# Agthia Group - Synergies at play

Agthia is a UAE based FMCG behemoth operating across 45 countries. It is the third largest FMCG player in the GCC+Egypt region with over 35 brands in the Agriculture and consumer segments. The company is undergoing rapid transformation from a semi government institution to a professionally run organization. ADQ, the sovereign wealth fund of Abu Dhabi is the major shareholder and provides solid support in terms of access to capital, network and management bandwidth. ADQ has merged some of its group companies with Agthia and initiated other takeovers to create a larger and more efficient organization. Post consolidation the revenue and profits for Agthia have doubled to record levels at AED 4.1bn and AED 273mn in 2022 from 2019. Agthia has actively undertaken the task of bringing synergies in operations amongst the group companies. Economies of scale are driving operating efficiencies, lower procurement costs and decreasing overheads, this will lead to improvement in margins going forward. We are positive on the developments taking place in the company and we believe the company is entering its next phase of growth with the recent acquisitions. We expect revenue growth of 14% and net profit is likely to grow by 24.3% CAGR over 2022-27e. We assign a target price of AED 5.992/share based on the DCF and peer valuation. Our target price provides an upside of 22.3% from the current market price and we recommend to BUY the stock.

ADQ's vision provides the adequate support for growth: ADQ, the ultimate parent company of Agthia was formed in 2018 to manage all the investments of the Government. This sovereign fund has been incorporated with an objective to bring significant efficiencies within the portfolio companies. We believe ADQ has been aggressively pursuing this path across the board, and impact of the same has been implied in the case of Agthia. Changes in board, management, consolidation of similar entities and well planned expansion strategies are all result of the changes happening at the parental level. This is an extremely positive push which will sustain the growth for Agthia going forward.

Inorganic expansion falling in line, synergies to be evident from 2023 onwards: The period between 2020-22 witnessed 6 acquisitions by Agthia. These were done with the objective to improve the consumer division of the company. The acquired companies were market leaders in their respective segments. Consolidation of these companies, optimizing resources, reducing costs, cross selling, standardized packaging etc. are some areas where synergies are being built. The company has witnessed cost savings to the tune of AED 137mn in the last couple of years. We believe the initial phase of the improvements are over and the next phase would be in 2023 which would further enhance the operational efficiencies of the group.

Changes in product mix to sustain margins: High raw material costs, low revenue growth and thin margins were the issues faced by Agthia prior to 2020. Post the addition of new brands from the snacking and protein segments the overall product portfolio mix has changed for the better. The low margin agriculture and water business which had contributed to 93% of the revenue and 95% of profits in 2020 stands reduced to 49% and 44% respectively in 2022. The legacy business giving way to the new ones will provide adequate cushion to the margins.

**Valuation:** Agthia is one of the largest and fastest growing FMCG player in the region. The solid parental support, new management team and the changes in the product mix will provide adequate impetus to growth and warrant a re-rating. We value the stock on the basis of DCF and analyze Agthia along with its global and regional peers to arrive at a blended target price of AED 5.99/share. This provides an upside potential of 22.3% from the current price and we provide a BUY rating on Agthia.

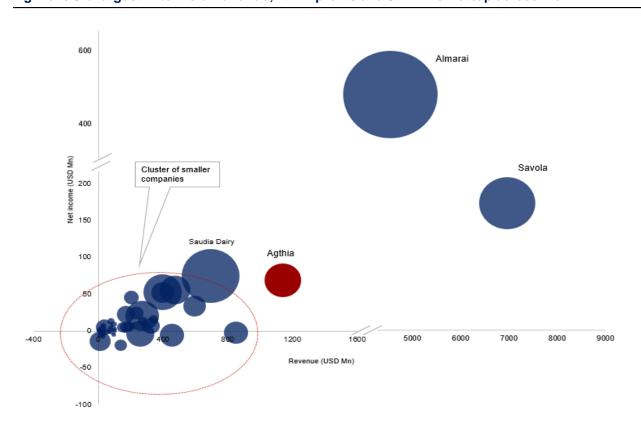

# Agthia has grown exponentially to become an FMCG leader in the region

Agthia is a regional leader in the FMCG segment ...

Agthia was incorporated in 1978 with the support of the Government of Abu Dhabi and had its humble beginnings as an animal feed and flour company. It has come a long way in the last four decades and is currently one of the largest FMCG players in the region. The company manages 35+ brands, exports to over 45 countries, has 21 manufacturing facilities, 21 distribution centers and employs over 11,800 people. The company has two major business segments- Agri Business Division (ABD) and the Consumer Business Division (CBD). While the ABD is involved in the manufacturing and distribution of flour and animal feed, the CBD includes multiple products related to food and water. Together the company reported a consolidated revenue of AED 4 bn and profit of AED 273 mn in 2022.

# Agthia is 3rd largest in terms of revenue, 4th in profits and 5th in Marketcap across the MENA

Source: Bloomberg ®, US Research, ^ Size of the bubble represents the market cap of the company

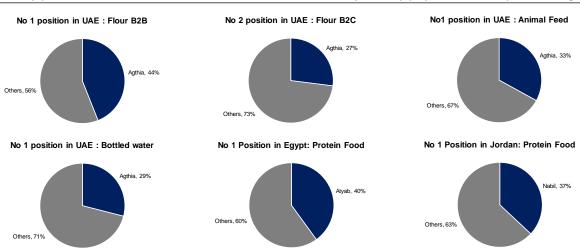

There are about 45 listed companies in the packaged food and meat industry across GCC and Egypt. The industry is highly fragmented with majority being smaller companies with one or two products and operating on thin margins. The larger companies in the industry are a handful which own multiple brands and serve many food categories. Only 3 companies have more than a billion dollar in revenue. Saudi leads the sector with Savola (2022 rev \$ 7.5Bn) and Almarai (2022 rev.\$ 5.1bn) followed by UAE based Agthia (2022 rev \$ 1.1bn) in the third position.

Agthia has achieved leadership in most brands that it operates ...

Agthia had already been the market leader in its legacy bottled water, flour and animal feed business in the UAE before it started out on acquiring companies in 2020. It added consumption brands related to protein and frozen snacks in Jordan and Egypt, both of which were market leaders with nearly 40% market share. The company also bought Al Foah which is one of the world's largest supplier of dates; the house-hold bakery brand Al Faysal which is a three-decade old entity based in Kuwait and the largest confectionary in the GCC Baklawa Made Better (BMB) and finally the snacking segment leader Abu Auf which has significant presence in Egypt.

# Leadership position in several brands: Dominates UAE markets, new buys are top players in their respective categories

Source: Company presentation

Aggressive geographic diversification in the last two years ...

Further, the company has also accomplished geographic diversification over the last two years. It has increased its export orientation, and in 2022 derived 51% revenue from outside UAE, this was only 10% in 2020. Agthia is clearly aiming at a sustainable top line growth by capturing existing market share from competitors, diversifying the product pipeline along with expanding its footprint across the borders.

We believe FMCG is an industry which is highly sensitive to price and brand positioning. It requires several years to achieve leadership and size after cutting across severe competition. Agthia has taken a shortcut with its recent approach of inorganic growth and we are optimistic on the growth prospects considering the vibrant market that it caters to (MENAP) which has over 350Mn people as potential customers across the variety of categories.

# Agthia's recent growth is a trickledown effect of parental push and consolidation of group holdings

Agthia is a government of Abu Dhabi promoted company incorporated with the objective of providing food security to the nation at a time when the country was in its nascent stages. It was one of the very few players operating in the food sector in the country during the early 1980s when infrastructure was limited and population was low. UAE is currently one of the fastest growing and most vibrant nations in the world. The social cause for setting up Agthia gradually faded with the transformation of the country and it has manifested itself into a commercial organization with a professional management.

Agthia was incorporated to address the food security problem of UAE...

ADQ pursues consolidation of all government investments

However, the transformation of Agthia into a professional organization is part of a larger plan by the Abu Dhabi government. The government established ADQ (erstwhile Abu Dhabi Development Holding Company) in 2018 as a sovereign wealth fund. The purpose was to bring all its investments under one roof, consolidate and manage them in the most efficient manner. 11 asset transfers from the government into ADQ took place in 2019, and 23 in 2020, amongst which General Holding Corporation (Seenat) was one of them. Seenat is the major shareholder in Agthia, currently having 63% ownership in the company.

ADQ has strived to make measureable changes across its investment portfolios...

The recent changes in Agthia, is part of a long term vision ...

Moving from government to professional run company, commodity to value added brands ... ADQ in the last 3 years has been aggressively consolidating its investment portfolio which includes Energy, Food & Agri, Healthcare, Logistics, Financial Services, Tourism & Real estate. It has merged, right sized, provided capital and improved the performance of most entities by creating fewer and larger corporations, on the lines of a PE fund. ADQ has also installed a new team of professional management in its investment companies whenever required. It has funded expansion projects, assisted group companies in building their network and most importantly brought accountability across the board.

In the case of Agthia, ADQ has changed the board and the top management. It has facilitated group companies such as Nutrivation and Ideal Holding to sell its stake in Al Nabil to Agthia and Seenat to transfer its ownership in Al Foah to Agthia. This has consolidated all the food divisions of ADQ and brought them under one roof for easier control, monitoring and management. Currently there are six investments in the ADQ portfolio related to Food and Agriculture, which include Louis Dreyfus Company (LDC), Agthia, Al Dahra, Unifruitti, Silal and Lulu International Holdings. These companies together operate as leaders across the food ecosystem and offer humongous opportunities to complement each other.

We are extremely positive on the aggressive stance taken by ADQ and the impact it has created in its investment portfolio. The pursuit to maximize profitability is being pushed by the parent from the top and we believe the trickledown effect from the larger plan will offer a sustainable growth opportunity for Agthia.

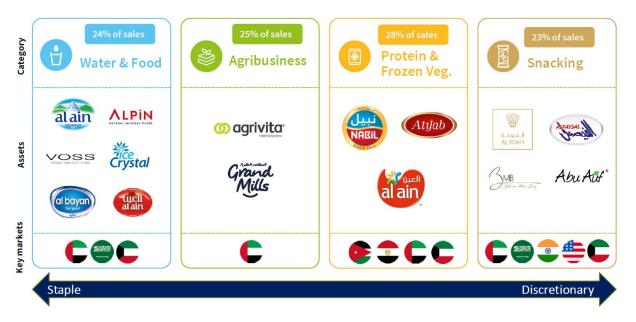

## Synergies from recent acquisitions to be evident from 2023 onwards

Prior to 2020 Agthia was a semi government organization primarily focused in UAE. It undertook a transformation strategy to re-invent itself into a F&B leader. The changes envisioned the company to move from a commoditized business and to own value added brands, increase the geographic footprint across the borders, introduce latest technologies and modernize operations.

A new set of board members stepped in April 2020 and a new CEO took over in July 2020. The replacements were made specifically with the objective to achieve the new goals as soon as possible. Over the next couple of years 6 acquisitions were made at a cost of AED 2.7bn. As a result, the consolidated revenue doubled from AED 2 bn in 2020 to AED 4.1bn in 2022.

# The current product portfolio of Agthia is diverse and ranges from staple to discretionary

Source: Company presentation

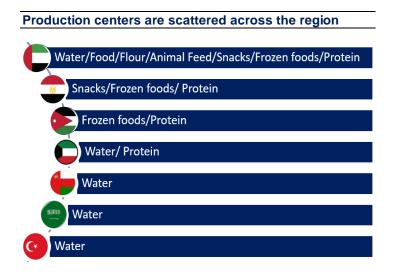

Multiple areas identified where synergies could help lower cost and cross sell products ...

Agthia intends to bring in synergies with these acquired companies some of which are over three decades old with an established customer base, set process and distinct product profile, while others are still evolving. Increasing the synergies and integrating these new divisions is critical to the success of the group and its operations. The company has identified numerous products, channels, sourcing, manufacturing and packaging synergies between its various business divisions.

As a first step, it has begun the process of consolidating the manufacturing operations of these new businesses across the 21 manufacturing plants that it owns in 7 countries. BMB, one of the recent acquisitions moved its operations from Jebal Ali to Abu Samra in Al Ain. Similarly, operations in Saudi, Kuwait and Egypt are expected to achieve consolidation by 2023-

24. The consolidation process has also benefitted in reducing procurement costs, standardization of raw materials, improved supply chain efficiency and packaging quality for the entire group. The company estimated cumulative cost savings of AED 137mn through the synergies from 2020 to 1Q23.

Source: Company reports, US Research

Additionally, these acquisitions have brought scale in operations, cross selling opportunities, financial support, management bandwidth and a wide spread distribution network to sell the products. Some of these factors were lacking across these home grown companies that were acquired. Agthia's data driven approach to transform these local business into power brands is also proving to be effective. We are positive on Agthia's strategy of integrating the new business divisions while retaining their erstwhile local flavor. We believe the positive impact of the consolidation will become visible with the improvement in revenue, operational efficiencies and profits from 2023 onwards as these plans get executed.

## Details of acquired companies and synergy plan

		Snacki	Protein and frozen foods			
Company	Al Foah	BMB	Abu Auf	Al Faysal	Al Nabil	Atyab

Higher revenue from value added products to offset low margin legacy brands and keep blended margins stable...

## Changes in product mix to keep margins stable

The changes in the product mix and the shift towards higher margin products have improved the overall realization. In 2020, the low margin water, flour and animal feed contributed to 93% of the revenue while the rest was from the higher margin protein and snacks segment. Currently the legacy business contributes to 49% while the new divisions have added 51% of the revenue. The company hopes to reduce the revenue contribution from the legacy business to about 25% going forward. Net profit contribution has also changed significantly over the last two years with legacy business contribution declining from 95% in 2020 to 44% in 2022.

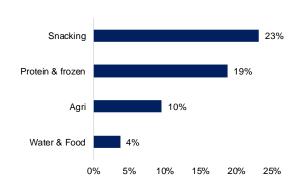

#### Net margin highest for branded snacks in 2022

Source: Company reports, US Research

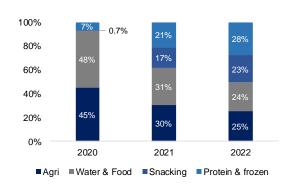

#### Snacking segment to see high CAGR (2022-27e)

Snacking and protein segments to drive the next phase of growth in top and bottom line...

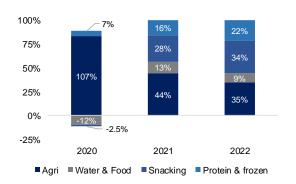

While gross margins are high for the Agri segment at 22%, the net margins have declined recently due to the rise in raw materials. In the case of water, the gross margins are at 36% while net margins are at a low of 4%. The growth in the water segment has also lagged over the years (de-growth by 4% in 2021 and growing by a meager 1.4% in 2022). Snacking is the most promising segment with gross margin of 30% and net margin of 15%, it is expected to grow fastest amongst the basket of products at a CAGR 23% (2022-27e). Protein and Frozen foods will witness improvement in margins on account of consolidation and is expected to grow at 19% CAGR (2022-27e).

#### Revenue from Snacking+Protein at 51% in 2022

Source: Company reports, US Research

#### Profit from Snacking and Protein at 56% in 2022

# Financial parameters witness changes on account of consolidation

Agthia witnessed a change in the structure of its balance sheet in 2021 post the acquisitions. Funds were raised via debt and equity to purchase six companies for a total deal value of AED 2.7bn.

in AED Mn	Snacking		Protein and t	Total			
Company	Al Foah	вмв	Abu Auf	Al Faysal	Al Nabil	Atyab

Borrowings in balance sheet at the time of purchase	0	3	22	4	49	8	86

Source: Company reports, US Research

Additional shares issued for acquiring group companies...

Two of the deals entered into by the company were by issuing additional shares of Agthia to the promoter and other group entities through a share purchase agreement (SPA). Al Foah was bought for a value of AED 450 mn in Jan 2021, by issuing 120mn new shares at AED 3.75/share. The entire operations and ownership of Al Foah was transferred from the erstwhile owner Seenat. Seenat was also the largest shareholder in Agthia with a holding of 51%. The new allotment of shares increased the shareholding of Seenat in Agthia to 59.17%.

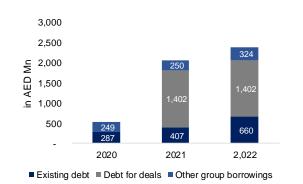

Further increase in share capital took place during the same year when the company purchased Al Nabil in May 2021, from another sister concern and portfolio company of ADQ, Nutrivation. The total consideration of the deal was AED 520mn which was partly paid by issuing a mandatory convertible instrument of value AED 393.7mn that converted to 71.58mn new shares at AED 5.5/share. These shares were given to Nutrivation as the consideration for 60% ownership in Al Nabil. The bonds were immediately converted to shares and this was internally transferred to Seenat, taking its shareholding in Agthia to 62.8%. The remaining amount of AED 126mn was paid in cash to Ideal Holding another group company of ADQ for 20% ownership. Through this Agthia took 80% ownership in Al Nabil. Post these two deals the share capital of Agthia increased from AED 600mn in 2020 to AED 791.6mn and added a share premium of AED 652mn in 2021.

#### 191.58 mn shares issued for acquisitions in 2021

# 3,000 2,500 2,000 1,500 1,000 500 2020 2021 Share capital Reserves Retained earnings

#### Cumulative debt taken for the deals was AED 1.4bn

Source: Company reports, US Research

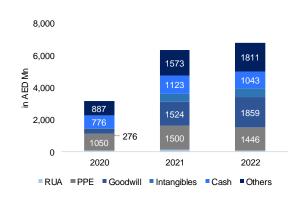

Borrowings increased significantly to fund the remaining four transactions...

In 2020, Agthia bought 100% ownership in BMB and Al Faysal by paying AED 646mn and AED 161mn respectively. The company also took majority stake in Atyab (75%) in May 2021 and Abu Auf (60%) in July 2022 for a value of AED 573mn and AED 350mn. All these four transactions were settled in cash and funds were raised via debt. The group availed four long term loans in 2021 amounting to AED 1.4bn for a tenure of 5 years with bullet repayment in 2026. It also consolidated existing loans in Al Faysal in 2020, Al Nabil and BMB in 2021 and Abu Auf in 2022. These additional borrowings along with the ones taken for other group entities increased the total carrying value of all the loans from AED 536mn in 2020 to AED 2.1bn in 2021 and further to AED 2.4bn in 2022. Finance costs increased from AED 17.3mn in 2020 to AED 75.9mn in 2022. The debt of Agthia is backed by government related entities hence the credit rating is high. This is reflected in the low cost of borrowings, which is in the range of LIBOR+ 0.4% to 1.2%. We do not expect significant addition in long term debt going forward. Further, we believe since all acquisitions are earnings and cash accretive the additional income will suffice to service the debt.

Consolidation of balance sheet resulted in rise in tangible and intangibles... Consolidation of the fixed assets in 2021 also led to increase in its value by AED 450mn taking the total tangible assets from AED 1bn in 2020 to AED 1.45bn in 2022. These back to back deals also led to accumulation of goodwill (AED 1.9bn) and intangibles (AED 563mn) in 2021-22. Goodwill being the excess cost of acquisition paid over the fair value of the acquired assets and intangibles related to assets such as brand equity and customer relationships. Both these intangible items contributed to 35.6% of the total assets in the balance sheet in 2022.

#### Marked increase in assets on account of consolidation

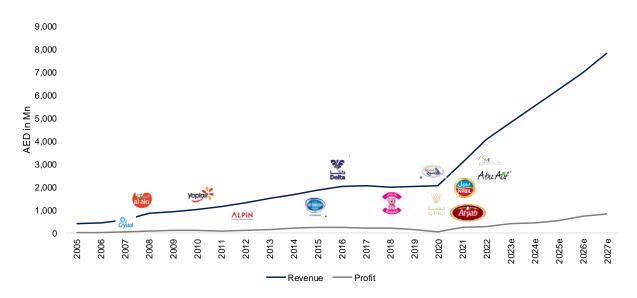

Source: Company reports, US Research

Revenue trajectory to change sharply upwards from 2023 onwards...

As a result of consolidation, in 2022, the company recorded its highest ever revenue and profit of AED 4.1 bn and AED 272 mn respectively. The revenue doubled from 2020 levels and increased by 32.6% from 2021. We believe Agthia is moving into the next stage of growth leaving behind its erstwhile local legacy business. Revenue growth from 2005 over the next 15 years till 2020 was CAGR 11.5% and we expect this rate of growth to increase to CAGR 14.5% going forward and through our forecast period 2022-27e. Profits grew by a CAGR growth of 11.7% in the past and we expect the trajectory to shift upwards to 24.3% CAGR (2022-27e) primarily triggered by the fast growth in the high margin consumer division. We expect the consumer division to grow at a CAGR of 15.7% (2022-27e), with gross margins in the range of +30% and contribute 79% (c74.5%) of the total revenue by 2027e. We estimate the Agri business to grow at 9.8% CAGR (2022-27e), with a gross margin of 22% and have a lesser share in the consolidated revenue of about 21% (c26%).

Source: Company reports, US Research

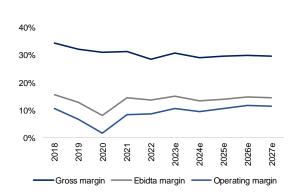

Additional triggers for revenue growth could arrive from the company's ambition to leverage data as a strategic asset and to increase digital revenue streams. This will lead to new routes in marketing and build a wider customer base. Agthia's expects to become a significant player in the ecommerce space through digital marketing.

Lower raw material costs and improvement in procurement will hold gross margins ...

As in the case of most flour and feed manufacturers across the globe, the high wheat, soy and corn prices affected the raw material cost for Agthia in 2022. Raw material formed 75% of the total cost of goods sold in 2021 and it increased to 79% in 2022. The government partially compensated for the price increase by providing a subsidy, the amount of which was AED 150mn in 2021 and AED 121mn in 2022. The rise in raw material cost led to a decline in gross margins by 270bps from 31.2% in 2021 to 28.5% in 2022. While the prices have declined from peak levels it continues to remain higher than historic averages. Agthia hopes to improve its sourcing methods using technology and diversifying the countries from which it purchases. The requirement for larger amount of raw materials going forward on account of the additional requirements from the new entities will also improve the purchasing power for the group. We expect gross margins to hold in the range of 29-30% going forward.

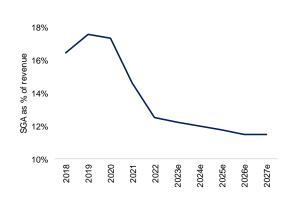

#### Margins to remain stable and within guidance

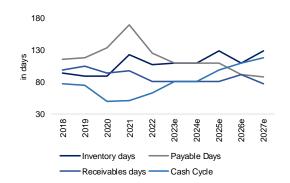

Source: Company reports, US Research

#### Gradual decrease in SG&A expenses

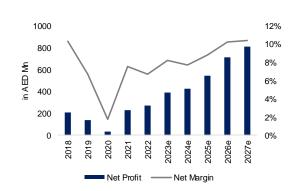

Economies of scale, use of technology, right sizing various departments have led to better operating parameters. Operating margins have witnessed minor improvements in 2022 on account of lower salary, admin and selling expenditures. We expect operating margins to increase significantly by 200 bps to reach 10.6% in 2023e and remain stable within that range till 2027e. EBIDTA margins will also witness increase from current levels backed by improvement in operational efficiency. EBIDTA margin expected to increase by 150 bps to 15.1% in 2023e from the current level 13.6%.

#### Inventory management to remain stable

Source: Company reports, US Research

#### Net profit to grow rapidly, margins to improve

Management guidance conservative and achievable...

The company has guided a revenue growth of 10-12% in 2023 and the EBITDA and group net profit margins to increase by 40 to 60bps and 30 to 50bps respectively. In 2025 Agthia expects its revenue to reach AED 6bn, and has guided 15.5-16.5% EBITDA margin and 8.5-10% net profit margin. While our revenue estimates match the 2025e value of AED 6bn, we believe the company is being conservative on the margin guidance given the current issues related to raw material costs. We hope cost savings out of synergies will help aid EBIDTA and net margins. Our base case forecast for profit growth over 2022-27e CAGR is 24%.

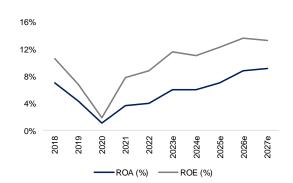

Adequate cash, moderate capex, stable inventory management...

Despite the outflow from the purchases, debt servicing and dividend payments the company maintains adequate cash. Agthia reported 2022 cash balance of AED 1bn, however repayment of some bank borrowings reduced the cash balance to AED 674mn in 1Q23. We do not expect significant cash outflow on account of capex. The board had approved construction of a manufacturing plant in Jeddah for Al Nabil at a cost of AED 84mn which is the only one in the pipeline. Inventory management has been stable with receivable days less than 3 months and cash conversion around 3.5 months. We do not estimate significant changes in the working capital cycle for the company as it follows a stable process of operations with scope only to improve from the current levels.

DPS to increase on stable payout and higher profits...

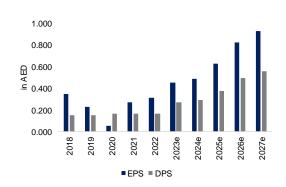

The company has maintained a semi-annual dividend policy of AED 0.0825 (full year AED 0.165) since 2020 with a payout ratio of about 55-60%. We expect the payout ratio to remain at 60% and higher dividends to be paid as profits increase. At current price the stock trades at a 2023e dividend yield of 5%.

#### Return ratios to improveas as proftiability rise

Source: Company reports, US Research

#### Dividends to increase going forward

# DCF target price of AED 5.946/share

## **Valuation**

We have used the Discounted Cash Flow (DCF) and peer valuation method to value Agthia. In our DCF method we have forecasted through 2023-2027e. We considered the cost of equity of 11.3% derived from risk free rate of 5.0%, Equity Risk Premium of 8%, and beta of 0.791. We arrive at a WACC of 10.2% for the company. We assume a terminal growth rate of 1% post the forecast period. Our DCF valuation of Agthia provides an intrinsic value of AED 5.946 per share which is 21.3% higher from the current price.

# Blended price target of AED 5.992/share

On a peer valuation, we find the global sector average TTM PE is at 24x and regional average is at 25x. Also on an EV/EBIDTA (TTM) basis the global average is at 16x and regional average at 13x. Agthia trades at a discount when compared to regional and global players. We provide a target PE multiple of 18x and target EV/EBIDTA multiple of 11x. We arrive at a blended target price (50% DCF, 25% each for PE and EV/EBDITA) of AED 5.992/share which provides a potential upside of 22.3%. Based on our target price we recommend to BUY the stock at the current level.

# **Key risks:**

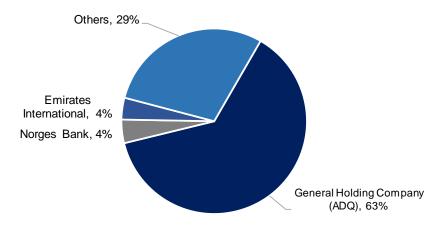

- 1. Sharp slowdown in the economy
- 2. Significantly high cost of raw materials
- 3. Currency devaluation in Egypt and Turkey
- 4. Increase in competition
- 5. Changes in regulation
- 6. Escalation of Russia Ukraine war
- 7. Delay in optimizing the synergy benefits

### **Company Profile**

Agthia was started with the support of the Abu Dhabi government as Grand mills in 1978 with an objective to produce animal feed. It later extended its portfolio to drinking water which started its operations in 1990 under the brand "Al Ain". Later in 2004, and as part of the privatization program the company was transformed into its current form and renamed Emirates Foodstuff and Mineral Water Company. In 2005, the company was listed in the Abu Dhabi Stock Exchange as Agthia offering 49% stake to the public. Currently Agthia is part of ADQ (Abu Dhabi Development Holding Company), one of UAE's largest holding companies with several investments in the food value chain. Agthia has 35+ brands across 4 major segments - Water & Food, Snacking, Protein & Frozen and Agri-products. The company is the market leader in the water, flour, and animal feed segments in the UAE, and in the frozen protein segment in Egypt and Jordan. Agthia exports to 45+ countries covering North America, Europe, Asia, Africa and Middle East. However, bulk of the products are sold in UAE, Egypt, Jordan and GCC. The company operates 21 manufacturing facilities and 27 distribution centers in UAE, Turkey, Saudi Arabia, Egypt, Oman, Jordan and the GCC. It employs over 11,800 employees across the globe catering to the manufacturing, distribution and marketing of various products.
