## Disclaimer:

The Standard Deviation and Sharpe Ratio are calculated based on the formulas stated in CMA circular dated March 30, 2017 related to fund manager quarterly disclosures as per Article 71-h of the IFR.

Where x = unit price during the quarter  $\overline{x} = Average$  unit price during the quarter n = number of unit prices during the quarter

Sharpe Ratio formula is

$$SR = \frac{R - Rf}{8}$$

Where R = Actual return during the Quarter
Rf = average risk free return during the Quarter (Sibor 3 month)
s = standard deviation as calculate above
