**REPORT ON REVIEW OF INTERIM CONDENSED
CONSOLIDATED FINANCIAL STATEMENTS**

**The Shareholders
Middle East Specialized Cables Company
(A Saudi Joint Stock Company)**

Introduction

We have reviewed the accompanying interim condensed consolidated statement of financial position of **Middle East Specialized Cables Company (the "Company")** and its subsidiary (the "Group") as at 31 March 2019, and the related interim condensed consolidated statements of profit or loss and other comprehensive income, changes in equity and cash flows for the three-month period then ended, and a summary of significant accounting policies and other explanatory notes. Management is responsible for the preparation and presentation of these interim condensed consolidated financial statements in accordance with International Accounting Standard (34) "Interim Financial Reporting" that is endorsed in the Kingdom of Saudi Arabia. Our responsibility is to express a conclusion on these interim condensed consolidated financial statements based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" that is endorsed in the Kingdom of Saudi Arabia. A review of interim condensed consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

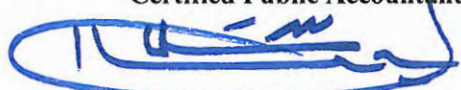

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial statements are not prepared, in all material respects, in accordance with International Accounting Standard (34) "Interim Financial Reporting" that is endorsed in the Kingdom of Saudi Arabia.

Emphasis of Matter

We draw attention to note (8) of the interim condensed consolidated financial statements which describes that the Board of Directors decided on August 5, 2018 to recommend to the extra ordinary General Assembly to reduce the Company's capital from SR 600 million to SR 400 million, therefore reducing the number of Company's shares from 60 million shares to 40 million shares by cancelling 20 million shares. A reduction of SR 200 million to amortized the accumulated losses. On November 4, 2018 the extra ordinary General Assmblly approved Board of Directors' recommendation related to reduction of Company's capital. Our conclusion is not modified in respect of this matter.

2. BASIS OF PREPARATION

2.1 Statement of compliance

These interim condensed consolidated financial statements have been prepared in accordance with IAS 34 "Interim Financial Reporting" that is endorsed in Kingdom of Saudi Arabia and other standards and pronouncements that are issued by Saudi Organization of Certified Public Accountants (SOCPA) and should be read in conjunction with the Group's last annual financial statements as at and for the year ended 31 December 2018 ("last annual financial statements"). They do not include all of the information required for a complete set of IFRS financial statements, however; accounting policies and selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group's financial position and performance since the last annual financial statements. This is the first set of interim condensed consolidated financial statements where IFRS 16 has been applied. Changes to significant accounting policies are described below.

2.2 Preparation of the Financial Statements

The interim condensed consolidated financial statements have been prepared on the historical cost basis except for the employees' end-of-service benefits provision, which has been actuarially valued as explained in the accounting policies below and available for sale investments which has been measured at fair value.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

2.3 Use of Judgments and Estimates

In preparing these interim condensed consolidated financial statements, management has made judgments and estimates that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

The significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those described in the last annual financial statements, except for new significant judgment and key sources of estimation uncertainty related to the application of IFRS 16 as explained in note 4.

3. BASIS OF CONSOLIDATION

These condensed consolidated interim financial statements comprising the condensed consolidated interim statement of financial position, condensed consolidated interim statement of profit or loss, condensed consolidated interim statement of comprehensive income, condensed consolidated interim statement of changes in shareholders' equity, condensed consolidated interim statement of cash flows and notes to the condensed consolidated interim financial statements of the Group include assets, liabilities and the results of the operations of the Company and its subsidiary, as set out in note (1). The Company and its subsidiary are collectively referred to as the "Group". Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are consolidated from the date on which control commences until the date on which control ceases. The Group accounts for the business combinations using the acquisition method when control is transferred to the Group. The consideration transferred in the acquisition is generally measured at fair value, as are the identified net assets acquired. The excess of the cost of acquisition over the fair value of the identifiable net assets acquired is recorded as goodwill in condensed consolidated interim statement of financial position. Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated. Accounting policies of subsidiaries are aligned, where necessary, to ensure consistency with the policies adopted by the Group. The Company and its subsidiaries have the same reporting periods.

NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies adopted in the preparation of the condensed consolidated interim financial statements are consistent with those followed in the preparation of the Group's annual financial statements for the year ended 31 December 2018, except for the adoption of new standards effective as of 1 January 2019. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

4.1 New standards, interpretations, and amendments adopted by the Group

The Group applies, for the first time, IFRS 16 "Rent Contracts". As required by IAS 34, the nature and effect of these changes are disclosed below.

4.1.1 Annual Improvements to IFRSs 2015–2017 Cycle

Improvement to IFRS (11) "Joint Arrangements" related to Previously Held Interests in a Joint Operation.

Improvement to IAS (12) "Income Taxes" related to Income Tax Consequences of Payments on Financial Instruments Classified as Equity.

Improvement to IAS (23) "Borrowing Costs" related to Borrowing Costs Eligible for Capitalization.

4.2 Changes in significant accounting policies

Except as described below, the accounting policies applied in these Condensed Consolidated Interim Financial Statements are the same as those applied in the last annual Consolidated Financial Statements for the year ended 31 December 2018. The changes in accounting policies are also expected to be reflected in the annual Consolidated Financial Statements for the year ending 31 December 2019.

IFRS 16 - Leases

IFRS 16 supersedes IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases-Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for most leases under a single on-balance sheet model.

Lessor accounting under IFRS 16 is substantially unchanged from IAS 17. Lessors will continue to classify leases as either operating or finance leases using similar principles as in IAS 17. Therefore, IFRS 16 did not have an impact for leases where the Group is the lessor.

In the current period, the Group has adopted IFRS 16 using the modified retrospective method of adoption with the date of initial application of 1 January 2019.

FOR THE THREE MONTHS PERIOD ENDED MARCH 31, 2019

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (Continued)

4.2 Changes in significant accounting policies - (Continued)

The Group elected to use the practical expedient available on transition to IFRS 16 not to reassess whether a contract contains a lease or not, allowing the standard to be applied only to contracts that were previously identified as leases applying IAS 17 and IFRIC 4 at the date of initial application.

The Group also adopted the following practical expedients when applying IFRS 16 to leases previously classified as operating leases under IAS 17:

- Applied a single discount rate to a portfolio of leases with reasonably similar characteristics.
- Applied the exemption not to recognize right-of-use assets and liabilities for leases that are expiring during 2019.
- Excluded initial direct cost from measuring the right-of-use asset at the date of initial application.

The Group also elected to use the recognition exemptions for lease contracts that, at the commencement date, have a lease term of 12 months or less and do not contain a purchase option ('short-term leases'), and lease contracts for which the underlying asset is of low value ('low-value assets').

Nature of the effect of adoption of IFRS 16

Prior to adoption of IFRS 16:

Before the adoption of IFRS 16, the Group classified each of its leases (as lessee) at the inception date as either a finance lease or an operating lease based on the substance of the arrangement at the inception date.

A lease was classified as a finance lease that transfer to the Group substantially all of the risks and benefits incidental to ownership of the leased item, are capitalized at the commencement of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and a reduction in the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability.

In an operating lease, the leased property was not capitalized and the lease payments were recognized as operating expense in the consolidated statement of profit or loss on a straight-line basis over the lease term. Any prepaid and accrued amounts were recognized under prepayments and other payables, respectively.

After adoption of IFRS 16:

Upon adoption of IFRS 16, the Group applied a single recognition and measurement approach for all leases that it is the lessee, except for short-term leases and leases of low-value assets. The Group recognized lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets. In accordance with the modified retrospective method of adoption, the Group applied IFRS 16 at the date of initial application. Under modified retrospective approach right-of use assets were measured at the amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognized in the statement of financial position as at 31 December 2018. Accordingly, the comparative information is not restated.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (Continued)

4.3 Impact on the interim condensed consolidated financial statements - (Continued)

Below are the new accounting policies of the Group after adoption of IFRS 16:

Leases

The Group assess whether a contract contains a lease, at inception of the contract. For all such lease arrangements the Group recognize right of use assets and lease liabilities except for the short term leases and leases of low value assets as follows:

Right-of-use assets

The Group recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Unless the Group is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognized right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term. Right-of-use assets are subject to impairment.

Lease liabilities

At the commencement date of the lease, the Group recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating a lease, if the lease term reflects the Group exercising the option to terminate. The variable lease payments that do not depend on an index or a rate are recognized as expense in the period on which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is re-measured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered of low value. Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

Significant judgement in determining the lease term of contracts with renewal options

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Group applies judgement in evaluating whether it is reasonably certain to exercise the option to renew. That is, it considers all relevant factors that create an economic incentive for it to exercise the renewal. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise (or not to exercise) the option to renew (e.g., a change in business strategy).
