## BinDawood Holding Co. Gradual reopening of school and Umrah a positive catalyst

BinDawood Q2 2021 net income of SAR95mn came below our estimates of SAR122mn, the miss in bottom-line stemmed from lower than expected top-line of SAR1.123bn v/s our expectations of SAR1.362bn. The overall revenue declined 27.4% y-o-y mainly due to 30% y-o-y drop in BinDawood sales and 26.4% y-o-y decline in Danube segment sales. H1 2020 had one off positive impact from pantry loading and pre-vat buying therefore from a high base last year the overall basket size at the group level fell 11.31% in H1 2021 v/s H2 2020. At the gross margin level, the company posted a positive surprise as margins expanded 300bps y-o-y driven by procurement efficiency and new inventory management system. The operating expenses also reduced by ~SAR9.5mn mainly due to operating efficiencies, the operating margins declined c.330bps y-o-y while increased c.270bps q-o-q.

**Outlook:** Going forward the gradual reopening of school and resumption of Umrah is a positive catalyst for the company, as this will increase the store traffic and overall revenue. We expect H2 2021 to be better than H1 2021 as the overall macros improve. The company is planning to open 5 new stores and is looking for M&A opportunities outside kingdom as well as acquire brands which complements the current business. We expect the current level of margins to sustain as back to school sales will have a positive impact on the product mix (stationaries and gift items are higher margins SKU's). We factor in a steep recovery in FY 2022e and accordingly increase our tp from SAR102/sh to SAR113/sh but remain "Neutral" on the company.

**Valuation and Key Risks:** We value BinDawood using equal mix given to DCF and PE based relative valuation. Our DCF based tp based on 2% terminal growth and 7.92% WACC is SAR120/sh while PE based relative valuation based on 26x FY 2023EPS (discounted to PV) is SAR106/sh thus equal weighted tp stands at SAR113/sh (earlier SAR102/sh) which implies ~5% upside from CMP of SAR108/sh. We remain neutral on BinDawood holding Co.

#### Key Upside risks:

Faster than expected ramp up of new stores and higher LFL growth will have a positive impact on overall revenue and poses an upside risk to our valuation.

#### Downside Risks:

1. Any new restrictions limiting the number of people inside the stores might impact the footfall in the stores and the overall revenue. This poses a downside risk to our valuation.
2. Down trading by Saudi customers might impact the basket size further and this would have a negative impact on company's revenue and our valuation.

### Explanation of Al Rajhi Capital's rating system

Al Rajhi Capital uses a three-tier rating system based on absolute upside or downside potential for all stocks under its coverage except financial stocks and those few other companies not compliant with Islamic Shariah law:

"Overweight": Our target price is more than 10% above the current share price, and we expect the share price to reach the target on a 12 month time horizon.

"Neutral": We expect the share price to settle at a level between 10% below the current share price and 10% above the current share price on a 12 month time horizon.

"Underweight": Our target price is more than 10% below the current share price, and we expect the share price to reach the target on a 12 month time horizon.

"Target price": We estimate target value per share for every stock we cover. This is normally based on widely accepted methods appropriate to the stock or sector under consideration, e.g. DCF (discounted cash flow) or SoTP (sum of the parts) analysis.

Please note that the achievement of any price target may be impeded by general market and economic trends and other external factors, or if a company's profits or operating performance exceed or fall short of our expectations.
