Valuation Approach Final Property Value	Comparable Approach, Cost Approach & Income Approach 171,000,000 SAR
Valuation Date Inspection Date	31/12/2020 05/12/2020

TERMS OF REFERENCE & VALUATION

1.2 VALUATION REFERENCE

This report was prepared based on the instructions issued to us by Muscat Capital (the customer) to estimate the market value of the property / real estate that is the subject of this report for the mentioned purpose only. This report may not be used for other purposes. The valuation was prepared in accordance to the regulations and standards issued by the Saudi Authority of Accredited Valuers and the International valuation Standards of the Council of International Assessment Standards (IVSC).

1.3 BASIS OF VALUATION

Market Value

Market Value is defined as: -

The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction, after proper marketing and where the parties have each acted knowledgeably, prudently and without compulsion.

The definition of Market Value is applied in accordance with the following conceptual framework:

"The estimated amount" refers to a price expressed in terms of money payable for the asset in an arm's length market transaction. Market value is the most probable price reasonably obtainable in the market on the valuation date in keeping with the market value definition. It is the best price reasonably obtainable by the seller and the most advantageous price reasonably obtainable by the buyer. This estimate specifically excludes an estimated price inflated or deflated by special terms or circumstances such as atypical financing, sale and leaseback arrangements, special considerations or concessions granted by anyone associated with the sale, or any element of special value:

AN ASSET SHOULD EXCHANGE

"an asset should exchange" refers to the fact that the value of an asset is an estimated amount rather than a predetermined amount or actual sale price. It is the price in a transaction that meets all the elements of the market value definition at the valuation date;

ON THE VALUATION DATE

"on the valuation date" requires that the value is time specific as of a given date. Because markets and market conditions may change, the estimated value may be incorrect or inappropriate at another time. The valuation amount will reflect the market state and circumstances as at the valuation date, not those at any other date;

BETWEEN WILLING BUYER

"between a willing buyer" refers to one who is motivated, but not compelled to buy. This buyer is neither over eager nor determined to buy at any price. This buyer is also one who purchases in accordance with the realities of the current market and with current market expectations, rather than in relation to an imaginary or hypothetical market that cannot be demonstrated or anticipated to exist. The assumed buyer would not pay a higher price than the market requires. The present owner is included among those who constitute "the market";

AND
WILLING
SELLER

“**and a willing seller**” is neither an over eager nor a forced seller prepared to sell at any price, nor one prepared to hold out for a price not considered reasonable in the current market. The willing seller is motivated to sell the asset at market terms for the best price attainable in the open market after proper marketing, whatever that price may be. The factual circumstances of the actual owner are not a part of this consideration because the willing seller is a hypothetical owner;

IN AN ARM'S
LENGTH
TRANSACTION

“**in an arm's-length transaction**” is one between parties who do not have a particular or special relationship, eg parent and subsidiary companies or landlord and tenant, that may make the price level uncharacteristic of the market or inflated because of an element of special value. The market value transaction is presumed to be between unrelated parties, each acting independently;

AFTER
PROPER
MARKETING

“**after proper marketing**” means that the asset would be exposed to the market in the most appropriate manner to effect its disposal at the best price reasonably obtainable in accordance with the market value definition. The method of sale is deemed to be that most appropriate to obtain the best price in the market to which the seller has access. The length of exposure time is not a fixed period but will vary according to the type of asset and market conditions. The only criterion is that there must have been sufficient time to allow the asset to be brought to the attention of an adequate number of market participants. The exposure period occurs prior to the valuation date;

KNOWLEDGEABLY
AND
PRUDENTLY

‘**where the parties had each acted knowledgeably, prudently**’ presumes that both the willing buyer and the willing seller are reasonably informed about the nature and characteristics of the asset, its actual and potential uses and the state of the market as of the valuation date. Each is further presumed to use that knowledge prudently to seek the price that is most favorable for their respective positions in the transaction. Prudence is assessed by referring to the state of the market at the valuation date, not with benefit of hindsight at some later date. For example, it is not necessarily imprudent for a seller to sell assets in a market with falling prices at a price that is lower than previous market levels. In such cases, as is true for other exchanges in markets with changing prices, the prudent buyer or seller will act in accordance with the best market information available at the time;

AND
WITHOUT
COMPULSION

‘**and without compulsion**’ establishes that each party is motivated to undertake the transaction, but neither is forced or unduly coerced to complete it. Market value is the basis of value that is most commonly required, being an internationally recognized definition. It describes an exchange between parties that are unconnected (acting at arm's length) and are operating freely in the marketplace and represents the figure that would appear in a hypothetical contract of sale, or equivalent legal document, on the valuation date, reflecting all those factors that would be taken into account in framing their bids by market participants at large and reflecting the highest and best use of the asset. The highest and best use of an asset is the use of an asset that maximizes its productivity and that is possible, legally permissible and financially feasible. Market value is the estimated exchange price of an asset without regard to the seller's costs of sale or the buyer's costs of purchase and without adjustment for any taxes payable by either party as a direct result of the transaction.

1.4 CLIENT APPROVAL DATE

The client approval date reflects the green light given to us by the client to start the inspection procedures of the property / properties subject to the valuation process.

November 30, 2020.

1.5 INSPECTION DATE

The inspection date reflects the exact date of the property's inspection and the date of executed market survey. Yet, the outcome value of the subject property / properties will be based on the findings at the inspection date.

December 05, 2020.

1.6 VALUATION DATE

The Valuation date is the date on which the opinion of value/s applies. The date of valuation is the date were the value/s of the subject property / properties is reflected. The valuation date is at

December 31, 2020.

1.7 REPORT DATE

The valuation reports usually dated exactly as the valuation date. Yet, and in some cases, the report date can be after the valuation date depending on the nature, size and location of the subject property.

December 31, 2020.

1.8 OPINION OF VALUE

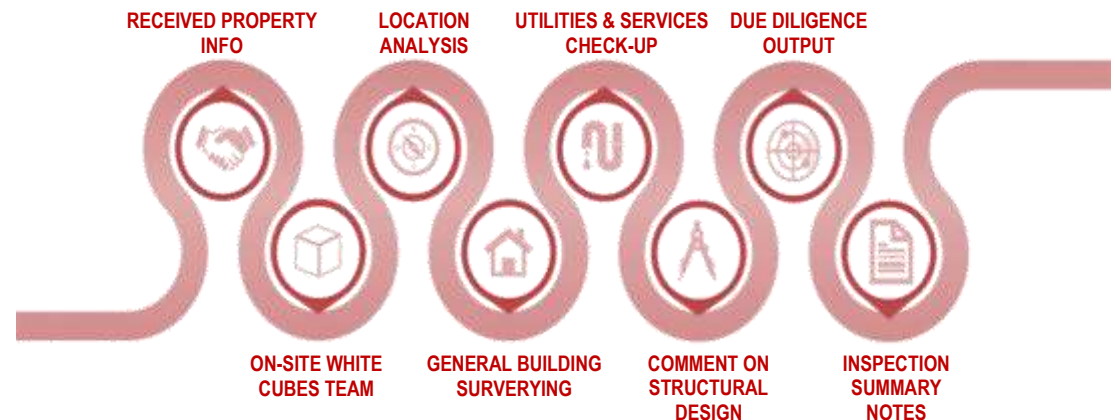

All the outputs will be shown in this report (Values) are based on our best knowledge of the market, documents received from the client (assumed to be correct), market findings and inspection inputs. Yet, the estimated values of the subject property / properties express our opinion of values based on the previously mentioned findings.

1.9 PURPOSE OF VALUATION

The client requested to know the current market value of the subject property for Real Estate Investment trust (REIT) Purposes. Therefore, and according to the valuation purpose, and as requested by the client, we will adapt the valuation methodologies of The Comparable Approach, The Income Approach & Depreciated Replacement Cost (DRC)

1.10 INSPECTION ROLE

A visit to a property or inspection of an asset, to examine it and obtain relevant information, in order to express a professional opinion of its value. We hereby confirm that we have inspected the subject property / Asset at the date of inspection. Our inspection procedure covers only the surface / boundaries / out layers of the property. No technical inspection has been made such as soil test, construction durability, etc. the following shows the findings from the inspection procedures.

1.11 MARKET SURVEY

During the site visit, our team has made the market survey for the immediate surrounding areas of the subject property to collect all the possible and related data to the valuation process. The collected data will be prices, rents, land offerings, properties transactions, etc. the collected data type will be according to the property data and the purpose of valuation.

PROPERTY DETAILS

1.12 PROPERTY & LOCATION DESCRIPTION

Property Description

The subject property is a hospitality tower composed of 23 floors and located in Al Aziziah district, Makkah City. Based on the provided copy of the title deed and the construction permit, the project has a total land area of 1,287.97 Sqm and a total BUA of 18,053 Sqm. As per the site inspection done by our team for the purpose of valuation, the property is open from two sides with a direct view on Masjid Al Haram Road from the west side. The tower is mostly surrounded by several residential and mix-use building where all infrastructural facilities such as water electricity, sewage and telecommunication are available in the surroundings and connected to the subject property.

Location Description

The property subject of valuation is a hospitality tower located in Al Aziziah district, Makkah City.
 The property is bordered from the north by a private property
 The property is bordered from the south by a private property
 The Property is bordered from the east by an internal street
 The property is bordered to the west by Masjid Al Haram Road

Ease of Access

Based on the current location of the subject property, the access level is high since it is located on Masjid Al Haram Road.

Area Surrounding the Property

The subject property is mostly surrounded by residential and mix-use buildings.

Land		Building	
Land Use	Commercial	Building Type	Hospitality Tower
No. of Streets	2	Building Structural Conditions	Fully Constructed

1.27 DOCUMENTS RECIEVED

The client has provided us by clear copy of the following documents.

Title Deed Copy ✓	Construction Permit ✓	Krooki
Master Plan	Layouts	3D Design & Perspectives
Pictures	Presentation of the subject property	Pilgrims Permit ✓
Location Link ✓	Contact Details ✓	Costing & Budget
Tenant List	Income & Revenues	Tourist Accommodation Operation License ✓

1.28 GENERAL ASSUMPTIONS

- The subject property is valued under the assumption of freehold status unless otherwise stated in the report.
- All the written and verbal information provided to us by the Client assumed to be up to date, complete and correct in relation to elements such as title deed, construction permits, land area, and any other relevant matters that are set out in the report.
- This report is a valuation report and not structural / building survey. Therefore, we did not carry out any structural due diligence, utilities check, services check, soil test, etc.
- All the inputs used in the valuation methodologies are based on the collected market data using our best know how and experience in the related market.
- The output of this report (Final Value), is based on the used assumptions, received documents from the client and available market data. Yet, the output estimates show an indicative value of the subject property / properties.

1.29 LEGAL NOTICES

We are not aware of and have not been notified of any legal notices on the property, whether they are ongoing or pending in the courts.

1.30 INFORMATION SOURCE

Referring to the purpose of this report, it has been assumed that all information received from the client, whether verbal or written, is up-to-date and correct. Our team conducted a field research in order to ensure the validity of some market information for the purpose of valuation, which included the values of assets in the region, occupancy rates and market information related to the asset being valued in order to reach the market value of the asset being valued. During the field research process, some sources were relied on as follows:

- The field survey prepared by us
- Site inspection done by our team
- Our historical database for the similar assets of the property being valued
- Sales agents specialized with the same type of assets subject to valuation

1.31 STRUCTURAL EXAMINATION OF BUILDINGS (IF ANY)

Our service’s scope does not include any technical testing of buildings and / or structural examinations and does not include any quality assurance of these constructions. However, in the event of any visible and observed deficiencies in the structural structure, we will write it down in our report and reflect such effect on the value.

1.32 VALUATION APPROACH

With reference to the valuation purpose, taking into consideration the nature of the subject property, we will use the following ticked methods to estimate the market value of the subject property:

	DRC	Comparable	Income Cap	DCF	RLV
Land	-----	✓	-----	-----	-----
Building	✓	-----	-----	-----	-----
Overall Property	-----	-----	✓	-----	-----

COMPARABLE METHOD

This is the method most are familiar with as it is the accepted method for valuing residential real estate. Typically, this method involves selecting properties with similar characteristics in the same market area that have recently sold. Once those properties are found they are compared to the property in question and a professional appraiser will deduct value from the subject property for comparative deficiencies and increase value for advantages. Typically, this method is required if the investor is seeking conventional financing. For comparable information, property brokers, dealers and estate agents are contacted to ascertain the asking and selling prices for property of the nature in the immediate neighborhood and adjoining areas. Neighboring properties, which have been recently sold or purchased, are investigated to ascertain a reasonable selling price.

DEPRECIATED REPLACEMENT COST (DRC)

A cost approach is a real estate valuation method that surmises that the price someone should pay for a piece of property should not exceed what someone would have to pay to build an equivalent building. In cost approach pricing, the market price for the property is equivalent to the cost of land plus cost of construction, less depreciation. It is often most accurate for market value when the property is new. Generally, the cost approach considers what the land, devoid of any structures, would cost, then adds the cost of building the structures, then depreciation is subtracted. The cost approach is most often used for public buildings, such as schools and churches, because it is difficult to find recently sold comparable properties in the local market, and public buildings do not earn income, so the income approach cannot be used, either. A property that already has improvements will usually contribute a certain amount of value to the site, but improvements can also lower property value if the site's potential buyers wish to use the property for another use that would entail removing some of the improvements to the current site. The cost approach is best used when improvements are new and there is adequate pricing information to value the property components. The cost approach may be less desirable if there are no recent sales of vacant land for which to compare, since the major method of valuing vacant lands is to use the sales comparison approach, or when construction costs are not readily available. The cost approach method includes:

- Estimate what the vacant property would be worth.
- Estimate the current cost of building the structures, then add that value to the value of the vacant land.
- Estimate the amount of accrued depreciation of the subject property, then subtract it from the total to arrive at the property's worth.

CAPITALIZATION METHOD (CAP RATE)

The income approach values property by the amount of income that it can potentially generate. Hence, this method is used for apartments, office buildings, malls, and other property that generates a regular income.

The appraiser calculates the income according to the following steps:

- Estimate the potential annual gross income by doing market studies to determine what the property could earn, which may not be the same as what it is currently earning.
- The effective gross income is calculated by subtracting the vacancy rate and rent loss as estimated by the appraiser using market studies.
- The net operating income (NOI) is then calculated by subtracting the annual operating expenses from the effective gross income. Annual operating expenses include real estate taxes, insurance, utilities, maintenance, repairs, advertising and management expenses. Management expenses are included even if the owner is going to manage it, since the owner incurs an opportunity cost by managing it herself. The cost of capital items is not included, since it is not an operating expense. Hence, it does not include mortgage and interest, since this is a debt payment on a capital item.

Estimate the capitalization rate (aka cap rate), which is the rate of return, or yield, that other investors of property are getting in the local market.

1.33 INPUT VALUATION PROCESS

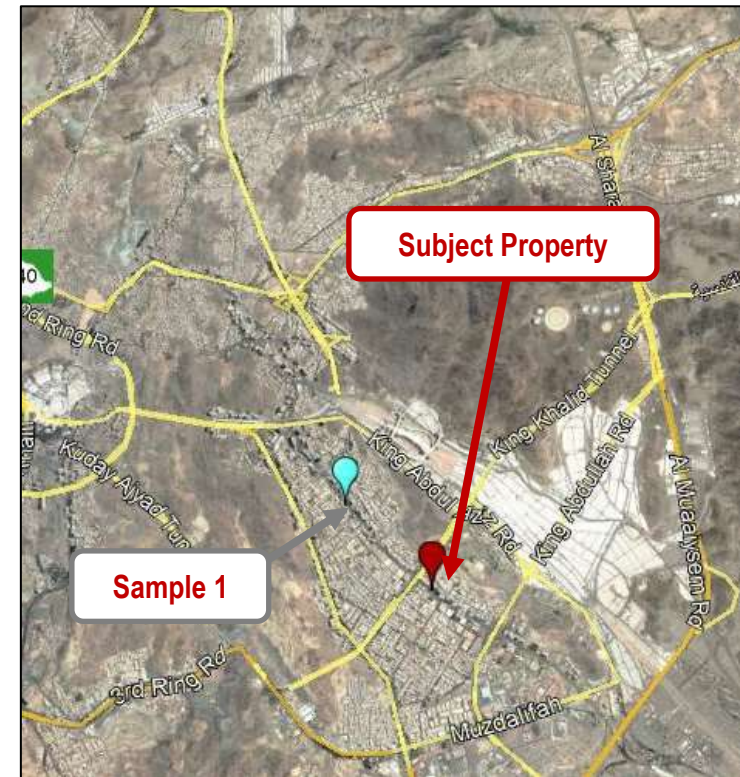

After carrying out the inspection process of the subject property, and based on the purpose of the valuation, we surveyed the surrounding area for the purpose of bringing in information related to the same sector to begin the actual assessment. This information may include similar land prices, residual values, income rates and other information that may be useful, depending on the assessment method to be followed in this report.

1.34 COMPARABLE APPROACH

This method aims to collect data and information on actual sales and / or current offers of similar properties within the surrounding market, and then make the necessary adjustments to these comparisons in terms of area, location, shape, quality, content and others. Below is a summary of the valuation process using the comparable method and the amendments made to the available comparisons

Characteristics of Samples

Property Value	SAR 53,321,958	SAR 56,284,289	SAR 59,246,620	SAR 62,208,951	SAR 65,171,282
	PROPERTY VALUE				

Based on the market samples obtained with the assistance of some real estate experts in the region and the inspection made by our team, the average prices for similar properties falls in the range of 40,000 - 50,000 SAR / Sqm with an average of 45,000 SAR / Sqm. When comparing with the results of the analysis of comparisons, we found that the property value falls within the same range and is close to the market average values.

1.35 COST APPROACH (DRC)

As a first step, the cost of reconstructing the building (the cost of replacement) was estimated, based on the average construction costs of similar properties and at the same level of finishes, services, utilities, and others. The opinion of some engineering experts was used in this regards. The following table shows the expected replacement costs for such property.

	Min Cost (SAR / Sqm)	Max Cost (SAR / Sqm)	Average Cost
Skeleton - Concrete Cost	SAR 900	SAR 1,100	SAR 1,000
MEP	SAR 450	SAR 550	SAR 500
Finishing Materials	SAR 900	SAR 1,100	SAR 1,000
Fit outs &Appliance	SAR 250	SAR 350	SAR 300
Furniture	SAR 750	SAR 850	SAR 800
Site Improvements	SAR 180	SAR 220	SAR 200
Owner Profit	28%	32%	30%

In the following table, we will estimate the direct replacement cost of the property taking into consideration the main components of the building, such as the concrete structure, electromechanical work, finishes, site improvements, etc. Then we will estimate the value of the indirect costs as a percentage of the total direct costs to estimate the total construction costs of the project

Others	SAR 63,746,602	0.00%	SAR 0.00
TOTAL			SAR 8,287,058.21

After knowing the total construction costs (Incl. Soft Costs) at a rate of 3,990 SAR per square meter, we will estimate the economic life of the property according to the type of construction and its general condition, then apply the depreciation rates based on the actual age of the property. The developer's profitability will be added to the property's value after depreciation to reflect the estimated market value of the building

DEVELOPMENT VALUE

Hard Cost	SAR 63,746,602	Economic Age	40
Soft Cost	SAR 8,287,058	Annual Dep Rate	2.50%
Total Dev Cost	SAR 72,033,660		
		Actual Age	7
Net Dep Rate	17.50%	Total Dep Rate	17.50%
Dev Cost After Depreciation	SAR 59,427,769	Add Appr Rate	0.00%
		Net Dep Rate	17.50%
Total Completion Rate	100.00%		
Developer Profit Rate @ 30%	30.0%		
Dev. Profit Amount	SAR 17,828,331		
Development Value	SAR 77,256,100		

The total value of the building is 77,256,100 SAR, which will be added to the value of the land in order to get the full value of the property as follows:

Total Dev. Value	Land Value	Total Property Value	Rounded Value
SAR 77,256,100	SAR 59,246,620	SAR 136,502,720	SAR 136,500,000

1.36 INCOME APPROACH- MARKET RATES

Market Rental Analysis

PILGRIMS – HAJJ SEASON

We have noted that the average market rate for the Hajj season in the surrounding areas of the subject property falls in the range of SAR 1,700 to SAR 2,000, which we have applied the rate of SAR 1,700 for conservative basis. In addition, and according to the market current performance, we have assumed 95% occupancy rate in Hajj season.

AVERAGE DAILY RATE (ADR) – RAMADAN SEASON (20 DAYS)

The Average Daily Rates for the hospitality sector depend on the category of the property itself (no of Stars). The average ADR falls in the range of SAR 200 to SAR 250 as rooms daily rates for the first 20 days of Ramadan Season. In addition, and according to the market current performance, we have assumed 70% occupancy rate for the same mentioned season.

AVERAGE DAILY RATE (ADR) – RAMADAN SEASON (10 DAYS)

The average ADR of the last 10 days of Ramadan season falls in the range of SAR 300 to SAR 400 in the surrounding areas of the subject property, in addition to occupancy rate of 80%.

AVERAGE DAILY RATE (ADR) – OTHER SEASONS

The overall estimated occupancy rate of the hospitality sector in Makkah for the remaining days of the year, and in the year of 2020, is almost 40%. Same rate will be applied on the subject property with an ADR of SAR 180 / Night.

Analysis of Operating and Maintenance Expenses

The operating expenses of similar properties reached between 10% to 20% of the total expected income for the property. These ratios depend on the condition and quality of the property and the type of services and public facilities available in the property itself. These ratios are divided into several main categories as follows:

Management expenses	5% to 7%
Operating and maintenance expenses	5% to 6%
General service bills expenses	3% to 4%
Other incidental expenses	2% to 3%

Property Operation and Maintenance Expenses

The owner did not provide us with details of the actual maintenance and operation costs of the project and accordingly market averages for similar projects will be assumed. Therefore, we will apply the rate of 15% as the OPEX which will be calculated from the total revenues of the property. This ratio is based on the condition and quality of the property and the type of services and public facilities available in the property itself.

Market Capitalization Rate Analysis

Based on recent transactions of real estate properties and funds, the average capitalization rate of acquiring such property falls in the range of 7% to 8%. This average is mainly driven by several factors such as the quality of the building, finishing materials, the general location, ease of access, actual age of the property, size of the project, and the extent of income stability in it. In addition to the above, the capitalization rates are also affected directly by the supply and demand rates for the same type of real estate

The Capitalization Rate Used for the Valuation

With regard to the capitalization rate used in the valuation, we will base our analysis on the average capitalization rates based on the market and then make some adjustments based on the property situation in terms of its characteristics, location and some other important elements.

Minimum capitalization rate				7%
Maximum capitalization rate				8%
Average				7.50%
The effect of the property specifications on the property				
Item	Status	Influence	Notes	
Ease of access to the property	-----	0.00%	several major methods	
General condition of the property	-----	0.25%	The actual age of the property is 7 years	
The general location of the property	-----	-0.25%	The area is served good	
Quality and finishes	-----	0.00%	Good quality finishes	
Project Management Team	-----	-0.25%	Excellent management and operational team level	
Services and public facilities	-----	0.00%	level and availability of services is average	
Total		-0.25%		
<i>Note: When the effect is negative (-), this reduces the capitalization rate, which increases the value of the property. And when the effect is positive (+), this increases the capitalization rate, which reduces the value of the property</i>				
Total adjustments on capitalization rate		-0.25%		
Capitalization rate, according to market averages		7.50%		
Estimated capitalization rate of the property valuation		7.25%		

With regard to the capitalization rate used in the valuation, we will rely on the averages of the capitalization rate by market and then make some adjustments based on the real estate situation in terms of the following:

- Easy access to the property
- The general condition of the property
- The general location of the property
- Quality of finishes
- Quality and presence of management team
- Services and public utilities

The estimated capitalization rate for the property, which will be based on the valuation process, is 7.25%, which will be applied subsequently to the net operating income of the property.

Based on the above, the value of the property using the income capitalization method is as follows:

REVENUES						
	Quantity		Revenues			
Season Type	Unit	Quantity	Rate	Revenue Type	No of Days	Total Revenues
Hajj Season	Pilgrims	1,868	SAR 1,700	Seasonal	10	SAR 3,175,600

1.37 INCOME APPROACH- LEASING CONTRACT

Market Rental Analysis

As per the received copy of the leasing contract, the subject property is fully leased to one tenant with an annual triple net lease of SAR 12,825,000. As for the OPEX rate, which is being paid by the Tenant, no expenses were calculated.

Market Capitalization Rate Analysis

Based on recent transactions of real estate properties and funds, the average capitalization rate of acquiring such property falls in the range of 7% to 8%. This average is mainly driven by several factors such as the quality of the building, finishing materials, the general location, ease of access, actual age of the property, size of the project, and the extent of income stability in it. In addition to the above, the capitalization rates are also affected directly by the supply and demand rates for the same type of real estate

The Capitalization Rate Used for the Valuation

With regard to the capitalization rate used in the valuation, we will base our analysis on the average capitalization rates based on the market and then make some adjustments based on the property situation in terms of its characteristics, location and some other important elements.

Minimum capitalization rate				7%	With regard to the capitalization rate used in the valuation, we will rely on the averages of the capitalization rate by market and then make some adjustments based on the real estate situation in terms of the following: - Easy access to the property - The general condition of the property - The general location of the property - Quality of finishes - Quality and presence of management team - Services and public utilities
Maximum capitalization rate				8%	
Average				7.50%	
The effect of the property specifications on the property					
Item	Status	Influence	Notes		
Ease of access to the property	-----	0.00%	several major methods		
General condition of the property	-----	0.25%	The actual age of the property is 7 years		
The general location of the property	-----	0.00%	The area is served good		
Quality and finishes	-----	0.00%	Good quality finishes		
Project Management Team	-----	0.00%	Good management and operational team level		
Stronghold tenant	-----	-0.25%	level and availability of services is average		
Total		0.00%			
<i>Note: When the effect is negative (-), this reduces the capitalization rate, which increases the value of the property. And when the effect is positive (+), this increases the capitalization rate, which reduces the value of the property</i>					
Total adjustments on capitalization rate		0.00%			The estimated capitalization rate for the property, which will be based on the valuation process, is 7.5%, which will be applied subsequently to the net operating income of the property.
Capitalization rate, according to market averages		7.50%			
Estimated capitalization rate of the property valuation		7.50%			

Based on the above, the value of the property using the income capitalization method is as follows:

REVENUES					
Unit Type	Quantity	Revenues

Net Operating Income					SAR 12,825,000.00
Net Operating Income	Cap Rate	Property Value		Rounded Value	
SAR 12,825,000.00	7.50%	171,000,000.00 SAR		171,000,000.00 SAR	

1.38 SUBJECT PROPERTY VALUE IN DIFFERENT APPROACHES

Methodology	Subject of Valuation	Value in Numbers	Value in Letters
Income- Market	Property	SAR 155,700,000	One Hundred Fifty-Five Million and Seven Hundred Thousand Saudi Riyals
Income- Actual	Property	SAR 171,000,000	One Hundred Seventy-One Million Saudi Riyals
DRC Approach	Land + Building	SAR 136,500,000	One Hundred Thirty-Six Million and Five Hundred Thousand Saudi Riyals

1.39 VALUATION NOTES

The achieved value from the income approach is based the leasing contract. In case there were modifications in the contract value and terms between the owner and the tenant, this may cause a direct impact on the final value of the subject property based on the Income approach.

1.40 SUBJECT PROPERTY VALUE

We are of an opinion that the total market value of the subject property taking into consideration the purpose of valuation by using the Income Approach based on the leasing contract is:

Property Value: 171,000,000 SAR
One Hundred Seventy-One Million Saudi Riyals

1.41 REPORT USE

This valuation is for the sole use of the named Client. This report is confidential to the Client, and that of their advisors, and we accept no responsibility whatsoever to any third party. No responsibility is accepted to any third party who may use or rely upon the whole or any part of the contents of this report. It should be noted that any subsequent amendments or changes in any form thereto will only be notified to the Client to whom it is authorized.

1.42 DISCLAIMER

In undertaking and executing this assignment, extreme care and precaution has been exercised. This report is based on the information supplied by the bank and or the owner/s of the property. The values may differ or vary periodically due to various unforeseen factors beyond our control such as supply and demand, inflation, local policies and tariffs, poor maintenance, variation in costs of various inputs, etc. It is beyond the scope of our services to ensure the consistency in values due to changing scenarios.

1.43 CONCLUSION

We trust that this report and valuation fulfills the requirement of your instruction. The contents, formats, methodology and criteria outlined in this report are pending copyright. This report is compiled based on the information received to the best of our belief, knowledge and understanding. The information revealed in this report is strictly confidential and issued for the consideration of the client. The valuer's approval is required in writing to reproduce this report either electronically or otherwise and for further onward distribution, hence no part of this report may be copied without prior consent. We trust that this report and valuation fulfills the requirement of your instruction. The contents, formats, methodology and criteria outlined in this report are pending copyright.

GENERAL NOTES

1.44 CONSULTANT STATUS

We confirm that the consultant / valuator has no physical contact or affiliation with the original subject matter of valuation or with the client and can provide objective, unbiased valuation. We confirm that the valuator is competent to carry out the valuation task and has sufficient skills and market knowledge concerned to conduct the valuation.

1.45 DISCLOSING CONFLICT OF INTEREST

We affirm that we are completely independent of the customer and the subject of the valuation, and nothing contained in this agreement must be interpreted as constituting any relationship with the customer except for the normal official relationship of work, or that it aims to establish any business relationship whatsoever between the customer and Whitecubes employees. We also confirm that we do not have any conflicts of interest with the customer's property. We would like to draw your attention to the following:

*The subject property was previously valued by White Cubes
 White Cubes was previously involved in selling activities related to the property
 White Cubes was previously involved in advisory services related to the property*

No	If Yes		Remarks
	Client	Date

1.46 CONFIDENTIALITY

This document and / or any other documents received from the client are confidential between White Cubes Est. and the client. Except as may be required by any court or authority, the subject service shall not disclose or use or cause to be disclosed or used, at any time during the Term.

Any of the Client's secrets and/or confidential information, any other non-public information relating to the client business, financial or other affairs acquired by the subject service during the process remain confidential.

1.47 ENVIRONMENTAL MATTERS

We are not aware of the content of any environmental audit or other environmental investigation or soil survey which may have been carried out on the property and which may draw attention to any contamination or the possibility of any such contamination.

In undertaking our work, we have been instructed to assume that no contaminative or potentially contaminative use has ever been carried out on the property.

We have not carried out any investigation into past or present uses, either of the properties or of any neighboring land, to establish whether there is any contamination or potential for contamination to the subject properties from the use or site and have therefore assumed that none exists.

However, should it be established subsequently that contamination exists at the properties or on any neighboring land, or that the premises has been or is being put to any contaminative use, this might reduce the value now reported.

Land Area (Sqm)	Based on the title deed, the land has an area size of 1,458 Sqm
BUA (Sqm)	The building is composed of 18 floors with a total BUA of 15,200.71 Sqm
No. of Rooms	The total number of rooms is 255 Rooms
Pilgrim's Capacity	1286 Pilgrims
Vacancy Rate	The property is fully leased to 1 tenant with a triple net of 13,500,000 SAR
Valuation Approach	Comparable Approach, Cost Approach & Income Approach
Final Property Value	180,000,000 SAR
Valuation Date	31/12/2020
Inspection Date	05/12/2020

TERMS OF REFERENCE & VALUATION

1.2 VALUATION REFERENCE

This report was prepared based on the instructions issued to us by Muscat Capital (the customer) to estimate the market value of the property / real estate that is the subject of this report for the mentioned purpose only. This report may not be used for other purposes. The valuation was prepared in accordance to the regulations and standards issued by the Saudi Authority of Accredited Valuers and the International valuation Standards of the Council of International Assessment Standards (IVSC).

1.3 BASIS OF VALUATION

Market Value

Market Value is defined as: -

The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction, after proper marketing and where the parties have each acted knowledgeably, prudently and without compulsion.

The definition of Market Value is applied in accordance with the following conceptual framework:

"The estimated amount" refers to a price expressed in terms of money payable for the asset in an arm's length market transaction. Market value is the most probable price reasonably obtainable in the market on the valuation date in keeping with the market value definition. It is the best price reasonably obtainable by the seller and the most advantageous price reasonably obtainable by the buyer. This estimate specifically excludes an estimated price inflated or deflated by special terms or circumstances such as atypical financing, sale and leaseback arrangements, special considerations or concessions granted by anyone associated with the sale, or any element of special value:

AN ASSET SHOULD EXCHANGE

"an asset should exchange" refers to the fact that the value of an asset is an estimated amount rather than a predetermined amount or actual sale price. It is the price in a transaction that meets all the elements of the market value definition at the valuation date;

ON THE VALUATION DATE

"on the valuation date" requires that the value is time specific as of a given date. Because markets and market conditions may change, the estimated value may be incorrect or inappropriate at another time. The valuation amount will reflect the market state and circumstances as at the valuation date, not those at any other date;

BETWEEN WILLING BUYER

"between a willing buyer" refers to one who is motivated, but not compelled to buy. This buyer is neither over eager nor determined to buy at any price. This buyer is also one who purchases in accordance with the realities of the current market and with current market expectations, rather than in relation to an imaginary or hypothetical market that cannot be demonstrated or anticipated to exist. The assumed buyer would not pay a higher price than the market requires. The present owner is included among those who constitute "the market";

AND
WILLING
SELLER

“**and a willing seller**” is neither an over eager nor a forced seller prepared to sell at any price, nor one prepared to hold out for a price not considered reasonable in the current market. The willing seller is motivated to sell the asset at market terms for the best price attainable in the open market after proper marketing, whatever that price may be. The factual circumstances of the actual owner are not a part of this consideration because the willing seller is a hypothetical owner;

IN AN ARM'S
LENGTH
TRANSACTION

“**in an arm's-length transaction**” is one between parties who do not have a particular or special relationship, eg parent and subsidiary companies or landlord and tenant, that may make the price level uncharacteristic of the market or inflated because of an element of special value. The market value transaction is presumed to be between unrelated parties, each acting independently;

AFTER
PROPER
MARKETING

“**after proper marketing**” means that the asset would be exposed to the market in the most appropriate manner to effect its disposal at the best price reasonably obtainable in accordance with the market value definition. The method of sale is deemed to be that most appropriate to obtain the best price in the market to which the seller has access. The length of exposure time is not a fixed period but will vary according to the type of asset and market conditions. The only criterion is that there must have been sufficient time to allow the asset to be brought to the attention of an adequate number of market participants. The exposure period occurs prior to the valuation date;

KNOWLEDGEABLY
AND
PRUDENTLY

‘**where the parties had each acted knowledgeably, prudently**’ presumes that both the willing buyer and the willing seller are reasonably informed about the nature and characteristics of the asset, its actual and potential uses and the state of the market as of the valuation date. Each is further presumed to use that knowledge prudently to seek the price that is most favorable for their respective positions in the transaction. Prudence is assessed by referring to the state of the market at the valuation date, not with benefit of hindsight at some later date. For example, it is not necessarily imprudent for a seller to sell assets in a market with falling prices at a price that is lower than previous market levels. In such cases, as is true for other exchanges in markets with changing prices, the prudent buyer or seller will act in accordance with the best market information available at the time;

AND
WITHOUT
COMPULSION

‘**and without compulsion**’ establishes that each party is motivated to undertake the transaction, but neither is forced or unduly coerced to complete it. Market value is the basis of value that is most commonly required, being an internationally recognized definition. It describes an exchange between parties that are unconnected (acting at arm's length) and are operating freely in the marketplace and represents the figure that would appear in a hypothetical contract of sale, or equivalent legal document, on the valuation date, reflecting all those factors that would be taken into account in framing their bids by market participants at large and reflecting the highest and best use of the asset. The highest and best use of an asset is the use of an asset that maximizes its productivity and that is possible, legally permissible and financially feasible. Market value is the estimated exchange price of an asset without regard to the seller's costs of sale or the buyer's costs of purchase and without adjustment for any taxes payable by either party as a direct result of the transaction.

1.4 CLIENT APPROVAL DATE

The client approval date reflects the green light given to us by the client to start the inspection procedures of the property / properties subject to the valuation process.

November 30, 2020.

1.5 INSPECTION DATE

The inspection date reflects the exact date of the property’s inspection and the date of executed market survey. Yet, the outcome value of the subject property / properties will be based on the findings at the inspection date.

December 05, 2020.

1.6 VALUATION DATE

The Valuation date is the date on which the opinion of value/s applies. The date of valuation is the date were the value/s of the subject property / properties is reflected. The valuation date is at

December 31, 2020.

1.7 REPORT DATE

The valuation reports usually dated exactly as the valuation date. Yet, and in some cases, the report date can be after the valuation date depending on the nature, size and location of the subject property.

December 31, 2020.

1.8 OPINION OF VALUE

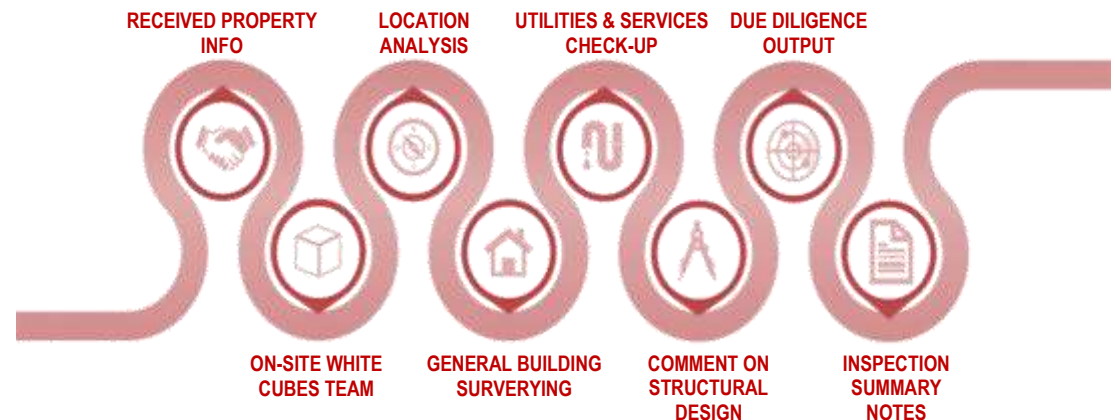

All the outputs will be shown in this report (Values) are based on our best knowledge of the market, documents received from the client (assumed to be correct), market findings and inspection inputs. Yet, the estimated values of the subject property / properties express our opinion of values based on the previously mentioned findings.

1.9 PURPOSE OF VALUATION

The client requested to know the current market value of the subject property for Real Estate Investment trust (REIT) Purposes. Therefore, and according to the valuation purpose, and as requested by the client, we will adapt the valuation methodologies of The Comparable Approach, The Income Approach & Depreciated Replacement Cost (DRC)

1.10 INSPECTION ROLE

A visit to a property or inspection of an asset, to examine it and obtain relevant information, in order to express a professional opinion of its value. We hereby confirm that we have inspected the subject property / Asset at the date of inspection. Our inspection procedure covers only the surface / boundaries / out layers of the property. No technical inspection has been made such as soil test, construction durability, etc. the following shows the findings from the inspection procedures.

1.11 MARKET SURVEY

During the site visit, our team has made the market survey for the immediate surrounding areas of the subject property to collect all the possible and related data to the valuation process. The collected data will be prices, rents, land offerings, properties transactions, etc. the collected data type will be according to the property data and the purpose of valuation.

PROPERTY DETAILS

1.12 PROPERTY & LOCATION DESCRIPTION

Property Description

The subject property is a hospitality tower composed of 18 floors and located in Al Aziziah district, Makkah City. Based on the provided copy of the title deed and the construction permit, the project has a total land area of 1,458 Sqm and a total BUA of 15,200.71 Sqm. As per the site inspection done by our team for the purpose of valuation, the property is open from 2 sides with a direct view on Masjid Al Haram Road from the southern side. The tower is mostly surrounded by several residential and mix-use building where all infrastructural facilities such as water electricity, sewage and telecommunication are available in the surroundings and connected to the subject property.

Location Description

The property subject of valuation is a hospitality tower located in Al Aziziah district, Makkah City.
 The property is bordered from the north by a private property
 The property is bordered from the south by Masjid Al Haram Road
 The Property is bordered from the east by Al Tamour Street
 The property is bordered to the west by a private property

Ease of Access

Based on the current location of the subject property, the access level is high since it is located on Masjid Al Haram Road.

Area Surrounding the Property

The subject property is mostly surrounded by residential and mix-use buildings.

1.26 DOCUMENTS RECIEVED

The client has provided us by clear copy of the following documents.

Title Deed Copy ✓	Construction Permit ✓	Krooki
Master Plan	Layouts	3D Design & Perspectives
Pictures	Presentation of the subject property	Pilgrims Permit
Location Link ✓	Contact Details ✓	Costing & Budget
Tenant List	Income & Revenues	Operational Cost - OPEX

1.27 GENERAL ASSUMPTIONS

- The subject property is valued under the assumption of freehold status unless otherwise stated in the report.
- All the written and verbal information provided to us by the Client assumed to be up to date, complete and correct in relation to elements such as title deed, construction permits, land area, and any other relevant matters that are set out in the report.
- This report is a valuation report and not structural / building survey. Therefore, we did not carry out any structural due diligence, utilities check, services check, soil test, etc.
- All the inputs used in the valuation methodologies are based on the collected market data using our best know how and experience in the related market.
- The output of this report (Final Value), is based on the used assumptions, received documents from the client and available market data. Yet, the output estimates show an indicative value of the subject property / properties.

1.28 LEGAL NOTICES

We are not aware of and have not been notified of any legal notices on the property, whether they are ongoing or pending in the courts.

1.29 INFORMATION SOURCE

Referring to the purpose of this report, it has been assumed that all information received from the client, whether verbal or written, is up-to-date and correct. Our team conducted a field research in order to ensure the validity of some market information for the purpose of valuation, which included the values of assets in the region, occupancy rates and market information related to the asset being valued in order to reach the market value of the asset being valued. During the field research process, some sources were relied on as follows:

- The field survey prepared by us
- Site inspection done by our team
- Our historical database for the similar assets of the property being valued
- Sales agents specialized with the same type of assets subject to valuation

1.30 STRUCTURAL EXAMINATION OF BUILDINGS (IF ANY)

Our service’s scope does not include any technical testing of buildings and / or structural examinations and does not include any quality assurance of these constructions. However, in the event of any visible and observed deficiencies in the structural structure, we will write it down in our report and reflect such effect on the value.

1.31 VALUATION APPROACH

With reference to the valuation purpose, taking into consideration the nature of the subject property, we will use the following ticked methods to estimate the market value of the subject property:

	DRC	Comparable	Income Cap	DCF	RLV
Land	-----	✓	-----	-----	-----
Building	✓	-----	-----	-----	-----
Overall Property	-----	-----	✓	-----	-----

COMPARABLE METHOD

This is the method most are familiar with as it is the accepted method for valuing residential real estate. Typically, this method involves selecting properties with similar characteristics in the same market area that have recently sold. Once those properties are found they are compared to the property in question and a professional appraiser will deduct value from the subject property for comparative deficiencies and increase value for advantages. Typically, this method is required if the investor is seeking conventional financing. For comparable information, property brokers, dealers and estate agents are contacted to ascertain the asking and selling prices for property of the nature in the immediate neighborhood and adjoining areas. Neighboring properties, which have been recently sold or purchased, are investigated to ascertain a reasonable selling price.

DEPRECIATED REPLACEMENT COST (DRC)

A cost approach is a real estate valuation method that surmises that the price someone should pay for a piece of property should not exceed what someone would have to pay to build an equivalent building. In cost approach pricing, the market price for the property is equivalent to the cost of land plus cost of construction, less depreciation. It is often most accurate for market value when the property is new. Generally, the cost approach considers what the land, devoid of any structures, would cost, then adds the cost of building the structures, then depreciation is subtracted. The cost approach is most often used for public buildings, such as schools and churches, because it is difficult to find recently sold comparable properties in the local market, and public buildings do not earn income, so the income approach cannot be used, either. A property that already has improvements will usually contribute a certain amount of value to the site, but improvements can also lower property value if the site's potential buyers wish to use the property for another use that would entail removing some of the improvements to the current site. The cost approach is best used when improvements are new and there is adequate pricing information to value the property components. The cost approach may be less desirable if there are no recent sales of vacant land for which to compare, since the major method of valuing vacant lands is to use the sales comparison approach, or when construction costs are not readily available. The cost approach method includes:

- Estimate what the vacant property would be worth.
- Estimate the current cost of building the structures, then add that value to the value of the vacant land.
- Estimate the amount of accrued depreciation of the subject property, then subtract it from the total to arrive at the property's worth.

CAPITALIZATION METHOD (CAP RATE)

The income approach values property by the amount of income that it can potentially generate. Hence, this method is used for apartments, office buildings, malls, and other property that generates a regular income.

The appraiser calculates the income according to the following steps:

- Estimate the potential annual gross income by doing market studies to determine what the property could earn, which may not be the same as what it is currently earning.
- The effective gross income is calculated by subtracting the vacancy rate and rent loss as estimated by the appraiser using market studies.
- The net operating income (NOI) is then calculated by subtracting the annual operating expenses from the effective gross income. Annual operating expenses include real estate taxes, insurance, utilities, maintenance, repairs, advertising and management expenses. Management expenses are included even if the owner is going to manage it, since the owner incurs an opportunity cost by managing it herself. The cost of capital items is not included, since it is not an operating expense. Hence, it does not include mortgage and interest, since this is a debt payment on a capital item.

Estimate the capitalization rate (aka cap rate), which is the rate of return, or yield, that other investors of property are getting in the local market.

1.32 INPUT VALUATION PROCESS

After carrying out the inspection process of the subject property, and based on the purpose of the valuation, we surveyed the surrounding area for the purpose of bringing in information related to the same sector to begin the actual assessment. This information may include similar land prices, residual values, income rates and other information that may be useful, depending on the assessment method to be followed in this report.

1.33 COMPARABLE APPROACH

This method aims to collect data and information on actual sales and / or current offers of similar properties within the surrounding market, and then make the necessary adjustments to these comparisons in terms of area, location, shape, quality, content and others. Below is a summary of the valuation process using the comparable method and the amendments made to the available comparisons

Property Value	SAR 65,413,170	SAR 69,047,235	SAR 72,681,300	SAR 76,315,365	SAR 79,949,430
	PROPERTY VALUE				

Based on the market samples obtained with the assistance of some real estate experts in the region and the inspection made by our team, the average prices for similar properties falls in the range of 45,000 - 55,000 SAR / Sqm with an average of 50,000 SAR / Sqm. When comparing with the results of the analysis of comparisons, we found that the property value falls within the same range and is close to the market average values.

1.34 COST APPROACH (DRC)

As a first step, the cost of reconstructing the building (the cost of replacement) was estimated, based on the average construction costs of similar properties and at the same level of finishes, services, utilities, and others. The opinion of some engineering experts was used in this regards. The following table shows the expected replacement costs for such property.

	Min Cost (SAR / Sqm)	Max Cost (SAR / Sqm)	Average Cost
Skeleton - Concrete Cost	SAR 900	SAR 1,100	SAR 1,000
MEP	500	700	SAR 600
Finishing Materials	900	SAR 1,100	SAR 1,000
Fit outs & Appliance	SAR 250	SAR 350	SAR 300
Furniture	SAR 750	SAR 850	SAR 800
Site Improvements	380	420	400
Owner Profit	18%	22%	20%

In the following table, we will estimate the direct replacement cost of the property taking into consideration the main components of the building, such as the concrete structure, electromechanical work, finishes, site improvements, etc. Then we will estimate the value of the indirect costs as a percentage of the total direct costs to estimate the total construction costs of the project

				Overall Completion	100.00%

After knowing the total construction costs (Incl. Soft Costs) at a rate of 4,116 SAR per square meter, we will estimate the economic life of the property according to the type of construction and its general condition, then apply the depreciation rates based on the actual age of the property. The developer's profitability will be added to the property's value after depreciation to reflect the estimated market value of the building

DEVELOPMENT VALUE			
Hard Cost	SAR 55,120,530	Economic Age	40
Soft Cost	SAR 7,441,272	Annual Dep Rate	2.50%
Total Dev Cost	SAR 62,561,802		
Net Dep Rate	15.00%	Actual Age	6
Dev Cost After Depreciation	SAR 53,177,531	Total Dep Rate	15.00%
		Add Appr Rate	0.00%
		Net Dep Rate	15.00%
Total Completion Rate	100.00%		
Developer Profit Rate @ 20%	20.0%		
Dev. Profit Amount	SAR 10,635,506		
Development Value	SAR 63,813,038		

The total value of the building is 63,808,563 SAR, which will be added to the value of the land in order to get the full value of the property as follows:

Total Dev. Value	Land Value	Total Property Value	Rounded Value
SAR 63,813,038	SAR 72,681,300	SAR 136,494,338	SAR 136,500,000

1.35 INCOME APPROACH- MARKET RATES

Market Rental Analysis

PILGRIMS – HAJJ SEASON

We have noted that the average market rate for the Hajj season in the surrounding areas of the subject property falls in the range of SAR 1,900 to SAR 2,100, which we have applied the rate of SAR 2,000 for conservative basis. In addition, and according to the market current performance, we have assumed 95% occupancy rate in Hajj season.

AVERAGE DAILY RATE (ADR) – RAMADAN SEASON (20 DAYS)

The Average Daily Rates for the hospitality sector depend on the category of the property itself (no of Stars). Since the subject property is a 4 stars project, the average ADR falls in the range of SAR 300 to SAR 350 as rooms daily rates for the first 20 days of Ramadan Season. In addition, and according to the market current performance, we have assumed 75% occupancy rate for the same mentioned season.

AVERAGE DAILY RATE (ADR) – RAMADAN SEASON (10 DAYS)

The average ADR of the last 10 days of Ramadan season falls in the range of SAR 400 to SAR 500 in the surrounding areas of the subject property, in addition to occupancy rate of 85%.

AVERAGE DAILY RATE (ADR) – OTHER SEASONS

The overall estimated occupancy rate of the hospitality sector in Makkah for the remaining days of the year, and in the year of 2020, is almost 50%. Same rate will be applied on the subject property with an ADR of SAR 225 / Night.

Analysis of Operating and Maintenance Expenses

The operating expenses of similar properties reached between 10% to 20% of the total expected income for the property. These ratios depend on the condition and quality of the property and the type of services and public facilities available in the property itself. These ratios are divided into several main categories as follows:

Management expenses	5% to 7%
Operating and maintenance expenses	5% to 6%
General service bills expenses	3% to 4%
Other incidental expenses	2% to 3%

Property Operation and Maintenance Expenses

The owner did not provide us with details of the actual maintenance and operation costs of the project and accordingly market averages for similar projects will be assumed. Therefore, we will apply the rate of 15% as the OPEX which will be calculated from the total revenues of the property. This ratio is based on the condition and quality of the property and the type of services and public facilities available in the property itself.

Market Capitalization Rate Analysis

Based on recent transactions of real estate properties and funds, the average capitalization rate of acquiring such property falls in the range of 7% to 8%. This average is mainly driven by several factors such as the quality of the building, finishing materials, the general location, ease of access, actual age of the property, size of the project, and the extent of income stability in it. In addition to the above, the capitalization rates are also affected directly by the supply and demand rates for the same type of real estate

The Capitalization Rate Used for the Valuation

With regard to the capitalization rate used in the valuation, we will base our analysis on the average capitalization rates based on the market and then make some adjustments based on the property situation in terms of its characteristics, location and some other important elements.

Minimum capitalization rate				7%
Maximum capitalization rate				8%
Average				7.50%
The effect of the property specifications on the property				
Item	Status	Influence	Notes	
Ease of access to the property	-----	0.00%	several major methods	
General condition of the property	-----	0.25%	The actual age of the property is 6 years	
The general location of the property	-----	-0.25%	The area is served good	
Quality and finishes	-----	0.00%	Good quality finishes	
Project Management Team	-----	-0.25%	Excellent management and operational team level	
Services and public facilities	-----	0.00%	level and availability of services is average	
Total		-0.25%		
<i>Note: When the effect is negative (-), this reduces the capitalization rate, which increases the value of the property. And when the effect is positive (+), this increases the capitalization rate, which reduces the value of the property</i>				
Total adjustments on capitalization rate		-0.25%		
Capitalization rate, according to market averages		7.50%		
Estimated capitalization rate of the property valuation		7.25%		

With regard to the capitalization rate used in the valuation, we will rely on the averages of the capitalization rate by market and then make some adjustments based on the real estate situation in terms of the following:

- Easy access to the property
- The general condition of the property
- The general location of the property
- Quality of finishes
- Quality and presence of management team
- Services and public utilities

The estimated capitalization rate for the property, which will be based on the valuation process, is 7.25%, which will be applied subsequently to the net operating income of the property.

Based on the above, the value of the property using the income capitalization method is as follows:

REVENUES						
Quantity			Revenues			
Season Type	Unit	Quantity	Rate	Revenue Type	No of Days	Total Revenues

1.36 INCOME APPROACH- LEASING CONTRACT

Market Rental Analysis

As per the received copy of the leasing contract, the subject property is fully leased to one tenant with an annual triple net lease of SAR 13,500,000. As for the OPEX rate, which is being paid by the Tenant, no expenses were calculated.

Market Capitalization Rate Analysis

Based on recent transactions of real estate properties and funds, the average capitalization rate of acquiring such property falls in the range of 7% to 8%. This average is mainly driven by several factors such as the quality of the building, finishing materials, the general location, ease of access, actual age of the property, size of the project, and the extent of income stability in it. In addition to the above, the capitalization rates are also affected directly by the supply and demand rates for the same type of real estate

The Capitalization Rate Used for the Valuation

With regard to the capitalization rate used in the valuation, we will base our analysis on the average capitalization rates based on the market and then make some adjustments based on the property situation in terms of its characteristics, location and some other important elements.

Minimum capitalization rate				7%
Maximum capitalization rate				8%
Average				7.50%
The effect of the property specifications on the property				
Item	Status	Influence	Notes	
Ease of access to the property	-----	0.00%	Several major methods	
General condition of the property	-----	0.00%	The actual age of the property is 6 years	
The general location of the property	-----	0.00%	The area is served good	
Quality and finishes	-----	0.00%	Good quality finishes	
Project Management Team	-----	0.00%	Good management and operational team level	
Stronghold tenant	-----	0.00%	Level and availability of services is average	
Total		0.00%		
<i>Note: When the effect is negative (-), this reduces the capitalization rate, which increases the value of the property. And when the effect is positive (+), this increases the capitalization rate, which reduces the value of the property</i>				
Total adjustments on capitalization rate		0.00%		
Capitalization rate, according to market averages		7.50%		
Estimated capitalization rate of the property valuation		7.50%		

With regard to the capitalization rate used in the valuation, we will rely on the averages of the capitalization rate by market and then make some adjustments based on the real estate situation in terms of the following:

- Easy access to the property
- The general condition of the property
- The general location of the property
- Quality of finishes
- Quality and presence of management team
- Services and public utilities

The estimated capitalization rate for the property, which will be based on the valuation process, is 7.5%, which will be applied subsequently to the net operating income of the property.

Based on the above, the value of the property using the income capitalization method is as follows:

REVENUES					
Unit Type	Quantity	Revenues			
Unit Type	Total GLA	No Of Units	SAR / Sqm	SAR / Unit	Total Revenues

Net Operating Income					SAR 13,500,000.00
Net Operating Income	Cap Rate	Property Value		Rounded Value	
SAR 13,500,000.00	7.50%	180,000,000.00 SAR		180,000,000.00 SAR	

1.37 SUBJECT PROPERTY VALUE IN DIFFERENT APPROACHES

Methodology	Subject of Valuation	Value in Numbers	Value in Letters
Income- Market	Property	SAR 161,100,000	One Hundred Sixty-One Million and One Hundred Thousand Saudi Riyals
Income- Actual	Property	SAR 180,000,000	One Hundred Eighty Million Saudi Riyals
DRC Approach	Land + Building	SAR 136,500,000	One Hundred Thirty-Six Million and Five Hundred Thousand Saudi Riyals

1.38 VALUATION NOTES

- We have noted that all the values, prices and occupancy rates have been affected negatively by 5% to 10% due to the current situation arising from the Covid-19's pandemic.
- The achieved value from the income approach is based the leasing contract. In case there were modifications in the contract value and terms between the owner and the tenant, this may cause a direct impact on the final value of the subject property based on the Income approach.

1.39 SUBJECT PROPERTY VALUE

We are of an opinion that the total market value of the subject property taking into consideration the purpose of valuation by using the Income Approach based on the leasing contract is:

Property Value: 180,000,000 SAR
One Hundred Eighty Million Saudi Riyals

1.40 REPORT USE

This valuation is for the sole use of the named Client. This report is confidential to the Client, and that of their advisors, and we accept no responsibility whatsoever to any third party. No responsibility is accepted to any third party who may use or rely upon the whole or any part of the contents of this report. It should be noted that any subsequent amendments or changes in any form thereto will only be notified to the Client to whom it is authorized.

1.41 DISCLAIMER

In undertaking and executing this assignment, extreme care and precaution has been exercised. This report is based on the information supplied by the bank and or the owner/s of the property. The values may differ or vary periodically due to various unforeseen factors beyond our control such as supply and demand, inflation, local policies and tariffs, poor maintenance, variation in costs of various inputs, etc. It is beyond the scope of our services to ensure the consistency in values due to changing scenarios.

1.42 CONCLUSION

We trust that this report and valuation fulfills the requirement of your instruction. The contents, formats, methodology and criteria outlined in this report are pending copyright. This report is compiled based on the information received to the best of our belief, knowledge and understanding. The information revealed in this report is strictly confidential and issued for the consideration of the client. The valuer's approval is required in writing to reproduce this report either electronically or otherwise and for further onward distribution, hence no part of this report may be copied without prior consent. We trust that this report and valuation fulfills the requirement of your instruction. The contents, formats, methodology and criteria outlined in this report are pending copyright.

GENERAL NOTES

1.43 CONSULTANT STATUS

We confirm that the consultant / valuator has no physical contact or affiliation with the original subject matter of valuation or with the client and can provide objective, unbiased valuation. We confirm that the valuator is competent to carry out the valuation task and has sufficient skills and market knowledge concerned to conduct the valuation.

1.44 DISCLOSING CONFLICT OF INTEREST

We affirm that we are completely independent of the customer and the subject of the valuation, and nothing contained in this agreement must be interpreted as constituting any relationship with the customer except for the normal official relationship of work, or that it aims to establish any business relationship whatsoever between the customer and Whitecubes employees. We also confirm that we do not have any conflicts of interest with the customer's property. We would like to draw your attention to the following:

*The subject property was previously valued by White Cubes
 White Cubes was previously involved in selling activities related to the property
 White Cubes was previously involved in advisory services related to the property*

No	If Yes		Remarks
	Client	Date	
✓	Muscat Capital	June 2020	-----

1.45 CONFIDENTIALITY

This document and / or any other documents received from the client are confidential between White Cubes Est. and the client. Except as may be required by any court or authority, the subject service shall not disclose or use or cause to be disclosed or used, at any time during the Term.

Any of the Client's secrets and/or confidential information, any other non-public information relating to the client business, financial or other affairs acquired by the subject service during the process remain confidential.

1.46 ENVIRONMENTAL MATTERS

We are not aware of the content of any environmental audit or other environmental investigation or soil survey which may have been carried out on the property and which may draw attention to any contamination or the possibility of any such contamination.

In undertaking our work, we have been instructed to assume that no contaminative or potentially contaminative use has ever been carried out on the property.

We have not carried out any investigation into past or present uses, either of the properties or of any neighboring land, to establish whether there is any contamination or potential for contamination to the subject properties from the use or site and have therefore assumed that none exists.

However, should it be established subsequently that contamination exists at the properties or on any neighboring land, or that the premises has been or is being put to any contaminative use, this might reduce the value now reported.

TERMS OF REFERENCE & VALUATION

1.2 VALUATION REFERENCE

This report was prepared based on the instructions issued to us by Muscat Capital (the customer) to estimate the market value of the property / real estate that is the subject of this report for the mentioned purpose only. This report may not be used for other purposes. The valuation was prepared in accordance to the regulations and standards issued by the Saudi Authority of Accredited Valuers and the International valuation Standards of the Council of International Assessment Standards (IVSC).

1.3 BASIS OF VALUATION

Market Value

Market Value is defined as: -

The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction, after proper marketing and where the parties have each acted knowledgeably, prudently and without compulsion.

The definition of Market Value is applied in accordance with the following conceptual framework:

"The estimated amount" refers to a price expressed in terms of money payable for the asset in an arm's length market transaction. Market value is the most probable price reasonably obtainable in the market on the valuation date in keeping with the market value definition. It is the best price reasonably obtainable by the seller and the most advantageous price reasonably obtainable by the buyer. This estimate specifically excludes an estimated price inflated or deflated by special terms or circumstances such as atypical financing, sale and leaseback arrangements, special considerations or concessions granted by anyone associated with the sale, or any element of special value:

AN ASSET SHOULD EXCHANGE

"an asset should exchange" refers to the fact that the value of an asset is an estimated amount rather than a predetermined amount or actual sale price. It is the price in a transaction that meets all the elements of the market value definition at the valuation date;

ON THE VALUATION DATE

"on the valuation date" requires that the value is time specific as of a given date. Because markets and market conditions may change, the estimated value may be incorrect or inappropriate at another time. The valuation amount will reflect the market state and circumstances as at the valuation date, not those at any other date;

BETWEEN WILLING BUYER

"between a willing buyer" refers to one who is motivated, but not compelled to buy. This buyer is neither over eager nor determined to buy at any price. This buyer is also one who purchases in accordance with the realities of the current market and with current market expectations, rather than in relation to an imaginary or hypothetical market that cannot be demonstrated or anticipated to exist. The assumed buyer would not pay a higher price than the market requires. The present owner is included among those who constitute "the market";

AND
WILLING
SELLER

“**and a willing seller**” is neither an over eager nor a forced seller prepared to sell at any price, nor one prepared to hold out for a price not considered reasonable in the current market. The willing seller is motivated to sell the asset at market terms for the best price attainable in the open market after proper marketing, whatever that price may be. The factual circumstances of the actual owner are not a part of this consideration because the willing seller is a hypothetical owner;

IN AN ARM'S
LENGTH
TRANSACTION

“**in an arm's-length transaction**” is one between parties who do not have a particular or special relationship, eg parent and subsidiary companies or landlord and tenant, that may make the price level uncharacteristic of the market or inflated because of an element of special value. The market value transaction is presumed to be between unrelated parties, each acting independently;

AFTER
PROPER
MARKETING

“**after proper marketing**” means that the asset would be exposed to the market in the most appropriate manner to effect its disposal at the best price reasonably obtainable in accordance with the market value definition. The method of sale is deemed to be that most appropriate to obtain the best price in the market to which the seller has access. The length of exposure time is not a fixed period but will vary according to the type of asset and market conditions. The only criterion is that there must have been sufficient time to allow the asset to be brought to the attention of an adequate number of market participants. The exposure period occurs prior to the valuation date;

KNOWLEDGEABLY
AND
PRUDENTLY

‘**where the parties had each acted knowledgeably, prudently**’ presumes that both the willing buyer and the willing seller are reasonably informed about the nature and characteristics of the asset, its actual and potential uses and the state of the market as of the valuation date. Each is further presumed to use that knowledge prudently to seek the price that is most favorable for their respective positions in the transaction. Prudence is assessed by referring to the state of the market at the valuation date, not with benefit of hindsight at some later date. For example, it is not necessarily imprudent for a seller to sell assets in a market with falling prices at a price that is lower than previous market levels. In such cases, as is true for other exchanges in markets with changing prices, the prudent buyer or seller will act in accordance with the best market information available at the time;

AND
WITHOUT
COMPULSION

‘**and without compulsion**’ establishes that each party is motivated to undertake the transaction, but neither is forced or unduly coerced to complete it. Market value is the basis of value that is most commonly required, being an internationally recognized definition. It describes an exchange between parties that are unconnected (acting at arm's length) and are operating freely in the marketplace and represents the figure that would appear in a hypothetical contract of sale, or equivalent legal document, on the valuation date, reflecting all those factors that would be taken into account in framing their bids by market participants at large and reflecting the highest and best use of the asset. The highest and best use of an asset is the use of an asset that maximizes its productivity and that is possible, legally permissible and financially feasible. Market value is the estimated exchange price of an asset without regard to the seller's costs of sale or the buyer's costs of purchase and without adjustment for any taxes payable by either party as a direct result of the transaction.

1.4 CLIENT APPROVAL DATE

The client approval date reflects the green light given to us by the client to start the inspection procedures of the property / properties subject to the valuation process.

November 30, 2020.

1.5 INSPECTION DATE

The inspection date reflects the exact date of the property’s inspection and the date of executed market survey. Yet, the outcome value of the subject property / properties will be based on the findings at the inspection date.

December 05, 2020.

1.6 VALUATION DATE

The Valuation date is the date on which the opinion of value/s applies. The date of valuation is the date were the value/s of the subject property / properties is reflected. The valuation date is at

December 31, 2020.

1.7 REPORT DATE

The valuation reports usually dated exactly as the valuation date. Yet, and in some cases, the report date can be after the valuation date depending on the nature, size and location of the subject property.

December 31, 2020.

1.8 OPINION OF VALUE

All the outputs will be shown in this report (Values) are based on our best knowledge of the market, documents received from the client (assumed to be correct), market findings and inspection inputs. Yet, the estimated values of the subject property / properties express our opinion of values based on the previously mentioned findings.

1.9 PURPOSE OF VALUATION

The client requested to know the current market value of the subject property for Real Estate Investment trust (REIT) Purposes. Therefore, and according to the valuation purpose, and as requested by the client, we will adapt the valuation methodologies of The Comparable Approach, The Income Approach & Depreciated Replacement Cost (DRC)

1.10 INSPECTION ROLE

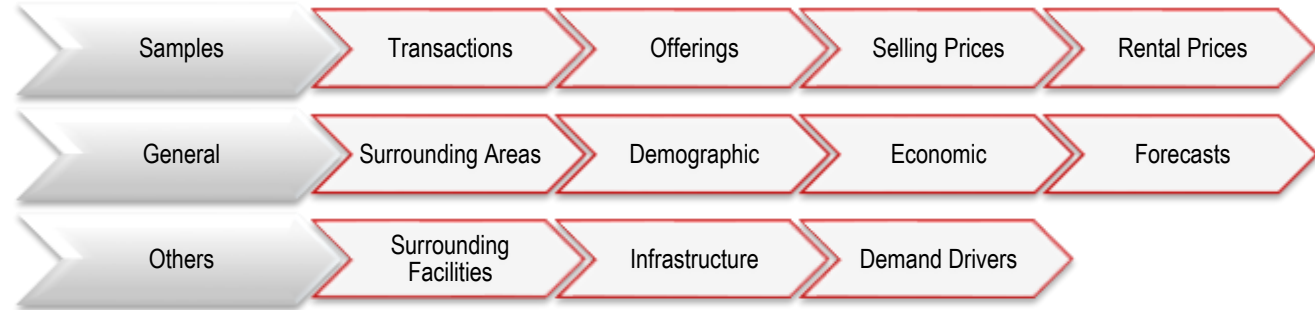

A visit to a property or inspection of an asset, to examine it and obtain relevant information, in order to express a professional opinion of its value. We hereby confirm that we have inspected the subject property / Asset at the date of inspection. Our inspection procedure covers only the surface / boundaries / out layers of the property. No technical inspection has been made such as soil test, construction durability, etc. the following shows the findings from the inspection procedures.

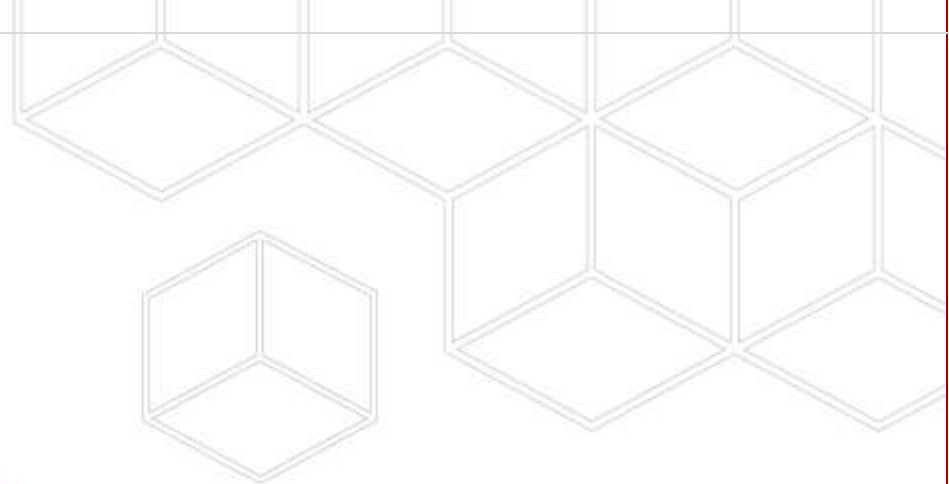

1.11 MARKET SURVEY

During the site visit, our team has made the market survey for the immediate surrounding areas of the subject property to collect all the possible and related data to the valuation process. The collected data will be prices, rents, land offerings, properties transactions, etc. the collected data type will be according to the property data and the purpose of valuation.

PROPERTY DETAILS

1.12 PROPERTY & LOCATION DESCRIPTION

Property Description

The subject property is a hospitality tower composed of 20 floors and located in Prince Abdullah Faisal district, Makkah City. Based on the provided copy of the title deed and the construction permit, the project has a total land area of 1,382.73 Sqm and a total BUA of 19,905 Sqm. As per the site inspection done by our team for the purpose of valuation, the property is open from 1 side with a direct view on Al Rida Street from the west side. The tower is mostly surrounded by several residential and mix-use building where all infrastructural facilities such as water electricity, sewage and telecommunication are available in the surroundings and connected to the subject property.

Location Description

The property subject of valuation is a hospitality tower located in Prince Abdullah Faisal district, Makkah City. The property is bordered from the north by a private property
The property is bordered from the south by a private property
The Property is bordered from the east by a private property
The property is bordered to the west by Al Rida Street

Ease of Access

Based on the current location of the subject property, the access level is medium since it is located near Al Hajj Road.

Area Surrounding the Property

The subject property is mostly surrounded by residential and mix-use buildings.

Land		Building	
Land Use	Commercial	Building Type	Hospitality Tower
No. of Streets	1	Building Structural Conditions	Fully Constructed
Land Shape	Graded	External Elevation Conditions	Good
Direct View on the Main Road	No Direct View on the main road	Building Finishing Conditions	Good
Direct View on an Internal Street	Al Rida Street	Overall Building Conditions	Good
Land Condition	Constructed		

1.13 INFRASTRUCTURE FACILITIES

	Available in the surrounding	Connected to the property
Water	✓	✓
Electricity	✓	✓
Tele-Communication	✓	✓
Sewage	✓	✓

All the infrastructural facilities are available in the surroundings and connected to the subject property.

1.14 LOCATION

The subject property is located in Prince Abdullah Faisal district, Makkah city and surrounded by several landmarks as follows:

Property Location on a City Scale

Property Location on a District Scale

Surrounding Landmarks

- | | |
|---|--|
| <ul style="list-style-type: none"> 1- Faculty Alchp (0.5 Kilometre) 2- Makarim Albait (0.7 Kilometre) 3- Al Saad Flower Hotel 3 (0.5 Kilometre) 4- Retaj Al Rayyan (0.9 Kilometre) 5- King Faisal Hospital (0.6 Kilometre) | <ul style="list-style-type: none"> 6- Zajil (0.7 Kilometre) 7- Jarir Bookstore (1 Kilometre) 8- Bin Dawood Shisha (1 Kilometre) 9- Makkah Province Emirate (1.1 Kilometres) 10- Noor (1.2 Kilometres) |

1.15 PROPERTY ACCESS

The subject property can be accessed as shown in the map below:

1.16 TITLE DEED & OWNERSHIP

We were provided with copy of the title deed related to the subject property which is owned by one title deed. The details of the subject property:

City	Makkah	Land Area	1,382.73
District	Prince Abdullah Faisal	Plot No.	166
T.D Type	Electronic	Block No.	N/A
T.D Number	920121009575	Layout No.	1/15/23/ب
T.D Date	09/04/1439 H. D	Owner	Machaer REIT For Real Estate
T.D Value	182,400,000	Ownership Type	FreeHold
Date of Last Transaction Issued From	N/A Makkah Notary	Limitation of Document	N/A
North Side	Private Property	East Side	Private Property
South Side	Private Property	West Side	Al Rida Street

Notes The client has provided us with copy of the Title Deed which was assumed to be correct and authentic. It is not in our scope to run legal diagnosis on any legal document.

1.17 CONSTRUCTION & BUILDINGS

The building permit indicates the maximum permissible BUA approved by the city municipality. However, the actual area may differ from the area mentioned in the building permit. Therefore, if the customer did not provide us with a copy of the approved plans, the valuation will be done based on the building permit provided by the customer. In the event that the customer does not provide us with a copy of the legal documents that show the total building surfaces, we will valuate them using the skills of our team along with the municipality's laws and regulations, and therefore the building surfaces will be estimated only roughly.

1.18 PILGRIMS PERMIT

The client has provided us with copy of the pilgrims permit which was assumed to be correct and authentic. We must note that it is not in our scope to run legal diagnoses to any legal document. The details are shown below:

Pilgrims Permit	
Permit No.	13702
Permit Issuance Date	02/07/1434 H. D
Total Number of Rooms	428
Number of Pilgrims	1976
Number of Elevators	6
Number of Internal Emergency Staircases	3
Number of Electrical Generators	1
Means of Safety Available in the property	
Automatic Sprinkler System	Fire Alarm System
Fire Extinguishing System	Fire Pump

1.19 PHOTO RECORD

1.20 STATUS & CONDITION

The subject property is a fully constructed hospitality tower. It is composed of 20 floors in total, 14 of which are typical residential floors with a total capacity of 428 rooms units. It has six elevators and three internal emergency staircases. The property is equipped with variety of safety means such as an automatic sprinkler system, fire alarm system, fire extinguishing system and a fire pump.

1.21 INSURANCE

We have not been provided with any insurance policy for the underlying asset.

1.24 SWOT ANALYSIS

Strength <ul style="list-style-type: none"> - Good quality of finishing - Newly Constructed Project 	Weakness <ul style="list-style-type: none"> - No direct view on the main road - It is open on 1 side only
Opportunities <ul style="list-style-type: none"> - High demand of hospitality project due to the nature of the city 	Threats <ul style="list-style-type: none"> - Existing and upcoming hospitality projects - High Competition in the area

The strength and weakness points mentioned above are considered as an indicator only, where no full market study was conducted in this matter. Yet, all the mentioned points are based only on the site inspection of the subject property.

1.25 SECTOR BRIEF

In the following we will insert general information about the real estate sector related to the property subject of our valuation and which is intended to give an initial indication on the sector. These information and indicators are estimated based on our experience, the current sector performance and some other historical data collected from our side, In addition to some current economic changes in general.

- Indicator showing a decrease in the current performance comparing to the last year
- Indicator showing an increase in the current performance comparing to the last year
- Indicator showing a stable position in the current performance comparing to the last year

PROPERTY VALUATION

1.27 DOCUMENTS RECEIVED

The client has provided us by clear copy of the following documents.

Title Deed Copy ✓	Construction Permit ✓	Krooki
Master Plan	Layouts	3D Design & Perspectives
Pictures	Presentation of the subject property	Pilgrims Permit ✓
Location Link ✓	Contact Details ✓	Costing & Budget
Tenant List	Income & Revenues	Operational Cost - OPEX

1.28 GENERAL ASSUMPTIONS

- The subject property is valued under the assumption of freehold status unless otherwise stated in the report.
- All the written and verbal information provided to us by the Client assumed to be up to date, complete and correct in relation to elements such as title deed, construction permits, land area, and any other relevant matters that are set out in the report.
- This report is a valuation report and not structural / building survey. Therefore, we did not carry out any structural due diligence, utilities check, services check, soil test, etc.
- All the inputs used in the valuation methodologies are based on the collected market data using our best know how and experience in the related market.
- The output of this report (Final Value), is based on the used assumptions, received documents from the client and available market data. Yet, the output estimates show an indicative value of the subject property / properties.

1.29 LEGAL NOTICES

We are not aware of and have not been notified of any legal notices on the property, whether they are ongoing or pending in the courts.

1.30 INFORMATION SOURCE

Referring to the purpose of this report, it has been assumed that all information received from the client, whether verbal or written, is up-to-date and correct. Our team conducted a field research in order to ensure the validity of some market information for the purpose of valuation, which included the values of assets in the region, occupancy rates and market information related to the asset being valued in order to reach the market value of the asset being valued. During the field research process, some sources were relied on as follows:

- The field survey prepared by us
- Site inspection done by our team
- Our historical database for the similar assets of the property being valued
- Sales agents specialized with the same type of assets subject to valuation

1.31 STRUCTURAL EXAMINATION OF BUILDINGS (IF ANY)

Our service’s scope does not include any technical testing of buildings and / or structural examinations and does not include any quality assurance of these constructions. However, in the event of any visible and observed deficiencies in the structural structure, we will write it down in our report and reflect such effect on the value.

1.32 VALUATION APPROACH

With reference to the valuation purpose, taking into consideration the nature of the subject property, we will use the following ticked methods to estimate the market value of the subject property:

	DRC	Comparable	Income Cap	DCF	RLV
Land	-----	✓	-----	-----	-----
Building	✓	-----	-----	-----	-----
Overall Property	-----	-----	✓	-----	-----

COMPARABLE METHOD

This is the method most are familiar with as it is the accepted method for valuing residential real estate. Typically, this method involves selecting properties with similar characteristics in the same market area that have recently sold. Once those properties are found they are compared to the property in question and a professional appraiser will deduct value from the subject property for comparative deficiencies and increase value for advantages. Typically, this method is required if the investor is seeking conventional financing. For comparable information, property brokers, dealers and estate agents are contacted to ascertain the asking and selling prices for property of the nature in the immediate neighborhood and adjoining areas. Neighboring properties, which have been recently sold or purchased, are investigated to ascertain a reasonable selling price.

DEPRECIATED REPLACEMENT COST (DRC)

A cost approach is a real estate valuation method that surmises that the price someone should pay for a piece of property should not exceed what someone would have to pay to build an equivalent building. In cost approach pricing, the market price for the property is equivalent to the cost of land plus cost of construction, less depreciation. It is often most accurate for market value when the property is new. Generally, the cost approach considers what the land, devoid of any structures, would cost, then adds the cost of building the structures, then depreciation is subtracted. The cost approach is most often used for public buildings, such as schools and churches, because it is difficult to find recently sold comparable properties in the local market, and public buildings do not earn income, so the income approach cannot be used, either. A property that already has improvements will usually contribute a certain amount of value to the site, but improvements can also lower property value if the site's potential buyers wish to use the property for another use that would entail removing some of the improvements to the current site. The cost approach is best used when improvements are new and there is adequate pricing information to value the property components. The cost approach may be less desirable if there are no recent sales of vacant land for which to compare, since the major method of valuing vacant lands is to use the sales comparison approach, or when construction costs are not readily available. The cost approach method includes:

- Estimate what the vacant property would be worth.
- Estimate the current cost of building the structures, then add that value to the value of the vacant land.
- Estimate the amount of accrued depreciation of the subject property, then subtract it from the total to arrive at the property's worth.

CAPITALIZATION METHOD (CAP RATE)

The income approach values property by the amount of income that it can potentially generate. Hence, this method is used for apartments, office buildings, malls, and other property that generates a regular income.

The appraiser calculates the income according to the following steps:

- Estimate the potential annual gross income by doing market studies to determine what the property could earn, which may not be the same as what it is currently earning.
- The effective gross income is calculated by subtracting the vacancy rate and rent loss as estimated by the appraiser using market studies.
- The net operating income (NOI) is then calculated by subtracting the annual operating expenses from the effective gross income. Annual operating expenses include real estate taxes, insurance, utilities, maintenance, repairs, advertising and management expenses. Management expenses are included even if the owner is going to manage it, since the owner incurs an opportunity cost by managing it herself. The cost of capital items is not included, since it is not an operating expense. Hence, it does not include mortgage and interest, since this is a debt payment on a capital item.

Estimate the capitalization rate (aka cap rate), which is the rate of return, or yield, that other investors of property are getting in the local market.

1.33 INPUT VALUATION PROCESS

After carrying out the inspection process of the subject property, and based on the purpose of the valuation, we surveyed the surrounding area for the purpose of bringing in information related to the same sector to begin the actual assessment. This information may include similar land prices, residual values, income rates and other information that may be useful, depending on the assessment method to be followed in this report.

1.34 COST APPROACH (DRC)

As a first step, we did not find samples similar to the property's land in terms of area, nature, etc. Yet, we have conducted a market survey in addition to interviews with several real estate agents and found that the square meter's value fall between 13,500 & 14,500 SAR/ Sqm. We will base our valuation analysis on the average rate 14,100 SAR/ Sqm.

SENSITIVITY ANALYSIS					
	-10%	-5%	0%	5%	10%
Land Area	1,000	1,000	1,000	1,000	1,000
SAR / Sqm	SAR 12,690.0	SAR 13,395.0	SAR 14,100.0	SAR 14,805.0	SAR 15,510.0
Property Value	SAR 12,690,000	SAR 13,395,000	SAR 14,100,000	SAR 14,805,000	SAR 15,510,000
	PROPERTY VALUE				

As a second step, the cost of reconstructing the building (the cost of replacement) was estimated, based on the average construction costs of similar properties and at the same level of finishes, services, utilities, and others. The opinion of some engineering experts was used in this regards. The following table shows the expected replacement costs for such property.

	Min Cost (SAR / Sqm)	Max Cost (SAR / Sqm)	Average Cost
Skeleton - Concrete Cost	SAR 900	SAR 1,100	SAR 1,000
MEP	SAR 450	SAR 550	SAR 500
Finishing Materials	SAR 900	SAR 1,100	SAR 1,000
Fit outs &Appliance	SAR 250	SAR 350	SAR 300
Furniture	SAR 750	SAR 850	SAR 800
Site Improvements	280	320	300
Owner Profit	28%	32%	30%

In the following table, we will estimate the direct replacement cost of the property taking into consideration the main components of the building, such as the concrete structure, electromechanical work, finishes, site improvements, etc. Then we will estimate the value of the indirect costs as a percentage of the total direct costs to estimate the total construction costs of the project

TOTAL			SAR 8,153,795.14

After knowing the total construction costs (Incl. Soft Costs) at a rate of 3,941 SAR per square meter, we will estimate the economic life of the property according to the type of construction and its general condition, then apply the depreciation rates based on the actual age of the property. The developer's profitability will be added to the property's value after depreciation to reflect the estimated market value of the building

DEVELOPMENT VALUE

Hard Cost	SAR 70,291,337	Economic Age	50
Soft Cost	SAR 8,153,795	Annual Dep Rate	2.00%
Total Dev Cost	SAR 78,445,133		
		Actual Age	7
Net Dep Rate	14.00%	Total Dep Rate	14.00%
Dev Cost After Depreciation	SAR 67,462,814	Add Appr Rate	0.00%
		Net Dep Rate	14.00%
Total Completion Rate	100.00%		
Developer Profit Rate @ 20%	30.0%		
Dev. Profit Amount	SAR 20,238,844		
Development Value	SAR 87,701,658		

The total value of the building is 87,702,662 SAR, which will be added to the value of the land in order to get the full value of the property as follows:

Total Dev. Value	Land Value	Total Property Value	Rounded Value
SAR 87,702,662	SAR 19,500,300	SAR 107,202,962	SAR 107,200,000

1.35 INCOME APPROACH- MARKET RATES

Market Rental Analysis

PILGRIMS – HAJJ SEASON

We have noted that the average market rate for the Hajj season in the surrounding areas of the subject property falls in the range of SAR 1,650 to SAR 1,750, which we have applied the rate of SAR 1,700 for conservative basis. In addition, and according to the market current performance, we have assumed 95% occupancy rate in Hajj season.

AVERAGE DAILY RATE (ADR) – RAMADAN SEASON (20 DAYS)

The Average Daily Rates for the hospitality sector depend on the category of the property itself (no of Stars). The average ADR falls in the range of SAR 130 to SAR 190 as rooms daily rates for the first 20 days of Ramadan Season. In addition, and according to the market current performance, we have assumed 80% occupancy rate for the same mentioned season.

AVERAGE DAILY RATE (ADR) – RAMADAN SEASON (10 DAYS)

The average ADR of the last 10 days of Ramadan season falls in the range of SAR 200 to SAR 400 in the surrounding areas of the subject property, in addition to occupancy rate of 90%.

AVERAGE DAILY RATE (ADR) – OTHER SEASONS

The overall estimated occupancy rate of the hospitality sector in Makkah for the remaining days of the year, and in the year of 2020, is almost 45%. Yet we have assumed 45% occupancy rate due to the property's location with an ADR of SAR 130 / Night.

Analysis of Operating and Maintenance Expenses

The operating expenses of similar properties reached between 10% to 20% of the total expected income for the property. These ratios depend on the condition and quality of the property and the type of services and public facilities available in the property itself. These ratios are divided into several main categories as follows:

Management expenses	5% to 7%
Operating and maintenance expenses	5% to 6%
General service bills expenses	3% to 4%
Other incidental expenses	2% to 3%

Property Operation and Maintenance Expenses

The owner did not provide us with details of the actual maintenance and operation costs of the project and accordingly market averages for similar projects will be assumed. Therefore, we will apply the rate of 15% as the OPEX which will be calculated from the total revenues of the property. This ratio is based on the condition and quality of the property and the type of services and public facilities available in the property itself.

Market Capitalization Rate Analysis

Based on recent transactions of real estate properties and funds, the average capitalization rate of acquiring such property falls in the range of 7% to 8%. This average is mainly driven by several factors such as the quality of the building, finishing materials, the general location, ease of access, actual age of the property, size of the project, and the extent of income stability in it. In addition to the above, the capitalization rates are also affected directly by the supply and demand rates for the same type of real estate

The Capitalization Rate Used for the Valuation

With regard to the capitalization rate used in the valuation, we will base our analysis on the average capitalization rates based on the market and then make some adjustments based on the property situation in terms of its characteristics, location and some other important elements.

Minimum capitalization rate				7%
Maximum capitalization rate				8%
Average				7.50%
The effect of the property specifications on the property				
Item	Status	Influence	Notes	
Ease of access to the property	-----	0.00%	several major methods	
General condition of the property	-----	0.25%	The actual age of the property is 7 years	
The general location of the property	-----	-0.25%	The area is served good	
Quality and finishes	-----	0.00%	Good quality finishes	
Project Management Team	-----	-0.25%	Excellent management and operational team level	
Services and public facilities	-----	0.00%	level and availability of services is average	
Total		-0.25%		
<i>Note: When the effect is negative (-), this reduces the capitalization rate, which increases the value of the property. And when the effect is positive (+), this increases the capitalization rate, which reduces the value of the property</i>				
Total adjustments on capitalization rate		-0.25%		
Capitalization rate, according to market averages		7.50%		
Estimated capitalization rate of the property valuation		7.25%		

With regard to the capitalization rate used in the valuation, we will rely on the averages of the capitalization rate by market and then make some adjustments based on the real estate situation in terms of the following:

- Easy access to the property
- The general condition of the property
- The general location of the property
- Quality of finishes
- Quality and presence of management team
- Services and public utilities

The estimated capitalization rate for the property, which will be based on the valuation process, is 7.25%, which will be applied subsequently to the net operating income of the property.

Based on the above, the value of the property using the income capitalization method is as follows:

REVENUES						
Season Type	Unit	Quantity	Rate	Revenue Type	No of Days	Total Revenues
Hajj Season	Pilgrims	1,976	SAR 1,700	Seasonal	10	SAR 3,359,200

SAR 11,238,770.00	7.25%	155,017,517.24 SAR		155,000,000.00 SAR		

1.36 INCOME APPROACH- LEASING CONTRACT

Market Rental Analysis

As per the received copy of the leasing contract, the subject property is fully leased to one tenant with an annual triple net lease of SAR 12,312,000. As for the OPEX rate, which is being paid by the Tenant, no expenses were calculated.

Market Capitalization Rate Analysis

Based on recent transactions of real estate properties and funds, the average capitalization rate of acquiring such property falls in the range of 7% to 8%. This average is mainly driven by several factors such as the quality of the building, finishing materials, the general location, ease of access, actual age of the property, size of the project, and the extent of income stability in it. In addition to the above, the capitalization rates are also affected directly by the supply and demand rates for the same type of real estate

The Capitalization Rate Used for the Valuation

With regard to the capitalization rate used in the valuation, we will base our analysis on the average capitalization rates based on the market and then make some adjustments based on the property situation in terms of its characteristics, location and some other important elements.

Minimum capitalization rate		7%
Maximum capitalization rate		8%
Average		7.50%
The effect of the property specifications on the property		
Item	Influence	Notes
Ease of access to the property	0.00%	several major methods
General condition of the property	0.25%	The actual age of the property is 7 years
The general location of the property	0.00%	The area is served good
Quality and finishes	0.00%	Good quality finishes
Project Management Team	0.00%	Good management and operational team level
Tenant Status	-0.25%	Stronghold tenant
Total	0.00%	
<i>Note: When the effect is negative (-), this reduces the capitalization rate, which increases the value of the property. And when the effect is positive (+), this increases the capitalization rate, which reduces the value of the property</i>		
Total adjustments on capitalization rate	0.00%	
Capitalization rate, according to market averages	7.50%	
Estimated capitalization rate of the property valuation	7.50%	

With regard to the capitalization rate used in the valuation, we will rely on the averages of the capitalization rate by market and then make some adjustments based on the real estate situation in terms of the following:

- Easy access to the property
- The general condition of the property
- The general location of the property
- Quality of finishes
- Quality and presence of management team
- Services and public utilities

The estimated capitalization rate for the property, which will be based on the valuation process, is 7.5%, which will be applied subsequently to the net operating income of the property.

Based on the above, the value of the property using the income capitalization method is as follows:

REVENUES					
Unit Type	Quantity	Revenues			
Unit Type	Total GLA	No Of Units	SAR / Sqm	SAR / Unit	Total Revenues
Hospitality Project		The subject property is Fully leased to 1 tenant			SAR 12,312,000

-----	0.00%	0.00%	0.00%	0.00%	0.00%
-----	0.00%	0.00%	0.00%	0.00%	0.00%
NET OPERATING INCOME					
Unit Type	Total Revenues	Total Expenses		NOI	
Hospitality Project	SAR 12,312,000	0.00%		SAR 12,312,000	
-----	SAR 0	0.00%		SAR 0	
-----	SAR 0	0.00%		SAR 0	
Total					SAR 12,312,000
Total Property Revenues					SAR 12,312,000
Total Property Expenses					SAR 0
Net Operating Income					SAR 12,312,000.00
Net Operating Income	Cap Rate	Property Value		Rounded Value	
SAR 12,312,000.00	7.50%	164,160,000.00 SAR		164,200,000.00 SAR	

1.37 SUBJECT PROPERTY VALUE IN DIFFERENT APPROACHES

Methodology	Subject of Valuation	Value in Numbers	Value in Letters
Income- Market	Property	SAR 155,000,000	One Hundred Fifty-Five Million Saudi Riyals
Income- Actual	Property	SAR 164,200,000	One Hundred Sixty-Four Million and Two Hundred Thousand Saudi Riyals
DRC Approach	Land + Building	SAR 107,200,000	One Hundred Seven Million and Five Hundred Thousand Saudi Riyals

1.38 VALUATION NOTES

The achieved value from the income approach is based the leasing contract. In case there were modifications in the contract value and terms between the owner and the tenant, this may cause a direct impact on the final value of the subject property based on the Income approach.

1.39 SUBJECT PROPERTY VALUE

We are of an opinion that the total market value of the subject property taking into consideration the purpose of valuation by using the Income Approach based on the leasing contract is:

Property Value: 164,200,000 SAR
One Hundred Sixty-Four Million and Two Hundred Thousand Saudi Riyals

1.40 REPORT USE

This valuation is for the sole use of the named Client. This report is confidential to the Client, and that of their advisors, and we accept no responsibility whatsoever to any third party. No responsibility is accepted to any third party who may use or rely upon the whole or any part of the contents of this report. It should be noted that any subsequent amendments or changes in any form thereto will only be notified to the Client to whom it is authorized.

1.41 DISCLAIMER

In undertaking and executing this assignment, extreme care and precaution has been exercised. This report is based on the information supplied by the bank and or the owner/s of the property. The values may differ or vary periodically due to various unforeseen factors beyond our control such as supply and demand, inflation, local policies and tariffs, poor maintenance, variation in costs of various inputs, etc. It is beyond the scope of our services to ensure the consistency in values due to changing scenarios.

1.42 CONCLUSION

We trust that this report and valuation fulfills the requirement of your instruction. The contents, formats, methodology and criteria outlined in this report are pending copyright. This report is compiled based on the information received to the best of our belief, knowledge and understanding. The information revealed in this report is strictly confidential and issued for the consideration of the client. The valuer's approval is required in writing to reproduce this report either electronically or otherwise and for further onward distribution, hence no part of this report may be copied without prior consent. We trust that this report and valuation fulfills the requirement of your instruction. The contents, formats, methodology and criteria outlined in this report are pending copyright.

GENERAL NOTES

1.43 CONSULTANT STATUS

We confirm that the consultant / valuator has no physical contact or affiliation with the original subject matter of valuation or with the client and can provide objective, unbiased valuation. We confirm that the valuator is competent to carry out the valuation task and has sufficient skills and market knowledge concerned to conduct the valuation.

1.44 DISCLOSING CONFLICT OF INTEREST

We affirm that we are completely independent of the customer and the subject of the valuation, and nothing contained in this agreement must be interpreted as constituting any relationship with the customer except for the normal official relationship of work, or that it aims to establish any business relationship whatsoever between the customer and Whitecubes employees. We also confirm that we do not have any conflicts of interest with the customer's property. We would like to draw your attention to the following:

*The subject property was previously valued by White Cubes
 White Cubes was previously involved in selling activities related to the property
 White Cubes was previously involved in advisory services related to the property*

No	If Yes		Remarks
	Client	Date	
✓	Muscat Capital	June 2020	-----
✓	-----	-----	-----
✓	-----	-----	-----

1.45 CONFIDENTIALITY

This document and / or any other documents received from the client are confidential between White Cubes Est. and the client. Except as may be required by any court or authority, the subject service shall not disclose or use or cause to be disclosed or used, at any time during the Term.

Any of the Client's secrets and/or confidential information, any other non-public information relating to the client business, financial or other affairs acquired by the subject service during the process remain confidential.

1.46 ENVIRONMENTAL MATTERS

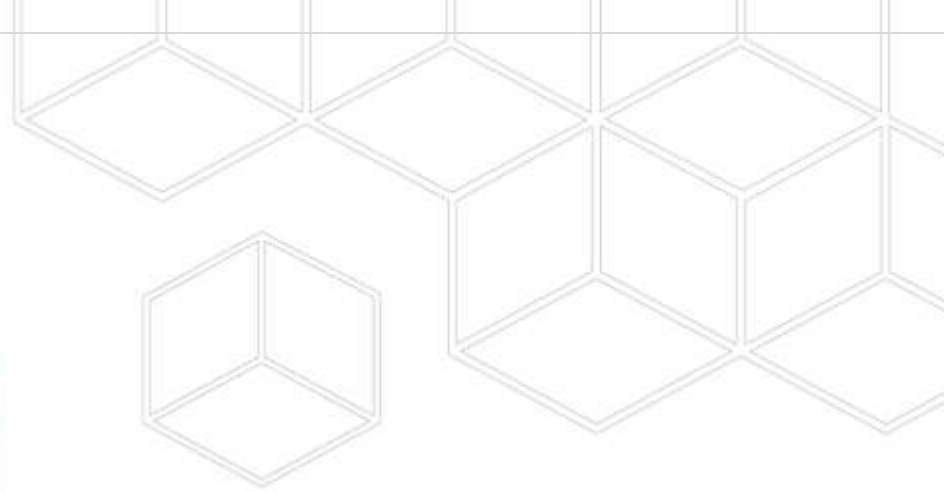

We are not aware of the content of any environmental audit or other environmental investigation or soil survey which may have been carried out on the property and which may draw attention to any contamination or the possibility of any such contamination.

In undertaking our work, we have been instructed to assume that no contaminative or potentially contaminative use has ever been carried out on the property.

We have not carried out any investigation into past or present uses, either of the properties or of any neighboring land, to establish whether there is any contamination or potential for contamination to the subject properties from the use or site and have therefore assumed that none exists.

However, should it be established subsequently that contamination exists at the properties or on any neighboring land, or that the premises has been or is being put to any contaminative use, this might reduce the value now reported.
