Saudi Ceramic

Capacity expansion plan to boost operation; Raise TP to 75/sh

Saudi Ceramic's announced today their plan of establishing a new factory for the production of porcelain tiles with a capacity of 8.25 million square meters annually. The project is expected to commence from Q4 2021 and will be completed by Q2 2023. The cost of the project would be around SAR249.3 mn and would be financed through a combination of internal accruals and fresh borrowings. Based on our estimates, the company is currently operating at near full capacity (current capacity 50-60mn mn sq.m depending on the size of the tiles) and we view the fresh capacity addition as a positive move. Given the higher return on incremental capital employed, stemming from increase in gross margins in recent years, we expect this investment to add significant value to shareholders. We expect ROCE to increase from 13.3% in 2021e to 22.7% in 2025e. We do not expect the company to face difficulty in financing the project. Overall, we expect the capacity expansion to have a positive impact on the financials of Saudi Ceramics and increase our target price from SAR69/sh to SAR75/sh and maintain our "Overweight" rating.

Key growth drivers:

- 1) New production facility for porcelain tiles to aid financial performance
- 2) Strong revenue visibility, at the back of growth in mortgages and our expectation of an improvement in execution of PIF backed giga projects
- 3) Government's local content norm to further strengthen Saudi Ceramic's market position
- 4) Improving pricing scenario, as the inventory of cheaper imported products fall, thus providing pricing power to Saudi Ceramics
- 5) Debt restructuring to lower finance cost and enhance profitability, aiding in an improvement in dividend pay-out

Valuation: We use a 50% DCF and 50% relative valuation using P/E of 18.5x to value Saudi Ceramic. Our DCF based target price (based on 9.9% WACC and terminal growth of 2%) is SAR84/sh and the relative valuation-based target price, based on 18.5x P/E, is SAR65/sh, resulting in a weighted average target price of SAR75/sh, which implies 22.7% upside from CMP of SAR61.10/sh.

Explanation of Al Rajhi Capital's rating system

Al Rajhi Capital uses a three-tier rating system based on absolute upside or downside potential for all stocks under its coverage except financial stocks and those few other companies not compliant with Islamic Shariah law:

"Overweight": Our target price is more than 10% above the current share price, and we expect the share price to reach the target on a 12 month time horizon.

"Neutral": We expect the share price to settle at a level between 10% below the current share price and 10% above the current share price on a 12 month time horizon.

"Underweight": Our target price is more than 10% below the current share price, and we expect the share price to reach the target on a 12 month time horizon.

"Target price": We estimate target value per share for every stock we cover. This is normally based on widely accepted methods appropriate to the stock or sector under consideration, e.g. DCF (discounted cash flow) or SoTP (sum of the parts) analysis.

Please note that the achievement of any price target may be impeded by general market and economic trends and other external factors, or if a company's profits or operating performance exceed or fall short of our expectations.
