Yanbu Cement

Earnings better than expected; Increase TP to SAR 40

Yanbu Cement (YCC) registered revenue of SAR240 million, a YoY growth of 5.4% and, was slightly higher than our estimate of SAR234 million, but lower than the average consensus estimates of SAR253 million. Growth in sales was supported by a 35% YoY growth in volume, though the same was tempered by a more than 20% fall in average realization. Cement sales volume for 3Q20 came in at 1.16 million tons, 5% higher than our estimate, though the average realization at SAR208/ton was lower than our estimate of SAR212/ton. Continued growth from mortgages aided volume growth, while heavy competition among the local players kept the prices under check. Cost of sales and operating costs fell by 1.2% YoY and 34.2% YoY respectively, aided by higher operating leverage. For the nine months, YCC registered a volume growth of 27.5% YoY. Growth was aided by strong growth in real estate activities in the local market. Going forward, we expect this trend to continue, though growth rates for 2021 will be tempered by the higher base in 2020. Average realizations are likely to continue to remain subdued, given the competitive nature of the local market. After taking into account the current quarter performance, we increase our target price to SAR40/share from the earlier target price of SAR30/share and have revised our rating from the earlier "Neutral" to "Overweight".

Q3 results: Total volume sold during the quarter was at 1.16mn tons in 3Q20, compared to 0.74mn tons in 2Q20 and 0.86mn tons a year back. Average realizations on the other hand at SAR208/ton was lower than SAR212/ton in 2Q20 and SAR266/ton a year back. Aided by improved operating leverage gross margins increased to 37.3% in 3Q20, corresponding to 35.8% in 2Q20 and 33.1% a year back. In line with better gross margins, net margins too improved to 34.3% in 3Q20, compared to 23.8% in 2Q20 and 27.2% a year back.

Valuation and risks: We value the company based on an equal mix of DCF and relative valuation. The DCF target price is based on a 2.5% terminal growth and WACC of 9.0% and comes to SAR47.6/share. P/E is based on a multiple of 18.5x and comes to SAR33/share. Overall, we have increased our target price for the company to SAR40 per share, an upside of 11.7%, which implies an "Overweight" rating. The key downside risk is a decline in volume. The key upside risks are higher than expected cement price and higher than forecasted pick up in the government's infrastructure spending.

Explanation of Al Rajhi Capital's rating system

Al Rajhi Capital uses a three-tier rating system based on absolute upside or downside potential for all stocks under its coverage except financial stocks and those few other companies not compliant with Islamic Shariah law:

"Overweight": Our target price is more than 10% above the current share price, and we expect the share price to reach the target on a 12 month time horizon.

"Neutral": We expect the share price to settle at a level between 10% below the current share price and 10% above the current share price on a 12 month time horizon.

"Underweight": Our target price is more than 10% below the current share price, and we expect the share price to reach the target on a 12 month time horizon.

"Target price": We estimate target value per share for every stock we cover. This is normally based on widely accepted methods appropriate to the stock or sector under consideration, e.g. DCF (discounted cash flow) or SoTP (sum of the parts) analysis.

Please note that the achievement of any price target may be impeded by general market and economic trends and other external factors, or if a company's profits or operating performance exceed or fall short of our expectations.
