# Scope of review

We conducted our review in accordance with the International Standard on Review Engagements 2410, 'Review of Interim Financial Information Performed by the Independent Auditor of the Entity' that is endorsed in the Kingdom of Saudi Arabia. A review of condensed consolidated interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia, and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Notes to the condensed consolidated interim financial statements (continued) For the nine-month period ended 30 September 2023

# 2. BASIS OF PREPARATION (CONTINUED)

# 2.2. Preparation of condensed consolidated interim financial statements

The condensed consolidated interim financial statements do not include all of the information and disclosures required in a full set of annual consolidated financial statements and should therefore be read in conjunction with the last annual consolidated financial statements for the year ended 31 December 2022 ("last annual consolidated financial statements"). However, selected explanatory notes are included to explain events and transactions that are significant to the understanding of the changes in the Group financial position and performance since the last annual consolidated financial statements. The interim results may not be an indicator of the annual results of the Group.

#### (i) Historical cost convention

These condensed consolidated interim financial statements have been prepared on a historical cost basis, except for:

- Derivative financial instruments and unquoted equity shares which are measured at fair value.
- Employees' end of service benefits are recognized at the present value of future obligations using the projected unit credit method.

# (ii) Functional and presentation currency

These condensed consolidated interim financial statements are presented in Saudi Riyal ("SAR"), which is the Company's functional and presentation currency. All amounts have been rounded to the nearest thousand, unless otherwise indicated.

#### 3. BASIS OF CONSOLIDATION

The Company and its subsidiaries are referred to collectively as the "Group". Subsidiaries are entities controlled by the Group. Specifically, the Group controls an investee if, and only if, the Group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee):
- Exposure, or rights, to variable returns from its involvement in the investee;
- The ability to use its power over the investee to affect its returns.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the period are included in these condensed consolidated interim financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the Parent Company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the condensed consolidated interim financial statements to bring the accounting policies of the subsidiaries in line with the Group accounting policies. All intra-group assets and liabilities, income and expenses and cash flows relating to transactions are eliminated in full on consolidation.

Non-controlling interests are measured at their proportionate share of the acquiree's identifiable net assets at the date of acquisition.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it:

- De-recognizes the assets and liabilities of the subsidiary;
- De-recognizes the carrying amount of any non-controlling interest;
- De-recognizes the cumulative translation differences, recorded in equity;
- Recognizes the fair value of the consideration received;
- Recognizes the fair value of any investment retained; and
- Recognizes any surplus or deficit in the condensed consolidated statement of profit or loss;

#### 4. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies used in the preparation of the condensed consolidated interim financial statements are consistent with those followed in preparing the Group's annual consolidated financial statements for the year ended 31 December 2022.

# 4.1. Significant accounting judgments, estimates and assumptions

The preparation of condensed consolidated interim financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the result of which form the basis of making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Therefore, actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

In the process of applying the Group's accounting policies, management has made the following estimates and judgments, which are significant to the condensed consolidated interim financial statements:

- Impairment assessment of vessels;
- Measurement of defined benefit obligations; key actuarial assumptions; and
- Measurement of ECL allowance for trade receivables and contract assets: key assumptions in determining the weighted average loss rate.

#### 4.2. New Standards, Amendment to Standards and Interpretations:

There are no new standards issued which are applicable on the Group, however, there are a number of amendments to standards which are effective from 1 January 2023 and are explained in the Group's annual consolidated financial statements for the year ended 31 December 2022, but they do not have a material effect on the Group's condensed consolidated interim financial statements.

# 5. OPERATING SEGMENTS

The Group has the following four strategic divisions, which are its reportable segments. These divisions offer different services and are managed separately because they have different economic characteristics – such as trends in sales growth, rates of return and level of capital investment – and have different marketing strategies.

a) The following schedule illustrates the Group's activities according to the operating segments for the period:

The Group's vessels are deployed throughout the world and are not concentrated in certain geographical areas. The Group's management does not consider the geographical distribution of the group's operations to be relevant for their internal management analysis and therefore no geographical segment information has been disclosed.

All operating segment results are reviewed regularly by the Group's management to make decisions about resources to be allocated to the segment and assess the performance of segments, for which discrete financial information is available.
