DAP (USD/Mt)

Ammonia (USD/Mt)

Aluminium (USD/Mt)

Gold (USD/oz)

- High **Phosphate** inventories across key markets and increased Chinese supply led to drop in prices until mid-Q3, then rebounded driven by improved demand fundamentals and lower supply.
- **Ammonia** supply tightness due to operational issues across the globe, along with marginal rise in ammoniated phosphate production in key countries led to price upside from mid-Q3.
- **Aluminium** market still impacted by weaker Chinese and global manufacturing activity, however prices supported into end of Q3 by lower LME inventories*
- **Gold** price remains bullish amid geopolitical uncertainty.
