## **Independent Auditors' Report**

### **To the Shareholders of Al Rajhi Banking and Investment Corporation (A Saudi Joint Stock Company)**

### **Report on the Audit of the Consolidated Financial Statements**

#### **Opinion**

We have audited the consolidated financial statements of Al Rajhi Banking and Investment Corporation (the “Bank”) and its subsidiaries (“the Group”), which comprise the consolidated statement of financial position as at 31 December 2025, and the consolidated statement of income, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including material accounting policy information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 December 2025, and its consolidated financial performance and its consolidated cash flows for the year then ended, in accordance with International Financial Reporting Standards (“IFRSs”) that are endorsed in the Kingdom of Saudi Arabia and other standards and pronouncements that are endorsed by the Saudi Organization for Chartered and Professional Accountants.

#### **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) as endorsed in the Kingdom of Saudi Arabia (“the Code”), as applicable to audits of financial statements of public interest entities, and we have fulfilled our other ethical responsibilities in accordance with the requirements of the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Independent Auditors' Report to the Shareholders of Al Rajhi Banking and Investment Corporation (A Saudi Joint Stock Company)

### Report on the Audit of the Consolidated Financial Statements (continued)

#### Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the current year. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our auditors' opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter	How our audit addressed the key audit matter
<p><b><i>Expected credit loss allowance 'ECL' against financing</i></b></p>	
<p>As at 31 December 2025, the Group's gross financing amounted to ₩ 761,442.74 million (2024: ₩ 701,915.04 million), against which an expected credit loss ("ECL") allowance of ₩ 8,682.89 million (2024: ₩ 8,505.32 million) was recorded.</p> <p>In accordance with the requirements of IFRS 9, the Group measures ECL based on the credit losses expected to arise over the next twelve months ('12-month ECL'), except for financing which have undergone a significant increase in credit risk ("SICR") since origination, or those which are in default or those that are classified as Purchased or Originated Credit Impaired "POCI" assets, in which case, the allowance is based on the ECL expected to arise over the life of the financing ('Lifetime ECL').</p> <p>Additional judgements are applied by the Group when identifying and assessing exposures meeting SICR criteria.</p> <p>We considered this as a key audit matter, as the determination of ECL involves significant estimation and management judgment, and this has a material impact on the consolidated financial statements of the Group. The key areas of judgment include:</p> <ol style="list-style-type: none"> <li>1. Categorisation of financing into Stages 1, 2 and 3 based on the identification of:           <ol style="list-style-type: none"> <li>(a) exposures that have a significant increase in credit risk ("SICR") since their origination; and</li> <li>(b) individually impaired / defaulted exposures.</li> </ol> </li> </ol>	<ul style="list-style-type: none"> <li>• We obtained an understanding of management's assessment of the determination of the ECL allowance in respect of financing, including the Group's internal risk rating models, accounting policy and methodology, as well as any key changes made during the year.</li> <li>• We assessed the Group's accounting policy and methodology for ECL allowance against the requirements of IFRS 9: 'Financial Instruments'.</li> <li>• We assessed the design and implementation, and tested the operating effectiveness, of the key controls (including relevant IT general and application controls) in relation to:           <ul style="list-style-type: none"> <li>○ the ECL model (including governance over the model, its validation and any model updates performed during the year);</li> <li>○ the classification of financing into Stages 1, 2 and 3, timely identification of SICR, and the determination of default / individually impaired exposures;</li> <li>○ the IT systems and applications supporting the ECL model; and</li> <li>○ the integrity of data inputs into the ECL model.</li> </ul> </li> <li>• We assessed the governance process implemented by management in relation to customer specific provision post ECL model output including the appropriateness of qualitative factors considered in management's assessment.</li> </ul>

**Independent Auditors' Report to the Shareholders of Al Rajhi Banking and Investment Corporation (A Saudi Joint Stock Company)****Report on the Audit of the Consolidated Financial Statements (continued)****Key Audit Matters (continued)**

Key audit matter	How our audit addressed the key audit matter
<i>Expected credit loss allowance against financing (continued)</i>	
<p>2. Assumptions used in the ECL model for determining probability of default (“PD”), loss given default (“LGD”) and exposure at default (“EAD”), including, but not limited to, assessment of the financial condition of the counterparties, expected future cash flows, and developing and incorporating forward looking assumptions, macroeconomic factors and the associated scenarios.</p> <p>The application of these judgments continues to result in heightened estimation uncertainty around ECL calculations, and therefore affected the associated audit risk thereon as at 31 December 2025.</p> <p><i>Refer to the summary of material accounting policies note 3(c)(5) for the impairment of financial assets; note 2(f)(1) which contains the disclosure of critical accounting judgments, estimates and assumptions relating to impairment losses on financial assets and the impairment assessment methodology used by the Group; note 8(e) which contains the disclosure of impairment against financing; and note 31(1)(a) for details of credit quality analysis and key assumptions and factors considered in determination of ECL.</i></p>	<ul style="list-style-type: none"><li>For a sample of customers, we tested the internal risk ratings determined by management based on the Group’s internal models. We also compared whether these were consistent with the ratings used as inputs in the ECL model.</li><li>For a selected sample of customers, we tested management’s assessment of recoverable cash flows, including the impact of collateral, and other sources of repayment, if any.</li><li>We assessed the Group’s criteria for the determination of definition of default and SICR, and the identification of individually impaired exposures. Furthermore, for a sample of exposures, we tested the corresponding staging classification of financing facilities to determine if it was appropriate.</li><li>We assessed the underlying assumptions used by the Group in the ECL models, including forward looking assumptions.</li><li>We tested the completeness and accuracy of input data supporting the ECL calculations as at 31 December 2025.</li><li>Where required, we involved our specialists to assist us in reviewing the ECL models’ calculations, evaluating interrelated inputs (including EAD, PDs and LGDs) and assessing the reasonableness of assumptions used in the ECL models, particularly around macroeconomic variables and forecasted macroeconomic scenarios.</li><li>We evaluated the adequacy of the disclosures in the consolidated financial statements against the requirements of IFRS.</li></ul>

## Independent Auditors' Report to the Shareholders of Al Rajhi Banking and Investment Corporation (A Saudi Joint Stock Company)

### Report on the Audit of the Consolidated Financial Statements (continued)

#### Other Matter

The consolidated financial statements of the Group for the year ended 31 December 2024 were audited by other joint auditor who expressed an unmodified opinion on those statements on 6 February 2025 (corresponding to 7 Sha'ban 1446H).

#### Other Information included in the Group's 2025 Annual Report

Other information consists of the information included in the Group's 2025 annual report, other than the consolidated financial statements and our auditors' report thereon. Management is responsible for the other information in the Group's annual report. The Group's 2025 annual report is expected to be made available to us after the date of this auditors' report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Group's 2025 annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

#### Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the IFRSs that are endorsed in Kingdom of Saudi Arabia and other standards and pronouncements that are endorsed by the Saudi Organization for Chartered and Professional Accountants and the applicable provisions of the Regulation for Companies, the Banking Control Law in the Kingdom of Saudi Arabia and the Bank's By-Laws, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, i.e. the Audit Committee is responsible for overseeing the Group's financial reporting process.

#### Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia will always detect a material misstatement when it exists.

**Independent Auditors' Report to the Shareholders of Al Rajhi Banking and Investment Corporation (A Saudi Joint Stock Company)****Report on the Audit of the Consolidated Financial Statements (continued)****Auditors' Responsibilities for the Audit of the Consolidated Financial Statements (continued)**

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of the internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for the purpose of the group audit. We remain solely responsible for our audit opinion.

**Independent Auditors' Report to the Shareholders of Al Rajhi Banking and Investment Corporation (A Saudi Joint Stock Company)****Report on the Audit of the Consolidated Financial Statements (continued)****Auditors' Responsibilities for the Audit of the Consolidated Financial Statements (continued)**

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence and, where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the current year and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

**Report on Other Legal and Regulatory Requirements**

Based on the information that has been made available to us, nothing has come to our attention that causes us to believe that the Bank was not in compliance, in all material respects, with the applicable requirements of the Regulation for Companies, the Banking Control Law in the Kingdom of Saudi Arabia and the Bank's By-Laws in so far as they affect the preparation and presentation of the consolidated financial statements for the year ended 31 December 2025.

1

**General (Continued)**

\* During June 2024, the Group acquired 65% shareholding in "Drahim Holdings". The subsidiary is based in Cayman Island with the objective of offering open banking, investment and financial technology services. The Group has completed the Purchase Price Allocation exercise and consolidated the subsidiary in these Consolidated Financial statements. The Group completed the process and legal formalities of the acquisition of the shares in Drahim Holding Company for a cash consideration of ₩83.4 million. As part of the acquisition, the Group has received Drahim Treasury Shares presenting 3.1% shareholding. The acquisition has been accounted for using the acquisition method under IFRS 3 – Business Combinations (the 'Standard')."

**b) Shari'a Authority**

As a commitment from the Bank for its activities to be in compliance with Islamic Shari'a legislations, since its inception, the Bank has established a Shari'a Authority to ascertain that the Bank's activities are subject to its approval and control. The Shari'a Authority has reviewed the Bank's activities and issued the required decisions thereon.

The Bank is regulated by the Saudi Central Bank (SAMA).

2

**Basis of preparation****(a) Statement of compliance**

The consolidated financial statements of the Group have been prepared

- in accordance with the IFRS as endorsed in the Kingdom of Saudi Arabia and other standards and pronouncements endorsed by the Saudi Organization for Chartered and Professional Accountants ("SOCPA"), and
- in compliance with the Banking Control Law and the Regulations for Companies in the Kingdom of Saudi Arabia and by-laws of the Bank.

The new Companies Law issued through Royal Decree M/132 on 1/12/1443H (corresponding to June 30, 2023) (hereinafter referred as "the Law") came into force on 26/6/1444H (corresponding to January 19, 2023). For certain provisions of the Law, full compliance is expected not later than two years from 26/6/1444H (corresponding to January 19, 2023). The management has amended its Articles of Association / By-Laws in its recent annual General Assembly meeting.

**(b) Basis of measurement and preparation**

The consolidated financial statements have been prepared on a going concern basis under the historical cost convention except for the following items in the consolidated statement of financial position:

- Derivatives are measured at fair value;
- Financial instruments designated as Fair Value through Profit or Loss ("FVIS") are measured at fair value;
- Investments designated as Fair Value through Other Comprehensive Income ("FVOCI") are measured at fair value;
- Employee defined benefit obligations are recognized at the present value of future obligations using the Projected Unit Credit Method, and
- Financial assets or liabilities that are hedged through a fair value hedging relationship, are adjusted to record changes in fair value attributable to the risks that are being hedged.

The Group presents its consolidated statement of financial position in order of liquidity.

**(c) Going concern**

The consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and settlement of liabilities in the normal course of business.

**2****Basis of preparation (Continued)****(d) Basis of consolidation**

These consolidated financial statements comprise the financial statements of the Bank and its subsidiaries as identified in (note 1). The financial statements of subsidiaries are prepared for the same reporting year as that of the Bank, using consistent accounting policies.

Subsidiaries are investees controlled by the Group. The Group controls an investee when it is exposed to, or has rights to, variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date that control ceases.

The control indicators set out below are subject to management's judgements that can have a significant effect in the case of the Group's interests in securitisation vehicles and investments funds.

Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee; and
- The ability to use its power over the investee to affect amount of its returns.

When the Group has less than majority of the voting or similar substantive rights of an investee entity, the Group considers all relevant facts and circumstances in assessing whether it has power over the investee, including:

- The contractual arrangement with the other vote holders of the investee;
- Rights arising from other contractual arrangements; and
- The Group's voting rights and potential voting rights granted by equity instruments such as shares.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of income from the date the Group gains control until the date the Group ceases to control the subsidiary. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- Derecognises the assets (including goodwill) and liabilities of the subsidiary;
- Derecognises carrying amount of any non-controlling interests;
- Derecognises the cumulative translation differences recorded in equity;
- Recognises the fair value of the consideration received;
- Recognises the fair value of any investment retained;
- Recognises any surplus or deficit in the consolidated statement of income; and
- Reclassifies the parent's share of components previously recognised in OCI to the consolidated statement of income or retained earnings, as appropriate as would be required if the Group had directly disposed of the related assets or liabilities.

All intra-group balances, transactions, income, and expenses are eliminated in full in preparing these consolidated financial statements.

The consolidated financial statements have been prepared using uniform accounting policies and valuation methods for like transactions and other events in similar circumstances. The accounting policies of subsidiaries have been changed when necessary to align them with the policies adopted by the Group.

**Basis of preparation (Continued)****(e) Functional and presentation currency**

These consolidated financial statements are presented in Saudi Arabian Riyals (‘), which is the Bank's functional currency.

Except as otherwise indicated, financial information presented in ‘ has been rounded off to the nearest thousand.

**(f) Critical accounting judgments, estimates and assumptions**

The preparation of the consolidated financial statements in conformity with IFRS as endorsed in KSA and other standards and pronouncements issued by SOCOPA, requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires management to exercise its judgments in the process of applying the Group's accounting policies. Such estimates, assumptions and judgments are continually evaluated and are based on historical experience and other factors, including obtaining professional advice and expectations of future events that are believed to be reasonable under the circumstances.

The significant accounting estimates impacted by these forecasts and associated uncertainties are predominantly related to expected credit losses, fair value measurement, and the assessment of the recoverable amount of non-financial assets.

Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period, or in the period of revision and in future periods if the revision affects both current and future periods.

Significant areas where management has used estimates, assumptions or exercised judgments is as follows:

**1. Expected Credit Losses on financial assets**

The measurement of impairment losses under IFRS 9 across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Group's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models such as Probability of Default ("PD"), Exposure at Default ("EAD") and Loss Given Default rate ("LGD"), that are considered accounting judgements and estimates include selection of an estimation technique or modelling that are considered accounting Judgements as follows:

- The Group's internal credit grading model, which assigns Probability of Default ('PDs') to the individual grades,
- The Group's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a Lifetime ECL basis and the qualitative assessment,
- The segmentation of financial assets when their ECL is assessed on a collective basis,
- Development of ECL models, including the various formulas and the choice of inputs,
- Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models.

**2. Judgement of equity vs liability for Tier I Sukuk**

The determination of equity classification of Tier I Sukuk requires significant judgement as certain clauses of the Offering Circular require interpretation. The Group classifies as part of equity the Tier I Sukuk issued with no fixed redemption/maturity dates (Perpetual Sukuk) and not obliging the Group for payment of profit upon the occurrence of a non-payment event or non-payment election by the Bank subject to certain terms and conditions that are under the control of the Group. The related initial costs and distributions thereon are recognized directly in the consolidated statement of changes in equity under retained earnings.

## 2 Basis of preparation (Continued)

### 3. Determination of control and significant influence over investees

The control indicators are subject to management's judgements, and are set out in (notes 3.c and 6).

Investment funds management:

The Group acts as Fund Manager to a number of investment funds. Determining whether the Group controls such investment fund usually focuses on the assessment of the aggregate economic interests of the Group in the Fund (comprising any carried profits and expected management fees) and the investor's rights to remove the Fund Manager the Group has concluded that it acts as an agent for the investors in all cases, and therefore has not consolidated these funds.

### 4. Employees' end of service benefits liabilities

The Group operates an End of Service Benefit scheme for its employees based on the prevailing Saudi Labor laws. The liability is being accrued based on projected unit credit method in accordance with the periodic actuarial valuation. For details of assumptions and estimate refer to (note 30).

### 5. Other significant areas where management has used estimates, assumptions or exercised judgments are referred as follows:

- Fair value Measurement (note 35)
- Credit Risk Management (note 31.1.a)
- Credit Risk Measurement (note 31.1.a)
- Classification of Investments at Amortised Cost (note 3.d.1)
- Recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources (note 21)
- Judgement of equity vs liability for Tier I Sukuk (note 2.2)
- Determination of control and significant influence over investees (note 2.h)

## 3 Material accounting policies

The material accounting policies adopted in the preparation of these consolidated financial statements are set out below.

### (a) Changes in accounting policies due to adoption of new standards, interpretations and amendments adopted by the Group

The accounting policies used in the preparation of these consolidated financial statements are consistent with those used in the preparation of the annual (consolidated) financial statements for the year ended December 31, 2025. Based on the adoption of new standard and in consideration of current economic environment, the following accounting policies are applicable effective January 1, 2025 replacing, amending, or adding to the corresponding accounting policies set out in 2024 annual consolidated financial statements.

### New standards, interpretations and amendments adopted by the Group

Following standard, interpretation or amendment are effective from the annual reporting period beginning on 1 January 2025 and are adopted by the Group, however, they do not have any significant impact on the consolidated financial statements of the year unless otherwise stated below:

Standard, interpretation and amendments	Description	Effective date
Amendment to IAS 21 – Lack of exchangeability	IASB amended IAS 21 to add requirements to help in determining whether a currency is exchangeable into another currency, and the spot exchange rate to use when it is not exchangeable. Amendment set out a framework under which the spot exchange rate at the measurement date could be determined using an observable exchange rate without adjustment or another estimation technique.	1 January 2025

**Material accounting policies (Continued)****(b) Forthcoming new standards not yet effective**

Standard, interpretation and amendments	Description	Effective date
Amendments to IFRS 10 and IAS 28- Sale or Contribution of Assets between an Investor and its Associate or Joint Venture	Partial gain or loss recognition for transactions between an investor and its associate or joint venture only apply to the gain or deferred loss resulting from the sale or contribution of assets that do not indefinitely constitute a business as defined in IFRS 3 Business Combinations and the gain or loss resulting from the sale or contribution to an associate or a joint venture of assets that constitute a business as defined in IFRS 3 is recognized in full.	
Amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures	Under the amendments, certain financial assets including those with ESG-linked features could now meet the SPPI criterion, provided that their cash flows are not significantly different from an identical financial asset without such a feature.	1 January 2026
Amendments to IFRS 9 and IFRS 7 Contracts referencing Nature-dependent Electricity	The IASB has amended IFRS 9 to clarify when a financial asset or a financial liability is recognized and derecognized and to provide an exception for certain financial liabilities settled using an electronic payment system.	
Annual improvements to IFRS – Volume 11	Contracts Referencing Nature-dependent Electricity amends IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures to more faithfully reflect the effects of contracts referencing nature-dependent electricity on an entity's financial statements.	1 January 2026
IFRS 18, Presentation and Disclosure in Financial Statements	Annual improvements are limited to changes that either clarify the wording in an Accounting Standard or correct relatively minor unintended consequences, oversights or conflicts between the requirements in the Accounting Standards. The 2024 amendments are to the following standards: IFRS 1 First-time Adoption of International Financial Reporting Standards; IFRS 7 Financial Instruments: Disclosures and its accompanying Guidance on implementing IFRS 7; IFRS 9 Financial Instruments; IFRS 10 Consolidated Financial Statements; and IAS 7 Statement of Cash Flows.	1 January 2026
	IFRS 18 provides guidance on items in statement of profit or loss classified into five categories: operating; investing; financing; income taxes and discontinued operations. It defines a subset of measures related to an entity's financial performance as 'management-defined performance measures' ('MPMs'). The totals, subtotals and line items presented in the primary financial statements and items disclosed in the notes need to be described in a way that represents the characteristics of the item. It requires foreign exchange differences to be classified in the same category as the income and expenses from the items that resulted in the foreign exchange differences.	1 January 2027

**Material accounting policies (Continued)****(b) Forthcoming new standards not yet effective (Continued)**

Standard, interpretation and amendments	Description	Effective date
IFRS 19, Subsidiaries without Public Accountability: Disclosures	IFRS 19 allows eligible subsidiaries to apply IFRS with the 1 January 2027 reduced disclosure requirements of IFRS 19. A subsidiary may choose to apply the new standard in its consolidated, separate or individual financial statements provided that, at the reporting date it does not have public accountability, and its parent produces consolidated financial statements under IFRS.	

**c) Government grants**

The Group recognizes a government grant related to income, if there is a reasonable assurance that it will be received, and the Group will comply with the conditions associated with the grant. The benefit of a government deposit at a below-market rate of profit is treated as a government grant related to income. The below-market rate deposit is recognized and measured in accordance with IFRS 9 - Financial Instruments. The benefit of the below-market rate of profit is measured as the difference between the initial fair value of the deposit determined in accordance with IFRS 9 and the proceeds received. The benefit is accounted for in accordance with IAS 20 - Accounting for Government grant. The government grant is recognised in the statement of income on a systematic basis over the period in which the Group recognises as expenses for which the grant is intended to compensate. The grant income is only recognised when the ultimate beneficiary is the Group. Where the customer is the ultimate beneficiary, the Group only records the respective receivable and payable amounts.

**d) Financial assets and financial liabilities****(1) Classification of financial assets**

On initial recognition, a financial asset is classified and measured at: Amortized Cost, Fair Value through Other Comprehensive Income ("FVOCI") or Fair Value through Statement of Income ("FVIS"). This classification is generally based on the business model in which a financial asset is managed and its contractual cash flows.

**Financial Asset at amortised cost:**

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVIS:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and profit on the principal amount outstanding.

**Financial Asset at FVOCI:**

A Debt and equity instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVIS:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and profit on the principal amount outstanding.

FVOCI debt instruments are subsequently measured at fair value with gains and losses arising due to changes in fair value recognised in OCI. Profit income and foreign exchange gains and losses are recognised in consolidated statement of income.

An Equity Instrument; the Group on initial recognition, may irrevocably elect to present subsequent changes in fair value in OCI for an equity investment that is not held for trading. This election is made on an instrument-by-instrument (i.e. share-by-share) basis.

**3****Material accounting policies (Continued)****d) Financial assets and financial liabilities (Continued)****(1) Classification of financial assets (Continued)****Financial Asset at FVIS:**

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVIS.

In addition, on initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI as at FVIS if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

**Reclassification of financial assets**

Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Group changes its business model for managing financial assets.

**Business model assessment**

The Group makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual profit revenue, maintaining a particular profit rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realizing cash flows through the sale of the assets;
- the performance of the portfolio is evaluated and reported to the Group's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- the compensation made to the managers of the business- e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Group's stated objective for managing the financial assets is achieved and how cash flows are realized.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Group's original expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

Financial assets that are held for trading and whose performance is evaluated on a fair value basis are measured at FVIS because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

**Material accounting policies (Continued)****d) Financial assets and financial liabilities (Continued)****(1) Classification of financial assets (Continued)****Assessments whether contractual cash flows are solely payments of principal and profit (SPPP)**

For the purposes of this assessment, 'principal' is the fair value of the financial asset on initial recognition. "Profit" is the consideration for the time value of money, the credit and other basic financing risk associated with the principal amount outstanding during a particular period and other basic financing costs (e.g. liquidity risk and administrative costs), along with profit margin.

In assessing whether the contractual cash flows are solely payments of principal and profit, the Group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Group considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Group's claim to cash flows from specified assets (e.g. non-recourse asset arrangements); and
- features that modify consideration of the time value of money- e.g. periodical reset of profit rates.

**Designation at fair value through statement of income**

At initial recognition, the Bank has designated certain financial assets at FVIS.

The Group deploys profit based products including Mutajara, installment sales and Murabaha to its customers in compliance with Shari'a rules. The Group classifies its Principal financing and Investment as follows:

**Financing:** These financings represent facilities granted to customers. These financings mainly constitute four broad categories i.e. Mutajara, Installment sales, Murabaha and credit cards. The Group classifies these financings at amortised cost as they are held to collect contractual cash flow and pass SPPP test.

**Due from banks and other financial institutions:** These consists of placements with financial Institutions (FIs). The Group classifies these balances due from banks and other financial institutions at amortised cost as they are held to collect contractual cash flows and pass SPPP criterion.

**Investments (Murabaha with SAMA):** These investments consists of placements with the Saudi Central Bank (SAMA). The Group classifies these investments at amortised cost as they are held to collect contractual cash flows and pass SPPP criterion.

**Investments (Sukuk):** These investments consists of Investment in various Sukuk. The Group classifies these investments at amortised cost and FVOCI except for those Sukuk which fails SPPP criterion, which are classified at FVIS.

**Equity Investments:** These are the strategic equity investments which the Group does not expect to sell, for which Group has made an irrevocable election on the date of initial recognition to present the fair value changes in other comprehensive income.

**Investments (Mutual Funds):** The investments consist of Investments in various Mutual Funds. The Group classifies these investment at FVIS as these investments fail SPPP criterion.

**Investments (Structured Products):** These investments consists of Investment in various structured products. Structured products are sukus with an additional embedded feature which could be Range accrual, Credit linked and Floaters. The Group classifies these investments at amortised cost and FVOCI except for those structured products which fails SPPP criterion, which are classified at FVIS.

**3****Material accounting policies (Continued)****d) Financial assets and financial liabilities (Continued)****(2) Classification of financial liabilities**

The Group classifies its financial liabilities, other than financial guarantees and financing commitments, as measured at amortized cost. Amortized cost is calculated by taking into account any discount or premium on issue funds, and costs that are an integral part of the Effective Profit Rate "EPR".

All amounts Due to banks, Saudi Central Bank and other financial institutions and customer deposits are initially recognized at fair value less transaction costs. Subsequently, financial liabilities are measured at amortized cost, unless they are required to be measured at fair value through profit or loss.

**(3) Derecognition****Derecognition of financial assets**

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

On derecognition of a financial asset (debt instrument), the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognized) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognized in OCI, is recognized in consolidated statement of income.

When assets are sold to a third party with a concurrent total rate of return swap on the transferred assets, the transaction is accounted for as a secured financing transaction similar to sale and repurchase transactions, as the Group retains all or substantially all of the risks and rewards of ownership of such assets.

In transactions in which the Group neither retains nor transfers substantially all of the risks and rewards of ownership of a financial asset and it retains control over the asset, the Group continues to recognize the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset.

Any cumulative gain/loss recognized in OCI, among other reserve, in respect of equity investment securities designated as at FVOCI is not recognized in consolidated statement of income on derecognition of such securities. Cumulative gains and losses recognized in OCI in respect of such equity investment securities are transferred to retained earnings on disposal. Any interest in transferred financial assets that qualify for derecognition that is created or retained by the Group is recognized as a separate asset or liability.

In certain transactions, the Bank retains the obligation to service the transferred financial asset for a fee. The transferred asset is derecognized if it meets the derecognition criteria. An asset or liability is recognized for the servicing contract if the servicing fee is more than adequate (asset) or is less than adequate (liability) for performing the servicing.

**Derecognition of financial liabilities**

The Group derecognizes a financial liability when its contractual obligations are discharged or cancelled or expired.

**Material accounting policies (Continued)****d) Financial assets and financial liabilities (Continue)****(4) Modifications of financial assets and financial liabilities****Modified financial assets**

If the terms of a financial asset are modified, the Group evaluates whether the contractual cash flows of the modified asset are substantially different. If the contractual cash flows are substantially different than it was originated, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognized and a new financial asset is recognized at fair value plus any eligible transaction costs. Any fees received as part of the modification are accounted for as follows:

- Fees that are considered in determining the fair value of the new financial asset and fees that represents reimbursement of eligible transaction costs are included in the initial measurement of the asset; and
- Other fees are included in profit or loss as part of the gain or loss on derecognition.

If the contractual cash flows of the modified asset carried at amortized cost are not substantially different than it was originated, then the modification does not result in derecognition of the financial asset. In this case, the Group recalculates the gross carrying amount of the financial asset and recognizes the amount arising from adjusting the gross carrying amount as a modification gain or loss in the consolidated statement of income. For floating-rate financial assets, the original effective profit rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs of fees incurred and modification fees received adjust the gross carrying amount of the modified financial asset and are amortised over the remaining term of the modified financial asset

**Modified financial liabilities**

The Group derecognizes a financial liability when its terms are modified and the contractual cash flows of the modified liability are substantially different. In this case, a new financial liability based on the modified terms is recognized at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognized in consolidated statement of income.

If the modification of a financial liability is not accounted for as derecognition, then the amortized cost of the liability is recalculated by discounting the modified cash flows at the original effective profit rate and the resulting gain or loss is recognized in consolidated statement of income.

**(5) Impairment of financial assets**

The loss allowance is based on the Expected Credit Losses ("ECLs") associated with the Probability of Default ("PD") in the next twelve months unless there has been a Significant Increase in Credit Risk ("SICR") since origination. If the financial asset meets the definition of Purchased or Originated Credit Impaired ("POCI"), the allowance is based on the change in the ECLs over the life of the asset. POCI assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and financing income is subsequently recognised based on a credit-adjusted ("EPR"). ECLs are only recognised or released to the extent that there is a subsequent change in the expected credit losses.

The Group recognizes loss allowances for ECL on the following financial instruments that are not measured at FVIS:

- Due from banks and other financial institutions;
- financial assets that are debt instruments;
- lease receivables;
- Financial guarantee contracts issued; and
- Financing commitments issued.

No impairment loss is recognized on equity at FVOCI investments.

**Material accounting policies (Continued)****d) Financial assets and financial liabilities (Continued)****(5) Impairment of financial assets (Continued)**

The Group measures loss allowances at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:

- debt investment securities that are determined to have low credit risk at the reporting date; and
- other financial instruments on which credit risk has not increased significantly since their initial recognition.

The Group considers Sukuk to have low credit risk when their credit risk rating is equivalent to the globally understood definition of “investment grade”.

12-month ECL are the portion of ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date. Financial assets, for which 12-month ECLs are recognized, are referred to as “Stage 1” financial instruments. Financial instruments allocated to Stage 1 have not undergone a significant increase in credit risk since initial recognition and are not credit-impaired.

Lifetime ECL are the ECL that result from all possible default events over the expected life of the financial instrument or the maximum contractual period of exposure. Financial instruments for which lifetime ECL are recognized but that are not credit-impaired are referred to as “Stage 2 financial assets”. Financial instruments allocated to stage 2 are those that have experienced a significant increase in credit risk since initial recognition but are not yet credit-impaired.

Financial assets for which the lifetime ECLs are recognized and that are credit-impaired are referred to as “Stage 3 financial assets”.

**Measurement of ECL**

ECL are a probability-weighted estimate of credit losses. It is measured as follows:

- financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive);
- financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows;
- undrawn financing commitments: as the present value of the difference between the contractual cash flows that are due to the Group if the commitment is drawn down and the cash flows that the Group expects to receive; and
- financial guarantee contracts: the expected payments to reimburse the holder less any amounts that the Group expects to recover.

When discounting future cash flows, the following discount rates are used:

- financial assets other than POCI financial assets and lease receivables: the original effective profit rate or an approximation thereof;
- POCI assets: a credit-adjusted effective profit rate;
- Lease receivables: the discount rate used in measuring lease receivables;
- Undrawn financing commitments: the effective profit rate, or an approximation thereof, that will be applied to the financial asset resulting from the financing commitment; and
- financial Guarantee contracts issued: the rate that reflects the current market assessment of the time value of money and the risks that are specific to the cash flows.

The key inputs into the measurement of ECL are the term structure of the following variables:

- Probability of default (“PD”),
- Loss given default (“LGD”), and
- Exposure at default (“EAD”).

**Material accounting policies (Continued)****d) Financial assets and financial liabilities (Continued)****(5) Impairment of financial assets (Continued)****Measurement of ECL (Continued)**

The above parameters are generally derived from internally developed statistical models and historical data which are adjusted for forward looking information. The Group categorizes its financial assets into the following three stages in accordance with IFRS 9 methodology:

- Stage 1: Performing assets;
- Stage 2: Underperforming assets; and
- Stage 3: Credit-impaired assets.

The three stage categories of financial assets are more elaborated in (note 32-1-a.v)

To evaluate a range of possible outcomes, the Group formulates various scenarios. For each scenario, the Group derives an ECL and applies a probability weighted approach to determine the impairment allowance in accordance with the accounting standards requirements.

For how financial assets and ECLs are allocated among the three credit stages, refer to (note 5) for due from banks and financial institutions, (note 6) for investments, (note 7) for financing facilities, and (note 18) Commitments and contingencies.

**Restructured financial assets**

If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the customer, then an assessment is made of whether the financial asset should be derecognized and then ECLs are measured as follows:

- If the expected restructuring will not result in derecognition of the existing asset, then the expected cash flows arising from the modified financial asset are included in calculating the cash shortfalls from the existing asset.
- If the expected restructuring will result in derecognition of the existing asset, then the expected fair value of the new asset is treated as the final cash flow from the existing financial asset at the time of its derecognition. This amount is included in calculating the cash shortfalls from the existing financial asset that are discounted from the expected date of derecognition to the reporting date using the original effective profit rate of the existing financial asset.

**Credit-impaired financial assets**

At each reporting date, the Group assesses whether financial assets carried at amortized cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the customer or issuer;
- a breach of contract such as a default or past due event;
- the restructuring of a financing facility by the Group on terms that the Group would not consider otherwise;
- it is becoming probable that the customer will enter bankruptcy or other financial reorganization; or
- the disappearance of an active market for a security because of financial difficulties.

Financing facility that has been renegotiated due to deterioration in the customer's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. In addition, a retail financing that is overdue for 90 days or more is considered impaired. In making an assessment of whether an investment in sovereign debt is credit-impaired, the Group considers the following factors.

- The market's assessment of creditworthiness as reflected in the yields.
- The rating agencies' assessments of creditworthiness.
- The country's ability to access the capital markets for new debt issuance.
- The probability of financing being restructured, resulting in holders suffering losses through voluntary or mandatory financing forgiveness.

**Material accounting policies (Continued)****d) Financial assets and financial liabilities (Continued)****(5) Impairment of financial assets (Continued)****Credit-impaired financial assets (Continued)**

- The international support mechanisms in place to provide the necessary support as “lender of last resort” to that country, as well as the intention, reflected in public statements, of governments and agencies to use those mechanisms. This includes an assessment of the depth of those mechanisms and, irrespective of the political intents, whether there is the capacity to fulfil the required criteria.

**POCI financial assets**

POCI financial assets are assets that are credit-impaired on initial recognition. For POCI assets, lifetime ECL are incorporated into the calculation of the effective profit rate on initial recognition. Consequently, POCI assets do not carry impairment allowance on initial recognition. The amount recognized as a loss allowance subsequent to initial recognition is equal to the changes in lifetime ECL since initial recognition of the asset.

**Credit cards and other revolving facilities**

The Bank's products offering include a variety of corporate and retail overdraft and credit cards facilities, in which the Bank has the right to cancel and/or reduce the facilities with one day's notice. The Bank does not limit its exposure expectations of customer behaviour, the likelihood of default and its future risk mitigation procedures, which could include reducing or cancelling the facilities. Based on past experience and the Bank's expectations, the period over which the Bank calculates ECL for these products, is five years for corporate and seven years for retail products. The ongoing assessment of whether a significant increase in credit risk has occurred for revolving facilities is similar to other lending products. This is based on shifts in the customer's internal credit grade, but greater emphasis is also given to qualitative factors such as changes in usage.

The profit rate used to discount the ECL for credit cards is based on the average effective profit rate that is expected to be charged over the expected period of exposure to the facilities. This estimation takes into account that many facilities are repaid in full each month and are consequently not charged profit. The calculation of ECL, including the estimation of the expected period of exposure and discount rate is made, on an individual basis for corporate and on a collective basis for retail products.

The collective assessments are made separately for portfolios of facilities with similar credit risk characteristics.

**Presentation of allowance for ECL in the consolidated statement of financial position**

Loss allowances for ECLs are presented in the consolidated statement of financial position as follows:

- financial assets measured at amortized cost: as a deduction from the gross carrying amount of the assets;
- where a financial instrument includes both a drawn and an undrawn component, and the Group cannot identify the ECL on the financing commitment component separately from those on the drawn component: the Group presents a combined loss allowance for both components. The combined amount is presented as a deduction from the gross carrying amount of the drawn component. Any excess of the loss allowance over the gross amount of the drawn component is presented as a provision; and
- financing commitments and financial guarantee contracts: generally, as a provision;
- debt instruments measured at FVOCI: no loss allowance is recognized in the statement of financial position because the carrying amount of these assets is their fair value. However, the loss allowance is disclosed and is recognized in the fair value reserve.

**Material accounting policies (Continued)****d) Financial assets and financial liabilities (Continued)****(5) Impairment of financial assets (Continued)****Write-off**

Financing and debts securities are written off (either partially or fully) when there is no reasonable expectation of recovering a financial asset in its entirety or a portion thereof. This is generally the case when the Group determines that the customer does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. This assessment is carried out at the individual assets level.

Recoveries of amounts previously written off are recognised when the cash is received and are included in “Impairment charge for expected credit losses, net” in the consolidated statement of income.

Financial assets that are written off could still be subject to enforcement activities in order to comply with the Group’s procedures for recovery of amounts due.

**Collateral valuation**

To mitigate its credit risks on financial assets, the Group seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets and credit enhancements such as netting agreements. Collateral, unless repossessed, is not recorded on the Group’s statement of financial position. However, the fair value of collateral affects the calculation of ECL. It is generally assessed, at a minimum, at inception and re-assessed on a periodic basis. However, some collateral, for example, cash or market securities relating to margining requirements, is valued daily.

To the extent possible, the Group uses active market data for valuing financial assets held as collateral. Non-financial collateral, such as real estate, is valued based on data provided by third parties such as mortgage brokers, or based on housing price indices.

**Collateral repossessed**

The Group’s policy is to determine whether a repossessed asset can be best used for its internal operations or should be sold. Assets determined to be useful for the internal operations, if any, are transferred to their relevant asset category at the fair value, if material. Assets for which selling is determined to be a better option are transferred to assets held for sale at their fair value (if financial assets) and fair value less cost to sell for non-financial assets at the repossession date in, line with the Bank’s policy.

In its normal course of business, the Bank does not physically repossess properties or other assets in its retail portfolio, but engages external agents to recover funds, generally at auction, to settle outstanding debt. Any surplus funds are returned to the customers/obligors. As a result of this practice, the residential properties under legal repossession processes are not recorded in the consolidated Statement of financial position.

**(6) Financial guarantees and financing commitments, letters of credit**

Financial guarantees are contracts that require the Bank to make specified payments to reimburse the holder for a loss that it incurs because a specified debtor fails to make payment when it is due in accordance with the terms of a debt instrument. Financing commitments are firm commitments to provide credit under pre-specified terms and conditions.

The premium received is recognised in the consolidated statement of income in net fees and yield income on a straight line basis over the life of the guarantee.

Financing commitments and letter of credits' are firm commitments under which, over the duration of the commitments, the Bank is required to provide credit under pre-specified terms and conditions. Similar to financial guarantee contracts, these contracts are in the scope of the ECL requirements.

**Material accounting policies (Continued)****d) Financial assets and financial liabilities (Continued)****(6) Financial guarantees and financing commitments, letters of credit (Continued)**

The nominal contractual value of financial guarantees, letters of credit and financing commitments, where the financing agreed to be provided is on market terms, are not recorded in the consolidated statement of financial position. The nominal values of these instruments together with the corresponding ECL is recorded.

Financial guarantees issued or financing commitments to provide financing at a below market profit rate are initially measured at fair value. Subsequently, they are measured at the higher of the ECL determined in accordance with IFRS 9 and the amount initially recognized less, where appropriate, the cumulative amount of income recognized in accordance with the principle of IFRS 15.

- The Bank issued no financing commitments that are measured at FVIS.
- Liabilities arising from financial guarantees and financing commitments are included within provisions.

**e) Derivative financial instruments and hedge accounting**

Derivative financial instruments include foreign exchange forward contracts, profit rate swaps and FX swaps. These derivatives financial instruments are initially recognised at fair value on the date on which the derivative contract is entered into. These instruments are carried at their fair value as assets where the fair value is positive and as liabilities where the fair value is negative. Fair values are obtained by reference to quoted market prices, discounted cash flow models and pricing models as appropriate. The treatment of changes in their fair value depends on their classification into the following categories:

**i. Derivatives held for trading**

Any changes in the fair value of derivatives that are held for trading purposes are taken directly to the consolidated statement of income and disclosed in Gain / (Loss) on FVIS Financial Instruments, net. Derivatives held for trading also include those derivatives, which do not qualify for hedge accounting.

**ii. Hedge Accounting**

As indicated in the accounting policies below, the Group elected to account for hedge accounting under IFRS 9 except for the macro fair value hedges for which the Group has elected to apply the IAS 39 hedge accounting as permitted by IFRS 9.

The Group designates certain derivatives as hedging instruments in qualifying hedging relationships to manage exposures to profit rate, foreign currency, and credit risks, including exposures arising from highly probable forecast transactions and firm commitments. In order to manage particular risk, the Group applies hedge accounting for transactions that meet specific criteria.

For the purpose of hedge accounting, hedges are classified into two categories:

(a) fair value hedges which hedge the exposure to changes in the fair value of a recognised asset or liability, (or assets or liabilities in case of portfolio hedging), or an unrecognised firm commitment or an identified portion of such an asset, liability or firm commitment, that is attributable to a particular risk and could affect the reported net gain or loss; and

(b) cash flow hedges which hedge exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or to a highly probable forecasted transaction that will affect the reported net gain or loss.

In order to qualify for hedge accounting, the hedge should be expected to be highly effective, i.e., the changes in fair value or cash flows of the hedging instrument should effectively offset corresponding changes in the hedged item and should be reliably measurable. At inception of the hedge, the risk management objective and strategy are documented including the identification of the hedging instrument, the related hedged item, the nature of risk being hedged, and how the Group will assess the effectiveness of the hedging relationship. Subsequently, the hedge is required to be assessed and determined to be an effective hedge on an on-going basis.

**Material accounting policies (Continued)****e) Derivative financial instruments and hedge accounting (continued)****ii. Hedge Accounting (continued)**

At each hedge effectiveness assessment date, a hedge relationship must be expected to be highly effective on a prospective basis and demonstrate that it was effective (retrospective effectiveness) for the designated period in order to qualify for hedge accounting. A formal assessment is undertaken by comparing the hedging instrument's effectiveness in offsetting the changes in fair value or cash flows attributable to the hedged risk in the hedged item, both at inception and at each quarter end on an ongoing basis. Hedge ineffectiveness is recognized in the statement of income in 'Net trading income'. For situations where the hedged item is a forecast transaction, the Group also assesses whether the transaction is highly probable and presents an exposure to variations in cash flows that could ultimately affect the statement of income.

**Cash flow hedges**

For designated and qualifying cash flow hedging, derivatives instruments in a hedge of a variability in cash flows attributable to a particular risk associated with recognised asset or a liability or a highly probable forecast transaction that could affect the consolidated statement of income, the portion of the gain or loss on the hedging instrument that is determined to be an effective portion is recognised directly in other comprehensive income and the ineffective portion, if any, is recognised in the consolidated statement of income. For cash flow hedges affecting future transactions, the gains or losses recognised in other reserves, are transferred to the consolidated statement of income in the same period in which the hedged item affects the consolidated statement of income. However, if the Group expects that all or a portion of a loss recognized in other comprehensive income will not be recovered in one or more future periods, it shall reclassify into the consolidated statement of income as a reclassification adjustment the amount that is not to be recognized.

Where the hedged forecasted transaction results in the recognition of a non-financial asset or a non-financial liability, then at the time such asset or liability is recognised the associated gains or losses that had previously been recognised directly in other comprehensive income are included in the initial measurement of the acquisition cost or other carrying amount of such asset or liability. When the hedging instrument is expired or sold, terminated, or exercised, or no longer qualifies for hedge accounting, or the forecast transaction is no longer expected to occur, or the Group revokes the designation then hedge accounting is discontinued prospectively. At that point of time, any cumulative gain or loss on the cash flow hedging instrument that was recognised in other comprehensive income from the period when the hedge was effective is transferred from equity to consolidated statement of income when the forecasted transaction occurs. Where the hedged forecasted transaction is no longer expected to occur and affects the consolidated statement of income, the net cumulative gain or loss recognised in "other comprehensive income" is transferred immediately to the consolidated statement of income for the period.

**Fair value hedges**

When a derivative is designated as the hedging instrument in a hedge of the change in fair value of a recognised asset or liability or a firm commitment that could affect the consolidated statement of income, any gain or loss from re-measuring the hedging instruments to fair value is recognised immediately in the consolidated statement of income. The related portion of the hedged item is adjusted against the carrying amount of the hedged item and recognised in the consolidated statement of income. For hedged items measured at amortised cost, where the fair value hedge of a profit bearing financial instrument ceases to meet the criteria for hedge accounting or is sold, exercised or terminated, the difference between the carrying value of the hedged item on termination and the face value is amortised over the remaining term of the original hedge using the effective yield basis. If the hedged item is derecognised, the unamortised fair value adjustment is recognized immediately in the consolidated statement of income.

A fair value hedge relationship is a 'Non-Macro hedge' when the hedged item (or group of items) is a distinctively identifiable asset or liability hedged by one or a few hedging instruments. The financial instruments hedged that are used for profit rate risk we designed to (pay fix / receive floating rate swaps). If the hedging instrument expires or is sold, terminated or exercised, or when the hedge no longer meets the criteria for hedge accounting, or the Bank decides to voluntarily discontinue the hedging relationship, the hedge relationship is discontinued prospectively. If the relationship does not meet the hedge effectiveness criteria, the Bank discontinues hedge accounting from the last date on which compliance with hedge effectiveness was demonstrated. If the hedge accounting relationship is terminated for an item recorded at amortised cost, the accumulated fair value hedge adjustment to the carrying amount of the hedged item is amortised over the remaining term of the original hedge by recalculating the EPR. If the hedged item is derecognised, the unamortised fair value adjustment is recognised immediately in the income statement. For fair value hedge relationships where the hedged item is not measured at amortised cost, such as debt instruments at FVOCI, changes in fair value that were recorded in the income statement whilst hedge accounting was in place are amortised in a similar way to amortised cost instruments using the EPR method. However, as these instruments are measured at their fair values in the statement of financial position, the fair value hedge adjustments are transferred from the income statement to OCI. There were no such instances in either the current year or in the comparative year.

**Material accounting policies (Continued)****e) Derivative financial instruments and hedge accounting (continued)****iii. Derivatives Held for hedging purposes**

The Bank has adopted a comprehensive system for the measurement and management of risk. Part of the risk management process involves managing the Bank's exposure to fluctuations in foreign exchange and profit rates to reduce its exposure to currency and profit rate risks to acceptable levels as determined by the Board of Directors and within the guidelines issued by SAMA.

The Board of Directors has established levels of currency risk by setting limits on counterparty and currency position exposures. Positions are monitored on a daily basis and hedging strategies are used to ensure positions are maintained within the established limits. The Board of Directors has established the level of profit rate risk by setting limits on profit rate gaps for stipulated periods. Asset and liability profit rate gaps are reviewed on a periodic basis and hedging strategies are used to reduce profit rate gap within the established limits.

As part of its asset and liability management, the Bank uses derivatives for hedging purposes in order to adjust its own exposure to currency, cash flows and profit rate risks. This is generally achieved by hedging specific transactions as well as strategic hedging against overall consolidated statement of financial position exposures. Strategic hedging, other than portfolio hedges for profit rate risk, do not qualify for special hedge accounting and related derivatives are accounted for as held for trading.

**Portfolio (macro) fair value hedges**

The Bank applies macro fair value hedging to its fixed rate financing. The Bank determines hedged items by identifying portfolios of homogenous loans based on their contractual profit rates, maturity and other risk characteristics. Loans within the Identified portfolios are allocated to repricing time buckets based on expected, rather than contractual, repricing dates. The hedging instruments (pay fix/receive floating rate profit swaps) are designated appropriately to those repricing time buckets. Hedge effectiveness is measured on a periodic basis, by comparing fair value movements of the designated proportion of the bucketed loans due to the hedged risk, against the fair value movements of the derivatives, to ensure that they are within an 80% to 125% range. The aggregated fair value changes in the hedged loans are recognised as an asset on the Statement of financial position. Should hedge effectiveness testing highlight that movements for a particular bucket fall outside the 80-125% range (i.e., the hedge relationship was ineffective for the period), no fair value hedge accounting adjustment is recorded for that month for that particular bucket. Regardless of the results of the retrospective hedge effectiveness testing, at the end of every month, in order to minimise the ineffectiveness from early repayments and accommodate new exposures, the Bank voluntarily de-designates the hedge relationships and re-designates them as new hedges. At de-designation, the fair value hedge accounting adjustments are amortised on a straight-line basis over the original hedged life. The Bank has elected to commence amortisation at the date of de-designation.

The Bank uses forward foreign exchange contracts and currency swaps to hedge against specifically identified currency risks. In addition, the Bank uses profit rate swaps and profit rate futures to hedge against the profit rate risk arising from specifically identified fixed profit-rate exposures.

**Material accounting policies (Continued)****e) Derivative financial instruments and hedge accounting (continued)****iii. Derivatives Held for hedging purposes (continued)**

The Bank also uses profit rate swaps to hedge against the cash flow risk arising on certain floating rate exposures. In all such cases, the hedging relationship and objective, including details of the hedged items and hedging instrument are formally documented and the transactions are accounted for as fair value or cash flow hedges.

Possible sources of ineffectiveness are as follows:

- difference between the expected and actual volume of prepayments, as the Group hedges to the expected repayment date taking into account expected prepayments based on past experience;
- difference in the discounting between the hedge item and hedge instrument, as cash collateralized profit rate swaps are discounted using Overnight Indexed Swaps discount curves, which are not applied to the fixed rate mortgages;
- hedging derivative with a non-zero fair value at the date of initial designation as a hedging instrument;
- counter party credit risk which impacts the fair value of uncollateralized profit rate swaps but not the hedge items; and

the effects of the forthcoming reforms to USD LIBOR, because these might take effect at a different time and have a different impact on the hedged item e.g. (the fixed-rate mortgages) and the hedging instrument e.g. (the derivatives used to hedge those mortgages).

**iv. Embedded derivatives**

Derivatives may be embedded in another contractual arrangement (a host contract). The Bank accounts for an embedded derivative separately from the host contract when:

- (a) the host contract is not an asset in the scope of IFRS 9;
- (b) the terms of the embedded derivative would meet the definition of a derivative if they were contained in a separate contract; and
- (c) the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics and risks of the host contract.

Separated embedded derivatives are measured at fair value, with all changes in fair value recognized in statement of income unless they form part of a qualifying cash flow or net investment hedging relationship

**Material accounting policies (Continued)****f) Intangible assets****i. Goodwill**

Goodwill arises on the acquisition of subsidiaries, associates and joint ventures and represents the excess of the consideration transferred over the Bank's interest in net fair value of the net identifiable assets, liabilities and contingent liabilities of the acquiree and the fair value of the non-controlling interest in the acquiree. Goodwill on acquisitions of subsidiaries is included under 'intangible assets'. Goodwill on acquisitions of associates and joint ventures is included under 'investments in associates and joint ventures'.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Any goodwill arising from initial consolidation is tested for impairment at least once a year and whenever events or changes in circumstances indicate the need for impairment, they are written down if required.

For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Goodwill is allocated to cash-generating units or groups of cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose identified in accordance with IFRS 8.

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss of disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative fair values of the operations disposed of and the portion of the cash-generating unit retained.

**ii. Capitalised software**

Software acquired by the Group is stated at cost less accumulated amortisation and accumulated impairment losses, if any. Subsequent expenditure on software assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

Amortisation is recognised in the Group's consolidated statement of income on a straight-line basis over the estimated useful life of the software, from the date that it is available for use.

**g) Impairment of non-financial assets**

The Group assesses, at each reporting date, whether there is an indication that an asset may be impaired.

If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Group bases its impairment calculation on most recent budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated.

**Material accounting policies (Continued)****g) Impairment of non-financial assets (Continued)**

These budgets and forecast calculations generally cover a period of five years. A long-term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations are recognised in the statement of profit or loss in expense categories consistent with the function of the impaired asset, except for properties previously revalued with the revaluation taken to OCI. For such properties, the impairment is recognised in OCI up to the amount of any previous revaluation.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Goodwill is tested for impairment annually as at 31 December and when circumstances indicate that the carrying value may be impaired.

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs of disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the performance of the assets of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to goodwill and other intangibles with indefinite useful lives recognised by the Group.

The bank assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the bank estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units (CGU) fair value less costs to sell and its value in use. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded subsidiaries or other available fair value indicators.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the bank estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceeds the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of income.

Impairment losses relating to goodwill cannot be reversed in future periods.

**Material accounting policies (Continued)****h) Investment in an associate**

An associate is an entity over which the Group exercises significant influence (but not control), over financial and operating policies and which is neither a subsidiary nor a joint arrangement.

Investments in associates are carried in the consolidated statement of financial position at cost, plus post-acquisition changes in the Group's share of net assets of the associates, less any impairment in the value of individual investments. The Group's share of its associates' post-acquisition profits or losses are recognized in the consolidated statement of income, and its share of post-acquisition movements in other comprehensive income is recognized in OCI included in the shareholders' equity. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Distribution received from an investee reduces the carrying amount of the investment.

The previously recognized impairment loss in respect of investment in associate can be reversed through the consolidated statement of income, such that the carrying amount of the investment in the consolidated statement of financial position remains at the lower of the equity-accounted (before provision for impairment) or the recoverable amount. On derecognition the difference between the carrying amount of investment in the associate and the fair value of the consideration received is recognized in the consolidated statement of income.

After application of the equity method, the Group determines whether it is necessary to recognize an impairment loss on an investment in an associate. The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognizes the amount in the share in earnings of associates in the consolidated statement of income.

Unrealised gains or losses on transactions are eliminated to the extent of the Group's interest in the investee. The financial statements of the associate are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

**i) Revenue recognition**

The following specific recognition criteria must be met before revenue is recognized.

**Income from Mutajara, Murabaha:** investments held at amortized cost, Installment sale and credit cards services is recognized based on the effective profit rate basis on the outstanding balances. The effective profit rate is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial asset (or, where appropriate, a shorter period) to the carrying amount of the financial asset. When calculating the effective yield, the Group estimates future cash flows considering all contractual terms of the financial instrument but excluding future credit losses. Fees from banking services are recognized when the service has been provided.

Fees that are integral to the effective profit rate on a financial asset or financial liability are included in the effective Gross financing and investment income / return as applicable.

**Financing commitment fees:** that are likely to be drawn down and other facility related fees are deferred above certain threshold and, together with the related direct cost, are recognized as an adjustment to the yeilded using the effective profit rate on the financing. When a financing commitment is not expected to result in the draw-down of a financing, financing commitment fees are recognised on a straight-line basis over the commitment period.

**Fees from banking services:** Portfolio and other management advisory and service fees are recognized based on the applicable service contracts, at a point in time or over the period when the service is being provided i.e. related performance obligation is satisfied.

**Fees received for asset management and brokerage activities:** wealth Management, financial planning, custody services, capital market trading brokerage services and other similar services that are provided over an extended period of time, are recognized over the period when the service is being provided i.e. related performance obligation is satisfied. Asset management fees related to investment funds are recognized over the period the service is being provided. As asset management fees are not subject to clawbacks, the management does not expect any significant reversal of revenue previously recognized. Wealth management and custody services fees that are continuously recognized over a period of time.

**Dividend income:** is recognised when the right to receive income is established which is generally when the shareholders approve the dividend. Dividends are reflected as a component of net trading income, net income from FVIS financial instruments or other operating income based on the underlying classification of the equity instrument.

**Foreign currency exchange income / loss:** is recognized when earned / incurred.

**Net trading income:** results from trading activities and include all realised and unrealised gains and losses from changes in fair value and related gross investment income or expense, dividends for financial assets and financial liabilities held for trading and foreign exchange differences.

**Material accounting policies (Continued)****j) Revenue recognition (Continued)****Rendering of services**

The Group provides various services to its customer. These services are either rendered separately or bundled together with rendering of other services. The Group has concluded that revenue from rendering of various services related to payment service system, share trading services, remittance business, SADAD and Mudaraba (i.e. subscription, management and performance fees), should be recognized at the point when services are rendered i.e. when performance obligation is satisfied.

**k) Customers' deposits**

Customer deposits are financial liabilities that are initially recognized at fair value less transaction cost, being the fair value of the consideration received, and are subsequently measured at amortized cost.

**l) Repurchase agreements and reverse repurchase agreements**

Assets sold with a simultaneous commitment to repurchase at a specified future date (repurchase agreements) continue to be recognized in the consolidated statement of financial position as the Group retains substantially all of the risks and rewards of ownership, and are measured in accordance with related accounting policies for investments. The transactions are treated as a collateralized financing and the counter party liability for amounts received under these agreements is included in Due to banks, Saudi Central Bank and other financial institutions, as appropriate. The difference between the sale and repurchase price is treated as financing and investment expense and recognized over the life of the repurchase agreement on an effective yield basis.

Underlying assets purchased with a corresponding commitment to resell at a specified future date (reverse repurchase agreements) are not recognized in the consolidated statement of financial position, as the Group does not obtain control over the underlying assets. Amounts paid under these agreements are included in cash and balances with SAMA. The difference between the purchase and resale price is treated as Income from investments and financing and recognized over the life of the reverse repurchase agreement on an effective profit basis.

**m) Cash and cash equivalents**

For the purposes of the consolidated statement of cash flows, 'cash and cash equivalents' include notes and coins on hand, balances with SAMA (excluding statutory deposits) and due from banks and other financial institutions with original maturity of 90 days or less from the date of acquisition which are subject to insignificant risk of changes in their fair value. Cash and cash equivalents are carried at amortised cost in the statement of financial position.

**n) Share-based payments**

The Group's founders had established a share-based compensation plan under which the entity receives services from the eligible employees as consideration for equity instruments of the Group which are granted to the employees.

**Material accounting policies (Continued)****o) Foreign Currencies**

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined.

The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

In determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which the Group initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, the Group determines the transaction date for each payment or receipt of advance consideration.

The consolidated financial statements are presented in Saudi Arabian Riyals ("₼"), which is also the Group's functional currency. Each subsidiary determines its own functional currency and items included in the consolidated financial statements of each subsidiary are measured using that functional currency.

Transactions in foreign currencies are translated into ₼ at exchange rates prevailing on the dates of the transactions. Monetary assets and liabilities at the year-end (other than monetary items that form part of the net investment in a foreign operation), denominated in foreign currencies, are translated into ₼ at exchange rates prevailing at the date of the consolidated statement of financial position.

The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the year adjusted for the effective profit rate and payments during the year and the amortized cost in foreign currency translated at the spot exchange rate at the end of the year.

Realized and unrealized gains or losses on exchange are credited or charged to the consolidated statement of comprehensive income.

Foreign currency differences arising on translation are generally recognised in profit or loss. However, foreign currency differences arising from the translation of equity investments in respect of which an election has been made to present subsequent changes in fair value in OCI are recognised in OCI. The monetary assets and liabilities of foreign subsidiaries are translated into ₼ at rates of exchange prevailing at the date of the consolidated statement of financial position. The statements of income of foreign subsidiaries are translated at the weighted average exchange rates for the year.

**p) Day 1 profit or loss**

Where a transaction price differs from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable markets, the Group immediately recognizes the difference between the transaction price and fair value (a Day 1 profit or loss) in the consolidated statement of income. In cases where use is made of data which is not observable, the difference between the transaction price and model value is only recognized in the consolidated statement of income when the inputs become observable, or when the instrument is derecognized.

**Material accounting policies (Continued)****q) Trade date**

All regular way purchases and sales of financial assets are recognized and derecognized on the trade date (i.e. the date on which the Group commits to purchase or sell the assets). Regular way purchases or sales of financial assets require delivery of those assets within the time frame generally established by regulation or convention in the market place. All other financial assets and financial liabilities (including assets and liabilities designated at fair value through statement of income) are initially recognised on the trade date at which the Group becomes a party to the contractual provisions of the instrument.

**r) Offsetting financial instruments**

Financial assets and financial liabilities are offset and are reported net in the consolidated statement of financial position when there is a legally enforceable right to set off the recognized amounts, and when the Group intends to settle on a net basis, or to realize the asset and settle the liability simultaneously. Income and expenses are not offset in the consolidated statement of income unless required or permitted by any accounting standard or interpretation, and as specifically disclosed in the accounting policies of the Group.

**s) Customer loyalty programs**

The Group offers customer loyalty programs referred to as reward points, which allows customers to earn points that can be redeemed through certain partner outlets. The Group allocates a portion of the transaction price to the reward points awarded to members, based on estimates of costs of future redemptions. The amount of expense allocated to reward points is charged to the consolidated statement of income with a corresponding liability recognized in other liabilities. The cumulative amount of the liability related to unredeemed reward points is adjusted over time based on actual redemption experience and current and expected trends with respect to future redemptions.

**t) Zakat and taxes**

The Group is subject to Zakat in accordance with the regulations of the Zakat, Tax and Customs Authority (“ZATCA”). Zakat expense is charged to the consolidated statement of income. Zakat is not accounted for as income tax and as such no deferred tax assets and liabilities are calculated relating to Zakat.

**- Value Added tax (“VAT”)**

The Group is a taxpayer for value added tax as per the Saudi law and its responsibility to collect VAT Output from the customers for qualifying services provided, and makes VAT Input payments to its vendors for qualifying payments. On a monthly basis, the net VAT remittances are made to the ZATCA representing VAT collected from its customers, net of any recoverable VAT on payments. Unrecoverable VAT is borne by the Group and is either expensed or in the case of property, equipment, and intangibles payments, is capitalized and either depreciated or amortized as part of the capital cost.

**Material accounting policies (Continued)****u) Zakat and taxes (Continued)****- Withholding tax**

Withholding tax is subject to any payment to non-resident vendors for services rendered and goods purchased with certain criteria and rate according to the tax law applicable in Saudi Arabia and are directly paid to the ZATCA on a monthly basis.

**v) Investment management services**

The Group provides investment management services to its customers, through its subsidiary which include management of certain mutual funds. Assets held in trust or in a fiduciary capacity are not treated as assets of the Group and, accordingly, are not included in the Group's consolidated financial statements. The Group's share of these funds is included under FVIS investments. Fees earned are disclosed in the consolidated statement of income.

**w) Bank's products definition**

The Group provides its customers with banking products based on interest avoidance concept and in accordance with Shari'a regulations. The following is a description of some of the financing products:

**Mutajara financing:**

It is a financing agreement whereby the Group purchases a commodity or an asset and sells it to the client based on a purchase promise from the client with a deferred price higher than the cash price, accordingly the client becomes debtor to the Group with the sale amount and for the period agreed in the contract

**Installment sales financing:**

It is a financing agreement whereby the Group purchases a commodity or an asset and sells it to the client based on a purchase promise from the client with a deferred price higher than the cash price. Accordingly the client becomes a debtor to the Group with the sale amount to be paid through installments as agreed in the contract.

**Murabaha financing:**

It is a financing agreement whereby the Group purchases a commodity or asset and sells it to the client with a price representing the purchase price plus a profit known and agreed by the client which means that the client is aware of the cost and profit separately.

**x) Profit sharing investment account (PSIA)**

The Bank offers unrestricted investment accounts based on fully sharia compliant concept through Mudarabah and Wakala.

In Mudarabah based accounts, the Bank (Mudarib) manages Investment Account holders' ("IAH") funds, along with its own funds, if any. Funds of these pools are utilized to provide financing to customers under Islamic modes and to invest in other Sharia compliant investments opportunities. Such information is available for all customers at Bank's website, branches, and call center.

Under Wakala arrangement, Bank accepts funds from investors (Muwakil) as Wakeel, in addition to its own funds, if any, and invests in Sharia compliant assets. Expected profit payout is mentioned to investors upfront while any return generated in excess of expected profit is retained by the Bank as Wakeel. Wakeel bears the loss in case of Wakeel's default, negligence or violation of any terms and conditions of the Wakala agreement, otherwise the loss is borne by the investor or Muwakil. The Bank may maintain a Profit Equalization Reserve (PER) for the purpose of covering any shortfall in the expected future business assets performance.

Profits earned from the assets allocated to the Pool investments are shared between the Bank and IAH on a pre-agreed basis, while losses (if any) is borne by the Investor (Rab-ul-Maal). Operating expenses incurred by the Bank relating to PSIA the Pools are charged to the Pools.

Unrestricted investment accountholders are commingled with Bank funds for investment, no priority is granted to any party for the purpose of investments and distribution of profits.

For the years ended 31 December 2025 and 2024 (‘000)

4

**Cash and balances with Central Banks**

Cash and balances with Saudi Central Bank ("SAMA") and other central banks comprise of the following:

	2025	2024
Cash in hand	6,979,787	6,681,225
Statutory deposit	39,503,642	40,258,314
Balances with central banks (current accounts)	544,447	195,171
Mutajara with SAMA	6,977,000	6,110,000
<b>Total</b>	<b>54,004,876</b>	<b>53,244,710</b>

In accordance with the Banking Control Law and regulations issued by SAMA, the Group is required to maintain a statutory deposit with SAMA and other central banks at stipulated percentages of its deposits liabilities calculated on monthly averages at the end of reporting period.

The above statutory deposits is not available to finance the Group's day-to-day operations and therefore are not considered as part of cash and cash equivalents (note 33) when preparing the consolidated statement of cash flows.

All these balances are stage 1.

5

**Due from banks and other financial institutions, net**

Due from banks and other financial institutions comprise the following:

	2025	2024
Current accounts	3,415,236	1,639,015
Mutajara	23,526,849	17,892,806
Less: Allowance for expected credit losses	(1,499)	(2,094)
<b>Total</b>	<b>26,940,586</b>	<b>19,529,727</b>

2025	Gross carrying amount	Allowance for expected credit loss	Net carrying amount
Investment grade (credit rating AAA to BBB)	26,759,517	(1,010)	26,758,507
Non-investment grade (credit rating BB+ to B-)	182,568	(489)	182,079
<b>Total</b>	<b>26,942,085</b>	<b>(1,499)</b>	<b>26,940,586</b>

2024	Gross carrying amount	Allowance for expected credit loss	Net carrying amount
Investment grade (credit rating AAA to BBB)	19,389,226	(942)	19,388,284
Non-investment grade (credit rating BB+ to B-)	142,595	(1,152)	141,443
<b>Total</b>	<b>19,531,821</b>	<b>(2,094)</b>	<b>19,529,727</b>

The credit quality of due from banks and other financial institutions is managed using external credit rating agencies. The above due from banks and other financial institutions balances are neither past due nor impaired and are classified in stage 1. There were no movements in staging during year.

## Shariah compliant derivatives

### (a) Profit rate swaps

Profit rate swaps are commitments to exchange one set of cash flows for another. For profit rate swaps, counterparties generally exchange fixed and floating rate profit payments in a single currency without exchanging principal. For cross-currency profit rate swaps, principal, fixed and floating profit payments are exchanged in different currencies.

### (b) Forwards and Futures

Forwards and futures are contractual agreements to either buy or sell a specified currency, commodity or financial instrument at a specified price and date in the future. Forwards are customized contracts transacted in the over-the-counter markets. Foreign currency and profit rate futures are transacted in standardized amounts on regulated exchanges and changes in futures contract values are settled daily.

### (c) FX Swaps

FX swaps are agreements between two parties to exchange a given amount of one currency for an amount of another currency based on the current spot rate and forward rates quoted in the interbank market. The two parties will then settle their respective foreign exchange notional amounts governed by the previously agreed specific forward rate, the forward rate locks in the exchange rate at which the funds will be exchanged in the future.

### (d) Cash flow hedges:

The Bank is exposed to variability in future yield cash flows on non-trading assets and liabilities which bear yield at a variable rate. The Bank uses profit rate swaps as cash flow hedges of these profit rate risks. Also, as a result of firm commitments in foreign currencies, such as its issued foreign currency debt, the Bank is exposed to foreign exchange and profit rate risks which are hedged with cross currency profit rate swaps. Below is the schedule indicating as at 31 December, the periods when the hedged cash flows are expected to occur and when they are expected to affect the statement of income.

### (e) Positive and negative fair values of derivative financial instruments, together with the notional amounts analysed by the term to maturity and monthly average

The notional amounts, which provide an indication of the volumes of the transactions outstanding at the year-end, do not necessarily reflect the amounts of future cash flows involved. These notional amounts, therefore, are neither indicative of the Bank's exposure to credit risk, which is generally limited to the positive fair value of the derivatives, nor market risk.

2025	Notional amounts by term to maturity						
	Positive fair value	Negative fair value	Notional amount total	Within 3 months	3-12 months	1-5 years	Over 5 years

Leasehold land & buildings improvements include work-in-progress amounting to ‘‘�’’ 219 million as at 31 December 2025 (2024: ‘‘�’’ 185 million).

\*Total additions represent additions plus transfers, while total disposals represent disposals plus transfers.

Right-of-use assets include land and buildings for ATMs and Branches.

## 13 Disposal group classified as held for sale

The Board of Directors has approved a plan to lose control over Ejada Systems Limited Company ("Ejada"), a wholly owned subsidiary, through a sequenced series of arrangements. The subsidiary meets the criteria to be classified as held for sale for the following reasons:

- Ejada is available for immediate sale and can be sold in its current condition;
- There is an active program to proceed with private placements and an IPO, where the sale plan is expected to be completed within one year; and
- The Group is committed to follow all steps required for the sale arrangements to be executed in line with the approved plan.

The Group has classified and presented the assets and liabilities of Ejada (the "disposal group") as "held for sale" in the Group's statement of financial position in accordance with IFRS 5, "Non-Current Assets Held for Sale and Discontinued Operations". As the business of Ejada does not meet the definition of discontinued operations under IFRS 5, the results for the period have not been classified as discontinued / discontinuing operations in the consolidated statement of comprehensive income.

The Group has disposed off 10% stake in Ejada through private placement. This has resulted in sale of minority stake in a subsidiary. As per the requirements of IFRS 10 – Consolidated financial statements, the Group has recognized non-controlling interest in these consolidated financial statements.

As at 31 December 2024, the Group has obtained the necessary public offering regulatory approval. The group is planning to update required regulatory approvals during 2026.

As at 31 December 2025, the disposal group was stated at carrying value, which is lower than the fair value less costs to sell and comprised of the following assets and liabilities:

	As of 31 December 2025	As of 31 December 2024
<b>Assets classified as held for sale</b>		
Goodwill and other intangibles, net	375,798	373,455

November 2022	10,000	ƒ		Yes
January 2022	6,500	ƒ		Yes
<b>Total</b>	<b>27,908</b>			

21

**Commitments and contingencies****a) Legal proceedings**

As at 31 December 2025, there were certain legal proceedings outstanding against the Group in the normal course of business including those relating to the extension of credit facilities. Such proceedings are being reviewed by the concerned parties.

Provisions have been made for some of these legal cases based on the assessment of the Group's legal advisors.

**b) Capital commitments**

As at 31 December 2025, the Group had capital commitments of ₩ 550 million (2024: ₩ 1,050 million) relating to contracts for computer software update and development, and ₩ 975 million (2024: ₩ 649 million) relating to building new workstations, and development and improvement of new and existing branches.

**c) Credit related commitments and contingencies**

The primary purpose of these instruments is to ensure that funds are available to customers as required. Credit related commitments and contingencies mainly comprise letters of guarantee, standby letters of credit, acceptances and unused commitments to extend credit. Guarantees and standby letters of credit, which represent irrevocable assurances that the Group will make payments in the event that a customer cannot meet his obligations to third parties, carry the same credit risk as financing.

Letters of credit, which are written undertakings by the Group on behalf of a customer authorizing a third party to draw drafts on the Group up to a stipulated amount under specific terms and conditions, are collateralized by the underlying shipments of goods to which they relate, and therefore, carry less risk. Acceptances comprise undertakings by the Group to pay bills of exchange drawn on customers. The Group expects most acceptances to be presented before being reimbursed by the customers.

Cash requirements under guarantees and letters of credit are considerably less than the amount of the commitment because the Group does not expect the third party to necessarily draw funds under the agreement.

Commitments to extend credit represent unused portions of authorization to extended credit, principally in the form of financing, guarantees and letters of credit. With respect to credit risk relating to commitments to extend unused credit, the Group is potentially exposed to a loss in an amount which is equal to the total unused commitments. The likely amount of loss, which cannot be reasonably estimated, is expected to be considerably less than the total unused commitments, since most commitments to extend credit are contingent upon customers maintaining specific credit standards.

The total outstanding commitments to extend credit do not necessarily represent future cash requirements, as many of these commitments could expire without being funded.

**1. The contractual maturities of the Group's commitments and contingent liabilities are as follows:**

	Less than 3 months	From 3 to 12 months	From 1 to 5 years	Over 5 years	Total
<b>2025</b>					
Letters of credit	8,175,685	2,568,248	728,797	-	11,472,730
Acceptances	2,463,098	10,216,160	-	-	12,679,258
Letters of guarantee	13,006,303	14,978,590	13,279,316	602,815	41,867,024

Return on customers' time investments	(10,226,563)	(10,468,451)
Return on due to banks and financial institutions' time investments	(15,777,282)	(11,706,626)
Gross financing and investment return	(26,003,845)	(22,175,077)
<b><u>Net financing and investment income</u></b>	29,845,671	24,843,046

In 2023, the Real Estate Development Fund ("REDF") launched a new programme ("the programme") in line with their mandate to facilitate home ownership by eligible Saudi nationals in the Kingdom of Saudi Arabia. In September 2023, the Bank has signed agreement time with REDF to become a party to this Programme and in 2024 addendums to main agreement to agree the advance payments to execute fixed number of contracts. Since the inception of the Programme, the Bank has received a total of advance payment of ₩ 3,189 million (2024: ₩ 3,189 million) for executing a fixed number of discounted real estate financing contracts.

In accordance with the requirements of IFRS 9, the programme results in a fair value loss being booked on origination of these mortgage facilities on day one due to the below-market profit rate. The Bank's management has determined that the amount received from REDF qualifies as a government grant under IAS 20, which will be recognized as income on a systematic basis.

23

**Fee from banking services, net**

Fee from banking services, net for the years ended 31 December comprise the following:

	2025	2024
<b>Fee income:</b>		
Remittance Business	613,074	557,040
Wholesale Business	861,619	640,354
Payment & Electronic Service Channels	9,188,485	7,766,145

<b>Gross total</b>	<b>23,437</b>	<b>3,723,809</b>	<b>775,761</b>	<b>226,630</b>

Salaries and employees' related benefits include end of services, social insurance, business trips, training and other benefits.

As the Kingdom of Saudi Arabia is part of the G-20, instructions were given to all financial institutions by SAMA, the Saudi Arabia Financial regulator, to comply with the standards and principles of Basel II and the Financial Stability Board, specially with regard to compensation.

In light of the above SAMA's regulations, the Group issued fixed and variable compensation policy which was implemented after the Board of Directors approval.

The scope of this policy is extended to include all permanent and temporary employees of the Group and its subsidiary companies (local and international) that are operating in the financial services sector.

25

## Salaries and employees' related benefits (Continued)

For consistency with other banking institutions in the Kingdom of Saudi Arabia, the Group has used a combination of fixed and variable compensation to attract and maintain talent. The fixed compensation is assessed on a yearly basis by comparing it to other local banks in the Kingdom of Saudi Arabia including the basic salaries, allowances and benefits which is related to the employees' ranks. The variable compensation is related to the employees' performance and their compatibility to achieve the agreed-on objectives. It includes incentives, performance bonus and other benefits. Incentives are mainly paid to branches' employees whereby the performance bonuses are paid to head office employees and others who do not qualify for incentives. These bonuses and compensation are approved by the Board of Directors as a percentage of the Group's net income.

The overall 2025 staff headcount increase is driven mainly by organic growth of businesses.

26

## Other general and administrative expenses

Other general and administrative expenses for the years ended 31 December comprises the following:

	2025	2024
Communications and utilities expenses	883,513	694,037
Software and IT support expenses	422,140	321,020
Maintenance and security expenses	395,576	331,459
Cash feeding and transfer expenses	289,468	195,582
Auditors' remuneration	34,989	22,744
Other operational expenses	706,674	700,099
<b>Total</b>	<b>2,732,360</b>	<b>2,264,941</b>

Auditors' remuneration for the years ended 31 December comprises the following:

	2025	2024
Audit fee of the Bank	23,500	11,080
Audit fee of the subsidiaries	5,466	4,517
Fee for assurance engagement of the Bank	2,713	3,247
Fee for assurance engagement of subsidiaries	2,832	3,623
Fee for Non-audit services of the Bank	140	-
Fee for Non-audit services of subsidiaries	338	277
<b>Total</b>	<b>34,989</b>	<b>22,744</b>

27

**Zakat**

The Group is subject to Zakat in accordance with the regulations of the Zakat, Tax and Customs Authority ("ZATCA"). Zakat expense is charged to the consolidated statement of income. Zakat is not accounted for as income tax, and as such no deferred tax is calculated relating to zakat.

(a) **Provisions for Zakat and Income tax for the years ended December 31 is summarized as follows:**

	2025	2024
Beginning balance for Zakat Provision	2,232,292	2,759,104
Provided during the year	2,821,986	2,236,709
Zakat Adjustment	(32,265)	(38,296)
Payments made during the year	(2,243,157)	(2,725,225)
Provisions for Zakat and Income tax	2,778,856	2,232,292

The Group has filed the required Zakat returns with the ZATCA which are due on April 30 each year. The Group's Zakat calculations and corresponding accruals and payments for Zakat are based on the ownership of the Bank to each of its subsidiaries.

On March 14, 2019, the ZATCA published rules (the "Rules") for the computation of Zakat for companies engaged in financing activities and licensed by SAMA. The Rules are issued pursuant to the Zakat Implementing Regulations and are applicable for the periods beginning January 1, 2019. In addition to providing a new basis for calculation of the Zakat base, the Rules have also introduced a minimum floor and maximum cap at 4 times and 8 times respectively of net income. The Zakat liability for the Saudi shareholders will continue to be calculated at 2.5% of the Zakat base but it should not fall below the minimum floor nor should exceed the maximum cap as prescribed by the Rules.

The Group has provided for Zakat for the year ended December 31, 2025 and 2024 on the basis of the Group's understanding of these rules.

28

**Earnings per share**

Basic and diluted earnings per share is calculated by dividing net income adjusted for equity Sukuk costs by weighted average number of the issued and outstanding shares as set out below:

	2025	2024
Net income for the period attributable to shareholder of the Bank	24,791,754	19,722,206
Less: equity Sukuk Costs	(1,376,946)	(1,035,867)
Net income after equity Sukuk payments	23,414,808	18,686,339
Number of outstanding shares	4,000,000	4,000,000
Basic and diluted earning per share (in ‘)	5.85	4.67

29

**Employees' end of service benefits liabilities****(a) General description**

The Group operates an End of Service Benefit Plan for its employees based on the applicable Labor Laws in the country in which they are employed. Accruals are made in accordance with the actuarial valuation under the projected unit credit method, while the benefit payments liabilities are discharged as and when they fall due.

**(b) The amounts recognized in the consolidated statement of financial position and movement in the liabilities during the year based on its present value are as follows:**

	2025	2024
Employees' end of service benefits liabilities at the beginning of the year	1,010,991	1,145,578
Past Service Cost	189	2,579
Current service cost	140,121	124,873
Financing cost	47,889	57,544
Benefits paid including pending to be paid for the period	(89,230)	(102,242)
Benefits acquired/ transferred to be transferred to sister companies	3,599	-
EOSB reclassified to liabilities associated with disposal group classified as held for sale	-	(160,920)
Remeasurement gain	(56,990)	(56,421)
<b>Employees' end of service benefits liabilities at the end of the year</b>	<b>1,056,569</b>	<b>1,010,991</b>

**(c) Charge for the year**

	2025	2024
Current service cost	140,121	124,873
Past Service cost	189	2,579
<b>Total</b>	<b>140,310</b>	<b>127,452</b>

**(d) Re-measurement recognised in other comprehensive income**

	2025	2024
Loss from change in experience assumptions	(70,184)	(78,479)
Gain from change in financial assumptions	13,194	22,058
<b>Total</b>	<b>(56,990)</b>	<b>(56,421)</b>

**(e) Income principal actuarial assumptions (in respect of the employee benefit scheme)**

	2025	2024
Discount rate	5.55%	5.90%
Expected rate of salary increase	2.50%	3.00%
Attrition Rate	5% - 14% (based on the age band)	5% - 14% (based on the age band)

For the years ended 31 December 2025 and 2024 (‘‘�’’000)

29

**Employees' end of service benefits liabilities (Continued)****(f) Sensitivity of actuarial assumptions**

The table below illustrates the sensitivity of the employees' end of service benefits liabilities valuation to the discount rate, salary increase rate and attrition rate assumptions.

2025		Impact on defined benefit obligation – Increase / (Decrease)			
Base Scenario		Change in assumption		Increase in assumption	Decrease in assumption
<b>Discount rate</b>		+/- 100 basis points		(73,947)	85,661
<b>Expected rate of salary increase</b>		+/- 100 basis points		87,491	(76,683)
<b>Attrition Rate</b>		Increase or decrease by 20%		19,125	(22,314)

2024		Impact on defined benefit obligation – Increase / (Decrease)			
Base Scenario		Change in assumption		Increase in assumption	Decrease in assumption
<b>Discount rate</b>		+/- 100 basis points		(82,421)	95,142
<b>Expected rate of salary increase</b>		+/- 100 basis points		97,034	(85,367)
<b>Attrition Rate</b>		Increase or decrease by 20%		15,843	(19,237)

**(e) Expected maturity**

At 31 December	Discounted liability	Less than a year	1-2 years	2-5 years	Over 5 years	Total
<b>2025</b>	<b>1,056,569</b>	<b>88,513</b>	<b>95,065</b>	<b>323,817</b>	<b>3,331,122</b>	<b>3,838,517</b>
2024	1,010,991	106,037	110,916	379,557	3,466,096	4,062,606

30

**Operating segments**

The Group identifies operating segments on the basis of internal reports about the activities of the Group that are regularly reviewed by the chief operating decision maker, principally the Chief Executive Officer, in order to allocate resources to the segments and to assess its performance.

Transactions between the operating segments are on normal commercial terms and conditions. The revenue from external parties reported to the Board is measured in a manner consistent with that in the consolidated statement of income. Segment assets and liabilities comprise operating assets and liabilities, which represents the majority of the Bank's assets and liabilities.

For management purposes, the Group is organized into the following four main businesses segments:

<b>Retail segment:</b>	Includes individual customers' deposits, credit facilities, customer debit current accounts (overdrafts), fees from banking services and remittance business, payment services.
<b>Corporate segment:</b>	Incorporates deposits of VIP, corporate customers' deposits, credit facilities, and debit current accounts (overdrafts).
<b>Treasury segment:</b>	Includes treasury services, Murabaha with SAMA and international Mutajara portfolio.
<b>Investment services, brokerage and other segments:</b>	Includes investments of individuals and corporates in mutual funds, local and international share trading services, investment portfolios and others.

For the years ended 31 December 2025 and 2024 (‘000)

30

**Operating segments (Continued)**

(a) The Group's total assets and liabilities, together with its total operating income and expenses, and net income, as of and for the years ended 31 December for each segment are as follows:

**AL RAJHI BANKING AND INVESTMENT CORPORATION (A SAUDI JOINT STOCK COMPANY)**  
**Notes to the Consolidated Financial Statements**

For the years ended 31 December 2025 and 2024 (‘000)

30

**Operating segments (Continued)**

(b) The Group's credit exposure by business segments as of 31 December follows:

2025	Retail segment	Corporate segment	Treasury segment	Investment services, brokerage and other segments	Total
Consolidated balance sheet assets	482,073,008	270,686,843	242,055,749	6,552,053	1,001,367,653
Commitments and contingencies excluding irrevocable commitments to extend credit	-	66,019,012	-	-	66,019,012
2024	Retail segment	Corporate segment	Treasury segment	Investment services, brokerage and other segments	Total
Consolidated balance sheet assets	475,215,178	218,194,545	236,763,172	5,533,331	935,706,226
Commitments and contingencies excluding irrevocable commitments to extend credit	-	43,031,782	-	-	43,031,782

**Financial risk management**

The Group's activities are exposed to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the banking business, and these risks are an inevitable consequence of participating in financial markets. The Group's aim is therefore to achieve an appropriate balance between risk and return and minimize potential adverse effects on the Group's financial performance.

The Group's risk management policies, procedures and systems are designed to identify and analyze these risks and to set appropriate risk mitigants and controls. The Group reviews its risk management policies and systems on an ongoing basis to reflect changes in markets, products and emerging best practices.

Risk management is performed by the Credit and Risk Management Groups ("CRMG") under policies approved by the Board of Directors. The CRMG identifies and evaluates financial risks in close co-operation with the Group's operating units. The most important types of risks identified by the Group are credit risk, liquidity risk and market risk. Market risk includes currency risk, profit rate risk, operational risk and price risk.

**(1) Credit risk**

Credit risk is considered to be the most significant and pervasive risk for the Group. The Group takes on exposure to credit risk, which is the risk that the counter-party to a financial transaction will fail to discharge an obligation causing the Group to incur a financial loss. Credit risk arises principally from financing (credit facilities provided to customers) and from cash and deposits held with other banks. Further, there is credit risk in certain off-balance sheet financial instruments, including guarantees relating to purchase and sale of foreign currencies, letters of credit, acceptances and commitments to extend credit. Credit risk monitoring and control is performed by the CRMG, which sets parameters and thresholds for the Group's financing activities.

**(a) Credit risk measurement****i) Financing**

The Group provides financial products which are in accordance with Shariah law in order to meet the customers demand. These products are all classified as financing assets in the Group's consolidated statement of financial position. In measuring credit risk of financing at a counterparty level, the Group considers the overall credit worthiness of the customer based on a proprietary risk methodology.

This risk rating methodology utilizes a 10 point scale based on quantitative and qualitative factors with seven performing categories (rated 1 to 7) and three non-performing categories (rated 8-10). The risk rating process is intended to advise the various independent approval authorities of the inherent risks associated with the counterparty and assist in determining suitable pricing commensurate with the associated risk.

**ii) Credit risk grades**

that is determined to be predictive of the risk of default and applying experienced credit judgment. Credit risk grades are defined using qualitative and quantitative factors that are indicative of risk of default. These factors vary depending on the nature of the exposure and the type of customer.

Credit risk grades are defined and calibrated such that the risk of default occurring increases exponentially as the credit risk deteriorates, for example, the difference in risk of default between credit risk grades 1 and 2 is smaller than the difference between credit risk grades 2 and 3.

Each corporate exposure is allocated to a credit risk grade at initial recognition based on available information about the customer. Exposures are subject to ongoing monitoring, which may result in an exposure being moved to a different credit risk grade. The monitoring of corporate exposure involves use of the following data.

- Information obtained during periodic review of customer files – e.g. audited financial statements, management accounts, budgets and projections.
- Data from credit reference agencies, press articles, changes in external credit ratings
- Actual and expected significant changes in the political, regulatory and technological environment of the customer or in its business activities

Credit risk grades are a primary input into the determination of the term structure of PD for exposures. The Group collects performance and default information about its customers analyzed by segment as well as by credit risk grading.

For the years ended 31 December 2025 and 2024 (‘000)

31

**Financial risk management (Continued)**

**(1) Credit risk (Continued)**

**(a) Credit risk measurement (Continued)**

**iii) Generating the term structure of PD**

The Group employs analytical techniques incorporating internal default estimates backed by transition matrices published by external agencies to construct PD term structures that can be applied to each exposure based on its remaining lifetime. These PD term structures are then adjusted to incorporate the impact of macroeconomic outlook to arrive at a forward looking estimate of PD across the lifetime.

For retail exposure, customer and financing specific information collected at the time of application, repayment behavior etc. are used to construct risk based segmentation using statistical techniques such as Logistic Regression, Chi-square Automatic Interaction Detection (CHAID) (or Decision Tree) etc.. Risk segments are constructed to identify and aggregate customers with similar risk characteristics. For each risk segment thus formed, PD term structures are constructed using historical data that can be applied to each exposure based on its remaining lifetime.

Based on consideration of a variety of external actual and forecast information from published sources, the Group formulates a forward looking adjustment to PD term structures to arrive at forward looking PD estimates across the lifetime using macroeconomic models.

Bank has a master rating scale in place that comprises of 22 risk rating grades in total which is further split into 19 performing grades and 3 non-performing grades. Below table provides the further details around the Bank's master rating scale:

Type	Rating Grade	Description	Modifiers	PD Range
<b>Performing</b>				
Investment Grade	1	<b>Exceptional</b> - Obligors of unquestioned credit standing at the pinnacle of credit quality.	None	0% to 0.42%
	2	<b>Excellent</b> - Obligors of the highest quality, presently and prospectively. Virtually no risk in financing to this class, Cash flows reflect exceptionally large and stable margins of protection. Projected cash flows including anticipated credit extensions indicate strong liquidity levels and debt service coverage. Balance Sheet parameters are strong, with excellent asset quality in terms of value and liquidity.	3	
	3	<b>Superior</b> - Typically obligors at the lower end of the high quality range with excellent prospects. Very good asset quality and liquidity. Consistently strong debt capacity and coverage. There could however be some elements, which with a low likelihood might impair performance in the future.	3	
	4	<b>Good</b> - Typically obligors in the high end of the medium range who are definitely sound with minor risk characteristics. Elements of strength are present in such areas as liquidity, stability of margins, cash flows, diversity of assets, and lack of dependence on one type of business.	3	
Sub Investment Grade	5	<b>Satisfactory</b> - These are obligors with smaller margins of debt service coverage and with some elements of reduced strength. Satisfactory asset quality, liquidity, and good debt capacity and coverage. A loss year or declining earnings trend may occur, but the customers have sufficient strength and financial flexibility to offset these issues.	3	0.42% to 99.9%
	6	<b>Adequate</b> - Obligors with declining earnings, strained cash flow, increasing leverage and/ or weakening market fundamentals that indicate above average risk, such customers have limited additional debt capacity, modest coverage, average or below average asset quality and market share. Present customer performance is satisfactory, but could be adversely affected by developing collateral quality/ adequacy etc.	3	
	7	<b>Very high risk</b> - Generally undesirable business constituting an undue and unwarranted credit risk but not to the point of justifying a substandard classification. No loss of principal or profit has taken place. Potential weakness might include a weakening financial condition, an unrealistic repayment program, inadequate sources of funds, or a lack of adequate collateral, credit information or documentation. The entity is undistinguished and mediocre. No new or incremental credits will generally be considered for this category.	3	

For the years ended 31 December 2025 and 2024 (‘000)

31

**Financial risk management (Continued)**

**(1) Credit risk (Continued)**

**(a) Credit risk measurement (Continued)**

**iii) Generating the term structure of PD (Continued)**

<b>Non Performing</b>					
Sub-Standard	8	<b>Substandard</b> - Obligors in default and 90 Days Past Due on repayment of their obligations. Unacceptable business credit. Normal repayment is in jeopardy, and there exists well defined weakness in support of the same. The asset is inadequately protected by the current net worth and paying capacity of the obligor or pledged collateral. Specific provision raised as an estimate of potential loss.	None		
Doubtful	9	<b>Doubtful</b> - Obligors in default and 180 Days Past Due (DPD) on their contracted obligations, however in the opinion of the management recovery/ salvage value against corporate and real estate obligors is a possibility, and hence write-off should be deferred. Full repayment questionable. Serious problems exist to the point where a partial loss of principle is likely. Weaknesses are so pronounced that on the basis of current information, conditions and values, collection in full is highly improbable. Specific provision raised as an estimate of potential loss. However, for retail obligors (except real estate) and credit cards, total loss is expected. A 100% Specific Provisioning must be triggered followed by the write-off process should be effected as per Al Rajhi Bank write-off policy.	None		100%
Loss	10	<b>Loss</b> - Obligors in default and 360 Days Past Due (DPD) on their obligations. Total loss is expected. An uncollectible asset which does not warrant classification as an active asset. A 100% Specific Provisioning must be triggered followed by the write-off process should be effected as per Al Rajhi Bank write-off policy.	None		

**iv) ECL - Significant increase in credit risk**

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and expert credit assessment and including forward-looking information.

For Corporate portfolio, the Group's assessment of significant increase in credit risk is based on counterparty. Significant increase in credit risk assessment for retail financing is carried out at customer level within the same product family. All the exposures which are considered to have significantly increased in credit risk are subject to lifetime ECL.

The Group considers all investment grade Sukuk issued by sovereigns including Gulf Corporation Council (GCC) countries to have low credit risk.

**v) Determining whether credit risk has increased significantly**

In determining whether credit risk has increased significantly since initial recognition, the Group uses its internal credit risk grading system, external risk ratings, quantitative changes in PDs, delinquency status of accounts, expert credit judgement and, where possible, relevant historical experience.

For Corporate portfolio, the credit risk of a particular exposure is deemed to have increased significantly since initial recognition based on quantitative assessment (including, but not limited to, significant changes in ratings reflecting deterioration in credit quality, days past due, watch-listing, and macroeconomic outlook) and / or using its expert credit judgment and, where possible, relevant historical experience, the Group may determine that an exposure has undergone a significant increase in credit risk based on particular qualitative indicators that it considers are indicative of such and whose effect may not otherwise be fully reflected in its quantitative analysis on a timely basis.

For Retail portfolio, the Group considers that a significant increase in credit risk occurs no later than when an asset is more than 30 days past due. Days past due are determined by counting the number of days since the earliest elapsed due date in respect of which full payment has not been received. Due dates are determined without considering any grace period that might be available to the customer.

For the years ended 31 December 2025 and 2024 (‘000)

31

**Financial risk management (Continued)****(1) Credit risk (Continued)****(a) Credit risk measurement (Continued)****v) Determining whether credit risk has increased significantly (Continued)**

The Group monitors the effectiveness of the criteria used to identify significant increases in credit risk by regular reviews to confirm that:

- the criteria are capable of identifying significant increases in credit risk before an exposure is in default;
- the criteria do not align with the point in time when an asset becomes 30 days past due; and
- there is no unwarranted volatility in loss allowance from transfers between 12-month PD (stage 1) and lifetime PD (stage 2).

The Group classifies its financial instruments into stage 1, stage 2 and stage 3, based on the applied impairment methodology, as described below:

Stage 1: for financial instruments where there has not been a significant increase in credit risk since initial recognition and that are not credit-impaired on origination, the Group recognises an allowance based on the 12-month ECL. All accounts at origination would be classified as Stage 1.

Stage 2: for financial instruments where there has been a significant increase in credit risk since initial recognition but they are not credit-impaired, the Group recognises an allowance for the lifetime ECL for all financings categorized in this stage based on the actual / expected behavioral maturity profile including restructuring or rescheduling of facilities.

Stage 3: for credit-impaired financial instruments, the Group recognises the lifetime ECL. Default identification process i.e. DPD of 90 or more is assumed to be stage 3.

Each exposure is allocated to a credit risk grade at initial recognition based on available information about the customer. Exposures are subject to ongoing monitoring, which may result in an exposure being moved to a different credit risk grade. The monitoring typically involves use of the following data:

Non-retail exposures	Retail exposures	All exposures
<p>1- Information obtained during periodic review of customer files – e.g., audited financial statements, management accounts, budgets, and projections. Examples of areas of particular focus are: gross profit margins, financial leverage ratios, debt service coverage, compliance with covenants, quality management, and senior management changes.</p> <p>2- Data from credit reference agencies, press articles, changes in external credit ratings</p> <p>3- Quoted Sukuk and credit default swap (CDS) prices for the customer where available</p> <p>4- Actual and expected significant changes in the political, regulatory, and technological environment of the customer or in its business activities</p>	<p>1- Internally collected data and customer behavior – e.g., utilization of credit card facilities</p> <p>2- Affordability metrics</p> <p>3- External data from credit reference agencies including industry-standard credit scores</p>	<p>1- Payment record – this includes overdue status as well as a range of variables about payment ratios</p> <p>2- Utilization of the granted limit</p> <p>3- Existing and forecast changes in business, financial and economic conditions</p>

**vi) Modified financial assets**

The contractual terms of a financing may be modified for a number of reasons, including changing market conditions, customer retention and other factors not related to a current or potential credit deterioration of the customer. An existing financing with terms have been modified may be derecognized and the renegotiated finance recognized as a new financing at fair value in accordance with the accounting policy

The Group renegotiates finances to customers in financial difficulties (referred to as 'forbearance activities' to maximize collection opportunities and minimize the risk of default. Under the Group's forbearance policy, finance forbearance is granted on a selective basis if the debtor is currently in default on its debt or if there is a high risk of default, there is evidence that the debtor made all reasonable efforts to pay under the original contractual terms and the debtor is expected to be able to meet the revised terms.

**Financial risk management (Continued)****(1) Credit risk (Continued)****(a) Credit risk measurement (Continued)****vi) Modified financial assets (Continued)**

The revised terms usually include extending the maturity, changing the timing of profit payments and amending the terms of financing covenants. Both retail and corporate financing are subject to the forbearance policy.

Forbearance is a qualitative indicator of a significant increase in credit risk, and an expectation of forbearance may constitute evidence that an exposure is credit-impaired/in default. A customer needs to demonstrate consistently good payment behavior over a period up to 12 months before the exposure is no longer considered to be credit-impaired/ in default.

**vii) Definition of 'Default'**

The Group considers a financial asset to be in default when:

- the customer is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realizing security (if any is held); or
- the customer is past due more than 90 days on any material credit obligation to the Group.

Overdrafts are considered as being past due once the customer has breached an advised limit or been advised of a limit smaller than the current amount outstanding.

In assessing whether a customer is in default, the Group considers indicators that are:

- qualitative- e.g. breaches of covenant;
- quantitative- e.g. overdue status and non-payment on another obligation of the same issuer to the Group; and
- based on data developed internally and obtained from external sources.

Inputs into the assessment of whether a financial instrument is in default and their significance may vary over time to reflect changes in circumstances.

The definition of default largely aligns with that applied for the Group for regulatory purposes.

**viii) Incorporation of forward looking information**

The Group considers macroeconomic forecasts for next 5 years (consistent with forecasts available from public sources), beyond which the long term average macroeconomic conditions prevail. The forward-looking PD curve would account for the changing expectation of macroeconomic environment over time. Externally available macroeconomic forecasts such as from International Monetary Fund (IMF) and Saudi Central Bank (SAMA) are used for making the base case forecast. For other scenarios (namely upturn and downturn), adjustments are made to base case forecasts based standard deviation of the macroeconomic factors.

The base case represents a most-likely outcome as published by external sources. The other scenarios represent more optimistic and more pessimistic outcomes.

The Group has in place suite of macroeconomic models pertaining to specific portfolios that are used to incorporate the forward-looking information. The Group chose to adopt a macroeconomic regression-based approach to determine the link function between historical default rates (up to 10 years) and prevalent macroeconomic condition. Key factors used across different macroeconomic models being: Change in Oil Price, General Government Revenue and Investments as percentage of GDP, Crude Oil Average Price, Gross National Savings and Government Expenditure and Gross Debt.

For the years ended 31 December 2025 and 2024 (‘000)

31

**Financial risk management (Continued)**

**(1) Credit risk (Continued)**

**(a) Credit risk measurement (Continued)**

**viii) Incorporation of forward looking information (Continued)**

The Group has used below base case near term forecast in its ECL model, which is based on updated information available as at the reporting date:

<b>Economic Indicators</b>	<b>Forecast calendar years used in 2025 ECL model</b>		
	<b>2026</b>	<b>2027</b>	<b>2028</b>
Yearly Growth in Oil Price	(6.8%)	0.6%	1.4%
General Government Revenue (% of GDP)	27.53%	27.75%	27.48%
Investment (% of GDP)	32.21%	32.22%	32.28%
Crude Oil simple Avg Price (USD per barrel)	62.381	62.729	63.586
Gross National Savings to (% of GDP)	27.96%	28.52%	28.87%
Government Total Expenditure (% of GDP)	32.41%	31.78%	31.14%
General Government Gross Debt (QoQ) National Currency	3.19%	2.65%	2.42%

The table below shows the change in economic indicators to the ECL computed under three different scenarios used by the Group:

<b>31 December 2025</b>	<b>Due from Bank and other financial institutions</b>	<b>Investment</b>	<b>Financing</b>	<b>Off Balance Sheet Items</b>	<b>Total</b>
Most likely (Base case)	1,499	55,590	8,682,888	206,818	8,946,795
More optimistic (Upside)	1,130	41,778	7,527,820	166,074	7,736,802
More pessimistic (Downside)	1,914	71,113	10,113,905	260,271	10,447,203

**ix) Measurement of ECL**

The Group measures an ECL at an individual instrument level taking into account the projected cash flows, PD, LGD, CCF and discount rate.

The key inputs into the measurement of ECL are the term structure of the following variables:

- i. probability of default (PD);
- ii. loss given default (LGD);
- iii. exposure at default (EAD).

These parameters are generally derived from internally developed statistical models and other historical data. They are adjusted to reflect forward-looking information as described above.

PD estimates are estimates at a certain date, which are calculated based on statistical rating models, and assessed using rating tools tailored to the various categories of counterparties and exposures. These statistical models are based on internally compiled data comprising both quantitative and qualitative factors. If a counterparty or exposure migrates between ratings classes, then this will lead to a change in the estimate of the associated PD. PDs are estimated considering the contractual maturities of exposures and estimated prepayment rates.

For Corporate and Retail portfolio, bank uses internal LGD models to arrive at the LGD estimates.

EAD represents the expected exposure in the event of a default. The Group derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract including amortization. The EAD of a financial asset is its gross carrying amount. For financing commitments and financial guarantees, the EAD includes the amount drawn, as well as potential future amounts that may be drawn under the contract, which are estimated based on historical observations and forward-looking forecasts. The period of exposure limits the period over which possible defaults are considered and thus affects the determination of PDs and measurement of ECLs (especially for Stage 2 accounts with lifetime ECL).

**Financial risk management (Continued)****(1) Credit risk (Continued)****(a) Credit risk measurement (Continued)****x) Financings (Continued)**

The banks in the ordinary course of financing activities hold collaterals as security to mitigate credit risk in the financings. These collaterals mostly include time, demand, and other cash deposits, financial guarantees, local and international equities, real estate, and other fixed assets. The collaterals are held mainly against commercial and consumer financings and are managed against relevant exposures at their net realizable values. For financial assets that are credit impaired at the reporting year, quantitative information about the collateral held as security is needed to the extent that such collateral mitigates credit risk. The outstanding credit impaired financing facility balances, that are covered by collateral, as of December 31 is as follows:

	2025	2024
Less than 50%	70,439	49,573
51-70%	36,491	37,928
More than 70%	445,555	671,561
<b>Total exposure</b>	<b>552,485</b>	<b>759,062</b>

## Financial liabilities subject to offsetting

2025	Gross Amounts of recognized financial liabilities	Gross amounts of recognized financial assets offset in the statement of financial position	Net amounts of recognized financial liabilities in the statement of financial position
Repurchase agreements	60,087,934	-	60,087,934
2024	Gross Amounts of recognized financial liabilities	Gross amounts of recognized financial assets offset in the statement of financial position	Net amounts of recognized financial liabilities in the statement of financial position
Repurchase agreements	49,595,542	-	49,595,542

For collaterals for above financial liabilities, please refer note 6(a).

**(a) Settlement risk**

The Group is also exposed to settlement risk in its dealings with other financial institutions. This risk arises when the Group pays its side of the transaction to the other bank or counterparty before receiving payment from the third party. The risk is that the third party may not pay its obligation. While these exposures are short in duration, they can be significant. The risk is mitigated by dealing with highly rated counterparties, holding collateral and limiting the size of the exposures according to the risk rating of the counterparty.

**(b) Risk limit control and mitigation policies**

The responsibility for credit risk management is enterprise-wide in scope. Strong risk management is integrated into daily processes, decision making and strategy setting, thereby making the understanding and management of credit risk the responsibility of every business segment.

The following business units within the Group assist in the credit control process:

- Corporate Credit Unit.
- Credit Administration, Monitoring and Control Unit.
- Remedial Unit.
- Credit Policy Unit.
- Retail Credit Unit.

**Financial risk management (Continued)**

- (1) Credit risk (Continued)
- (a) Credit risk measurement (Continued)
- x) Financings (Continued)
- (b) Risk limit control and mitigation policies (Continued)

The monitoring and management of credit risk associated with these financing are made by setting approved credit limits. The Group manages limits and controls concentrations of credit risk wherever they are identified - in particular, to individual customers and groups, and to industries and countries.

Concentrations of credit risks arise when a number of customers are engaged in similar business activities, activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations of credit risks indicate the relative sensitivity of the Group's performance to developments affecting a particular industry or geographical location. The Group seeks to manage its credit risk exposure through diversification of its financing to ensure there is no undue concentration of risks with to individuals or groups of customers in specific geographical locations or economic sectors.

The Group manages credit risk by placing limits on the amount of risk accepted in relation to individual customers and groups, and to geographic and economic segments. Such risks are monitored on a regular basis and are subject to an annual or more frequent review, when considered necessary. Limits on the level of credit risk by product, economic sector and by country are reviewed at least annually by the executive committee.

Exposure to credit risk is also managed through regular analysis on the ability of customers and potential customers to meet financial and contractual repayment obligations and by revising credit limits where appropriate.

Some other specific control and mitigation measures are outlined below:

The Group implements guidelines on the level and quality of specific classes of collateral. The principal collateral types are:

- Mortgages over residential and commercial properties.
- Cash, shares, and general assets for customer.
- Shares for Murabaha (collateralized share trading) transactions.

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit carry the same credit risk as traditional banking products of the Group.

Documentary and commercial letters of credit - which are written undertakings by the Group on behalf of a customer authorizing a third party to draw drafts on the Group up to a stipulated amount under specific terms and conditions, are collateralized by the underlying goods to which they relate, and therefore, risk is partially mitigated.

Commitments to extend credit represent unused portions of authorizations to extend credit in the form of further financing products, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Group is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon customers maintaining specific credit standards.

**Financial risk management (Continued)****(1) Credit risk (Continued)****x) Credit quality analysis**

The table below sets out the maximum exposure to credit risk at the reporting date without considering collateral or other credit enhancements and includes the off-balance sheet financial instruments involving credit risks as at 31 December:

On-balance sheet items	2025	2024
<b>Investments, net:</b>

Cheques under collection	<b>552,847</b>	626,418
<b>Total on-balance sheet items</b>	<b>1,001,367,653</b>	933,854,568
<b>Off-balance sheet items:</b>		
Letters of credit and acceptances	<b>24,151,988</b>	11,862,220
Letters of guarantee	<b>41,867,024</b>	31,169,562
Irrevocable commitments to extend credit	<b>17,516,592</b>	19,897,404
<b>Total off-balance sheet items</b>	<b>83,535,604</b>	62,929,186
<b>Maximum exposure to credit risk</b>	<b>1,084,903,257</b>	996,783,754

The exposures set out above are based on net carrying amounts as reported in the consolidated statement of financial position.

**(2) Liquidity risks**

Liquidity risk is the risk that the Group will be unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn. The consequence may be the failure to meet obligations to repay deposits and financing parties and fulfill financing commitments. Liquidity risk can be caused by market disruptions or by credit downgrades, which may cause certain sources of funding to become unavailable immediately. Diverse funding sources available to the Group help mitigate this risk. Assets are managed with liquidity in mind, maintaining a conservative balance of cash and cash equivalents.

**Liquidity risk management process**

The Group's liquidity management process is as monitored by the Group's Asset and Liabilities Committee (ALCO), and includes:

- Day-to-day funding, managed by Treasury to ensure that requirements can be met, and this includes replenishment of funds as they mature or are invested;
- Monitoring balance sheet liquidity ratios against internal and regulatory requirements;
- Managing the concentration and profile of debt maturities;
- Maintaining diversified funding sources; and
- Liquidity management and asset and liability mismatching.

Monitoring and reporting take the form of analyzing cash flows of items with both contractual and non-contractual maturities. The net cash flows are measured to ensure that they are within acceptable ranges. The Treasury / ALCO also monitors the level and type of undrawn financing commitments, usage of overdraft facilities and the potential impact of contingent liabilities such as standby letters of credit and guarantees may have on the Group's liquidity position.

The tables below summarizes the maturity profile of the Group's assets and liabilities, on the basis of the remaining maturity as of the consolidated statement of financial position date to the contractual maturity date.

For the years ended 31 December 2025 and 2024 (‘000)

31

**Financial risk management (Continued)****(2) Liquidity risks (Continued)**

Management monitors the maturity profile to ensure that adequate liquidity is maintained. Assets available to meet liabilities and to cover outstanding financing commitments include cash, balances with SAMA and due from banks. Further, in accordance with the Banking Control Law and Regulations issued by SAMA, the Group maintains a statutory deposit equal to a sum not less than 7% of total customers' deposits, and 4% of total other customers' accounts. In addition to the statutory deposit, the Group maintains a liquid reserve of not less than 20% of the deposit liabilities, in the form of cash, gold or assets which can be converted into cash within a period not exceeding 30 days. Also, the Group has the ability to raise additional funds through special financing arrangements with SAMA including deferred sales transactions.

**Financial risk management (Continued)****(2) Liquidity risks (Continued)**

The table below summarizes the maturity profile of the Bank's financial liabilities at 31 December 2025 and 2024 based on contractual undiscounted repayment obligations. As profit payments up to contractual maturity are included in the table, totals do not match with the statement of financial position. The contractual maturities of liabilities have been determined based on the remaining period at the Statement of financial position date to the contractual maturity date and do not consider the effective expected maturities. The Bank expects that many customers will not request repayment on the earliest date the Bank could be required to pay, and the table does not affect the expected cash flows indicated by the Bank's deposit retention history.

### **Financial risk management (Continued)**

#### **(3) Market risks**

The Group is exposed to market risks, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market risks arise on profit rate products, foreign currency and mutual fund products, all of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as profit rates, foreign exchange rates and quoted market prices.

Market risk exposures are monitored by Treasury / Risk department and reported to ALCO on a monthly basis. ALCO deliberates on the risks taken and ensures that they are appropriate.

#### **(a) Market risks - Trading Book**

In order to manage the market risk in trading book, the Bank periodically applies a VAR methodology to assess the market risk positions held and also to estimate the potential economic loss based on a set of assumptions and changes in market conditions.

A VAR methodology estimates the potential negative change in market value of a portfolio at a given confidence level and over a specified time horizon. The Bank uses simulation models to assess the possible changes in the market value of the trading book based on historical data. VAR models are usually designed to measure the market risk in a normal market environment and therefore the use of VAR has limitations because it is based on historical correlations and volatilities in market prices and assumes that the future movements will follow a statistical distribution.

The VAR that the bank measures is an estimate, using a confidence level of 99% of the potential loss that is not expected to be exceeded if the current market positions were to be held unchanged for one day. The Bank's VaR related information for the year ended December 31, 2025 and 2024 are as under. All the figures are in million ƒ:

<b>2025</b>			
	Foreign exchange risk	Profit rate risk	Overall
VAR as at December 31, 2025	3.94	2.16	5.51
<b>2024</b>			
VAR as at December 31, 2024	3.63	2.82	6.46

**Financial risk management (Continued)**

**(3) Market risks (Continued)**

**(b) Market risks - Non-Trading or Banking Book**

Market risk on non-trading or banking positions mainly arises from the commission rate, foreign currency exposures and equity price changes.

**(c) Market risks - banking operations**

**• Profit rate risk**

Cash flow profit rate risk is the risk that the future cash flows of a financial instrument will fluctuate due to changes in market profit rates. The Group does not have any significant exposure to the effects of fluctuations in prevailing level of market profit rates on its future cash flows as a significant portion of profit earning financial assets and profit bearing liabilities are at fixed rates and are carried in the financial statements at amortized cost. In addition to this, a substantial portion of the Group's financial liabilities are non-profit bearing.

Profit rate risk arises from the possibility that the changes in profit rates will affect either the fair values or the future cash flows of the financial instruments. The Group monitors its positions to ensure it is in line with Bank's risk management strategy.

The following table depicts the sensitivity to a reasonably possible change in profit rates, with other variables held constant, on the Bank's consolidated statement of income or shareholders' equity. The sensitivity of the income is the effect of the assumed changes in profit rates on the net income for one year, based on the gross financing and investment assets held as at 31 December 2025 and 2024. All the banking book exposures are monitored and analyzed in currency concentrations, and relevant sensitivities are disclosed in ‘‘�’’ million.

2025		‘‘�’’ in Million			
Currency	Increase in basis points	Sensitivity of gross financing and investment income			
		As at 31 December	Average	Maximum	Minimum
‘‘�’’	25	568	552	599	506

**Financial risk management (Continued)**

(3) Market risks (Continued)  
(c) Market risks - banking operations (Continued)  
• Profit rate risk (Continued)

Profit rate movements affect reported consolidated shareholders' equity through retained earnings, i.e. increases or decreases in financing and investment income.

**Yield sensitivity of assets, liabilities and off balance sheet items:**

The Group manages exposure to the effects of various risks associated with fluctuations in the prevailing levels of market profit rates on its financial position and cash flows.

The Board sets limits on the level of mismatch of profit rate repricing that may be undertaken, which is monitored daily by Bank Treasury.

The table below summarizes the Group's exposure to profit rate risks. Included in the table are the Group's financial instruments at carrying amounts, categorized by the earlier of contractual re-pricing or maturity dates.

The Group is exposed to profit rate risk as a result of mismatches or gaps in the amounts of assets and liabilities and off balance sheet instruments that mature or re-price in a given period. The Group manages this risk by matching the re-pricing of assets and liabilities through risk management strategies.

For the years ended 31 December 2025 and 2024 (‘000)

**Financial risk management (Continued)****(3) Market risks (Continued)****(c) Market risks - banking operations (Continued)****• Foreign currency risks**

Currency risk represents the risk of change in the value of financial instruments due to changes in foreign exchange rates. The Group management has set limits on positions by currencies, which are regularly monitored to ensure that positions are maintained within the limits.

The table below shows the currencies to which the Group has a significant exposure as at 31 December 2025 and 2024, on its non-trading monetary assets and liabilities and forecasted cash flows. The analysis calculates the effect of reasonably possible movements of the currency rate against ‘‘, with all other variables held constant, on the consolidated statement of income (due to the fair value of the currency sensitive non-trading monetary assets and liabilities) and equity. A positive effect shows a potential increase in the consolidated statement of income or consolidated shareholders' equity, whereas a negative effect shows a potential net reduction in the consolidated statement of income or consolidated statement of changes in shareholders' equity.

(‘‘ in '000)

Currency Exposures As at 31 December 2025	Change in Currency Rate in %	Effect on Net Income	Effect on Equity
US Dollar	+/-2	18,966	18,966
Emirati Dirham	+/-2	7,118	7,118
Malaysian Ringgit	+/-5	72,662	72,662
Jordanian Dinar	+/-2	10,185	10,185
Kuwaiti Dinar	+/-5	27,348	27,348

(‘‘ in '000)

Currency Exposures As at 31 December 2024	Change in Currency Rate in %	Effect on Net Income	Effect on Equity
US Dollar	+/-2	12,301	12,301
Emirati Dirham	+/-2	4,560	4,560
Malaysian Ringgit	+/-5	65,430	65,430
Jordanian Dinar	+/-2	12,540	12,540
Kuwaiti Dinar	+/-5	26,229	26,229

**Currency position**

The Group manages exposure to the effects of fluctuations in prevailing foreign currency exchange rates on its financial position and cash flows. The Board of Directors sets limits on the level of exposure by currency and in total for both overnight and intra-day positions, which are monitored daily. At the end of the year, the Group had the following significant net exposures denominated in foreign currencies:

	2025 Long/(Short)	2024 Long/(Short)
US Dollar	948,297	615,055
Emirati Dirham	355,884	228,017
Malaysian Ringgit	1,453,245	1,308,594
Jordanian Dinar	506,264	627,013
Kuwaiti Dinar	546,970	524,585
Others	756,525	501,284
<b>Total</b>	<b>4,570,185</b>	<b>3,804,548</b>

**Financial risk management (Continued)****(3) Market risks (Continued)****(d) Price risk**

The Group has certain investments which are carried at fair value through the income statement (FVIS) and fair value through other comprehensive income (FVOCI). Price risk arises due to changes in these investments.

As these investments are in a limited number of funds and are not significant to the total investment portfolio, the Group monitors them periodically and determines the risk of holding them based on changes in market prices.

Other investments have little or no risks as these are bought for immediate sales. Investments are made only with a confirmed sale order, and therefore involve minimal risk.

- Equity price risk**

Equity risk refers to the risk of decrease in fair values of equities in the Group's non-trading investment portfolio as a result of reasonably possible changes in levels of equity indices and the value of individual stocks.

The effect on the Group's equity investments held as FVOCI due to reasonably possible changes in equity indices, with all other variables held constant, as at 31 December is as follows:

	2025		2024	
Local Market Indices	Change in Equity price %	Effect in ₩ Million	Change in Equity price %	Effect in ₩ Million
Equity investments	+ / - 10	131	+ / - 10	+ / - 178

**(e) Operational risk**

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, systems, and external events.

Operational risk is inherent in most of the Group's activities. This necessitates an integrated approach to the identification, measurement and monitoring of operational risk.

An Operational Risk Management Unit (ORMU) has been established within the Credit and Risk Management Group, which facilitates the management of Operational Risk within the Group. ORMU facilitates the management of Operational Risk by setting policies, developing systems, tools and methodologies, overseeing their implementation and use within the business units and providing ongoing monitoring and guidance across the Group.

The three primary operational risk management processes in the Group are Risk Control Self-Assessment, Operational Loss Database and eventual implementation of Key Risk Indicators which are designed to function in a mutually reinforcing manner.

32

## Dividends

The Board of Directors has decided on 09 September 2025, distribution of cash dividends to shareholders for the first half of 2025, amounting to ₩ 3,000 million, being ₩ 0.75 per share after deduction of Zakat. The Bank has obtained no-objection from the Saudi Central Bank on the Board of Directors' decision to distribute cash dividends to shareholders for the first half of 2025. These dividends were paid on 02 October 2025.

On 28 January 2025, the Bank's Board of Directors recommended a distribution of cash dividends to the shareholders for the second half of 2024, amounting to ₩ 5,840 million (₩ 1.46 per share) after deduction of Zakat. The proposed final dividends for the second half of the financial year 2024 was approved by the Annual General Assembly in its meeting held on 13 April 2025. These dividends were paid on 24 April 2025.

The Board of Directors has decided on 04 August 2024, distribution of cash dividends to shareholders for the first half of 2024, amounting to ₩ 5,000 million, being ₩ 1.25 per share after deduction of Zakat. The Bank has obtained no-objection from the Saudi Central Bank on the Board of Directors' decision to distribute cash dividends to shareholders for the first half of 2024. These dividends were paid on 26 August 2024.

The Board of Directors proposed on 24 January 2024, distribution of final dividends to shareholders for the second half of the financial year 2023, amounting to ₩ 4,600 million, being ₩ 1.15 per share after deduction of Zakat. The proposed final dividends for the second half of the financial year 2023 was approved by the Annual General Assembly in its meeting held on 24 March 2024. These dividends were paid on 3 April 2024.

Refer to Note 8-1a for performing financing.

## Fair values of financial assets and liabilities

### Determination of fair value and fair value hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments:

Level 1: quoted prices in active markets for the same instrument (i.e. without modification or additions).

Level 2: quoted prices in active markets for similar assets and liabilities or other valuation techniques for which all significant inputs are based on observable market data.

Level 3: valuation techniques for which any significant input is not based on observable market data.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction takes place either:

- In the accessible principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous accessible market for the asset or liability.

**Valuation technique and significant unobservable inputs**

The following table shows the valuation techniques used in measuring level 2 and Level 3 fair values at December 31, 2024 and 2023, as well as the significant unobservable inputs used:

Item	Technique applied	Significant unobservable inputs	Inter-relationship between significant unobservable inputs and fair value measurement
FVIS mutual funds investments categorized as Level 2.	Based on the latest reported net assets value (NAV) as at the date of statement of consolidated financial position.	None	Not applicable
FVIS mutual funds investments categorized as level 3.	Based on the latest reported net assets value (NAV) as at the date of statement of consolidated financial position.	None	Not applicable

## Fair values of financial assets and liabilities (Continued)

## Valuation technique and significant unobservable inputs(Continued)

Item	Technique applied	Significant unobservable inputs	Inter-relationship between significant unobservable inputs and fair value measurement
FVOCI Sukuk investments categorized as level 2.	<p>The Bank seeks an active market inputs including quoted prices for similar Sukuk bonds, yield curves, credit spreads, and benchmark profit rates. When direct price discovery is limited, valuation techniques such as discounted cash flow models are employed, incorporating market-based risk-free rates and issuer-specific credit spreads to approximate fair value.</p> <p>The use of Level 2 inputs enhances valuation reliability while acknowledging that Sukuk pricing may be influenced by factors such as market liquidity, trading frequency, and prevailing credit conditions.</p>	None	Not applicable
FVIS structured products investments categorized as level 2.	For structured investments with embedded optionality classified under Level 2 fair value measurement, valuation relies on observable active market inputs, including profit rate curves, credit spreads, and implied volatilities. Market-calibrated models, are used to estimate fair value, provided key inputs remain directly observable. Adjustments for liquidity, counterparty credit risk, and bid-ask spreads ensure valuations reflect prevailing market conditions while maintaining classification within Level 2.	None	Not applicable
Derivatives categorized as Level 2 are comprised of over the counter profit rate swaps, cross currency swaps, and forward foreign exchange contracts.	These instruments are fair valued using the Group's proprietary valuation models that are based on discounted cash flow techniques. The data inputs on these models are based on observable market parameters relevant to the markets in which they are traded and are sourced from widely used market data service providers.	None	Not applicable
Held at amortized cost Due from banks and other financial institutions categorized as level 3.	Based on cost-based spread techniques using yield curve and deal inputs.	Additional buffer is added to account for any potential model discrepancy or any stressed market conditions.	Valuation is not significantly sensitive to the unobservable inputs

**35 Fair values of financial assets and liabilities (Continued)**  
**Valuation technique and significant unobservable inputs(Continued)**

Item	Technique applied	Significant unobservable inputs	Inter-relationship between significant unobservable inputs and fair value measurement
Held at amortized cost Murabaha with Saudi Government and SAMA categorized as level 2.	Based on simple discounted cash flow techniques that use referenced observable inputs, such as profit rates and yield curves.	None	Not applicable
Held at amortized cost Sukuk categorized as level 2.	<p>The Bank seeks an active market inputs include quoted prices for similar Sukuk bonds, yield curves, credit spreads, and benchmark profit rates. When direct price discovery is limited, valuation techniques such as discounted cash flow models are employed, incorporating market-based risk-free rates and issuer-specific credit spreads to approximate fair value.</p> <p>The use of Level 2 inputs enhances valuation reliability while acknowledging that Sukuk pricing may be influenced by factors such as market liquidity, trading frequency, and prevailing credit conditions.</p>	None	Not applicable
Held at amortized cost Financing categorized as level 3.	<p>Discounted cash flow techniques that rely on referenced but unobservable inputs, including new business (discount) rates, portfolio rates, and assumptions about prepayment behavior.</p>	<p>New business (discount) rates, portfolio rates, and assumptions about prepayment behavior.</p>	<p>The relationship between inputs and fair value is <b>inverse or direct</b>, depending on the input:</p> <ul style="list-style-type: none"> <li><b>Discount Rates:</b> Higher new business rates than portfolio rates decrease the fair value of the financing book, as future cash flows are discounted more steeply. Conversely, lower discount rates increase fair value.</li> <li><b>Prepayment Rates:</b> Higher prepayment rates shorten the portfolio's duration, leading to earlier cash flow realization. If the portfolio rate exceeds the discount rate, prepayments reduce fair value as the lender loses higher-yielding cash flows. Conversely, if the discount rate exceeds the portfolio rate, prepayments increase fair value since the lender can reinvest at a higher yield.</li> </ul>

**Related party transactions**

In the ordinary course of business, the Group transacts business with related parties. The related party transactions are governed by limits set by the Banking Control Law and the regulations issued by SAMA. The nature and balances resulting from such transactions are at arm's length between the parties as at and for the year ended 31 December are as follows:

	2025	2024
<b>Related parties</b>		
<b>Members of the Board of Directors</b>		
Financing	831,514	1,068,912
Current accounts	526,878	849,089
<b>Companies and establishments guaranteed by members of the Board of Directors*</b>		
Financing	13,914,097	8,252,833
Contingent liabilities**	1,157,393	2,208,063
<b>Associate</b>		
Contributions payable	695,824	67,399
Receivable against claims	330,224	400,240
Bank balances	373,976	656,413

\*This is in addition to the requirements of IAS 24.

\*\*Off balance sheet items.

Income and expenses pertaining to transactions with related parties included in the consolidated financial statements for the years ended 31 December are as follows:

	2025	2024
Net income from financing and other financial assets	317,702	204,856
Employees' salaries and benefits (air tickets)	1,393	2,167
Rent and premises related expenses	1,106	1,106
Contribution – policies written	6,624,448	6,756,555
Claims incurred and notified during the year	2,423,512	946,779
Claims paid	2,547,883	1,070,214
Board of Directors' remunerations	14,668	6,115

The amounts of compensations recorded in favor of or paid to the Board of Directors and the executive management personnel during the years ended 31 December are as follows:

	2025	2024
Short-term benefits	211,191	176,488
Provision for employees' end of service benefits	2,782	4,709

The executive management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Group, directly or indirectly.

**Special commissions excluded from the consolidated statement of income**

The following represents the movements in charities account, which is included in other liabilities (see note 17) for the year ended 31 December:

	2025	2024
Balance at beginning of the year	15,954	1,891
Additions during the year	52,173	27,686
Payments made during the year	(35,067)	(13,623)
Balance at end of the year	33,060	15,954

38

## Investment management services

The Group offers investment services to its customers. The Group has established a number of Mudaraba funds in different investment aspects. These funds are managed by the Group's Investment Department, and a portion of the funds is also invested in participation with the Group. The Group also offers investment management services to its customers through its subsidiary, which include management of funds with total assets under management of ₩ 165,822 million (2024: ₩ 123,319 million). The mutual funds are not controlled by the Group and neither are under significant influence to be considered as associates / subsidiaries. Mutual funds' financial statements are not included in the consolidated financial statements of the Group. The Group's share of investments in these funds is included under investments. Funds invested by the Group in those investment funds amounted to ₩ 1,255 million at 31 December 2025 (2024: ₩ 1,020 million).

39

## Capital risk management

The Bank actively manages its capital base to cover the risks inherent in its business. The adequacy of the Bank's capital is monitored using, among other measures, the rules and ratios established by the Basel Committee on Banking Supervision including the framework and guidance regarding the implementation of capital reforms under Basel III ("Basel III Accord") which has been adopted by the Bank's regulator, SAMA. The Basel III capital ratios measure capital adequacy by comparing the Bank's eligible capital with its balance sheet assets, commitments and notional amount of derivatives at a weighted amount to reflect their relative risk.

The Group monitors the adequacy of its capital using ratios established by SAMA. These ratios measure capital adequacy by comparing the Group's eligible capital with its interim consolidated statement of financial position, commitments and contingencies to reflect their relative risks.

40

## Capital adequacy

In line with SAMA and the internationally agreed timeline set by the Basel Committee on Banking Supervision (BCBS), the global standard-setter for the prudential regulation of banks, the Group started reporting Capital-Adequacy Ratios (CAR) as per Basel III: Finalizing post-crisis reforms regulations issued by SAMA through its Circular Number 44047144 effectively from January 1, 2023.

The following table summarizes the Group's Pillar-I Risk Weighted Assets, Tier I and Tier II Capital and Capital Adequacy Ratios

	2025	2024
Credit risk weighted assets	612,542,463	553,953,774
Operational risk weighted assets	46,067,844	47,008,909
Market risk weighted assets	15,302,335	10,471,553
<b>Total Pillar I - risk weighted assets</b>	<b>673,912,642</b>	<b>611,434,236</b>
Tier I capital	138,057,620	117,948,293
Tier II capital	9,220,631	5,636,168
<b>Total tier I &amp; II capital</b>	<b>147,278,251</b>	<b>123,584,461</b>

### Capital Adequacy Ratio %

Tier I ratio	20.49%	19.29%
Tier I & II ratio	21.85%	20.21%

For the years ended 31 December 2025 and 2024 (‘000)

**41 Mudarabah and Wakala based profit sharing investment accounts**

**(a) Analysis of PSIA income according to types of investments and financing assets:**

PSIA Assets that have been allocated and managed by the Bank through Financing, Investments, Due from financial institutions and other liquid assets of the combined pools (including Bank's contributions if any).The balances of the combined pools at the year end are as follows:

	<b>2025</b>	<b>2024</b>
<b>Financing:</b>		
Murabha	<b>91,101,084</b>	81,094,984
Ijarah	-	5,677,908
<b>Investments:</b>		
Murabaha with Saudi Government and SAMA investments	-	15,022,361
Sukuk	<b>36,435,834</b>	-
Due from financial institutions and other liquid assets	<b>9,016,409</b>	29,500,784
<b>Total pools' assets a</b>	<b>136,553,327</b>	131,296,037

Investment account holder liabilities and Bank's own contributions position at year end are as follows:

	<b>2025</b>	<b>2024</b>
Mudarabah and Wakalah customers contributions	<b>136,553,327</b>	131,296,037
Bank's contribution in PSIA funds	-	-
<b>Total pool's contributions at year end</b>	<b>136,553,327</b>	131,296,037

**(b) The basis for calculating and allocating profits between IAHs and the Bank:**

Computation of combined pools' net income is as follows:

	<b>2025</b>	<b>2024</b>
PSIA pool net income from Financing	<b>5,534,242</b>	6,042,502
PSIA pool income from Investments	<b>1,213,350</b>	1,530,070
<b>Total PSIA pools' net income</b>	<b>6,747,592</b>	7,572,572

Allocated between IAHs and the Bank as follows:

	<b>2025</b>	<b>2024</b>
Mudarib fee	<b>2,792,051</b>	2,563,634
Movement (from) / to PER	<b>(60,473)</b>	5,760
Total amount paid to IAH Mudarabah	<b>4,016,014</b>	5,003,178
<b>PSIA total pools' net income allocated</b>	<b>6,747,592</b>	7,572,572

Financing and investment income is net of exposure.

The basis of allocating the profits between IAH and the Bank:

	<b>IAH Share</b>	<b>Bank Share</b>
Profit Sharing Allocation Percentages	<b>59%</b>	<b>41%</b>

**(c) The equity of the IAHs at the end of the reporting period:**

	<b>2025</b>	<b>2024</b>
Investment account holders balance before profit	<b>136,553,327</b>	131,296,037
Add: Profit for the IAH during the year	<b>4,016,014</b>	5,003,178
Less: Profit paid out during the year	<b>(3,235,778)</b>	(4,334,603)
<b>Net value of Investment Account Holders</b>	<b>137,333,563</b>	131,964,612

For the years ended 31 December 2025 and 2024 (‘‘000)

41

**Mudarabah and Wakala based profit sharing investment accounts (Continued)****(d) Basis for determining PER and changes that have occurred during the reporting year**

Profit equalization reserve (PER) is determined and created by the Bank through appropriating an amount out of the profits earned on the pools' assets.

PER allows the Bank to mitigate considerably its exposure to displaced commercial risk. While the purpose of this reserve is to enhance the profit payout to IAH and the Bank in periods when the assets have underperformed.

With regard to the PER, IAHs agree in advance in the contract that regulates their relationship with Bank, on the proportion of their income that may be appropriated to PER. This amount is determined by the management of the Bank at their discretion.

**(e) Displaced commercial risk**

Rate of return risk can give rise to displaced commercial risk. To mitigate displaced commercial risk, the Bank may decide to waive its portion of profits to increase the returns for the IAH.

**(f) Movement of PER**

	2025	2024
Beginning Balance	140,039	134,279
Addition	-	5,760
Transferred	(60,473)	-
Closing Balance	79,566	140,039

42

**Subsequent Events**

On 07 Jan 2026, the Group issued 5000 Perpetual Sukuk Certificates (Sukuk) of USD 1000 million, The Group has a call option which can be exercised as per the terms mentioned in the related offering circular. The expected profit distribution on the Sukuk has a profit rate of 6.15 %.

On 24 Rajab 1447 H (corresponding to 13th of January 2026), the bank's Board of Directors recommended to the Extraordinary General Assembly to increase the bank's capital from ₩40,000 million to ₩60,000 million by granting bonus shares (1 shares for every 2 shares owned). The paid-up capital increase of ₩ 20,000 million will be capitalized from retained earnings. The proposed grant is subject to obtaining necessary approvals from official authorities and Extraordinary General Assembly on the capital increase and number of granted shares.

On 26 Jan 2026, Al Rajhi Bank announced the BOD's recommendation to distribute cash dividends to the shareholders for the second half of 2025 amounting to ₩ 7,000 million (SAR 1.75 per share).

43

**Comparative Figures**

During the year, term financing and certificate of deposits have been reclassified from "Due to banks, Saudi Central Bank and other financial institutions" to "Debt securities issued and term financing", also some deposits have been reclassified from the same item to "Customers' deposits" in order to reflect the Group's funding profile, in addition to the mentioned reclassification, certain insignificant prior periods figures have been reclassified to conform to current period presentation. Below is the summary of the reclassifications:

31 December 2024	As previously reported	Reclassification	Post-reclassification
<b>Consolidated statement of financial position</b>			
Due to banks, Saudi Central Bank and other financial institutions (Note 14)	173,434,597	(55,757,219)	117,677,378
Customers' deposits (Note 15)	628,238,501	26,750,000	654,988,501
