Independent auditor's review report
To the shareholders of L'azurde Group for Jewelry and Its Subsidiaries
(A Saudi Joint Stock Group)
Riyadh, Saudi Arabia

Introduction

We have reviewed the accompanying interim condensed consolidated statement of financial position of **L'azurde Company for Jewelry and its Subsidiaries (a Saudi joint stock Company) (the "Group")** as at 30 September 2018 and the related interim condensed consolidated statement of profit or loss and interim condensed consolidated statement of other comprehensive income for the three-month and nine-month periods ended 30 September 2018 and the interim condensed consolidated statement of changes in equity and interim condensed consolidated statement of cash flows for the nine-months period then ended and the related notes (1) to (14) which form an integral part of these interim condensed consolidated financial information. Management is responsible for the preparation and presentation of this interim condensed consolidated financial information in accordance with International Accounting Standard (IAS) 34 'Interim Financial Reporting', as endorsed in the Kingdom of Saudi Arabia. Our responsibility is to express a conclusion on this interim condensed consolidated financial information based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, 'Review of Interim Financial Information Performed by the Independent Auditor of the Entity', as endorsed in the Kingdom of Saudi Arabia. A review of interim condensed financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed financial information is not prepared, in all material respects, in accordance with IAS 34 'Interim Financial Reporting' as endorsed in the Kingdom of Saudi Arabia.

2. BASIS OF PREPARATION

2.1 Statement of Compliance

These interim condensed consolidated financial statements have been prepared in accordance with International Accounting Standard 34 'Interim Financial Reporting' as endorsed in Kingdom of Saudi Arabia by Saudi Organization for Certified Public Accountants ("SOCPA") and other standards and pronouncements issued by SOCPA. The interim condensed financial statements should be read in conjunction with the Group's last annual audited consolidated financial statements as at and for the year ended 31 December 2017. They do not include all of the information required for a complete set of IFRS financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understand the changes in the Group's financial position and performance since the last annual financial statements.

This is the first set of interim condensed consolidated financial statements where IFRS 15 and IFRS 9 have been applied. Changes to significant accounting policies have been disclosed in note 4.

The interim condensed consolidated financial statements for the period ended 30 September 2018 were approved and authorized for issue by the Board of Directors on 29 October 2018.

2.2 Preparation of the Financial Statements

These interim condensed consolidated financial statements have been prepared under historical cost basis except for employees' end of service benefits provision which has been valued by an independent professional actuary and certain financial assets and financial liabilities which are measured at fair value. All the amounts are presented in Saudi Riyal (SAR), which is also the functional and presentational currency of the Parent Company and rounded off to the nearest Saudi Riyal, except for earnings per share.

2.3 Use of Estimates and Judgments

The preparation of interim condensed consolidated financial statements in accordance with IFRSs applicable in the Kingdom of Saudi Arabia requires the use of certain critical estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the reporting date and the reported amounts of revenues and expenses during the reporting period. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results.

(A SAUDI JOINT STOCK COMPANY)**

**NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
FOR THE NINE MONTHS PERIOD ENDED 30 SEPTEMBER 2018**

3. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies used in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended 31 December 2017, except for the adoption of new standards effective as of 1 January 2018 and new transactions carried out during the period. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

The nature and the effect of these changes are further disclosed in note 4. Although these amendments apply for the first time in 2018, but they do not have a material impact on the interim condensed consolidated financial statements of the Group. The changes in accounting policies are also expected to be reflected in the Group's consolidated financial statements as at and for the year ending 31 December 2018.

During the three months period ended 30 September 2018, the Group has entered into derivative financial instruments with a financial institution, in the form of forward commodity contracts, in order to mitigate the risk of increase in finance costs on short-term gold facilities, due to increase in gold prices. The forward contracts were settled during the period and there is no open exposure at the end of the period.

4. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRSs)

4.1 New Standards adopted as at 1 January 2018

The Group has initially adopted IFRS 15 'Revenue from Contracts with Customers' (see A) and IFRS 9 'Financial Instruments' (see B) from 1 January 2018. The Group has not early adopted any other standards, interpretations or amendments that have been issued but not yet effective.

(A) IFRS 15 Revenue from Contracts with Customers

The new standard establishes a five-step model to account for revenue arising from contracts with customers. Revenue is recognised to depict the transfer of promised goods or services to a customer in an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. Revenue is recognized when, or as, the customer obtains control of the goods or services. IFRS 15 supersedes IAS 11, Construction Contracts and IAS 18, Revenue as well as related interpretations.

The introduction of this standard does not have a material impact on the results of the Group due to the relatively straightforward contractual terms and conditions with customers. However, the existing accounting policy for revenue has been further elaborated as follows:

Revenue from Gold

Revenue from sale of gold refers to the value of gold weight sold to the wholesale customers. Revenue is recognised at the time of issuing invoices and delivering the quantities of jewelry stated in the invoices when the Group has performed its obligation as agreed in the contract, at the then price of gold in the international markets.

Revenue from Operations

Revenue from operations refers to the added value component of the jewelry piece namely labor service charge, value of additions, sales of diamond jewelry and other revenues generated through wholesale and retail channels.

Revenue from operations is recognised in accordance with the fair value of the consideration received or receivable at the time the performance obligation is satisfied. The performance obligation is performed when the promised goods are delivered to the customers. Revenue is reduced for applicable discounts relating to the items sold.

4.1 New Standards adopted as at 1 January 2018 (continued)

(B) IFRS 9 Financial Instruments

The new standard for financial instruments (IFRS 9) replaces IAS 39 'Financial Instruments: Recognition and Measurement'. It makes major changes to the previous guidance on the classification and measurement of financial assets and introduces an 'expected credit loss' model for the impairment of financial assets.

i) Classification and measurement of Financial Assets and Financial Liabilities

IFRS 9 largely retains the existing requirements in IAS 39 for the classification and measurement of financial liabilities. However, it eliminates the previous IAS 39 categories for financial assets of held to maturity, loans and receivables and available for sale.

The adoption of IFRS 9 does not have a significant effect on the Group's accounting policies related to financial assets and financial liabilities and the classification of financial assets. Under IFRS 9, on initial recognition, a financial asset is classified as measured at: amortised cost; FVOCI – debt investment; FVOCI – equity investment; or FVTPL. The classification of financial assets under IFRS 9 is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held in a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specific dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

A financial asset (unless it is a trade receivable without a significant financing component that is initially measured at the transaction price) is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition.

The following accounting policies apply to the subsequent measurement of financial assets.

- Financial assets at FVTPL: These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.
- Financial assets at amortised cost: These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment loss. Interest income, foreign exchange gains and losses and impairments are recognised in profit or loss. Any gains or losses on derecognition is recognised in profit or loss.

ii) Impairment of financial assets

The adoption of IFRS 9 has fundamentally changed the Group's accounting for impairment losses for financial assets carried at amortised cost by replacing IAS 39's incurred loss approach with a forward-looking expected credit loss (ECL) approach. The impairment methodology applied depends on whether there has been a significant increase in credit risk since initial recognition.

4. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRSs) (continued)

4.1 New Standards adopted as at 1 January 2018 (continued)

(B) IFRS 9 Financial Instruments (continued)

ii) Impairment of financial assets (continued)

For accounts receivable, the Group has applied the standard's simplified approach and has calculated ECLs based on lifetime expected credit losses. The Group has already a provision matrix in place that is based on the Group's historical credit loss experience and also includes the forward-looking factors specific to the accounts receivable and the economic environment under which the Group operates.

Credit-impaired financial assets

For all other financial assets, the Group applies the general approach to calculate impairment. Lifetime ECL is recognized when there has been a significant increase in credit risk since initial recognition and 12 month ECL is recognized when the credit risk on the financial instrument has not increased significantly since initial recognition.

Presentation of impairment

The Group recognizes an impairment loss or reversals in the interim condensed consolidated statement of profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss provision for credit losses.

Credit losses for accounts receivable are presented in the interim condensed consolidated statement of profit or loss under selling and marketing expenses.

iii) Transition

The Group has not taken any exemption in relation to first time adoption of IFRS 9 as the adoption of the new standard does not have a significant impact on the accounting policies relating to financial liabilities and financial assets and classification of financial assets. The assessments related to determination of business model within which a financial asset is held have been made on the basis of the facts and circumstances that existed at the date of initial application.

4.2 New Standards issued but not yet effective

Following are the new standards and amendments to standards which are effective for annual periods beginning on or after 1 January 2019 and earlier application is permitted. However, the Group has not yet early adopted them in preparing these condensed interim consolidated financial statements.

a) IFRS 16 Leases

IFRS 16 introduces a single, on-balance lease sheet accounting model for lessees. A lessee recognises a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. There are optional exemptions for short-term leases and leases of low value items. Lessor accounting remains similar to the current standard – i.e. lessors continue to classify leases as finance or operating leases.

The Group has completed an initial assessment of the potential impact on its Consolidated Financial Statements but has not yet completed its detailed assessment. Management anticipates that IFRS 16 will be adopted in the Group's consolidated financial statements for the annual year beginning 1 January 2019. The application of IFRS 16 may have a significant impact on amounts reported and disclosures made in the Group's financial statements. However, it is not practicable to provide a reasonable estimate of effects of the application of this standard until the Group performs a detailed review.

b) Annual Improvements to IFRSs 2015–2017 Cycle

IFRS 3 Business Combinations and IFRS 11 Joint Arrangements - clarifies how a company accounts for increasing its interest in a joint operation that meets the definition of a business.

- If a party maintains (or obtains) joint control, then the previously held interest is not remeasured.
- If a party obtains control, then the transaction is a business combination achieved in stages and the acquiring party remeasures the previously held interest at fair value.

IAS 12 Income Taxes - clarifies that all income tax consequences of dividends (including payments on financial instruments classified as equity) are recognised consistently with the transactions that generated the distributable profits – i.e. in profit or loss, other comprehensive income or equity.

IAS 23 Borrowing Costs - clarifies that the general borrowings pool used to calculate eligible borrowing costs excludes only borrowings that specifically finance qualifying assets that are still under development or construction. Borrowings that were intended to specifically finance qualifying assets that are now ready for their intended use or sale – or any non-qualifying assets – are included in that general pool. As the costs of retrospective application might outweigh the benefits, the changes are applied prospectively to borrowing costs incurred on or after the date an entity adopts the amendments.

c) IFRIC 23 Uncertainty over Income Tax Treatments – Seeks to bring clarity to the accounting for income tax treatments that have yet to be accepted by tax authorities. The key test is whether it's probable that the tax authority will accept the Group's chosen tax treatment.

d) Other Amendments

The following amendment to standards are not yet effective and neither expected to have a significant impact on the Group's Consolidated Financial Statements:

- Prepayment Features with Negative Compensation (Amendments to IFRS 9)
- Long-term Interests in Associates and Joint Ventures (Amendments to IAS 28)
- Plan Amendments, Curtailment or Settlement (Amendments to IAS 19)

9. ZAKAT AND INCOME TAXES

Zakat for the period

Zakat charge on the Group for the nine months period ended 30 September 2018 amounted to SAR 8,232,389 (2017: SAR 8,148,890).

Income taxes related to foreign subsidiaries for the period

Income tax charges on subsidiaries for the nine months period ended 30 September 2018 amounted to SAR 706,750 (2017: SAR 595,927).

Income tax pertains to ORO Egypt Company ("ORO") and L'azurde Company for Jewellery LLC ("LCJ Qatar") where tax has been accrued on their estimated taxable profit at 22.5% and 10% respectively.

Status of zakat assessments

The Company has filed the zakat returns and paid zakat for all the years up to 2017 and obtained respective zakat certificates. During March 2017, the Company received zakat assessments for the years 2005 to 2014 with additional zakat liability of approximately SAR 10.6 million. Under the Saudi Arabian Zakat regulations, the Company had the right to file an appeal against such assessments within 60 days from receiving the assessments and the Company has submitted an appeal against such assessments within the grace period. The management believes that current provision relating to zakat liability is adequate to cover any additional exposure that may arise as a result of these assessments.

Status of income tax assessments related to foreign subsidiaries

ORO, registered in Arab Republic of Egypt, was exempt from Corporate Income Tax until 31 December 2014 according to the Egyptian Law No. 8 of the year 1997. ORO received tax assessments and settled its tax liabilities on non-exempt activities till the year 2011. The company received the tax assessment for the years 2012 to 2014 which came in line with the provision previously made for these years. ORO paid all taxes due on its non-exempt activities to date.

LCJ Egypt, registered in Arab Republic of Egypt, is exempt from income tax on its commercial and manufacturing operations for a period of 10 years ending December 2018.

L'azurde Company for Jewellery LLC ("LCJ Qatar"), registered in the State of Qatar, filed its tax return for year 2017 and the tax assessments for the company have been finalized up to year ended 31 December 2015.

Lazurde Company for Jewelry LLC ("LCJ Dubai"), L'azurde Jewellery LLC ("LJ Abu Dhabi") and L'azurde Group for Gold and Jewellery DMCC ("L'azurde DMCC") registered in the United Arab Emirates, operate in a tax-free country, so no tax returns have been filed.

14. FINANCIAL INSTRUMENTS

Fair value measurements of financial instruments

Assets and liabilities measured at fair value in the interim condensed consolidated statement of financial position are grouped into three levels of fair value hierarchies. This grouping is determined based on the lowest level of significant inputs used in fair value measurement, as follows:

- **Level 1:** quoted prices (unadjusted) in active markets for identical assets or liabilities
- **Level 2:** inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- **Level 3:** inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following table shows the fair value of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.
