## Yanbu Cement

### Operating performance to remain stable; TP at SAR 48/sh

Yanbu Cement (YCC) registered revenue of SAR243mn, a y-o-y increase of 54.6% and, was better than our estimate of SAR210mn. Revenue was aided by a 45.9% y-o-y improvement in cement volume sold. Cement sales volume for 2Q21 came in at 1.08mn tons, 7.7% higher than our estimate, while average realization too was better than our estimate. Volume growth was at the back of lower base, due to Covid restrictions during the same period previous year. However, gross profit and operating profit fell by 5.3% and 1.2% y-o-y respectively and were impacted by higher cost of sales. The company had shut down one of its production lines for modernisation, resulting in the company using its inventory. Inventory levels of YCC fell by 1.2 mn tons between 2020 and 2Q21 (c.50% of volume sold during the period), resulting in higher cost of sales. However, profitability was aided by lower operating expenses and lower zakat. For 2Q21, YCC registered a volume growth of 45.9% y-o-y, better than the industry average of 21.3% and the western region growth of 40.4% for the same period. We maintain our target price at SAR48/share, but have revised our rating from the earlier “Overweight” to “Neutral”.

**Q2 results:** Total volume sold during the quarter was at 1.08mn tons in 2Q21, compared to 1.40mn tons in 1Q21 and 0.74mn tons a year back. At the back of higher cost of sales, gross margins fell to 21.9% in 2Q21, corresponding to 27.8% in 1Q21 and 35.8% a year back. In line with this, net margins too fell to 17.1% in 2Q21, compared to 24.9% in 1Q21 and 23.4% a year back.

**Valuation and risks:** For our estimates, we expect input and energy prices to remain flat. We value the company based on a weighted average mix of DCF (45%) and dividend capitalization (55%). The DCF target price is based on a 2.0% terminal growth and WACC of 7.9% and comes to SAR50/share. Dividend capitalization is based on a fair value yield of 4.8% and a normalized dividend of SAR2.25 per share and comes to SAR47/share. Overall, we have maintained our target price for the company at SAR48 per share, an upside of 7.4%, which implies a “Neutral” rating. The key downside risk is a decline in volume and lower than expected cement prices. The key upside risks are higher than the forecasted pick up in the government’s infrastructure spending.

### Explanation of Al Rajhi Capital's rating system

Al Rajhi Capital uses a three-tier rating system based on absolute upside or downside potential for all stocks under its coverage except financial stocks and those few other companies not compliant with Islamic Shariah law:

"Overweight": Our target price is more than 10% above the current share price, and we expect the share price to reach the target on a 12 month time horizon.

"Neutral": We expect the share price to settle at a level between 10% below the current share price and 10% above the current share price on a 12 month time horizon.

"Underweight": Our target price is more than 10% below the current share price, and we expect the share price to reach the target on a 12 month time horizon.

"Target price": We estimate target value per share for every stock we cover. This is normally based on widely accepted methods appropriate to the stock or sector under consideration, e.g. DCF (discounted cash flow) or SoTP (sum of the parts) analysis.

Please note that the achievement of any price target may be impeded by general market and economic trends and other external factors, or if a company's profits or operating performance exceed or fall short of our expectations.
