 2021 with the approval of the unitholders. Subsequently, the Fund Manager with the approval of the unitholders has further extended the term of Fund till 31 December 2025 and sent a notification to CMA dated 11 February 2021 for the same.

The Company has accounted for its share in the Fund on financial information prepared on a going concern basis. Based on management's available information and best estimates, the value of the Company's investment in the Fund as at 31 December 2022 will be realizable.

During the year ended 31 December 2021, the Company sold 121,000 units representing 50% of its holding in Business Gate Fund reducing its ownership interest from 25.47% to 12.74%. The Company has assessed the accounting of investment, in terms of significant influence suggested under IAS 28 and it has concluded that despite this transaction, the Company still holds significant influence in the investee.

The Fund's purpose is to acquire real estate assets, an income generating real estate property located in the city of Riyadh, out of which the Fund will receive rental and operating income over the Fund term.

Summarized financial information of the associate is set out below. The summarized financial information below represents amounts shown in associate's financial statements.

14 EMPLOYEES DEFINED BENEFIT OBLIGATION

The movement in employees defined benefit obligation for the year ended as follows:

	31 December	31 December
	2022	2021
	SR	SR
Balance at beginning of the year	22,704,956	25,308,243
Current service cost	3,134,629	3,167,531
Past service cost	18,199	-
Interest cost	599,699	557,117
Amount recognized in profit or loss account	3,752,527	3,724,648
Re-measurements		
Actuarial loss	2,937,832	784,796
Amount recognized in OCI	2,937,832	784,796
Benefits paid during the year	(2,873,238)	(7,112,731)
Balance at the end of the year	26,522,077	22,704,956

The Company carried out an employee benefits actuarial valuation of its liability, using the projected unit credit method, as at 31 December 2022 arising from the end of service benefits to qualifying in-service employees.

The following were the principal actuarial assumptions:

Key actuarial assumptions	31 December 2022	31 December 2021
Financial assumptions		
Discount rate used	5.10%	2.90%
Salary growth rate*	5.00%	2.00%
Demographic assumptions		
Retirement age	60	60
Post Retirement Mortality	13	12

^{*}A salary increase assumption of 5.00% p.a. for the first five years has been assumed by the Company and for the subsequent years a salary increase rate of 5.10% p.a. is assumed, and is based on actual salary increases in past years

Sensitivity analysis

A reasonably possible change to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation. The following is a sensitivity analysis for the salary inflation and discount rate assumptions that were performed at the previous and current valuation date and the expected defined benefit obligation on each assumption are as follows:

27 FINANCIAL RISK AND MANAGEMENT OBJECTIVES AND POLICIES

Introduction

The Company's objective in managing risk is the creation and protection of shareholder value. Risk is inherent in the Company's activities, but it is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. The process of risk management is critical to the Company's continuing profitability. The Company is exposed to market risk (which includes interest rate risk, currency risk and equity price risk), liquidity risk, and credit risk and investment holding period risk arising from the financial instruments it holds.

Risk management structure

The Company's Board of Directors is ultimately responsible for the overall risk management of the Company.

Risk measurement and reporting system

The Company's risks are measured using a method that reflects both the expected loss likely to arise in normal circumstances and unexpected losses that are an estimate of the ultimate actual loss based on statistical models. The models make use of the probabilities derived from historical experience, adjusted to reflect the economic environment.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

Monitoring and controlling risks is primarily set up to be performed based on limits established by the Board of Directors. These limits reflect the business strategy, including the risk that the Company is willing to accept and the market environment of the Company. In addition, the Board monitors and measures the overall risk in relation to the aggregate risk exposure across all risk type and activities.

Risk mitigation

The Company has investment guidelines that set out its overall business strategies, its tolerance for risk and its general risk management philosophy.

Excessive risk concentration

Concentration indicates the relative sensitivity of the Company's performance to developments affecting a particular industry or geographical location. Concentrations of risk arise when a number of financial instruments or contracts are entered into with the same counterparty, or where a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations of liquidity risk may arise from the repayment terms of financial liabilities, sources of borrowing facilities or reliance on a particular market in which to realise liquid assets. Concentrations of foreign exchange risk may arise if the Company has a significant net open position in a single foreign currency, or aggregate net open positions in several currencies that tend to move together.

In order to avoid excessive concentrations of risk, the Company's policies and procedures include specific guidelines to focus on maintaining a diversified portfolio. The investment manager is instructed to reduce exposure or to use derivative instruments to manage excessive risk concentrations when they arise.

Credit risk

Credit risk refers to the risk that a party to a financial instrument will default on its contractual obligations resulting in financial loss to the Company. The Company has adopted a policy of only dealing with creditworthy counterparties, for whom the credit risk is assessed to be low. The Company attempts to control credit risk by monitoring credit exposures, limiting transactions with specific non-related counterparties, and continually assessing the creditworthiness of such non-related counterparties. The Company maintains bank accounts with high credit rated financial institutions.

The table below shows the Company's maximum exposure to credit risk for components of the statement of financial position.

	31 December 2022 SR	31 December 2021 SR
Receivable against margin lending (note 12) Investments at fair value through profit or loss (FVTPL) (note 8)	859,336,510 131,521,757	910,199,384 153,765,775
Investments in associates (note 10) Investments at fair value through OCI (note 9)	345,152,016 3,585,317	359,162,245
Cash and cash equivalents (note 13)	532,875,329	235,282,584
	1,872,470,929	1,658,409,988

Credit concentration

Concentration of credit risk arises when a number of counter-parties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions.

No significant concentrations of credit risk were identified by the management as at the reporting date.

The management has conducted an assessment as required under IFRS 9 and based on such assessment, the management believes that there is no need for any significant impairment loss against the carrying value of cash and cash equivalents, time deposits, due from related parties and other financial assets.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

27 FINANCIAL RISK AND MANAGEMENT OBJECTIVES AND POLICIES (continued)

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in raising funds to meet commitments associated with financial instruments. Liquidity risk may result from an inability to sell a financial asset quickly at an amount close to its fair value. Liquidity risk is managed by ensuring that sufficient funds are available from Shareholders and related parties at all times to meet any future commitments, and financing facilities are available.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

27 FINANCIAL RISK AND MANAGEMENT OBJECTIVES AND POLICIES (continued)

Liquidity risk (continued)

The following are the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted and include contractual interest payments:

31 December 2022	On Demand SR	Within 3 months SR	3 months to 1 year SR	Above 1 year SR	No fixed maturity SR	Total SR
Accrued expenses and other liabilities Lease Liability	17,610,494	2,561,744 425,742	24,987,002 1,305,610	3,967,156	- -	45,159,240 5,698,508
Total financial liabilities	17,610,494	2,987,486	26,292,612	3,967,156	-	50,857,748
31 December 2021						
Accrued expenses and other liabilities Lease Liability	10,718,157	1,559,137 480,479	15,207,671 1,473,467	5,465,577	- -	27,484,965 7,419,523
Total financial liabilities	10,718,157	2,039,616	16,681,138	5,465,577	-	34,904,488

Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates, foreign exchange rates and equity prices. The maximum risk resulting from financial instruments equals their fair value. The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimizing the return.

Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments. The Board of Directors has established limits on the interest gaps for stipulated periods. The Company's investments in debt securities carry fixed interest rates and mature within five years.

Equity price risk

Equity price risk is the risk of unfavourable changes in the fair values of equity instruments as a result of changes in the value of individual shares. The equity price risk exposure arises from the Company's investments in equity securities. The Company's investments are susceptible to market price risk arising from uncertainties about future prices. The Board manages this risk through diversification of its investment portfolio in terms of geographical distribution and/or industry concentration.

Sensitivity analysis

The table below sets out the effect on profit or loss and other comprehensive income of a reasonably possible weakening /strengthening in the individual market prices by 5% at the reporting date. The estimates are made on an individual investment basis. The analysis assumes that all other variables, in particular commission and foreign currency rates, remain constant.

(formerly known as Arab National Investment Company)

(A Saudi Closed Joint Stock Company)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) 31 DECEMBER 2022

Sensitivity analysis (continued)

Effect on profit and loss	2022		2021	
		SR		SR
Net (loss) gain on investments held at fair value	+ 5%	6,576,088	+ 5%	7,688,289
through profit or loss	- 5%	(6,576,088)	- 5%	(7,688,289)

Currency risk

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. The Company does not have any significant exposure to currency risk as all its significant monetary assets and monetary liabilities are denominated in Saudi Riyals. The Company did not undertake significant transactions in currencies other than Saudi Riyals and US dollars during the year and Saudi Riyals are pegged to the US dollar.
